***Sunday, 11/8***

**Movie Night: "Harry Potter & the Half-Blood Prince, 9 p.m., Tree House Lounge .** If you missed the magic on Thursday, be sure to come see it in the cozy Tree House Lounge.

*Did You Know?*

As part of an ongoing Environmental Education Writing & Advocacy project, student Kathleen Furey and Professors Heather Dune Macadam and Jim Quigley are sponsoring a free presentation open to the public on GM foods and their environmental impact. There will be a film screening entitled: **"THE WORLD ACCORDING TO MONSANTO; PRESENTATION: FOOD SOVEREIGNTY & GM FOODS."** The event will be held on Thursday, November 19 at 7 p.m. in Duke Lecture Hall. For more information, contact Kathleen Furey at (916) 397-1588 or email [cleanfoodearth@gmail.com](mailto:cleanfoodearth@gmail.com) . Furey adds, "The

community, students, faculty and staff are invited for this interactive educational outreach and advocacy for Food Sovereignty and the dangers of Genetically Modified foods and food patenting."

**Faculty/Staff** – If can host an SBS student for Thanksgiving break, please contact Dean of Students Anamaria Cobo de Paci at 632-5093.

**Also from the Dean of Students:** "In the past two weeks, we had several cases of vandalism on campus. It is our responsibility as citizens of Stony Brook Southampton to respect and take care of our community. If you have seen or heard of incidents pertaining vandalism on campus, please contact me at 831-8427 or the University Police."

**Be Heard!** Student Megan Harned is starting a newsletter exploring the themes of Sustainability and how we can integrate them into the fabric of our lives here at SBS, with an emphasis on "empowering us (the students) to take back our education. If you would like to share your thoughts about the campus that relate to these ideas, please submit a comment (no longer than 300 words) by Monday, November 9, to [inquiry.sbs@gmail.com](mailto:inquiry.sbs@gmail.com)."

#### **SCIENCE & SPIRITUALITY: Exploring New Pathways to Sustainability.**

"Our local and national environmental problems -- air pollution, beach erosion, climate change -- are symptoms of a far deeper issue : **the separation of our human nature from the rest of nature** , a spiritual issue," Peter Maniscalco said in an essay in Newsday in April. What is Spirituality? What is its relevance to Science and Sustainability?

Come discover these meanings with the Universe Story as well as Shamanic Drumming. Where? Stony Brook Southampton Library: Thursday, December 3, 7 – 9 p.m. (Maniscalco says, "This is an Introductory Event. All, especially skeptics, are welcome!") For more information, visit [http://commcgi.cc.stonybrook.edu/am2/publish/sbsouthampton/Stony\\_Brook\\_Southampton\\_Continues\\_its\\_Sustainability\\_Speaker\\_Series\\_Maniscalco.shtml](http://commcgi.cc.stonybrook.edu/am2/publish/sbsouthampton/Stony_Brook_Southampton_Continues_its_Sustainability_Speaker_Series_Maniscalco.shtml) .

[4 R's Newsletter...](#)

Hello! Now that we're all settled into the new semester at Southampton, I'd like for us to go over the proper recycling protocol to follow on campus. To help us reduce our carbon footprint on campus, we recycle a wide variety of items including some basics. We recycle #s 1 (PETE) and 2 (HDPE) plastic, metal and aluminum cans, and green, brown and clear container glass. When recycling bottles and cans, please rinse them and flatten them before placing them in our bins. Glass should not be flattened. If the container has a cap, please replace it after flattening.

This helps to maintain a sanitary environment for our staff.

We also recycle mixed paper and corrugated cardboard. When recycling paper, we ask that you only recycle paper that is clean and dry. Please flatten your boxes before recycling them to save space. Coffee cups are not recyclable.

If you have ideas, questions, comments or concerns, please contact our Outreach Coordinators!

Anjelica Whitehome  
Senior Outreach Coordinator  
Dept. Recycling/Resource Mgmt  
Stony Brook Southampton

Also, mark your calendars...

## best bet

**B**est Bet commends East Enders for not only their sophisticated tastes, but also for their serious commitment to the environment. And now, the perfect production will arrive here for our own special type of cosmopolitan audience and it's one which will combine an enlightened world view with a serious dose of eco-consciousness. "Our Blue Planet: Will It Survive Until Tomorrow" is a can't-miss eclectic theater piece with elaborate song and dance numbers interspersed with serious messages about the environment, which will be performed free (a big bonus for savvy East Enders) at Stony Brook Southampton on Tuesday, November 3. This performance—a blend of Japanese music and tunes from Gershwin, Beethoven, Bach, and Mozart, accompanied by a mix of traditional and modern dances of Japanese and western origin—will surely be a once in a lifetime experience showcasing an international troupe that includes Japan's

First Lady Miyuki Hatoyama and Japan's Environmental Minister Sakihito Ozawa. Cool.

*"Our Blue Planet: Will It Survive Until Tomorrow" will be performed at Stony Brook Southampton's Avram Theater on Tuesday, November 3, at 7 p.m. The free 90-minute production will be performed in three acts. All are invited to attend. The event is sponsored by Stony Brook Southampton Dean/Vice President Mary Pearl and the campus' Sustainability Forum, organized by noted professor and former UN environmental official Dr. Nay Htun. For more information, call 632-5028.*
