COMMENCEMENT

It's about time! All the hard work was worth it.

Graduation

CONGRATULATIONS
GRADUATES!

What a wonderful experience!

Stony Brook University has prepared me for the challenges ahead. The faculty, courses and facilities are excellent resources. I am looking forward to building on the very strong educational foundation.

Stony Brook University

COMMENCEMENT MESSAGE

Congratulations to all our graduates. You have had your share of triumphs, and I suspect you have learned something about fortitude. I hope you have experienced joy.

As you set forth on your life's adventure, you are in good company. You are now a member of a family of more than 100,000 Stony Brook alumni, including university presidents, filmmakers, oceanographers, major league baseball players, a former United States ambassador, and a Grammy Award-winning opera singer. All have sat where you sit today.

I am optimistic that undergraduates have learned, along with calculus and Shakespeare and periodic tables, to connect with others, to cooperate, to work together for shared goals. Graduate students have learned that your profession, whatever you have chosen, will serve you well only if you serve others well.

I hope you have taken advantage of the opportunity to know people who are completely different from you. Because one of your great strengths in whatever endeavor you undertake will be an openness to other ways of looking at life, an ability to work with people who think and look different to build commonalities of purpose and will.

Commencement is a very special time not only for you but for Stony Brook. It is the time when we know the importance of what we do because we realize the impact that you—our graduates—will have on the future.

May your journey be full of happiness.

Shirley Strum Kenny, President

Fabian Mc Cartney Johnston

Fabian McCartney Johnston (May 2000 Graduate)

I graduated from Martin Van Buren High School, Queens, NY on June 1996 at the age of 15 years and seven months shy of my 16th birthday. My dream as a child was always to become a doctor

Stony Brook was my first choice for undergraduate studies. I did research on the university which was known for its excellent work in the field of science, but most of all I got first hand knowledge from Suzette Chin a 1996 graduate who happens to be my cousin and who at present time is a Resident at Pittsburgh General Hospital in PA.

After being accepted at Stony Brook, attending orientation was the beginning of a wonderful life at Stony Brook. The fellowship of meeting students and faculty from different parts of the globe, the friends and the wonderful experience of being away from home for the first time.

Moving into the dorm I realized that all the other students were older than me. They were all 18 years and older. I was one month shy of my 16th birthday, but very mature for my age. My studies were my priority. I was on the Deans List all four years and graduated with honors.

I was a member of the following: PSI CHI, ALPHA EPSILON, DELTA, & GOLDEN KEYS HONOR SOCIETY. I also found some fun time to become a member of the pep band.

Stony Brook has prepared for the vigorous challenge of Medical School. I took the MCAT one. I applied to 18 medical schools, was accepted in the first five I interviewed for and cancelled all other appointments.

I was awarded the Presidential Scholarship for Academic Excellence at Penn State Hershey Medical College along with two other scholarships.

I am currently in my first year of studies and preparing for the great challenges ahead.

Stony Brook has prepared me to achieve my goal on becoming a Doctor.

CONGRATULATIONS GRADS

Stony Brook Soars: An Overview

Stony Brook is a 1,100-acre universe where world-renowned faculty have created a stimulating, highly interactive environment for undergraduate studies. With exceptional strength in the sciences, mathematics, humanities, fine arts, social sciences, engineering, and health professions, Stony Brook offers an array of challenging, career-building programs.

Established in 1957 as part of the State University of New York system, Stony Brook has grown at a prodigious rate and is now recognized as one of the nation's finest public universities. There are approximately 1,682 faculty and 19,831 students.

Stony Brook has been classified as a Type 1 research university, which is the highest distinction granted to fewer than 2 percent of all colleges and universities nationwide. This reflects Stony Brook's high volume of federally sponsored research and its emphasis on scholarship. Funding for research programs has grown faster than at almost any other university, making it the major research campus in SUNY, the largest public university system in the country.

A recent study published by Johns Hopkins University Press found Stony Brook to be one of the top public research universities in the nation. Measuring such criteria as the number of fellowships awarded and the volume of articles published by faculty in major scholarly journals, the study awarded Stony Brook high ratings in each of the major disciplinary categories. Stony Brook is quickly becoming the national model for undergraduate education at a research university.

In addition to its leading position as a research center, Stony Brook offers excellent instructional programs in a broad spectrum of academic subjects. Internationally recognized faculty members teach courses from the undergraduate to the doctoral level in more than 100 undergraduate and graduate degree programs. The academic and cultural resources of the University and the surrounding community provide a superb environment for intellectual and personal growth.

Our Surroundings

Close to the historic village of Stony Brook at the geographic midpoint of Long Island, the University campus lies about 60 miles east of Manhattan and 60 miles west of Montauk Point, convenient both to New York City's urban vitality and cultural attractions and the tranquil countryside and beautiful seashore of eastern Suffolk County. It is only a short drive to some of New York State's richest farmland and fishing grounds, the spectacular Atlantic beaches at Fire Island, the elegant resorts of the Hamptons, the craggy bluffs and natural harbors along Long Island Sound, and the picturesque village greens and gracious old homes of the North Shore towns. The internationally recognized research facilities of Brookhaven National Laboratory and Cold Spring Harbor Laboratory are nearby. And a two-hour train ride will bring you to the heart of one of the most exciting cities in the world.

The Campus

Ongoing campus beautification has created an atmosphere that encourages students and faculty to interact. The new fountain in the center of the six-acre Academic Mall has become a focal point for social activity. Surrounding the fountain are lawns, shrubs, gardens, trees, and a brook that cascades down steps leading to the campus's main entrance. A nature preserve, bicycle paths, park benches, an apple orchard, and a duck pond are interspersed among the spacious plazas, modern laboratories and classroom buildings, a performing arts center, and the rising walls of the new Asian American Cultural Center, being built with a major gift from Charles B. Wang, founder and CEO of Computer Associates.

At the center of West Campus stands the Frank Melville, Jr. Library, which holds more than 2 million bound volumes and some 3 million in microformat; around the library are the major academic buildings for the Colleges of Arts and Sciences and Engineering and Applied Sciences, the Van De Graaff nuclear accelerator, the Administration Building, Jacob K. Javits Lecture Center, Computer Science Building, Educational Communications Center, Computing Center, the Stony Brook Union, Indoor Sports Complex, and other service build-

ings. The Museum of Long Island Natural Sciences, located in the Earth and Space Sciences Building, displays dioramas of Long Island's natural landscape and special temporary exhibits.

The Student Activities Center features a food court and dining hall, study and assembly areas, and an auditorium. The center provides a focal point for the extracurricular activities that are an important part of life on campus. By the end of 2001, there will be two large multi-purpose rooms, an expanded wellness center, and an art gallery.

Stony Brook's Staller Center for the Arts provides superb performing arts facilities, where artists of international stature appear. The Staller Center also houses the departments of Theatre Arts, Music, and Art. A broad plaza (where outdoor concerts are held) connects the Melville Library, Stony Brook Union, and the Staller Center.

Encircling the academic buildings are several residential quadrangles, each with living space for about 1,000 students. The quads are made up of three to five coeducational "colleges," or residence halls, each housing 200 to 400 students. About 60 percent of the undergraduate student body lives on campus. The quads are the basic social units for this on-campus population, providing residence halls, study and social space, and dining facilities. There is a 240-unit complex of one-, two- and three-bedroom apartments near the Health Sciences Center, and a 220-bed apartment building on the southwest corner of campus.

Rising dramatically above the woods on East Campus is the Health Sciences Center, which provides academic and support areas for five professional schools and University Hospital, a 500-bed facility that admitted its first patients in 1980 and has since become a nationally significant teaching hospital. (A recent study ranked it as one of the top 15 teaching hospitals in the country.) Also on the East Campus is the Long Island High Technology Incubator, an important link to local business, which opened its doors to 20 start-up companies in biotechnology and other high technology fields in October, 1992.

South of the academic cluster is the 200-acre Ashley Schiff Nature Preserve. Beyond these woods, and linked to the rest of campus by shuttle bus service,

are 11 functionally adaptable single-story buildings housing the Marine Sciences Research Center and the School of Dental Medicine. Across Nicolls Road lies more student housing, and the 350-bed Long Island State Veterans Home, which was completed in the fall of 1991.

(See the map on page 396 of this *Bulletin*.)

Stony Brook Students

Undergraduates at Stony Brook can choose from over 50 majors, offered through the College of Arts and Sciences, the College of Engineering and Applied Sciences, the Health Sciences Center, Marine Sciences Research Center, and the W. Averell Harriman School for Management and Policy.

The University's enrollment for 2000 was 19,831. Currently there are 13,527 undergraduate and 6,574 graduate students at Stony Brook. Many students are also enrolled part-time in late afternoon and evening courses offered by several departments and by the School of Professional Development.

The majority of Stony Brook's undergraduates—95 percent—come from New York State; 52 percent of these are from Nassau and Suffolk counties and 36 percent from New York City. At any one time more than 100 Stony Brook students are studying abroad in approved exchange programs spread across the globe, in countries such as France, Poland, Italy, Bolivia, Jamaica, Spain, Germany, England, and Korea. International students representing some 75 countries are attending Stony Brook.

The overwhelming majority of first-time, full-time Stony Brook students are still in attendance after their first year. Many students who do not remain full-time return for continued study at a later date, while others go on to another college. Approximately 55 percent of each incoming freshman class graduates from Stony Brook; 36 percent in four years, and an additional 19 percent after their fourth year. The graduation rate exceeds the national rate of approximately 50 percent.

The University aims at the highest standards in all of its programs. Its record of placing graduates in the nation's best

graduate and professional schools shows that these standards are being maintained, and that an educational experience of high quality is available to the broad and diverse student body at Stony Brook.

Stony Brook Faculty

The vast majority of Stony Brook's 1,682 faculty members hold doctoral degrees, and 90 percent or more are engaged in active research leading to publication, much of it supported by external grants and contracts. It was the productivity and high quality of our faculty that helped earn Stony Brook a ranking among the best public universities in the country. The faculty-student ratio is about one faculty member for every 18 students.

Eminent faculty members include numerous internationally recognized scholars. Many have earned high honors in their fields, such as Einstein Professor C.N. Yang, a Nobel laureate in Physics; John Milnor in Mathematics, winner of the prestigious Fields Medal; and MacArthur fellows John Fleagle, professor of Anatomical Sciences, Paul Adams, professor of Neurobiology and Behavior, Patricia Wright, associate professor of Anthropology, and Daniel Monk, assistant professor of Art. Pulitzer-prize-winning poet Louis Simpson in English and Obie-winning poet, playwright, and activist Amiri Baraka in Africana Studies—these are only some of the best-known. Other eminent faculty members include: University Professor John H. Marburger in Physics and Electrical Engineering, former president of the University at Stony Brook; Distinguished Professors K. Daniel O'Leary in Psychology, Gerald E. Brown in Physics, James Glimm in Applied Mathematics and Statistics, Benjamin Chu in Chemistry, Lorne Mendell in Neurobiology and Behavior, Robert Sokal in Ecology and Evolution, Edward Reich in Pharmacological Sciences, H. Blaine Lawson, Jr. in Mathematics, Janos Kirz in Physics, Iwao Ojima in Chemistry, Theodosios Pavlidis in Computer Science, Felix Rapaport in Surgery, and Louis Ripa in Children's Dentistry; Distinguished Professors Emeriti Lewis Coser in Sociology, Jacob Bigeleisen in Chemistry, Seymour Cohen in Pharmacology, and Charles Rosen in Music; Distinguished Teaching Professors

Norman Goodman in Sociology, Elof Carlson in Biological Sciences, Barbara Elling in Germanic and Slavic Languages and Literatures, Stanley Alexander in Dental Medicine, Judith Tanur in Sociology, Alan Tucker in Applied Mathematics and Statistics, Jonathan F. Levy in Theatre Arts, and Shi Ming Hu in Social Sciences Interdisciplinary; Distinguished Teaching Professors Emeriti John Truxal in Technology and Society, Rose Zimbaro in Theatre Arts, and Homer Goldberg in English; Distinguished Service Professors Robert Cess in the Marine Sciences Research Center, Norman Goodman in Sociology, Lester Paldy in the Center for Science, Mathematics, and Technology Education, Velio Marsocci in Electrical Engineering, Barry Coller in Medicine and Pathology, Robert Lieberman in Earth and Space Sciences, Peter Paul in Physics, Eli Seifman in Social Sciences Interdisciplinary; and Distinguished Service Professors Emeriti Sidney Gelber in Philosophy, Marvin Kuschner, former dean of the School of Medicine, and J.R. Schubel, former dean and director of the Marine Sciences Research Center.

Stony Brook's distinguished faculty is also proud to include 11 members of the American Academy of Arts and Sciences, 12 members of the National Academy of Sciences, and three members of the National Academy of Engineering. More than 300 scholars from 40 countries pursue research here and teach at Stony Brook throughout the year.

The 1994 Middle States Reaccreditation Report observes that "Stony Brook has been strikingly successful in developing its research enterprise." In 1998-99, Stony Brook generated \$112 million in annual research activity from sources outside Long Island. Nearly 1,900 sponsored projects are being pursued, including scientific studies, training programs, public-service projects, educational activities, and library support. Among the hundreds of subjects currently under examination by faculty and students are cancer, arthritis, diabetes, lasers, semi-conductor chips, recombinant DNA, the mathematics of nonlinear systems, three-dimensional imaging systems, the psychology of political attitudes and behavior, the social history of American slavery, the interface between art and science, and urban problems and their solutions.
