3. Mastering Performance Reveiws

May 13, 2008 9:30am 12:30pm

Just as faculty members evaluate students on their performance in courses through papers, tests, classroom discussion, etc., managers evaluate employees on the quality and quantity of their work performance. These evaluations are made every day, every week, every month, depending

on how closely the manager works with or observes his/her employees. These informal ratings form the basis for what we now call the more formal "performance appraisal" or "performance review".

This program is designed to:

Clarify the manager's role as a communicator, counselor and mentor.

Guide the manager through the process: from preparing for and conducting the appraisal session, to concluding the appraisal session, with follow-up.

Target Audience: Managers and supervisors responsible for managing the performance of others. HSC/WEST Campus employees only

5. Americans With Disabilities Act Awareness Training For Supervisors and Managers

May 14, 2008 10:30am 12:00pm

The general population of individuals with disabilities is growing. People in this minority group are not necessarily born into it, becoming a member can happen to anyone at any time.

Technology is providing opportunities for people who were previously considered unable to be educated or employed. In this litigious society, Administrators and Employers must have the sensitivity and knowledge to protect themselves while serving the needs of this group effectively. Employees who are or become disabled must not only know their rights, but also their responsibilities.

Program Goals: Individuals can expect to gain a new outlook on the abilities of persons/job candidates/employees with disabilities and a simple, logical working knowledge of the ADA.

Target Audience: Supervisors and Managers that manage the performance of others
