December 18, 1981

"Did Civilization Advance in 1981?"

That is the provocative title of a special radio program available to your station without charge.

The program is a discussion of the year now ending...not a routine review of the happenings during this dramatic year but from the perspectives of a sociologist, a philosopher and student whose cartoon strips appear regularly in the campus newspaper.

This program was recorded at WUSB-FM, on the campus of the State University of New York at Stony Brook. It promises listeners a lively and even somewhat unusual look at what the peoples of the world have been doing over the past year and how any progress in advancing civilization may be measured now, and by historians later.

The program is available on tape, 7½ ips, ½ track, stereo. It runs 60 minutes but may be used in smaller segments. We will be happy to get a copy to you on a same day or overnight basis.

Just call Al Oickle at our office - (516) 246-3580.

Meantime, to you and all of your staff, happy holidays!

Sincerely,

David Woods, Director
University News Services
