VP Says He'll Thwart Porn Film Showing

'Debbie Does Dallas,' But Preston Says She Won't Do Stony Brook

By Raymond Fazzi

Fred Preston, vice president for Student Affairs, says he will today tell COCA Chairman Mike Barrett that he can't go through with the scheduled run of the porn flick "Debbie Does Dallas" in two weeks because the showing would "violate university policy."

Although he said the policy isn't a written one, Preston said the university administration has been going by a policy that pornography can't be shown unless it's for an "educational purpose." He couldn't say exactly when this policy was instituted.

Barrett was surprised to hear of Preston's intentions, saying that he had only been told last week by Gary Mis, special assistant to the vice president for Student Affairs, that Preston wanted to speak with him about the movie. Barrett said, "I can't really tell you what I'm going to do until I meet with Preston." But he added that he would fight a banning of the movie, possibly by going to the American Civil Liberties Union (ACLU).

Preston hasn't been the only one to voice opposition to the movie. Over the past few weeks the Womyn's Center has let Barrett know their objections to the movie, and had a meeting with him last Thursday which brought both parties close to a compromise. "We decided that we'd show our own movie concurrently with his," said Gina Maraio, director of the Womyn's Center. According to her, the center never requested that the movie not be shown but wanted the movie "This Is Not A Love Story," a movie which Maraio says reveals the "real, degrading side of pornography," to be shown at around the same time.

Maraio, who couldn't be reached since Preston's announcement, said that COCA and the Womyn's Center have been trying to work out security arrangements for the dual showing and find film distributors which stock the movie. The center has also been pushing for the additional showing of another anti-pornography movie through the circulation of a petition. "We gave up any notion of cancelling the movie and figured that showing both sides of the issue would be an educational thing for the campus."

But the question of what exactly is educational has yet to be decided. Preston said he hasn't spoken to anyone from the Womyn's Center and doesn't know the details of the compromise they have with COCA, but he said that two movies of contrasting views shown concurrently would not be considered educational. He said he has no clear-cut guidelines for what "educational purpose" actually entails, but he speculated that the involvement of faculty members in a "bona fide educational program" was the aim of the policy.

As an example of such a program, Preston pointed to last year's showing of "Deep Throat," also a pornographic movie. Hundreds of people flocked to the Lecture Center last year to see that movie, which was part of a program that included a debate the next day between Harry Reems, a star of the movie, and Deloris Alexander, former head of Women Against Pornography. This isn't the first time a university vice president

Students crowd the Lecture Center during a showing of "Deep Throat" in 1982. Fred Preston (inset) says a scheduled run of "Debbie Does Dallas," also an X-rated movie, will not be allowed because it is not part of an educational program, as was "Deep Throat."

has banned "Debbie Does Dallas" from Stony Brook. In November, 1980, a showing of the movie was cancelled by Elizabeth Wadsworth, Preston's predecessor as vice president for Student Affairs. Wadsworth said at the time that her reason for banning the film was due to "a significant number of people in the building (who) considered the film offensive and threatening." She also said that the decision was not meant to be precedent setting.

Barrett said he did expect some people to object to a pornographic movie on the COCA calendar, but that he chose to run one because of a heavy demand. "I think people on campus would go to a porn movie to laugh at their sexual hang-ups," he said. "It's all a matter of taste."

Members of the Womyn's Center, although calling their relations with COCA "friendly," stressed that

their compromise wasn't an acceptance of pornography. "The whole pornography industry is degrading to women," said Dawn McDaid. "And one of the most upsetting things about it is that some people take the sexual roles of women in these movies for granted — even some women."

Some of the petitions being distributed by the Womyn's Center have been brought to classes. Professor Judith Wishnia said she allowed petitions to be distributed in her "Women in American History" class. "The students gave it out, made an announcement and everyone was left to make their own decision," said Wishnia, adding that she personally feels that the movie shouldn't be shown at all. "It's harmful and shouldn't be shown in an institute of education. Pornography makes people become insensitive towards relationships."

USSR Chief Seat Vacant, Council Decision Pending

Moscow—The Communist Party Central Committee is expected to convene a plenum today that could name a new party chief to succeed Yuri Andropov, whose body lay in state yesterday near the Kremlin as Soviets lined up for miles in 10-degree weather to pay respects.

There was no announcement by last night who the new general secretary would be. Attention focused on Konstantin Chernenko, 72, the Politburo member with the most visible role during the period of mourning, as well as some of the younger members of the ruling body. These included Grigori Romanov, 61, head of the party disciplinary body, and Mikhail Gorbachev, 52, a technocrat whose power is said to have increased significantly under Andropov.

Soviet TV did not say when the plenum would sit.

Andropov is to be buried tomorrow, with dozens of foreign leaders attending, and, as it has been before, it seemed

unlikely the party would delay proclaiming a new leader until after the funeral.

There were unconfirmed reports among Western correspondents in the Soviet capital that the plenum would be convened this morning in time for the expected afternoon arrival of most foreign dignitaries. Japan's Kyodo News Service quoted the Soviet ambassador to Japan, Vladimir Pavlov, as saying the meeting would be today.

Andropov, who had severe kidney disease and diabetes, died Thursday at 69, and his death was announced Friday. Mourners by the thousands lined up to pay their respects at Andropov's casket for a second day in the red- and black-draped Soviet House of Unions.

Tens of thousands of citizens were expected to view the body, in an open coffin atop a bier of flowers and medals, by today's funeral. Andropov's wife, Tatyana, his diplomat son, Igor, and daughter, Irina, returned for a second day to sit by the bier.

Lebanon: Fighting Eases As Syria Threatens U.S.

Beirut, Lebanon—Syria yesterday warned against more U.S. bombardment of territory it controls in Lebanon. Fighting around the capital eased and medicine and food were trucked into west Beirut.

Lebanese army troops and Moslem militias traded sporadic fire across the "green line" dividing Moslem west Beirut from Christian east Beirut. Police said one army soldier was killed and nine civilians were wounded - by far the lowest single-day casualty toll in the 11-day-old civil war flareup that has claimed more than 450 lives. The state radio said U.S. Navy jets staged several reconnaissance runs over Beirut and the hills overlooking the U.S. Marine base at Beirut's airport. They drew no ground fire.

State Minister for Foreign Affairs Farouk al-Sharaa sounded Syria's warning at a news conference in Damascus, the Syrian capital, saying, "Syria has been exercising self-

restraint toward shelling attacks by the U.S. 6th fleet, particularly the battleship New Jersey. This cannot go on forever, and our self restraint has limits." He would not specify how Syria would retaliate, and denied reports of Syrian military casualties from the bombardments last week.

On Wednesday and Thursday the New Jersey and two destroyers engaged in massive shelling of Druse gun positions in the Syrian-controlled central mountains. U.S. officials blamed mountain gunners for the shelling of Beirut's Christian sector and the area around U.S. Ambassador Reginald Bartholomew's residence.

Al-Sharaa said talks between the United States and Syria, the biggest Soviet ally in the region, "is still on, but without progress." He also said the Syrian government was "talking" with the administration of Lebanese President Amin Gemayel and denied it was supporting efforts to force Gemayel from office.

Chinese Agents Nabbed In Smuggling U.S. Tech

New York—Five people, including three Chinese-born U.S. citizens, have been arrested for allegedly trying to ship equipment that could be used in missile guidance to the People's Republic of China, U.S. Customs officials announced yesterday.

Saturday's arrests came after a three-month "sting" in which an undercover agent posing as a technology broker met with the five, four men and a woman, on several occasions, said Arthur Stiffel, U.S. Customs special agent in charge for New Jersey.

But before the ring was infiltrated, authorities believe it successfully shipped to China about \$1 million worth of "computer chip devices" that can have military uses, according to Stiffel. He would not elaborate on possible uses of the equipment that reached China, citing security reasons. He said he had no indication any of the five were Chinese government agents, "but that aspect will be investigated."

The investigation was the first involving China, said Patrick O'Brien, an assistant Customs commissioner in New York.

Polity Outraged at Dorm Cooking Segregation Plan

By Raymond Fazzi

Angry. Unanimous. Amazing. These are just a few of the words Polity officials are using to describe student reaction to the recent announcement that cooking will be prohibited in some dormitories next year. Some are calling it the most intense reaction to an issue they've ever seen from the student body.

"I've been with Polity for three years and I've never seen anything like it," said Polity Secretary Belina Anderson. "People are actually calling us and asking when we're going to do something—I've never sensed such an urgency among students."

The issue arose from a letter University President John Marburger sent to Fred Preston, vice president for Student Affairs, which asked Preston to reduce the size of the dorm cooking program. Dated Jan. 27, and released at a University Senate meeting last Monday, it said, "...I am asking you [Preston] now to work with Vice Presidents [Robert] Francis and [Carl] Hanes...to design a program that reduces dormitory cooking to a manageable level as rapidly as possible...the objective of this program should be to identify entire dormitory buildings from which dorm cooking would be excluded..."

Preston has said that the number of dormitories designated cooking-free would probably have to be the

equivalent of two quads.

Most students didn't hear of the announcement until two days after the Senate meeting, when it appeared in *Statesman*. But, according to Polity officials, once the news was out reaction was swift, with phone calls coming into Polity at an unusually high rate and some students seeking ways to voice their outrage through other means.

In one case, two students from Kelly E collected 153 signatures last Wednesday on a petition asking that the building not be one of those designated cooking-free. "We got a positive response from everyone," said Tom Padilla, one of the petitioners. "We asked 153 people to sign and we got 153 signatures—nobody refused and everyone did it eagerly, knowing what was going on."

"People here are afraid of being split," said Ira Leifer, who initiated the petitioning with Padilla. "And I'm convinced that the aim of the administration in doing this is to abolish dorm cooking totally."

When told of this fear, Preston said, "That'll never happen as long as I'm here. The dorm cooking program will always exist as an option."

The residents of Hendrix College also took action. Last Wednesday they unanimously passed a resolution denouncing the new policy. "...the right of the student

to decide the way in which he or she wished to live is the right of the individual to freedom," read a passage from the resolution.

Students interviewed indicated that among their worst fears is possibly having to choose between leaving friends or going back on the meal-plan. Junior Anita Lismanis said she would choose to move out of Kelly E rather than go back to a plan she found unacceptable as a freshman. "They'll be breaking up friendships," she said. "And people have also invested money in their rooms thinking they're going to stay in them for a few years."

Paul Rizzo, legislature chairman of Kelly A, said he thinks the new policy will make conditions worse. "It'll force more people to bring appliances into their rooms illegally," he said. "It's the only thing you can do sometimes—what are you supposed to do when you want to eat late at night? DAKA doesn't have any places open." Rizzo said he intends to circulate a petition around his building.

Preston said he isn't surprised by student reaction thus far, and added that he hopes students will be more receptive to the plan when they "gain some clarity on why it's being done."

University Police to Use Radar

By Andrea Rosenberg

Beginning this week, the Department of Public Safety will be using radar equipment on campus to enforce speed limits, according to Public Safety Spokesman Doug Little.

"We will be actively out there enforcing the speed limits on the Stony Brook roadways," Little said.

Public Safety Director Gary Barnes ordered the use of radar equipment in an effort to decrease the number of accidents on campus and to increase personal safety, according to Little. "Our concern here is for...decreasing the chances of accident," he said.

In the nine month period from April 1 to Dec. 31, 95 motor vehicle accidents were reported on campus, 14 of which involved personal injury. Although the campus accident rate is low compared to that of Suffolk County, "one accident is one too many," said Little. "A defense against having an accident is going the speed limit," he said.

About eight University Police officers are trained to use the radar equipment. The equipment will be mounted in a Public Safety vehicle and set at a speed somewhat above the speed limit. A car exceeding the set speed will cause a light on the device to blink. The equip-

ment can also measure the exact speed of a vehicle, Little said.

Little said that as well as the use of radar to decrease the number of accidents and injuries on campus, Public Safety will be using the recently purchased breathalyzer in cases where intoxication is suspected. About 10 University Police officers are trained in use of the breathalyzer, which measures the amount of alcohol in a person's bloodstream. "We want to basically get the drunk driver off the road," said Little.

Voter Drive Begins Aimed at Student Issues

By Rex Dunphy

Student leaders are trying to register one million new student voters nation-wide as part of a campaign targeted at the upcoming presidential elections. Leaders locally are also coordinating efforts to gain voting rights on campus for students.

Student leaders of groups such as the Public Interest Research Groups (PIRGs) and the United States Student Association, a coalition of student governments across the country, are attempting to register and educate students about issues in the November elections. "For the national voter registration drive, in my mind, we're not supporting a particular candidate, but it is targeted at the November elections," said Troy Oechner, a spokesman for the Student Association of the State University (SASU), which is working on the drive.

Although they stress non-partisanship in the drive, student leaders admit that certain issues are stressed in the campaign. "As a broad generalization, the issues are for funding more social programs as

opposed to industrial profits or corporate needs," Oechner said. He said, "Those types of things would include better day care centers at the schools, financial aid and [defeating] the Solomon Amendment," the last of which links financial aid to draft registration.

Voting rights for students on campus is one issue local student leaders hope to turn into a reality. Polity, the undergraduate student government here, is willing to resort to legal action to allow students to exercise their voting rights on campus. Polity President David Gamberg said. The voting rights would allow students to vote in local elections if they declare the campus as their place of residence. Currently, they can vote via absentee ballots in their home elections.

Polity, NYPIRG and SASU are encouraging students to register locally. If their registrations are denied, they urge students to contact them and they will possibly take the issue to court. In a prepared release, the groups state: "Together with SUSB students, we will challenge any registration rejections in order to secure our

right to vote in our college community. If you are willing, you may be asked to testify or, in some other way, to help our lawyers win the case."

Similar cases have come up in other State University schools. Last fall, the students at SUNY Purchase were granted campus voting rights. SUNY Oneonta has obtained a preliminary injunction that gives them voting rights, Oechner said. The final decision is to be handed down in two to three weeks, he said.

Gamberg encourages students to vote in all elections to respond to state and federal government actions that are making life difficult for students, such as cutbacks in financial aid. Gamberg said both governments are "adversely making laws to hurt the student." If students vote in large numbers, then it will "put teeth into the letter writing campaigns that are staged," Gamberg said. Gamberg said that the wishes of students are often ignored by elected officials because of a low turn out of students in elections.

In a prepared release, Gamberg addressed the potential of

students on campus to decide elections in the community. "In Stony Brook's election district in 1982, the state Senatorial race was won by just 6800 votes and, similarly, the state Assem-

bly race was won by only 5500 votes. Some 17,000 students attend Stony Brook. Given these statistics, it's clear that students can have an impact."

Cuomo Wants Aid For Part-Time Students

Albany, N.Y. (AP)—Part-time students would get \$11 million in grants and the state would create a new program of low-interest student loans if two bills proposed Saturday by Gov. Mario Cuomo become law.

The first bill would allow state residents who are part-time students, defined as those taking six to 12 credit hours a semester, to get state aid if they also received federal aid under the Pell grant program.

By using the Pell grant program as a guideline, the state can ensure that the money it hands out goes to low and lower-middle income students and can minimize administrative costs, the governor said. "Part-time students are people who often work most of the day and go to school at night or on

weekends," the governor said. "They face difficulties ordinary students do not, and they deserve our help."

Cuomo said the new state student loan program was designed to help student pay for college costs not covered by federal loan programs. The loan program would be financed by tax-exempt bonds that would allow the loans to carry interest rates one to two points below conventional loans.

The legislation places no limit on the amount of bonds that could be issued.

Other states that have created programs using tax-exempt bonds for supplemental student loans include Massachusetts, Connecticut, New Hampshire and Illinois, Cuomo said.

Free Dental Exams Given on Campus

By Gloria Stock

Free dental screenings were held this week in Tabler Quad by students from the university's Dental School initiating a new program they call "The Student to Student Dental Outreach Program."

"It's never been done before. It's important," said Jonathan Garlick, a third year dental student and coordinator of the program. "We are going campus-wide and will visit every quad over the next few weeks," he said. "And then we hope to return every year as a follow-up."

The dental students were examining the teeth and gums of others to make their fellow students aware of their service and to provide them with information on how to take proper care of their teeth. Slides about gum disease and how to prevent it are also shown.

Forty students per night took advantage of the check-ups last Wednesday and Thursday in Tabler Quad. The group of about eight volunteers set up two chairs with professional equipment. The students examine the other students and present each with an evaluation on the state of their mouth, teeth, and gums. Each student is then given recommendations for future dental care. They caution, however, that without x-rays, the diagnose is not definitive.

Some of the 40 students present one night last week explained their presence as they were just passing by, or they had not been to the dentist recently.

The service will resume this Wednesday and Thursday in Dreiser and the Toscanini Colleges.

Police to Use Radar

(continued from page 3)

Little said that the Department of Public Safety wants to warn motorists about the use of radar. Officers will use discretion as to whether to issue a warning or a summons to a motorist found to be exceeding the speed limit, he said.

Senior Lance Wiener said that the use of radar equipment is a good idea. "I agree," he said. "People will be more careful. I'm for safety." Wiener said that he has often witnessed the speed limit violated on campus. "Right by the Tabler steps they go 40 or 50 miles an hours," he said.

"I don't see the need for it, [radar equipment], said Rajesh Shah, a senior. "If someone is going fast you can see it," he said. "I have no faith in the equipment," he added. Shah questioned the campus speed limits, which do not exceed 30 miles per hour, and are as low as 15 miles per hour in some areas of campus. "I think 15 miles an hour down Loop Road is kind of ridiculous," he said.

Little said that the use of radar and the breathalyzer should not negatively effect Public Safety's image. "If people give us a bad image for wanting to take preventive measures, then I guess we'll have to have a bad image," he said. "We have an obligation to this community," he said. "What would the image be if an accident did occur and we hadn't done anything because of our image?"

A Computer Makes Choosing a Career Fun

By Deena Berezow

The Career Development Office of the Student Affairs Division of Career and Developmental Services has recently added a new service that not only makes career searching simpler and much faster, but interesting and fun, as well.

The newest addition to the office is an intricate computer system called DISCOVER. DISCOVER enables one to explore a wide assortment of subjects relating to possible careers.

The way it works is by narrowing down occupational choices through exploration of such subjects as per-

sonal values, interests, and job characteristics. DISCOVER is easy to use and lists 425 job titles, selected because 95 percent of the working population holds these positions. If DISCOVER does not contain the occupation desired, it is still extremely helpful in identifying career goals and interests.

DISCOVER basically has four parts. Director James Keene describes the computer as "a big tree with different branches, any of which you can explore." The first part, "Learning About Yourself," supplies insight into such items as personal interests, abilities, and work related values. Each module sup-

plies a list of related careers after the completion of an exercise. The second module, "Searching for Occupations," suggests lists of occupations based on desired job characteristics, scores received on inventories, aptitude tests, and even college majors or planned study programs. The third part is called "Learning About Occupations." It has two main sections. The World of Work Map allows one to use the "browse mode," which identifies and briefly describes categories or specific careers by such characteristics as what is wanted from the job or personal priorities. The "detail mode" provides more complex information about careers by allowing up to 14 specific questions to be asked about a particular job. The last section, "Searching for Schools," provides a wide selection of descriptions of colleges and graduate schools based on majors or interests.

The system also provides a "User Guide" which contains a full list of all the jobs and schools in the computer with matched computer codes. These codes can be punched into DISCOVER to obtain specific information on a particular occupation or college.

As multi-faceted as the DISCOVER system is, however, it does not provide all the answers for a carer or school choice. Rather it "provides a framework for the career decision making process," explained Keene. The best process, according to Keene, is to start with self knowledge, look at descriptions, and compose a list of selected occupations. After this, it is a good idea to meet with one of the office's career counselors. The career office then can provide many other services related to career choices such as: workshops, an extensive resource library, a credentials service, and internships to name a few.

An Advocate for Grads Picked

By Jim Passano

Ted DeWitt, a graduate student in ecology and evolution has been appointed to the position of graduate advocate to aide graduate students in areas ranging from finding housing to teaching classes.

DeWitt was chosen for the year rotating position by the vice provost for Graduate Studies and the Graduate Student Organization (GSO).

Ted Dewitt

The first major project undertaken by the new advocate dealt with finding housing for foreign students.

The graduate advocate position was designed so that there would be someone on an official capacity to concern themselves with the welfare of the graduate students, according to DeWitt. "I see myself as someone who sticks up for the grads," he said. Outside of the GSO, there seems to be no one who takes an interest in the graduate students,

"A lot of these people were arriving here with no place to stay. Fortunately, every new student had at least temporary housing by the time they arrived," DeWitt said.

DeWitt has also been preparing three handbooks for use by 80 graduate students, which will be distributed in September. According to DeWitt the first is a survival manual. "This book outlines the various reserach facilities both on campus and the nearby community." Another is a guide for teaching assistants, graduate assistants, and research assistants. This is a manual which recommends ways to prepare for and how to teach classes. In addition, it outlines the responsibilities of the different positions. The last is a handbook on the policies and procedures of the graduate school and the university's administration.

In the future DeWitt hopes to continue to improve graduate student welfare. Also he hopes to get the university to show more concern for the graduate students. And most importantly DeWitt wants "to be available to all the students for any type of problem," by having office hours and keeping a list of phone numbers where he can be reached in the graduate school office.

Let's Face It

Question: President Marburger wants meal plan subscribers and dorm cooking students to live in separate buildings starting next semester. Is this a good idea?

By Howard Breuer

Michael Cannavale, Senior, Psychology major, Kelly B resident: It's a bad idea because it limits the students' freedom and forces them onto the meal plan, which is more expensive; meal plan food is not as good as your own.

Gary Halada, Junior, Physics major, Hendrix College: Of course not! This would be just another restriction of students' freedom of choice. It won't happen behind a cloud of student apathy. It is one of the students' most highly regarded options and they will fight for it.

Vanessa Seidman, Junior, Sociology/Philosophy major, Whitman College: No, because to break people up--especially friends-- for food makes no sense.

David Hymowitz, Junior, Psychology major, Whitman College: It will cut down on some bills and problems (like roach problems) but this sort of move has to be phased in slowly. People deserve the right to decide whether they want to cook.

Scott Helfand, Junior, History major, Irving College: It's a bad idea, and it will never stick because it restricts students' social lives and the right to live where they want.

Dan Gonzalez, Senior, History major, Sanger College: It is a good idea, but next semester is too soon. It shouldn't be implemented for a couple of years so people can adjust.

Paula Sherman, Junior, General major, Douglass College: It puts people in a position where they can't easily change their minds. They might get stuck on the meal plan--a fate worse than death!

Philip Garfield, Junior, Liberal Arts major, St. James resident: No because the water pressure will drop significantly in a quad-wide Daka-attack.

Denise Bernholz, Junior, AMS major, Dreiser College: If two people want to live together and only one wants to be on the meal plan they shouldn't be split.

Stuck in the Mud

A Public Safety car got stuck in the mud while driving through the recently refurbished lawn behind Irving College in G Quad at around 2:30 yesterday afternoon.

The officers were driving past the building when they spotted two students unloading a van. According to the students, Avi Mosden and Dave Wolman, they were moving their belongings from Stage XII into their new room on Irving A-3. The officers drove up the paved path on the side of the lawn and asked the students what they were doing. The students said they were moving their stuff into the building, and asked if it was alright to have the van temporarily parked by it. The officers said it was alright, and then drove across the lawn and into the mud.

A crowd of Irving residents gathered by their windows and outside the building to watch four Public Safety officers push their car out of the mud—a task which took over half an hour.

None of the students offered to help.

The university spent approximately \$8,000 last year to fix up the Irving grounds and set up natural barriers to deter people from driving across them.

It was good for a laugh," said Ed Paulsen, an onlooker from Irving. "It made some fun out of my Sunday afternoon."

Cooking Plan Upsets Polity

(continued from page 3)

prise with some officials saying they didn't hear of the decision until they read it in the paper. Polity President David Gamberg said he had heard of the idea before but was not given notice of Marburger's decision to implement it.

"This is a very hot issue which is going to have to take precedent over everything else," Gamberg said at a Polity Council meeting Thursday. "We're obviously going to have to develop an alternative plan."

A Polity committee will meet tonight to decide what type of action Polity will take said Anderson, who's heading the committee. Among the ideas being considered, she said, are demonstrations, sit-ins and the drafting of an alternative plan. Polity's official stand on the new policy will also be drawn up by the committee, a stand which she said will be "strongly opposed."

Although members of the Council haven't agreed on a strategy, Polity has decided to utilize dormitory legislature chairmen, an arm of polity rarely used in the past. "We've ignored them in the past, but this is a good opportunity for us to get together," said Freshman Representative Neal Drobenare. "This is an issue that's going to require a groundswell of action. They'll [the chairmen] be involved with each of their buildings, getting their residents together on this."

However, a petition Polity is circulating among legislature chairmen brought mixed reactions among council members. "Petitions are meaningless," said Vice President Barry Ritholtz. "We need something more. I've never sensed something so strong around here—students feel they're being mistreated." He also argued that serious negotiations would be undertaken with administration for the development of an alternative plan, such as fast food establishments on campus to draw people away from dorm cooking.

Gamberg said Marburger's personal announcement of the new policy will work to the advantage of Polity. "This is the first time he's come out in the face of students," he said. "In the past he's used his vice presidents to do his dirty work.

Now students can see him for what he is."

Meanwhile, the Graduate Student Organization (GSO) says this is not their issue. "The number of graduate students who may be affected by this is very small," said GSA President David Hill. He pointed out that the only graduate students on the dorm cooking plan are living in Stage XII, and that they represent a small percentage of the roughly 1,600 graduate students on campus.

"We'll go along with whatever Polity does in principle," Hill said, adding that the GSO won't release an official position regarding the issue unless one of its members requests one.

Preston to Form Committee

The committee assigned with studying the ways Marburger's proposal can be carried out will be formed sometime this week and will include at least one Polity representative, Preston said. But he said he could think of no way to carry out the plan without barring cooking from the equivalent of two quads.

"I haven't heard of any alternative plans from them [Polity] that would do the job," he said. He also pointed out that an alternative plan would not only have to reduce the number of people on the dorm cooking program but also ease the physical deterioration the cooking places on the dorms.

"I think it's important to remember that the committee will also be looking into ways to enhance all aspects of residence life," Preston said. "We just don't want to take dorm cooking away without replacing it with something else." Alternative to dorm cooking, he said, would include a declining credit system, where students would draw from a food service account to select from a variety of food establishments, rather than one cafeteria. In fact, he said that it's a "strong possibility" this system will be instituted next year, administered by either DAKA or another food service.

At least two public forums will be held this semester to discuss the issue, according to Preston.

Cooking Choices Should Be Preserved

Three years ago, University President John Marburger decided that allowing students to cook all their meals for themselves in the dorms was, all factors weighed, a bad thing. Dormitories were not designed with the electrical and maintenance requirements for dorm cooking in mind. Electrical systems are unsafely overtaxed by the power requirements of portable ovens, refrigerators and hot plates. Maintenance crews are burdened with a need to clean up after students' meals, and what they leave makes a home for roaches and other vermin.

So, the administration embarked on a two-pronged assault on dormitory cooking. It replaced the unpopular Lackmann food service with the Dining and Kitchen Administration (DAKA), and tried to make the meal plan a more attractive alternative for students. It also tried to make dorm cooking unattractive by hiking the dorm cooking fee, in increments, to its present level of \$65 annually for suite residents, and \$100 for hall residents, with a promised 37 percent hike for the upcoming fall semester.

But these tactics have, until now, failed to attract the 3,500 students to the meal plan—about 50 percent of the resident campus population—that Marburger hoped would be attracted. DAKA is still serving institutional food, and paying an extra hundred bills to cook for yourself seems like small change after shelling out about \$3,000 for the privilege of attending school and living at the "Berkeley of the East." Meanwhile, pressure from outside power groups continues to mount to abolish the dorm cooking program.

And so, what had until now been mere border skirmishes against the dorm cooking program has erupted into a full-scale declaration of war, with the unveiling of a proposed new policy: one which is unfair, impractical and potentially dangerous.

The Marburger plan calls for the segregation of the halls by cooking option. According to informal projections by Student Affairs Vice-president Fred Preston, one or two of the four undergraduate quads would be closed to students who opt for dorm cooking. This will separate roommates-by-choice if one wishes to be on the cooking plan and the other wants the meal plan. The system is weighted in favor of the meal plan because students who opt for dorm cooking will not be given preferential assignment into the "cooking dorms." These two elements of discrimination against dorm cooking makes the Marburger plan unfair.

The Marburger plan is scheduled for implementation in September. Chris Fairhall, president of the Faculty Student Association (FSA), which runs the campus meal plan by contracting it out to DAKA, said the meal plan cannot yet accommodate the 3,500 students Marburger wants to see enrolled in it. The university, cognizant of this, wants to encourage other food business to come to campus—fast food franchises, ethnic food stands, and the like—but the chances of their coming here by September are slim. Logic dictates that the facilities to accommodate an influx of students to the meal plan be in place *before* that influx starts. If things go as currently scheduled, the Marburger plan would result in lower quality food for all. This makes the Marburger plan impractical.

What makes the plan unsafe is that the buildings designated as cooking dorms will face increases in the problems which plague dorm cooking now: the overburden placed on electrical systems, building maintenance, and custodial crews. This could result in unclean building conditions, or even an electrical fire that could end with lost lives.

We freely admit that dorm cooking is a mixed blessing. Dorms were not meant to be cooked in. But the Marburger plan of segregation takes a bad

situation and makes it far worse. By forcing students to choose their roommates and rooms based on how they eat, by forcing them onto a meal plan that cannot accommodate them, and by further overburdening the infrastructures of the buildings that will be designated as cooking dorms, the proposed Marburger plan makes a bad situation dismal. Marburger's solution is worse than no solution at all.

Unfortunately, segregating dorms into cooking and meal plan is probably the only alternative to the total abolition of dorm cooking. But, the Marburger plan causes more problems than it solves. We propose two modifications to it that make it a good compromise between the present *laissez-faire* system and the elimination of dorm cooking entirely:

●Forego implementation of the Marburger plan until the campus is ready for it. This involves rewiring the cooking dorms to be able to meet the heightened energy requirements, and upgrading the food service options available to resident students. This should be done before the first student is told to choose between living where he wants and

eating how he wants.

●When the Marburger plan is implemented, it should be done on a rolling basis. Continuing students should not be affected by the changed policy toward dorm cooking at all. It is unfair for students who have already put down roots in their dormitories to be faced with the choice of tearing out those roots or giving up cooking for themselves. Incoming freshmen and transfer students should be the only ones subjected to the Marburger plan. It should be implemented by attrition, not forced on students already used to things the way they are as a change of rules in the middle of the game.

The Marburger plan, with these two modifications, will be the fairest compromise in the dorm cooking controversy. It would be nice for students if every room and suite on campus came equipped with a full kitchen, and the wiring and custodial staff to support it, but they don't. It would be nice for administrators if no student ever had a chance to grow used to cooking meals in his dorm, but the students are used to it. Dorm cooking at Stony Brook is a tradition that must be preserved—but so must the buildings!

Before We Put You In Charge Of The World's Most Sophisticated Nuclear Equipment, We Put You Through The World's Most Sophisticated Nuclear Training.

It takes more than 16 months of intensive training to become a fully qualified officer in the Nuclear Navy. You begin with four months of leadership training. Then as a Navy officer you get a full year of graduate-level training unavailable anywhere else at any price.

Navy training is based on more than 1900 reactor-years of experience. Right now the Navy operates over half the nuclear reactors in America. And the Navy's nuclear equipment is the most sophisticated in the world. That's why your Navy training is and must be the most sophisticated in the world.

As an officer in the Nuclear Navy, you have decision-making authority immediately. You get important management responsibility fast. Because in the Navy, as your knowledge grows, so does your responsibility.

Your training and experience place you among the country's most qualified professionals. (No surprise

that most of the men who operate the reactors in private industry started in the Nuclear Navy.)

It takes more time and more effort to become an officer in the Nuclear Navy. But the rewards are greater, too.

The rewards can begin as early as your junior year in college. Qualify, and the Navy will pay you approximately \$1000/month while you finish school.

After four years, with regular promotions and salary increases, you can be earning as much as \$40,500. That's on top of a benefits package that includes medical and dental care, and 30 days' vacation earned every year. More responsibility, more money, more future. So, if you're majoring in math,

engineering or the physical sciences, and you want to know more about a future in nuclear power, fill in the coupon.

Today's Nuclear Navy is an opportunity like no other in the world.

HERE IT IS LYN—It's the first and probably the last personal you'll get. But it won't be the last time I say, "I Love You Baby!" Happy Valentine's day.—R.L.

DEAR RABBIT—I really do care about you. Will you be my Valentine? Love—Olga

DEAL GLENN—I love you more than I love life it's self. Love—Amelia

DEAR G.E. AND D—Surprise! Hi honey. Happy V-day. You are the sunshine of my life. I love you! Love always—B.E.

KAREN (KT)—Happy Valentine's Day from an old friend! Why don't you come by sometime for a visit? Do you still want your typewriter?

DEAR PATTY AND Ed—Congratulations on your engagement. Best of luck and happiness for always. Happy VD to both of you. Love—Florisa and Fred

DEAR TONY—Wasn't Valentine's Day always on the 24th? I love you—Sue

CHUI—Put quite simply—I love you—Jerry (Salvatore Peter Jr.) P.S. Thank You.

TOMMY—YOUR Friendship is one that I will always cherish! I just wanted you to know that Happy Valentine's Day.—Am

ROSINE Elsie Claudie, I Love you all very much. Happy V-Day.

NADINE & SHARON. I Love You both very much. Happy Valentines Day. Mike.

TO ALL WHO CAN UNDERSTAND THIS: This seems as appropriate a time as any to tell you all how special you are. What could have been a very long and dreary final year you have made the best that I could have imagined, yet now it is going too fast. From all of you in KE to the unreal crew that keeps me and TL going strong, and beyond to everyone in each far corner who has touched my life and made me the better for it, not to leave out all the special people at SBMDA, especially you! (you know). Thanks for everything, wild & wise-ass women, and the most understanding set of friends a guy could ask for, despite the crowded kitchen. love and gratitude, Don Juan.

NORMA, Since the invisible Girl appeared and said she love me I have been a very contented soul. Afternoon romance can be fun but watch out for the Friday night ambush! I Love You and I always will. Love Howie.

CARL, I'm not going to Barbombos because I'm chaining you to me so we'll be together forever. I Love You madly and forever precious, special husband. Ecstasic Valentines Day. Love Robin.

TO ALL THE BOYS of Irving A-1 Students: The purpose of this mention is to relieve some tension. So have no fear and grab a bear cause stankness is here to stay on this Valentines' Day!! Signed SUNY-Bar.

DEAR DOHEFN—Remember this time last year? Well it's here again. I'm sorry but you have to go thru it again. Happy Valentines Day. Love Always, Cary.

MAR, Happy Anniversary and Happy Valentines Day! With all my love, Cooka Berra

DEANIS, What's your definition of love? Devotion? Strong attachment? Or it it #5? Happy Valentines Day! Love Always, Dawnis (Tonka)

DEAR MR. JPS: I gape you! Love the smiley face and C.T. So what's your name again shehehah.

SULTRY SUSIE, Happy Valentines Day Blueberry! I love you more each day and I'm glad to hve shared these past 26 months with you. Here's to 397 more wonderful years to come!! Love & Licks, Mike.

Pats Hockey Ties C.W. Post

By Teresa C. Hoyle

The Stony Brook hockey team, still fighting for a playoff spot in their division, tied C.W. Post, 3-3, Thursday night at Freeport, to make their record 1-6-1.

"It seemed like a loss, though," co-captain Sean Levchuck said. "They shouldn't have gotten a tie against us," he added. Levchuck was referring to the mistakes and frustration in the game that cost the Patriots a 3-1 lead in the third period. The second period, which was played with many penalties, ended with a comfortable lead for Stony Brook but then Levchuck said, "Everyone got loose. After the first ten minutes of the period, C.W. Post scored. Everyone just watched him put a soft shot in the net." That made the score 3-2. After missing several scoring opportunities, Stony Brook found itself skating shorthanded with Art Conkling sitting in the box and eight minutes left to play. C.W. Post took advantage and tied the game on a powerplay goal.

Levchuck also attributes Stony Brook's losing its lead to the constant changing of the lines. "[Coach] George [Lasher] kept juggling the lines around and the guys were skating with players they weren't used to," Levchuck said.

Levchuck broke the 1-1 tie at 1:16 in the second period. The Pats were skating on a powerplay and Marty Schmitt screened C.W. Post's goaltender. Chris Panafier sent the puck in from the corner to Levchuck, who then shot it in from the point. Two minutes later, John Newell took a faceoff in the C.W. Post end, passing the puck to Mark Havens, who faked a slapshot and sent it to Jim McFadzen, who scored, ending the second period scoring at 3-1.

The Patriot goal in the first period was scored by Tom Oates at 14:41. Schmitt and Eddie Barhan kept the puck in from the blue line allowing Oates to slapshot the puck past the C.W. Post goalie, who had turned away for a second.

John Mundy defended the goal for the Patriots.

Stony Brook skates against SUNY Binghamton on Feb. 20 in Staten Island. Because the team only has a few more games left, Levchuck said, "we have to decide whether we want to make the playoffs."

The hockey team skates into action.

U.S. Gains First Medal

Sarajevo, Yugoslavia—Elena Valova and Oleg Vasiliev maintained the Soviet Union's domination of pairs figure skating by winning a gold medal Sunday. Kitty and Peter Carruthers ended the U.S. medal drought by grabbing a silver medal at the XIV Olympic Winter Games. Finishing third was the Soviet pair of Larissa Selezneva and Oleg Makarov.

Team Canada Glides, Despite Early Problems

Sarajevo, Yugoslavia—Team Canada was cruising along, playing just above .500 hockey on its exhibition tour when it headed for Moscow and the Izvestia hockey pre-Christmas tournament. From then until arriving for the Winter Olympics, the Canadians struggled. "We were 2-16-1 beginning with Izvestia," said Canadian coach Dave King. "But we were playing a quality schedule, a tough schedule. That schedule played a big part in what's happened here." What has happened in the Olympics is that Canada is 3-0 in Group B and in the driver's seat for a spot in the medals round. The Canadians have beaten the defending gold medalist United States 4-2, Austria 8-1 and Finland 4-2. If Canada beats Norway and Finland loses to 3-0 Czechoslovakia today, the Canadians will advance to the final four.

The would be quite an achievement for King's young team, which underwent roster changes right up until the Games. Canada lost Mark Morrison and Don Iietrich when they were declared ineligible last Monday, the day before Olympic competition began, because they played in the national Hockey League. In addition, they had that poor record for more than a month on their minds. "We really looked at ourselves after West Germany," said Team Canada captain Dave Tippett, referring to a three-game series loss to the Germans. "We had meetings and discussed what was going wrong." King said his team is peaking at the right time just as the U.S. team did at Lake Placid in 1980. "We are playing our best hockey by far right now," said King, who coached the Canadian juniors to the 1982 World Championship. "This team is young chronologically but, as for maturity, we have played like a poised team in international play. They guys have played well beyond their years."

Canada has won thanks to super efforts from just about everyone. Mario Gosselin has been magnificent in goal. On defense, Bruce Driver and Robin Bartel have shown muscle, and James Patrick has helped spur the attack.

Up front, every line has contributed. The top unit of Carey Wilson, Pat Flatley and Darren Lowe has been supported by Tippett, Kirk Muller and Dave Donnelly, and Dan Wood, Russ Courtnall and David Gagner. The Wood-Courtnall-Gagner line was at its strongest in the third period against Finland Saturday night.

While Canada has surged into the medals picture, Team USA has sagged. Against Norway, which had lost 10-4 to Czechoslovakia and 16-2 to Finland, the Americans had to rally in the third period Saturday night on a power-play goal by Ed Olczyk to tie the game. "We played the same team and beat them 8-2 in Tokyo," said U.S. coach Lou Vairo. "Hockey is a funny game. We can play better than we've performed. I don't think we've been a very lucky team." Today, the Americans play Austria, the Soviet Union plays West Germany, Sweden takes on Poland and Italy faces Yugoslavia.

Skating Hopeful for USA and Brits

Sarajevo, Yugoslavia—Jayne Torvill and Christopher Dean crew closer to the gold medal in ice dancing yesterday, scoring more perfect marks and made more skating history at the XIV Olympic Winter Games.

The British world champions earned four marks of 6.0 for their spicy interpretation of the Paso Doble in the original set pattern dance—the second of three events leading to a medal. All other marks from the nine judges, including the British judge were 5.9s. The perfect marks were believed to be the most for the OSP at the Olympic event but not in international competition.

Torvill and Dean scored an unprecedented seven perfect marks for their rock 'n' roll number in the OSP at the 1983 World Championships at Helsinki. With Torvill and Dean leading, second place belonged to a Soviet couple—Natalia Bestemianova and Andrei Bukin.

Americans Judy Blumberg and Michael Seibert remained third. The two other U.S. ice dancing teams remained in the top 10 after the second event. Carol Fox and Richard Dalley were sixth and Elisa Spitz and Scott Gregory were 10th.

On Friday, Torvill and Dean became the first ice dancers to get perfect marks for compulsory dances when they were given three for the Westminster waltz. Dance couples will skate for medals tomorrow night in free dancing that counts as 50 percent of the final score.

Basketball Round—Up

Men's Team Down One While Women Win Two

By Jeff Eisenhart

On Saturday afternoon the Stony Brook men's varsity basketball team went on the road to play Manhattanville College. There they suffered another heartbreaking defeat, coming out on the short end of an 80-78 score.

Forward Mark Ward led Manhattanville with a game high of 33 points. Teammate Lee Isam added 17 points.

The Pats went almost point for point with Manhattanville in the first half, but they trailed 43-42 at halftime. After the Patriots trailed by eight points late in the second half, they went on a surge that cut the deficit to two points. With the Pats trailing 80-78, Tabare Borbon had a chance to tie the game for Stony Brook when he went to the foul line with two seconds remaining in the game. He missed the front end of a one-and-one situation which left Manhattanville with a win.

Gregory "Magic" Angru, one of five Stony Brook players to score in double figures, had a game high of 23 points while also grabbing a team high 14 rebounds.

The loss dropped Stony Brook to 7-13. The Pat's next game will be on Saturday when they will be home to take on Oneonta.

Meanwhile the Stony Brook women's basketball team continued their winning ways with two impressive road vic-

tories. Wednesday night they walloped Columbia University, 73-45, and then on Saturday they breezed past Lehman College, 62-53.

First on Wednesday they stormed into Columbia and took command of the game in the opening moments. Coach Declan McMullen said the difference was that "we used a pressure trap on them early and we forced them into turnovers." He added, "Our defense was the key." By halftime the Pats led 34-16.

In the second half, the Patriots came out just as hard, outscoring Columbia 39-29, on the way to a 73-45 victory. Michelle White led the way for the Pats with 20 points. Teammate Shelah Irby added 14 points and grabbed 17 rebounds.

On Saturday, Stony Brook traveled to Lehman College. For most of the first half, the Patriots, who were trailing by five points at the time went on a 14-0 scoring blitz that gave them a nine point halftime advantage. McMullen says "that was the turning point of the game, right then."

The second half saw both teams trade baskets throughout as Stony Brook went on to an easy 62-53 win. After the game McMullen lauded his team's defensive play, especially that of Lisa White and Kathy Mallon. White and Mallon held Lehman's leading scorer, Avis Wil-

kerson, averaging 25 ppg, to just 11 points.

Linda Sullivan paced the Patriots attack with 21 points. Michelle White chipped in with 16 points. Shelah Irby had another strong game off the boards, pulling down 14 rebounds. The two wins brought the Patriot winning streak up to 13 games. The Pats have also won 17 of their last 18 games and are now 19-5

for the season. McMullen said the reason for his team's success this season and in the last two games has been from "our ability to substitute. We have a lot of depth." According to the latest poll, Stony Brook is ranked fifth in the state, and third in the East. The next game will be tonight when the Patriots will be away to face CCNY.

Swimmers Sink Against USMMA

By James R. Benaburger

The injury-riddled Stony Brook men's swimming team was defeated by the United States Merchant Marine Academy (USMMA) on Feb. 8 at Kings Point by the score of 63-49. The meet was the long awaited battle of the top two undefeated teams in Division III's Metro Collegiate Swimming Conference. The score, though seemingly close was not indicative of the slim difference between the teams. Two of Stony Brook's three divers were struck with injuries which made a meet which, on paper, should have been decided by a matter of two or three points either way, a decisive victory for USMMA.

On paper, both teams had very strong swimmers, so Patriot's Coach John DeMarie intended on exploiting Stony Brook's superiority in diving to gain the victory. In both high and low board diving, Stony Brook was planning on using three divers and securing a 1-2 finish in the meet. But then, fate ruled his hand over the team. Kevin Falherty dislocated his shoulder in practice two days before the meet doing a forward 2 1/2 somersault in a pike position dive, one of the many dives that the Pats were going to use against USMMA. Kevin was hospitalized due to his injuries. Then, during the meet itself, Fritz Fidele dislocate his finger when it hit the diving board causing him to be hospitalized also. At the time, the Patriots were leading 21-20 but the outcome was now certain. Coach DeMarie tried to rearrange his swimmers to compensate for the two lost divers but in the end it proved too much.

Interestingly, if the divers remained healthy and

finished 1-2 as expected, all other events remaining the same, Stony Brook would have edged USMMA 59-58, showing that the two teams were truly equal. Not to worry though, for the Pats can get revenge at the Metropolitan championships on Feb. 23, 24 and 25 at Hofstra University.

Looking back over the season, one has to be pleased with the accomplishments of men's swimming. With only one meet remaining versus Adelphi, Stony Brook only has one loss to its record. Coming in from last year, when Stony Brook posted the best record in their history, the team just "kind of got it rolling again," according to DeMarie, when many times a team has a tendency to rebound and let down. The high points of the season so far have been the two victories against arch rival New Paltz. It's been likened to the Army-Navy rivalry. (Where even if Navy had lost every other game in their season, if they beat Army, the season's still a success.) Superior swimmers included James Donnally and Bjorn Hansen among others. Talking about Senior Captain James Donnally, DeMarie said, "In my sixteen years of coaching, he is without a doubt the toughest competitor I've ever seen." He added, "Jimmy doesn't care that this or that boy has better times than him. He'll still beat him. He's done it two times in clutch situations vs. New Paltz, once vs. Fordham and just recently against an All-American (Paul Coan) from USMMA." About Bjorn Hanson he stated, "Bjorn's been tough as nails too. Not many can swim three individual events and win all three as he's

been doing. It's his best year here at Stony Brook (He's a junior)." We can all look forward to the meet with Adelphi next and the championships at Hofstra to come late in February.

Lastly, a spot on not only Stony Brook's schedule, but on swimming in New York State in general, has been the withdrawal of SUNY Buffalo from the SUNY Centers Championships and their subsequent cancellation. Last year, Buffalo pulled out of the event but decided at the last minute to reverse their decision. This year, Buffalo backed out again, this time for good. (The Patriots won the event the last 2 years). When Buffalo pulled out, Binghamton, a traditionally weak team, saw this as an opportunity to pull out of the meet in which they've done poorly over the past years. In fact, DeMarie said, "I can tell you how few points they scored last year...It was in single digits."

What was proposed was what is called a dual meet but Stony Brook declined because it would be too costly (charter buses, motel, etc.) for the quality of the meet without Buffalo. "We are the best team of the SUNY Centers, there's no doubt about it," states DeMarie. "Buffalo backed out. It was an excellent meet last year. Buffalo was leading at the halfway point but we pulled it out in the second half." Buffalo has indicated a readiness to participate and host the event in 1986 when it's new pool is complete. But for now this has been a blemish to swimming in New York State. If those championships were held, DeMarie said, a flat guarantee that I'd be telling you now about our victory." Buffalo in '86? We'll be there.
