

Message for Dr. Leonard Kleinman:

Suffolk County Medical ⁹Society does weekly 15-minute radio programs. Dr. Kenneth Lebertes interviews other physicians. They've been doing this for 5 years; several stations, including WBLI are on their "network." on Long Island.

They would like to talk with you about neonatal care and ~~xams~~ about new amniocentesis testing...two 15-minute interviews. They are set up for Tuesday, April 24, at 10 a.m. at WBLI, Route 112, Medford.

Let me know if you can do it and I'll pass the word along. Or, if you wish, you can call and confirm: Danny Frank, 864-5750. If unable to be available then, can you recommend someone ~~xx~~ else or give us another day (a Tuesday morning ~~x~~ seems to be their best time) when you can make it.

Thanks,

AB
