Subject Seminar on "The Dynamic Brain" by Dr. Terry Sejnowski

Colleagues,

This is an invitation to a special seminar by Dr. Terry Sejnowski entitled the "The Dynamic Brain" on Monday, July 15th at 12 noon in the Life Sciences Building, Room 038. This seminar is organized by the Department of Neurobiology and Behavior.

Dr. Sejnowski, an eminent computational neurobiologist, is Director of the Computational Neurobiology Laboratory at the Salk Institute in La Jolla. He is also Professor of Biology at UC San Diego and an Investigator of the Howard Hughes Medical Institute. In an earlier visit to Stony Brook he presented a public lecture on neuroscience in the Mind/Brain series.

This promises to be a stimulating talk, and I encourage faculty and students interested in neuroscience and related disciplines to attend.

Robert L. McGrath
Provost and Executive Vice President for Academic Affairs
