*State University Of New York
At
Stony Brook*

Stony Brook was established little more than three decades ago as New York's State University Center for the downstate area. Today the State University of New York at Stony Brook is recognized as one of the nation's finest universities. For the students who attend classes here and the faculty who teach here, the campus is an integral part of every day. The campus is located about sixty miles east of Manhattan on the wooded north shore of Long Island.

At Stony Brook, learning takes place outside as well as inside the various classrooms and lecture halls. We have one hundred student clubs and organizations and that figure is expanding. All activities play a role in the learning and growing experience that Stony Brook University offers.

This yearbook is designed to give you an insight into our world.

About 60 percent of Stony Brook undergraduate students live on campus. The residence halls are organized as small residential colleges in order to foster social, intellectual, and cultural interaction. Although governance and activities vary from college to college, students within each living unit are encouraged to participate in all aspects of residential life, including intramural athletics. College Legislature, activities, and workshops. The professional residential staff, assisted by a staff of undergraduates who live and work in the residence halls, helps students plan collegiate activities. Residents, student assistants and professional staff members work out the policies and rules that protect residents' rights and make clear what their responsibilities are. Social and educational activities sponsored by the governing body in each residence hall and the Residence life staff add to the liveliness of on-campus living.

ADMINISTRATION

A call for togetherness: As students, staff and faculty members of the Stony Brook community we affirm our belief that our university like our nation, is neither black nor white, minority nor majority, male nor female but rather a pluralistic society made up of a positive array of diverse united ethnic and cultural groups.

STATE UNIVERSITY OF NEW YORK
General Statement

State University's 64 geographically dispersed campuses bring educational opportunity within commuting distance of virtually all New York citizens and compose the nation's largest, centrally managed system of public higher education.

When founded in 1948, the university consolidated 29 state-operated, but unaffiliated, institutions. In response to need, the university has grown to a point where its impact is felt educationally, culturally, and economically the length and breadth of the state.

More than 400,000 students are pursuing traditional study in classrooms or are working at home, at their own pace, through such innovative institutions as Empire State College, whose students follow individualized and often non-traditional paths to a degree. Of the total enrollment, approximately 36 percent of the students are 25 years old or older, reflecting State University's services to specific constituencies, such as refresher courses for the professional community, continuing educational opportunities for returning service personnel, and personal enrichment for more mature persons.

State University's research contributions are helping to solve some of modern society's most urgent problems. It was a State University scientist who first warned the world of potentially harmful mercury deposits in canned fish, and another who made the connection between automobile and industrial exhaust combining to cause changes in weather patterns. Other university researchers continue important studies in such wide-ranging areas as immunology, marine biology, sickle-cell anemia, and organ transplantation.

More than 1,000 public service activities are currently being pursued on State University campuses. Examples of these efforts include special training courses for local government personnel, state civil service personnel, and the unemployed; participation by campus personnel in joint community planning or project work; and campus-community arrangements for community use of campus facilities.

A distinguished faculty includes nationally and internationally recognized figures in all the major disciplines. Their efforts are recognized each year in the form of such prestigious awards as Fulbright-Hayes, Guggenheim, and Danforth fellowships.

The Africana studies program is interdisciplinary in scope and addresses itself to the experiences of persons of African descent throughout the world. It is designed to explore African civilizations and their influences on other parts of the "Black Diaspora." Issues within the black international communities in Africa, the United States, and elsewhere will be examined from both historical and contemporary perspectives. Particular attention will be focused on political concepts, cultural development, legal relations, and social theories.

Thomas Thompson, Adjunct Lecturer, M.F.A., Ohio University: Photography and printmaking.

The undergraduate programs in art are designed to provide the student with a thorough background in the history and criticism of art, as well as sound training in studio techniques and theory. The courses of study, while allowing students a considerable degree of choice, are carefully integrated with fulfilling requirements for graduate study or preparation for professional work in the field.

The undergraduate program introduces the student to the general field of anthropology, its branches, its theories and methods, and its relation to the other social sciences, the humanities, and the natural sciences. The curriculum emphasizes the fields of cultural and social anthropology, archaeology, and physical anthropology, and includes offerings in legal and medical anthropology.

chemistry, in addition to the traditional chemical science option. The program of the Department of Chemistry is approved by the Committee on Professional Training of the American Chemical Society.

The Bachelor of Arts program allows more flexibility in the choice of electives, accommodating the needs of pre-medical students and others whose career objectives may call for a substantial introduction to chemistry. It can also accommodate students who wish to obtain a strong undergraduate background in another science or mathematics while earning a degree in chemistry.

Students interested in combining the study of chemistry with the study of materials science should see also the Interdisciplinary Program in Engineering Chemistry.

The Department of Comparative Studies integrates the efforts of a number of humanities programs centering on comparative studies in literature, language, and culture. In addition to the major in comparative studies in literature, described below, the department offers major programs in humanities and religious studies and minor programs in classical civilization, Japanese studies, Judaic studies, Korean studies, and religious studies. Requirements for these programs appear under each program title elsewhere in the alphabetical listings of Arts and Sciences programs. Further information is available in the Comparative Studies Office.

Joan F. Kuchner, Social Sciences Interdisciplinary

Requirements for the Minor in Child and Family Studies

The child and family studies minor (CFS) focuses on the child's development and its role in the family and in the wider society. Theoretical and practical issues will be explored from an interdisciplinary perspective. Students will complement coursework and observations with directed work in campus day care centers and other approved facilities. In order to fulfill the minor, students will complete at least 24 credits of designated SSI courses, including three upper-division courses, one of them at the 400 level.

Chinese Studies

Director: Shi Ming Hu, Social Sciences Interdisciplinary

Affiliated Faculty

Eli Seifman, Social Sciences Interdisciplinary

The Chinese studies minor (CNS) is designed for students interested in an interdisciplinary study of China that combines coursework in social and behavioral sciences with that in humanities and fine arts. Students design an individualized program of study with the approval of the director of the Chinese studies minor. Consultation with the director is encouraged for those students considering special opportunities for overseas studies programs.

Dance

Minor Coordinator: Amy Sullivan, Theatre Arts

The minor in dance (DAN) provides an approach to the educational experience of dance that integrates movement, thought, sensation, and feeling. The minor, which requires 21 credits, offers a foundation for further study in choreography, performance, education, and criticism.

The Department of Earth and Space Sciences offers undergraduate programs leading either to a Bachelor of Science or to a Bachelor of Arts degree. The B.S. program in geology (GEO), which includes an environmental geoscience track, and the B.S. program in astronomy/planetary sciences (AST) aim at giving the student maximum preparation to carry out graduate and professional work in each of these fields. The B.A. program (ESS) is more flexible in that it is designed to meet the needs of students who desire a more diverse liberal arts and sciences background. The various programs prepare students to choose careers in teaching, law, environmental science, or research in private industry and government.

Minimum course requirements for both the B.S. and B.A. programs are listed below. Upon declaring a major, the student will be assigned a faculty advisor in the appropriate area who, along with the director of undergraduate studies, will assist in the selection of a course sequence leading to the desired degree. Students should consult frequently with their faculty advisors regarding their progress and regarding appropriate science courses.

The undergraduate major in economics provides training for graduate studies in economics, business, and law. Students may also use it to prepare for entry-level positions in

research and policy-making organizations such as the government, banks, and consulting firms.

Economics is a quantitative social science, and the curriculum reflects that. Although major requirements include only a semester of calculus, students planning to use their background in economics for graduate studies or in their careers are strongly urged to take additional courses in mathematics and in computer science.

The areas of study in the department fall into three broad classifications. The first of these, *microeconomics*, deals with the theoretical and empirical study of the behavior and interrelationships of individual economic agents, such as firms and individuals, and their interaction through markets. Next, *macroeconomics* examines the large sectors of the economy such as government, business, money and banking, and international trade. It also covers such topics as unemployment, inflation, and economic growth. Finally, *econometrics* uses statistics to estimate, test, and predict patterns of behavior of the various units and relationships that make up the economy.

Interdisciplinary Program in Engineering Chemistry

Program Committee

Patrick Herley: Materials Science and Engineering
Joseph W. Lauher: Chemistry

The interdisciplinary program in engineering chemistry (ECM), which leads to the Bachelor of Science degree, is designed to provide students with a basic understanding of the chemistry and materials technology underlying modern materials engineering.

This program emphasizes a strong background in physical chemistry infused with an orientation toward the solid-state sciences and materials technology. Its central theme is a chemistry core strengthened by materials science and laboratory courses, the latter with a unique "chemistry of materials" component. The choice of suitable electives will help the student to prepare for work or advanced study in areas such as electronic materials, interfacial phenomena, solid-state science and technology, polymers, ceramics, biomaterials, etc.

Jointly sponsored by the College of Arts and Sciences and the College of Engineering and Applied Sciences, the program is a basic preparation for training chemical and materials professionals who can enter a wide range of industries or proceed to graduate work in either solid-state chemistry or materials science.

Courses offered by the Department of English seek to develop students' understanding of important works of literature written in English, to provide a historical awareness of the range of thought and experience that has found expression in the English language, and to enlarge students' personal horizons by reflection upon cultural, social, and aesthetic experience. The development of this kind of knowledge also means a development of students' ability to express themselves effectively in speech and in writing. Courses in English instruct students in becoming more observant, thoughtful, and articulate in response to what they read. In addition, the department regularly offers courses in creative writing

Interdisciplinary Program in the Humanities

Director of Undergraduate Studies: Peter Manchester, Comparative Studies

The interdisciplinary program in the humanities, which is housed in the Department of Comparative Studies, is designed for undergraduates attracted to humanistic study—art, history, languages, literature, music, philosophy, religious studies, theatre—who prefer not to specialize in any single field. It involves introductory and upper-division work in several departments, described in the requirements below.

Potential majors are strongly urged to consult the director of undergraduate studies to help them prepare individual programs.

The department's offerings range over many eras, regions, and topics, concentrating on the United States, Europe, Latin America, East Asia, and the history of science. Surveys of these fields are offered at the 100 level for the United States and Europe and the 200 level for other areas. Students interested in the study of history should take these survey courses first, since they serve as prerequisites for more advanced coursework. American and European courses at the 200 level customarily examine a specific period in these regions' pasts, while 300-level courses typically examine specific topics (such as social or political history) or countries (such as Germany, Brazil, or China). History colloquia at the 400 level are small classes offering intensive reading and discussion on closely focused themes. The study of history emphasizes the mastery of large amounts of information and he ability to demonstrate that mastery through skillful writing.

Each semester the department issues a booklet with detailed descriptions of its offerings. Students interested in history, whether as a major, a minor, a related social science course, or for general liberal arts purposes, are invited to read this booklet and to seek advice from the department's director of undergraduate studies and other faculty members.

Human Sexual and Gender Development

Minor Coordinator: Helen Rodnite Lemay, History

The minor in human sexual and gender development (D) is designed primarily for the residents of Langmuir College who wish to add an academic dimension to their residential experience. The minor brings an interdisciplinary perspective to the examination of evolving concepts of gender, sexual self. Small group seminars focus on sex, gender, and the human life course, while students broaden their understanding with relevant courses in the arts, sciences, and social sciences.

Journalism

Minor Coordinator: Diane Fortuna, English

Cultural Writing
John Eysen, Lecturer, M.A., University of California, Los Angeles: Political writing.

Robert W. Greene, Lecturer, Fordham University: Investigative reporting.

David Kahn, Lecturer, Ph.D., Oxford University: Viewpoints.

Paul Schreiber, Lecturer, B.A., University of Miami: Business writing.

The journalism minor (JRN), housed in the Department of English, is staffed by professional, working journalists. Students who have an interest in careers in journalism will find that the program is committed to an academically sound background in arts and sciences, develops the writing and editing skills needed in journalism, and fosters understanding of the principles and responsibilities of journalism.

The minor in Judaic studies offers students an opportunity to acquire background in one or more Jewish languages and to study selected areas of Jewish history, culture, or religion. With the approval of an advisor from the Judaic studies program faculty, the student must construct a program of at least 21 credits fulfilling the requirements listed below. The advisor will help assure that the student's program has a curricular focus; courses from other departments suiting that focus may be included.

Department of Linguistics

The Department of Linguistics is concerned with the study of language as a central human attribute. It offers courses of general interest as well as programs for students with specialized objectives. In accordance with the pattern developed in modern linguistic theory, courses are offered in three areas. The core area examines the units of human language and their structural relations. The peripheral area is concerned with physiological, psychological, and social problems of language use. The applied area is concerned with language education and includes the application of scientific linguistics in communication technology and language policy.

The major in linguistics serves either as preparation for graduate study or as an organizing theme for a rich undergraduate education. The minor in linguistics is a valuable supplement to many majors offered on campus. The Department of Linguistics also prepares students for provisional certification as teachers of English to speakers of other languages (TESOL).

Instruction in uncommonly taught languages not offered elsewhere in the university is provided by the Department of Linguistics.

Japanese Studies

Director: Sachiko Murata, Comparative Studies

In the Japanese studies minor (JNH) students take a series of courses centering on the history and civilization of Japan while keeping in view Japan's close ties with China and Korea. Students design their own program with the approval of the director of the minor. The minor requires 18 credits that must be taken for a letter grade and passed with a C or higher.

Korean Studies

Director: Sung Bae Park, Comparative Studies

Teaching Assistants

Estimated number: 4

Students who undertake the Korean studies minor (KRH) design an individual program that combines coursework in Korean history, literature, art, religion, and philosophy. The director of the Korean studies program advises and oversees each student's program. For those considering overseas exchange programs with Korean universities, consultation with the director is encouraged. The minor requires 21 credits (18 for those who fulfill requirement 1 by examination).

Middle Eastern Studies

Minor Coordinator: Elizabeth C. Stone, Anthropology

The interdisciplinary minor in Middle Eastern Studies (MES) allows students interested in the Middle East to design an individual program of study centered around a particular area of concentration in consultation with an advisor. The minor requires 18 credits.

Religious Studies

Program Coordinator: William Chittick, Comparative Studies

Teaching Assistants

Estimated Number: 4

The Program in Religious Studies offers an interdisciplinary approach to the analysis of religion in its many forms and aspects. To the variety of religious traditions, both living and historical, it brings the techniques and questions of philosophy, history, literature, and the human sciences. Designed for flexibility in meeting student interests and needs, the

Religious Studies Program offers a major, a minor, an honors program, and a variety of strong electives useful for broadening one's knowledge of religious phenomena, for supplementing the major program in many related fields of humanities and social science, and for meeting D.E.C. requirements. Further information and advising in regard to any of the program's services are available through the program coordinator.

Multidisciplinary Studies

Director: Alan O. Ross, Psychology

The multidisciplinary studies major (MTD), which offers no courses of its own, allows students to design their own program of study drawing on all the offerings of the university. It requires careful planning and should be undertaken only after thorough exploration of academic goals with a multidisciplinary studies advisor. (Students whose primary interest focus on disciplines within the social sciences should select the interdisciplinary major in social sciences, described on p. 198.)

The minor in medieval studies (MVL) offers students the opportunity to acquire an understanding of the historical, cultural, and social forces that shaped Western civilization during the European Middle Ages. Under the direction of an advisor from the medieval studies program faculty, the student must establish an advisement folder with the minor coordinator and construct a program of at least 24 credits fulfilling the requirements listed below.

The Marine Sciences Research Center (MSRC) is the center for research, undergraduate and graduate education, and public service in the marine sciences for the State University of New York system. In addition, MSRC features five distinguished institutes: the Living Marine Resources Institute, the Coastal Ocean Action Strategies Institute, the Institute for Urban Ports and Harbors, the Waste Management Institute, and the Institute for Terrestrial and Planetary At-

mospheres. Three features distinguish MSRC from other leading oceanographic institutions: a clear focus on the coastal ocean, a persistent effort to integrate the marine and atmospheric sciences, and a commitment to translate the results of research into forms readily usable by decision makers in resolving important environmental and management problems.

MSRC offers an undergraduate major in atmospheric sciences/meteorology, a minor in marine sciences, and a certificate program in waste management. In addition, MSRC offers joint five-year programs with the Department of Earth and Space Sciences and with the College of Engineering and Applied Sciences, leading to the B.S. degree in geology or the B.E. degree in engineering science and the M.S. degree in marine environmental sciences. Students interested in entering one of these joint five-year programs should consult with their undergraduate departmental advisor and with the graduate studies director of MSRC.

MSRC offers a number of marine and atmospheric science courses that are geared toward both non-science and science majors. The first-year graduate courses at MSRC are, with the permission of the instructor and subject to university limits (see p. 74), available for advanced undergraduate students. MSRC offers opportunities to undergraduates for research and training in marine sciences, atmospheric sciences, and waste management.

Mathematics is an essential element in a wide range of human activities. It is the language of the physical sciences, and as such is an indispensable tool in the formulation of the laws of nature. In the social and biological sciences it plays an increasingly important role in modeling complicated, large-scale phenomena. In addition, mathematics has an aesthetic side; awareness of the possibility of elegance and beauty in mathematical arguments has been a significant feature of human culture throughout history. Today more mathematics is being done, and more needs to be done, than ever before.

The faculty of the Department of Mathematics enjoys an outstanding international reputation. The department offers courses at many levels, meeting the diverse needs of Stony Brook students. Courses range from those at the freshman level, which are offered in several sequences running at different paces, to advanced courses suitable for graduate students studying at a major research university.

The undergraduate course offerings in mathematics allow students to set up individualized programs of study consistent with their academic interests and career plans. Students should consider majoring in mathematics even if they do not plan to become mathematicians or teachers of mathematics. The training in abstract reasoning and problem solving is an excellent foundation for many different careers, such as law, graduate health professions, and business. Completion of a major in mathematics points to a thinking

person.

Students are encouraged to explore the various branches of pure and applied mathematics, as well as other mathematically oriented disciplines, in order to gain both breadth of knowledge and insight into career options. Mathematics majors can use their training as the foundation for advanced professional study, leading to research and teaching in universities or research in industrial research laboratories; they can use it also in secondary school teaching. In industry, undergraduate training in mathematics is excellent preparation for the important task of liaison work between the technological arm of a company and its marketing arm. A major in mathematics is particularly appropriate for work in computer applications, operations research, and actuarial science. Double majors in mathematics and another field, such as physics, computer science, applied mathematics and statistics, or economics, are common and are encouraged.

The *secondary teacher preparation option* is designed for students planning a career teaching mathematics in a secondary school. This option is described in detail in the section "Mathematics Secondary Teacher Preparation Program."

The *honors program* is designed for students with a high standard of achievement who wish to study mathematics at an advanced level. This option is described in detail in the subsection "Honors Program in Mathematics." Any student interested in graduate studies in mathematics, or in mathematics-intensive sciences such as theoretical physics, should consider participating in the honors program.

The Department of Mathematics offers tutorial help to all undergraduate students in its 100-level courses. The Mathematics Learning Center focuses on precalculus mathematics, and the Calculus Resource Room focuses on calculus courses.

The department encourages students to seek information and advice on appropriate mathematics courses, programs, and career goals. Professors in mathematics are available as advisors in the Undergraduate Mathematics Office to help with these matters. Advising hours can be obtained by calling the Department of Mathematics.

Mathematics Secondary Teacher Preparation Program

Director: Ira Wolf, Mathematics

This program prepares students for a career as a teacher of mathematics in the secondary schools. It satisfies all requirements for New York State provisional certification for teaching mathematics, grades 7-12.

Students wishing to enroll in the program should register with the director of mathematics teacher preparation by the end of the freshman year, if possible, and at the latest before registering for the junior year.

The Department of Physical Education is dedicated to developing the abilities and character of each student in order to foster a healthy and productive life. The curriculum is directed toward helping each student acquire a foundation in movement, skill, knowledge, and appreciation that has lifetime application.

The Department of Physical Education supports and is enhanced by the positive interaction among intramurals, intercollegiate athletics, and related Continuing Education programs.

Students in the College of Arts and Sciences may offer a maximum of ten PEC credits, including no more than four credits of 100-level courses, toward the 120 credits required for the bachelor's degree. Only three credits of physical education may be counted toward degree requirements in the College of Engineering and Applied Sciences.

Facilities

Indoor sports facilities are housed in the Indoor Sports Complex, which has a main arena that seats 3,900 for basketball and volleyball and 5,000 for special events such as lectures, concerts, and graduation ceremonies. The complex contains a four-lane, five-sprint-lane track (177 meters in distance); six glass, back-walled squash courts, locker room facilities including six team rooms, and a training room with capacity for hydrotherapy and electrotherapy.

The complex also includes a gymnasium that seats 1,800 for basketball or volleyball. When not in use for competition, the gymnasium contains three multipurpose courts suitable for basketball, volleyball, badminton, and indoor soccer. The facility also houses a six-lane, 25-yard pool, eight racquetball courts, two Universal weight rooms, a dance studio, and an exercise room.

Outdoor physical education and athletic facilities extend over 25 acres and include the 2,500-seat Patriot Field, which is the home of football and lacrosse; 20 tennis courts; a six-lane, 400-meter running track; four single-wall handball/paddleball courts; and fields for varsity soccer, baseball, and softball. Intramural fields are available for softball, touch football, soccer, beach volleyball, and many other sports.

Most facilities may be used for recreational purposes when they are not scheduled for classes, intercollegiate athletics, intramural competitions, or special events. Current schedules of recreation hours may be obtained in the Physical Education Office.

The main goal of the physics program is to teach students how to think about the world in a scientific manner. This basic education is applicable to many fields (physics, engineering, computer programming, astronomy, geology, biophysics, medicine, medical technology, teaching, law, business, etc.). Students preparing for research in physics or a related field should consider meeting the requirements of

the physics major with honors. Students should see their advisors often in order to plan course programs that remain current with their interests.

The Center for Science, Mathematics, and Technology Education (CSMTE) offers undergraduate science education courses satisfying New York State requirements for provisional

certification as a secondary school teacher of biology chemistry, earth science, physics, and general science.

Students who wish to enter this program are expected to consult with a CSMTE advisor and establish an advisement program prior to the beginning of the junior year. Failure to do so may result in a delay in meeting the certification requirements.

Interdisciplinary Program in Science and Engineering

Director: Joseph W. Launer, Chemistry

The interdisciplinary program in science and engineering is designed for the residents of Baruch College. The program is intended for motivated students who wish to broaden their exposure to science and engineering beyond that offered by their major department. Participation in the program will add an academic component to each student's residential experience.

Students from all disciplines are invited to apply for admission to the program, but it is expected that most will pursue majors in one of the departments of the Division of Biological Sciences, the Division of Physical Sciences and Mathematics, or the College of Engineering.

This interdisciplinary degree program (SSI) is designed for students with broad interests in the findings, questions, and methods of the social and behavioral sciences. Individual plans of study are created by combining courses from among the offerings of Africana studies, anthropology, economics, history, linguistics, political science, psychology, sociology, women's studies, and the social sciences program courses (e.g., SSI 102). The student must com-

plete work in at least four of these fields.

The Social Sciences Interdisciplinary Program is the administrative home of the Social Studies Secondary Teacher Preparation Program and two minors: Chinese studies and child and family studies. Social sciences majors who wish to follow one of these minors as an area of concentration may choose courses in that minor so as to simultaneously fulfill a large number of their social sciences requirements. (Requirements for the two minors appear under each program title elsewhere in the alphabetical listing of Arts and Sciences programs.

Further information on the minors is available at the Social Sciences Interdisciplinary Program Office.)

Programs in Engineering and Applied Sciences

Engineers and applied scientists are concerned with complex practical problems that can be approached only by those with a broad knowledge of mathematics and the physical sciences, supplemented by deeper training in a specific technical discipline. These problems often have social, political, economic, and legal aspects that must be considered in arriving at workable solutions. The understanding and judgment required to balance often conflicting technical and societal needs is acquired in part through study of the humanities and social and behavioral sciences. Consequently, the engineering and applied sciences curricula promote educational development not only in the technical areas, but in the social and behavioral sciences and humanities as well. They also provide a strong foundation of general principles that enables professional engineers and applied scientists to adapt to shifts in technological emphasis. The curricula include courses that examine contemporary technology and problems and courses that examine the technology and problems likely to be contemporary in the future. Graduates are well prepared for successful careers in large part because they are educated to develop with technology.

Social Studies Secondary Teacher Preparation Program

Director: Eli Seifman

Through this program students may prepare for a teaching career and complete the requirements for a New York State Provisional Certificate as a teacher of secondary school social studies.

Students who wish to enter this program are expected to consult the program director and establish an advising folder prior to the beginning of the junior year. Failure to do so may result in a delay in meeting the certification requirements. The program requires 75 credits, many of which also satisfy major requirements.

The interdisciplinary minor in socio-legal studies (SLS) is intended for students who have an interest in law and social control and a major in one of the social and behavioral science departments, interdisciplinary programs, or humanities departments. It emphasizes the interrelationships among social values, social control processes, bureaucracies, and legal institutions. It will be useful to students planning a career in public policy, law, legal services, rural development studies, and urban affairs. The minor requires 21 credits.

Women's studies is a scholarly field that examines its subject—women—from an interdisciplinary perspective. By bringing the questions, methods, and theories, of one discipline to focus on the subject matter of others, scholars in this area often discover new approaches to their own fields, through their own insights and through their interactions with faculty and students trained in other disciplines. The Women's Studies Program provides a focus for scholars who are interested in the interdisciplinary study of women.

The theatre arts major offers students a comprehensive introduction to the theory and practice of the theatre arts. The core program (see A below) provides a balance of historical and practical courses, ensuring that students share a common background while encouraging them to identify and build on their strengths. Area concentrations (see B below) encourage students to develop individual talents and interests, exploring a range of information and techniques for artistic work. Students participate in theatre productions at every stage of the program. Study culminates in the senior seminar in which students pursue an advanced, individual project in theatre arts.

Students graduate with a strong background in liberal arts and theatre study. With a major in theatre arts they may pursue theatre-related careers, go on to further theatre study, or enter other professions such as law, business, publishing, advertising, and public relations.

The Department of Computer Science offers two undergraduate majors: computer science (CSE) and information systems (ISE). Requirements and courses for the latter appear under the program title in the alphabetical listing of Engineering and Applied Sciences programs. The two programs of study share a number of courses, particularly in the first two years, so that it is possible to follow a program that permits a student to select either major by the start of the junior year. The department also offers a minor in computer science.

Computer Science

The computer science major provides professional education in computer science to prepare the student for graduate study or for a career in the computing field.

Students learn concepts and skills needed for designing, programming, and applying computer systems while also learning the theoretical and mathematical foundations of computer science. They have sufficient freedom in the program to pursue other academic interests in the liberal arts, sciences, and engineering to complement their study of computer science. Many students utilize the flexibility of the program to satisfy the requirements of a second major for the bachelor's degree.

Computing Facilities

Computer facilities for undergraduates are maintained by both the University Computing Center and the Computer Science Department. The Computing Center operates IBM 3083, VAX 8600, and VAX 8350 systems with approximately 250 terminals available to students. Campus-wide instructional computing sites include both IBM personal computers and Apple Macintoshes, as well as a network of Hewlett Packard workstations.

The department facilities for undergraduates include a network of 16 Hewlett Packard graphics workstations, 60 terminals, and numerous printers. A second network of 16 Hewlett Packard 400 graphics workstations is available for students in graphics courses. A network of 12 Apple Macintoshes serves the course CSE 113 Foundations of Computer Science. In addition, there are 100 Sun workstations, several Silicon Graphics workstations, a Sequent S27 multi-processor, three Micro VAX-11s, three Symbolics LISP machines, and several IBM personal computers. Almost all run Unix and are connected via Ethernets and a 50 Mbps fiber-optics ring for general departmental educational and research use. A fiber-optics network provides links to other campus computing facilities. Stony Brook is an ARPANet host and has connections to CSNet, NYSERNet, and the MOSIS VLSI foundry.

The undergraduate program in applied mathematics and statistics (AMS) aims to give mathematically oriented students a liberal education in quantitative problem solving. The courses in this program survey a wide variety of mathematical theories and techniques that are currently used by analysts and researchers in government, industry, and science. Many of the applied mathematics courses give students the opportunity to develop problem-solving techniques using campus computing facilities.

The Department of Electrical Engineering offers a major leading to the Bachelor of Engineering degree in electrical engineering with course offerings that span the subject matter of contemporary electrical engineering. Through the department's offerings, a student can develop the requisite background and skills for his or her own interests and career goals. The department's research and teaching areas include computers, computer engineering, communications, microprocessors, computer networks, solid-state electronics, electronic circuits, networks, controls and systems, robotics, computer graphics, pattern recognition, optoelectronics, artificial intelligence, biomedical instrumentation, and computer-aided design. The computer engineering specialization is an option within the major accredited by the Accreditation Board for Engineering and Technology, Inc.

While most electrical engineering students go into industry after graduation, many go directly to graduate school for further study in engineering, business, or other professions. Many continue their education on a part-time basis. The programs described below have sufficient flexibility to meet a large variety of individual objectives.

Department of Materials Science and Engineering

Chairperson: Clive R. Clayton

Undergraduate Program Director: Michael Dudley

Faculty

Christopher C. Berndt, Associate Professor, Ph.D., Monash University: Mechanical properties.

Clive R. Clayton, Professor, Ph.D., University of Surrey: Structure and properties of materials; thin film processing.

Michael Dudley, Associate Professor, Ph.D., University of Warwick: Diffraction techniques; materials in art, design, and technology.

Allen N. Goland, Adjunct Professor, Ph.D., Northwestern University: Solid-state physics.

Patrick J. Herley, Professor, Ph.D., Rhodes University; Ph.D., Imperial College: Crystallography; chemistry of solids.

Herbert Herman, Professor and Graduate Studies Director, Ph.D., Northwestern University: Materials engineering.

Hugh Isaacs, Adjunct Professor, Ph.D., Imperial College: Surface defects; surface analysis.

A. Peter Jardine, Assistant Professor, Ph.D., Bristol University: Thermodynamics; processing of materials.

Franco P. Jona, Professor, Ph.D., Eidgenossische Technische Hochschule: Solid state; modern materials.

Alexander H. King, Professor, D.Phil., Oxford University: Electron microscopy; crystal defects.

Miriam Rafailovich, Professor, Ph.D., State University of New York at Stony Brook: Polymer sciences and interfaces.

Leslie L. Seigle, Professor Emeritus, D.Sc., Massachusetts Institute of Technology: Thermodynamics.

Jonathan C. Sokolov, Associate Professor, Ph.D., State University of New York at Stony Brook: Polymer sciences and interfaces.

Masaki Suenaga, Adjunct Professor, Ph.D., University of California, Berkeley: Superconducting alloys; electron microscopy.

Franklin F.Y. Wang, Professor, Ph.D., University of Illinois at Urbana-Champaign: Magnetism; dielectrics; physical ceramics.

John B. Warren, Adjunct Assistant Professor, Ph.D., University of Florida: Analytical electron microscopy, X-ray fluorescence; semiconductor defects.

David O. Welch, Adjunct Professor, Ph.D., University of Pennsylvania: Kinetics of diffusion; energetics; crystal lattice defects; radiation effects.

The Department of Materials Science and Engineering offers the Bachelor of Engineering degree program in engineering science and the minor in materials science, as well as several interdisciplinary undergraduate programs in conjunction with other science and engineering departments on campus. These joint programs provide basic training for prospective graduates to enter a wide range of industries or to proceed to graduate studies in engineering fields. They are aimed at the materials aspect of mechanical engineering, electrical engineering, physics, and chemistry. Individualized programs are also available in biomedical materials, electronic materials, environmental properties of materials, and materials in energy conversion.

Engineering Science

The major in engineering science, in which all departments of the College of Engineering and Applied Sciences participate, furnishes the student with a broad background in the basic engineering disciplines. It is designed for those who want an engineering education of a less specialized nature, or whose career goals lie outside the boundaries of the conventional engineering departments. Through the proper choice of electives and design projects, a degree of specialization may be achieved within the major. Recommended course sequences in materials science and mechanics for this purpose are indicated below. In addition, with the help of a faculty advisor, the student may design a program uniquely suited to his or her own interests and objectives that cuts across departmental and college lines. Engineering students who wish to earn a B.E. degree with a concentration in applied analysis and statistics, computer science, or materials science should elect the major in engineering science. It is also good preparation for graduate studies in architecture, business, law, or medicine.

Health Services

The Health Sciences Center (HSC) consists of five professional schools and University Hospital, the major teaching facility for the educational programs of the Health Sciences Center. The schools—Allied Health Professions, Dental Medicine, Medicine, Nursing, and Social Welfare—offer professional education to approximately 1,900 students and conduct programs of research, service, and continuing professional education. Professional, technical, and laboratory resources support the academic activities of the students and faculty.

The Health Sciences Center has four primary objectives. It seeks to increase the supply and proficiency of health professionals in fields of demonstrated regional, state, and national need; to provide health care of sufficient variety and quality to enable professional education and related research to occur; to sustain an environment in which research in health and related disciplines can flourish; and to emerge as a regional resource for advanced education, patient care, and research in broad areas of health.

University Hospital serves the health care needs of the residents of Long Island and provides training for health-care professionals. Opened in 1980, the 504-bed hospital uses the very latest in medical knowledge and technologies to meet the needs of its patients. The hospital offers highly specialized services and serves many regional roles. It also provides training for more than 400 medical residents in 38 specialty programs, including general dentistry and the subspecialties of medicine.

Although University Hospital provides a hospital teaching environment for students, the Health Sciences Center also utilizes the clinical facilities provided for its students in Long Island hospitals and health agencies that have entered into partnership agreements with the Health Sciences Center.

Program Offerings

Current offerings include both undergraduate and post-baccalaureate programs. All undergraduate programs begin in the upper division.

The School of Allied Health Professions offers bachelor's degree programs in medical technology, physical therapy, and physician assistant. Bachelor's degree programs are also offered by the schools of Nursing and Social Welfare.

The Health Sciences Center enrolls M.D. and M.D./Ph.D. candidates in the School of Medicine, D.D.S. candidates in the School of Dental Medicine, and master's degree candidates in the schools of Allied Health Professions, Nursing, and Social Welfare. Doctoral degree programs are offered in anatomical sciences (functional morphology), cellular and molecular pharmacology, molecular pathology, molecular physiology and biophysics, biochemistry, cell biology, microbiology, neurobiology and behavior, and oral biology and pathology.

Undergraduate Eligibility

All Health Sciences Center baccalaureate programs begin in the upper division. To be eligible for consideration, students must have completed 57 college credits or their equivalent before matriculating in the program to which they seek admission. All programs require specific courses prerequisites. Most undergraduate programs are full time. Part-time studies are offered by the registered nurse program in the School of Nursing.

The Basic Baccalaureate Accelerated Program in the School of Nursing is designed for

college graduates who have a non-nursing bachelor's degree. To be eligible for consideration, students must have a B.S. or B.A. degree and specific course prerequisites. This is a full-time program, running from July 1 through June 30.

Biomedical Engineering

Biomedical engineering is not a field of study that can be offered easily as an academic discipline because the term describes the application of various engineering disciplines to biomedical problems rather than an engineering discipline in its own right. For example, a mechanical engineer may apply his or her skills to the design of prosthetic devices, while an instrumentation engineer might design patient-monitoring equipment for intensive care facilities; both could be considered to be engaged in biomedical engineering. What is required is a sound understanding of a particular branch of engineering along with the application of certain principles of biology and medicine. The would-be biomedical engineer must first decide which branch of engineering he or she wishes to apply to the field, then obtain the appropriate expertise. Certain technical electives may be appropriate and these are listed below. The student should also make use of open elective credits to learn the basics of biology and organic chemistry.

School for Management and Policy

Dean: Matthew J. Sobel

Director of Undergraduate Studies: Eugene A. Feinberg

Faculty

Stanley M. Altman, Associate Professor, Ph.D., Polytechnic Institute of Brooklyn: Analytic methods; evaluation of public agencies.

T. Owen Carroll, Associate Professor, Ph.D., Cornell University: Analytic methods; energy policy; social policy. Recipient of the State University Chancellor's Award for Excellence in Teaching, 1974.

Jeff T. Casey, Assistant Professor, Ph.D., University of Wisconsin-Madison: Organizational behavior; decision making.

Eugene A. Feinberg, Professor, Ph.D., Vilnius State University: Operations management; operations research.

Manuel London, Professor and Director of Labor Management Studies Program, Ph.D., Ohio University: Personnel; promotion policies; management training; assessment centers.

George Pidot, Adjunct Associate Professor, Ph.D., Harvard University: Using computers to solve policy problems.

Anne Preston, Associate Professor, Ph.D., Harvard University: Labor economics; non-profit organizations.

Matthew Porcelli, Lecturer, part time, M.B.A., Hofstra University: Human resources; employee relations.

Michael R. Robbins, Lecturer, M.B.A., Harvard University: Business strategy; computer systems development for direct marketing; business planning.

Sudipto Sarkar, Instructor, M.B.A., University of Texas-Pan American: Corporate finance; investment analysis.

Thomas Sexton, Associate Professor and Graduate Studies Director, Ph.D., State University of New York at Stony Brook: Operations research; statistics; health care management.

Donald Siegel, Assistant Professor, Ph.D., Columbia University: Productivity measurement; industrial organization; applied econometrics; government contracting.

Darko Skorin-Kapov, Assistant Professor, Ph.D., University of British Columbia: Network optimization; management information systems.

Jadranka Skorin-Kapov, Assistant Professor, Ph.D., University of British Columbia: Management science; mathematical programming with applications; artificial intelligence.

Matthew J. Sobel, Professor, Ph.D., Stanford University: Operations management; operations research.

Harry Weiner, Associate Professor, S.M., Massachusetts Institute of Technology: Redesign of organizational structure to improve programmatic capabilities.

Linda Whitaker, Assistant Professor, Ph.D., Georgia Institute of Technology: Operations management; operations research.

The W. Averell Harriman School for Management and Policy offers undergraduate students a major and a minor in business management. The school provides students with the skills and knowledge for managing business enterprises, as well as for managing nonprofit agencies or public policies in government. Students learn about computers and quantitative decision making, about how organizations work financially, operationally, legally, and behaviorally, and about the functions and strategies organizations play in society.

Business Management Major

This major provides training in general management for those students who intend to enter the job market directly after receiving their bachelor's degree. Students learn the basic techniques and skills of management that are essential to a modern economy.

Requirements for the Major

The major in business management (BUS) leads to the Bachelor of Science degree. (Students in this major must complete the same university and Diversified Education Curriculum requirements as students in the College of Arts and Sciences.) All courses must be taken for a letter grade.

COMMENCEMENT

ICON SCIENCE FICTION FESTIVAL

Stony Brook Theatre

The 1992-93 Season at the Staller Center For the Arts

M. Butterfly

by David Hwang • directed by Farley Richmond
The 1988 Tony Award winning play. "It turns everything upside down – sexism, racism, and man's infinite ability for self-delusion—in a whole bouncing series of acrobatic theatrical somersaults." Clive Barnes **New York Post**
October 8-11, 15-18, 1992

Australian Play

guest directed by Rod Wissler ^{Rivers of China} by Alma De Groen
Rod Wissler, guest Australian director, fresh from his starring role in John Aubrey's *Brief Lives* at the Staller Center's International Theatre Festival, will present an Australian play as our cross-cultural offering for this season.

November 5-8, 12-15, 1992

A New "Peace"

Written & Directed by Amy Sullivan & Bill Bruehl
An original full length dance drama created by our own faculty. Rooted in the pre-classic myths that precede the epic tale of Dionysus, this work in progress celebrates our special place on this planet.

December 3-6, 8-13, 1992

Special Event!

In addition to our regular season, two Japanese *Kyogen* and *No* plays will be presented as part of an exchange between the University of Kansas/Lawrence and Stony Brook. Tickets to this special production are available **only** at the Single Ticket price, and can be ordered separately on the reservation form.

November 20-21, 1992

Burn This

Written by Lanford Wilson • Directed by Tom Neumiller
Neither a straight play nor a gay one (or perhaps it's the first play that's truly straight *and* gay), a comedy that laughs at its own tragic roots, *Burn This* champions the free expression of the individual spirit.

March 4-7, 11-14, 1993

Stony Brook Dance Ensemble

coordinated by Randy Thomas
The Stony Brook Dance Ensemble will debut with choreographies from students, faculty, and guest artists. From "Hip-Hop" to Coltrane, to Heavy-Metal – experience the diversity of music, dance, and movement.

March 25-28, 1993

The Rivals

written by Richard B. Sheridan • directed by John Cameron
Our classic offering of the season. This play of humorous yet well drawn characters and situations marks one of the early successes that has made Sheridan a popular playwright for several centuries.

THE 1993 CAMPUS LIFE AWARDS

FACULTY STUDENT ASSOCIATION AWARDS

ELSA JONA QUALITY OF LIFE AWARD SCHOLARSHIPS - This award recognizes students who have enriched campus life and the campus workplace environment. Elsa Jona was an FSA checking supervisor who reached many students and staff through her never ending assistance and wonderful personality.

HOLLY HUNT SCHOLARSHIP AWARD - This scholarship is being presented for the first time in Spring of 1993 in honor of Holly Hunt (1968-1992), a member of the Stony Brook Class of 1992. This scholarship is presented to an FSA student staff member who has continued the wonderful tradition of service, friendship, and dedication which Holly brought to the campus workplace environment.

IDENT AND STAFF SERVICE AWARDS

These awards are in recognition of students and staff who have made a significant contribution or change to enhance the Stony Brook Union and campus programs, services and/or facilities.

LEADERSHIP AWARDS

Department of Student Union and Activities recognizes the leaders of major student clubs and organizations. These leaders and their organizations have significantly contributed to campus life.

MEDIA SERVICE AWARDS

This award is presented in recognition of service and dedication of Editors and Program Directors of campus media.

FRATERNITY/SORORITY AWARDS

ACADEMIC EXCELLENCE AWARDS - Given to fraternities and sororities with the highest cumulative grade point averages.

CAMPUS SERVICE AWARDS - Given to the fraternity or sorority who has successfully implemented the most outstanding service project on the Stony Brook Campus.

COMMUNITY SERVICES - Given to the fraternity or sorority who has successfully implemented the most outstanding community service project.

IDENT POLITY ASSOCIATION AWARDS

CAMPUS APPRECIATION AWARD - Given to members of the campus community that have shown dedication and concern to the improvement of the quality of student life.

ACADEMIC ENHANCEMENT AWARD - Received by a Polity member who has made a significant effort to improve the quality of student education and the university.

IDENT POLITY EXCELLENCE IN PROGRAMMING AWARD - This award will go to a student or organization who has demonstrated outstanding programming ability and consistent efforts towards improving campus life.

IDENT POLITY LEADERSHIP AWARDS - Students who exemplify the qualities of student leadership will be eligible for this award.

IDENT POLITY ACHIEVEMENT RECOGNITION - Awarded to students in Polity that have made significant contributions to improve Student Polity and increase its effectiveness.

CAMPUS APPRECIATION AND RECOGNITION AWARD - Given to graduating Polity members in recognition of their service and contributions to the Student Polity Association.

HSC STUDENT ASSOCIATION AWARDS

HEALTH SCIENCE CENTER STUDENT ASSOCIATION AWARD - Given to an individual from the Schools of Nursing, Social Welfare or Allied Health Professions who has excelled in areas of community service and leadership.

THERESA MONTENARO 200% STUDENT LEADERSHIP AWARDS

Theresa Montenaro worked as a custodian in the Student Union Building for almost 20 years. This award is named in honor of Theresa for her generous spirit, unceasing dedication and commitment to service to the Student Union and campus activities.
