Operations Research Seminar  
"Stochastic Shortest Paths"  
Evdokia Nikolova (MIT)  
Tuesday, May 5, 11:00-12:00  
Math 1-122A

Abstract:

How do we get to the airport on time? Ideally we would like to take the shortest path, however in the presence of uncertain traffic what does that mean? Is that the path with smallest expected travel time, or should we minimize the path variance or some other metric? One natural objective is to choose the path which maximizes our probability of arriving on time. This turns out to be equivalent to a non-convex optimization problem, for which no efficient algorithms are available. We develop algorithms that bridge stochastic, nonconvex and combinatorial optimization. In fact, our algorithms extend to solve a much more general framework of stochastic optimization that incorporates risk, beyond shortest paths.

### **16. Herbert Scarf Sterling Professor of Economics, Yale University**

Center for Game Theory

Department of Economics Stony Brook University

Invited Lecture

3:30pm May 6th, Room 110 Javits Center

Herbert Scarf, Sterling Professor of Economics, Yale University

Core and the Scarf Complex

Two of Professor Scarf's path-breaking discoveries are

\*Sufficient conditions for the existence of a non-empty core in a general cooperative game

\*Algorithms for the computation of economic equilibria (which he pioneered and for which his book won the Lancaster Prize in 1973)

Both these contributions are central to Game Theory and Economics. Of late there is a rapidly growing literature around them in the field of Computer Science.

The "Scarf Complex" lies at the heart of these contributions and has turned out to also be of great interest in Algebraic Geometry.

### **5. SBU Cat Network Needs Your Help**

There are hundreds of homeless cats living on campus. The SBU Cat Network consists of student, staff, and faculty volunteers who care for them daily. You can help us in several ways:

1. Vote for us in the national Shelter Challenge competition at [theanimalrescuesite.com](http://theanimalrescuesite.com)! If we accumulate a competitive number of votes by the end of the contest, we win a cash prize! In fact, don't just vote yourself; get your friends to do it, too!
2. Adopt one of our rescues.
3. Contribute money or time. This is an enormous project, and it requires the concerted efforts of a lot of us.

If you have questions, or want to help, or want to be put on our email distribution list, contact Nancy Franklin at [nfranklin@notes.cc.sunysb.edu](mailto:nfranklin@notes.cc.sunysb.edu).

On behalf of a lot of innocent and helpless animals, thanks!
