

TO: ALL FACULTY & STAFF

Colleagues,

I am pleased to announce that David Malakoff, Science Editor and Correspondent for National Public Radio, will present a lecture entitled "Scientists, Journalists, and Ghostbusters" on January 24, at 12:00 p.m., in Endeavour Hall 120 at the Marine Sciences Research Center on South Campus.

This seminar will be of special interest to those of you concerned with the interaction between science and the media. David Malakoff is an editor and correspondent on National Public Radio's Science Desk in Washington D.C. As a reporter, he covers research discoveries and the politics of science. He also edits and contributes to stories on technology, the environment, and energy.

Prior to joining NPR, Malakoff spent eight years as a reporter for the news section of the journal "Science", covering a broad range of topics from policy issues to marine research. As a freelance journalist, he has written for a wide range of magazines, newspapers, and web sites, including "The Economist", "Audubon", "The Washington Post", ABCNews.com, and PBS television's "Nature" series. He has also worked as an editor for environmental groups, a fundraiser for several small colleges, and led a nonprofit ecological research organization.

Please pass along this announcement to anyone you feel may be interested in attending.

- Robert McGrath, Provost & Executive Vice President for Academic Affairs
