HSC INFO-BYTES E-NEWS

*From: Norman H. Edelman, MD
Vice President, Health Sciences Center
Dean, School of Medicine*

NOVEMBER 2001

Academic prowess and research scholarship are the hallmarks of the Health

Sciences Center. Therefore, it gives me great pleasure to highlight some of the achievements and awards of the faculty and staff of the Health Sciences Center. I am particularly pleased this month to inform you about

the distinctions earned by several people here at the HSC, which again prove what a truly outstanding group of people we have here.

Dr. Cristina Leske, Chair of Preventive Medicine, has been elected to the Institute of Medicine, becoming the first person from Stony Brook and only

the fourth from a SUNY institution to receive this great honor. An internationally recognized expert in ophthalmic epidemiology, Dr. Leske's research has been in the forefront of methods for epidemiological research

and investigating risk factors for eye diseases and breast cancer. Her 15-year pioneering study measuring the incidence and prevalence of blinding

diseases in people of African descent is the largest of its kind.

In addition, Dr. Jack Stern, Chair of the Department of Anatomical Sciences, has been awarded the title of Distinguished Teaching Professor by

SUNY. Both Dr. William Lennarz, Chair of Biochemistry and Cell Biology and

Dr. Christina Leske, Chair of Preventive Medicine were appointed to the rank of Distinguished Professor.

Wayne Waltzer, Chair of the Department of Urology, received the 2001 National Medical Award by the Urology Kidney Foundation of New York/New

Jersey. Dr. Peter Viccellio from the Department of Emergency Medicine, received the Physician of the Year Award from the New York Chapter of the American College of Emergency Physicians.

Dr. Lorne M. Golub, Professor of Oral Biology and Pathology from the **School**

of Dental Medicine, was awarded the American Dental Association's 2001

Norton M. Ross Award for Excellence in Clinical Research the award for his

contributions to the understanding of periodontal disease and to the development of new therapies. Dr. Golub is recognized as an international

expert on periodontal disease, which affects 67 million adults in the U.S. His work has included the development of Periostat, the leading drug used

in treating periodontitis and the first FDA-approved collagenase inhibitory drug for the treatment of any disease. He currently is working on research

involving a new drug to treat a variety of diseases.

Cornerstone Pharmaceuticals (New York, NY) completed negotiations for an

exclusive, worldwide license to novel cancer therapeutics developed in the

Department of Biochemistry and Cell Biology by Drs. Paul Bingham and Zuzana

Zachar. Their studies have suggested that new agents are highly selective for modified enzymatic pathways in cancer that are unlikely to be

found in normal tissues. Cornerstone Pharmaceuticals has designed future

studies to test these specific agents as the core of a novel chemotherapeutic strategy. By combining the drug with its unique tumor targeting nanoparticle technology platform, the tumor targeted nanoparticles are capable of concentrating drugs in tumors more than anywhere else in the body, resulting in a higher probability that normal cells and tissues will be spared in cancer treatment.

Dr. Jack Fuhrer, Associate Dean for Student Affairs, received the Distinguished Alumni Award from the University at the Alumni Awards Dinner

last month for his outstanding professional accomplishments and exemplary

community service. Dr. Jerome Z. Liang, Professor of Radiology and Computer Science was recently honored as Guest Professor of Peking University in Beijing, the Beijing General Hospital and the Fourth VA Hospital in Xi'An, China. And -- Dr. Gerdi Weidner from the Department of

Preventive Medicine is the recipient of an Alexander von Humboldt research award.

Congratulations to all! You bring recognition not only to yourselves, but to the entire institution.

Q & A

Good communication is two way. Therefore, if you would like to comment or respond to any topics, please do so at HSC_VP@notes.cc.sunysb.edu. Suggestions for future topics are always welcome, as well.

IN OTHER HSC NEWS:

- Dr. Christopher Porter has been appointed Assistant Professor in the Department of Urology. Dr. Porter is currently involved in research on the detection and prediction of localized prostate cancer using spectral analysis and trans-rectal ultrasound.
- The students from the School of Health, Technology and Management float took first prize in the Banner Contest at Homecoming and third prize in the float contest. Also as part of the Homecoming activities, a interdisciplinary seminar, "Confronting Family Violence," attracted nearly 100 students, staff, and alumni.
- Dr. Maria Emanuel Ryan and her colleagues at the School of Dental Medicine, have received a \$300,000 grant from the National Institute of Dental and Craniofacial Research for a two-year study on the treatment of periodontal disease in type-1, insulin dependent diabetics.

Save the Date

On **Monday, November 12, 2001** - Veteran's Day- Harlem Globetrotters, the Magicians of Basketball will be here to take on our Stony Brook Seawolves! The tip-off is at 3 pm in the Stony Brook University Indoor Sports Complex. Tickets Only \$10 Call 631-632-WOLF or log onto www.goseawolves.org
