

Stony Brook

MEMORANDUM

MAY

To Norm Prusslin, Eric Corley

From Alvin F. Oickle *AO*

Subject SUNY Side Up, Village Common

Date April 14, 1982

Why do I feel as though a heavy load had been lifted? It's because I have finally completed the schedule of remaining radio broadcasts for this semester. The work, of course, lies ahead, as follows:

<u>ON AIR</u>	<u>SUBJECT</u>	<u>TAPING</u>
April 28	Prof. Jane Porcino	April 26 - 1:30 p.m.
May 5	Prof. Fred Ferguson	April 19 - 3:30 p.m.
May 12	Prof. Don Lindsley	May 3 - 4 p.m.
May 19	Prof. Tom Neumiller	May 3 - 3 p.m.

These are, of course, the SUNY Side Up broadcasts. This will complete my role and Barbara Suter will take over with the May 26 broadcast.

Eric Price, the engineer-technician for SUNY Side Up, has earned the highest praise I can give. He has always been on time, prepared and expert in his work. I will miss working with him next semester when the new program, "Here at Stony Brook," is launched. I look forward to working with John Vernile in that capacity.

Since this will be my final memo with the SUNY Side Up series, I also wish to say again how much I have enjoyed working with you two. WUSB-FM is a friendly, pleasant workplace; its efforts to help young people develop skills and excellence in broadcasting are impressive.

And now, heeeerrreeee's.....Barbara!

SUNY Side Up - May 5, 1982

THE SONG is "Sunny Side Up"; the name of the program, "SUNY Side Up."

Hi, everybody, this is Al Oickle. I'm with the Office of University News Services at the State University of New York, here at Stony Brook. This week's guest is Dr. Fred Ferguson, an associate professor in the Department of Children's Dental ~~Medicine~~, in the School of Dental Medicine, here at Stony Brook.

Dr. Ferguson is an example of a faculty member actively and successfully carrying out the traditional ~~missions~~ missions of a University; that is, teaching, research and public service. Indeed, the Thursday morning clinics conducted by Dr. Ferguson, ~~and~~ his students and staff, are a marvelous example. Clinic K is for the Suffolk County area's handicapped children. Advanced dental students are learning under the watchful eye of the faculty while, at the same time, helping provide a needed service to the public. At the same time, ~~the~~ the activity is a learning experience for Prof. Ferguson and other ~~faculty~~ faculty members in that it is ~~is~~ useful in their research efforts.

Why don't we begin, Dr. Ferguson, with ~~an~~ explanation of Clinic K... ~~how~~ how it works and its goals?

INTERVIEW: Ferguson

WRAPUP: We're out of time again. But I'll be back next week with Prof. Donald Linsley of Stony Brook's Department of Earth and Space Sciences. He is the new president of the Mineralogical Society of America. We'll be talking about his research, which goes beyond the Earth and into outer space. Until then, this is Al Oickle. So long, everybody.
