

'Twelfth Night' Seniors Buy Class Rings

Saturday, April 15, is the date set for Curtain and Canvas' final offering of the Spring Semester, the American Shakespeare Festival production of Shakespeare's comedy, "Twelfth Night". This play is considered one of Shakespeare's perfect comedies, and as such is rich in romance, action and imagination. Considering the fine performances and excellent settings with which "The Winter's Tale" was staged last year, we have every reason to expect that this year's trip will be just as enjoyable. The buses will depart from the Cafeteria grounds at 11:00 a.m. to insure our arrival at Stratford, Conn. by curtaintime at 2:00 p.m. The price of \$2.00 includes free bus transportation, as usual.

Preceding this final event of the Spring Semester were three trips
(Continued on page 3)

Tuition Fees Approved By Legislature

On Friday, March 10, all seniors, including those people who expect to receive a Bachelor of Arts degree, had their ring sizes taken and formally ordered their official College rings. Members of the Class of 1961 who are on the five year program were also eligible to take advantage of this opportunity to order their rings but they will not receive them until September. Member of the Class of 1962 will be able to order their rings before final exams this spring and will also receive their rings at the beginning of the fall semester.

There are 47 students attending the College who matriculated along with 100 others in the fall of 1957. Of those who are left approximately 34 are graduating this June. 30 of the Seniors have ordered their rings.

The rings are expected to arrive shortly after Easter.

On March 14, the State Assembly approved Governor Rockefeller's higher education bill including the controversial "scholar incentive" program.

Included in the bill was a provision for the State University Board of Trustees to charge tuition at all of its units. At the present time, only students attending Harper College and students in the pure science and engineering programs at the Long Island Center pay tuition.

Whether the Board of Trustees will exercise their new power to charge is not now known.

The bill provides an increase in the number of Regents Scholarships for 7,200 to 17,000; allows payments of \$100 to \$300 per year to New York residents attending colleges in the state; and also allows tuition to be charged at New York City colleges.

Front row (L. to R.) Marylou Lionells, Delores Baker, Nancy Nevole. Back row; Doug Hlinka, George May, Jesse Nicholson.

Senior Class Sponsors Dance At "Golden Slipper", April 6.

On Thursday evening, April 6th, the Class of 1961 will sponsor the first college dance held off-campus. This semi-formal affair for the entire college community will take place at the Golden Slipper, a plush night club in Glen Cove.

The ticket will include two setups for every five couples, choice of rye, scotch, vodka bourbon, or gin, continuous dancing from 9:00 P.M. to 3:00 A.M., big name floor show, hors d'oeuvres, and all tax and tips. The complete evening will cost only \$4.50 per person.

Tickets may be purchased from Dolores Baker, Marylou Lionells, Rosny Warmbler, Ed Farnworth, and George May. Sales will continue until Thursday, March 30. A table will be set up in the foyer of the Coe Hall and in the cafeteria during lunch time. No tickets will be sold after Thursday. Most tables will be set up for five couples. Seating arrangements may be made at the time of purchase.

The Golden Slipper, Long Island's finest night spot, is located near the College on Glen Cove Road. It may be easily reached from all points on Long Island. The northern route of Glen Cove Road (Guinea Woods Road) is accessible from Northern State Parkway, Long Island Expressway, Jericho Turnpike, and Route 25A.

Noted for its fine entertainment, on this evening, the club will feature Danny Davis and his Orchestra. Popular Capital recording star, Tony Mitchell, just back from an engagement in Las Vegas, will headline the show. Also included in the show are Dave Astor, a comedian, Ellis Winters will be featured in several dance numbers.

Two bottles of liquor will be provided for every table. Choice as to types and brands will be made at the table with all popular brands available.

Summer Workshop In Democracy

A unique summer experience for college students, 18 to 23, is offered by the 16th annual Encampment for Citizenship—a six-week "workshop in democracy" held in New York, California and Puerto Rico.

The Encampment program is a challenging combination of seminar, summer camp and adventure in human relations. On the campuses of the University of California in Berkeley and the Fieldston School in New York City, and at a camp in the Luquillo National Forest in Puerto Rico, students have the chance to live, study and play with alert young people from around the world, as well as from all sections of the United States—representing diverse racial, religious, ethnic and economic backgrounds. Here faculty members from colleges and universities, living in the dormitories, provide the fullest opportunity for a free exchange of information, ideas and viewpoints, and the opportunity to learn to think independently.

Major areas of study include civil rights and civil liberties, international affairs, economics and practical techniques for civic and community action. Four major research studies of the Encampment program done by the Bureau of Applied Social Research at Col-

(Continued on page 4)

Dr. Fausto Ramirez And Research Team Discover New Phosphorous Reactions

New and basic chemical discoveries about the fascinating element phosphorus are being made in a laboratory which resembles a "little UN" at State University.

A new class of phosphorus compounds has been discovered by Dr. Fausto Ramirez in one of the temporary "prefab" laboratories on campus, where he works with five research assistants from India, Sweden, Israel and Japan.

Phosphorus' effects run throughout our daily lives. We carry some of its compound forms in our own bodies—in our bones, our muscles and nerves, in the nucleus of every living cell. Still other forms are used in modern insecticides, in fireworks, and in the terrible "nerve gases" of chemical warfare.

Discovered centuries ago (1674) by the German chemist Brand, phosphorus is the subject of a voluminous chemistry, but much fundamental knowledge about it is still lacking. Now the State University researchers have discovered a whole new family of phosphorus compounds, which react in ways previously unknown.

Dr. Ramirez, internationally known organic chemist oversees a research staff of five "post-doctoral fellows" in projects supported by grants from the National Science Foundation, the National Institutes of Health and the Petroleum Research Fund of the American Chemical Society. His assistants are former faculty members, researchers or new doctoral graduates at universities in such places as Bombay, Tokyo, Stockholm and Haifa. They have come to this country to study and

L. to R., Dr. Bertil Hansen, University of Stockholm graduate, Dr. Narajan Ramanathan, University of Bombay graduate, Dr. Nobumasa Hojo, Assistant Professor at Shinshu University, Japan, Dr. Nelin B. Desai, University of Bombay graduate, (co-author with Dr. Ramirez of several research articles already published), Dr. T. H. Weill, graduate of University of Basle, Switzerland; former Lecturer at Israel Institute of Technology, Haifa, Israel, Dr. Fausto Ramirez.

work with Dr. Ramirez on his advanced research.

One of the most important results of this research to date is the uncovering of a new class of substances combining the elements carbon and oxygen with the phosphorus atom in the rare "penta-covalent" state.

"New 'molecular blueprints' such as this may help us understand much more about important everyday chemical events", says Dr. Ramirez. "For example, we still do not understand in detail how oxygen combines with phos-

Students Polled About Smoking

In view of Mr. Howland's letter which was published in the last issue of the STATESMAN, we thought it might be of interest to conduct a poll of the student body to determine whether the presence of "cigarette man" had any noticeable effect on this campus. Below are the results. We leave you to draw your own conclusions.

Number polled.....160
Smokers89
Non-smokers71

Of the smokers only 7 started since they have been in College and 1 person declared he had been induced to do so by the free cigarettes. Of the non-smokers polled, 39 take the free cigarettes from the salesman and give them to their friends and 11 admitted that they had tried them but did not continue smoking.

The Roving "I"

Madeline Weiser

QUESTION: What is your conception of "the meaning of life"?

ANSWERS:
Fran Luciano (freshman) - I don't believe that the meaning of life is centered about recognition or material reward. I think that it consists of a quest for happiness - not solely within oneself, but in those whom we love. It is a search for beauty and optimism, and bringing joy to others.

Marie Schachtschneider (sophomore) - I agree with Plato's ideology - that life is a means by which to obtain an end, the end being good in the form of knowledge.

Lenny Spivak (freshman) - At my age, life means the enjoyment of experience - experience in acquiring knowledge for future security, and in making the present fruitful and worthwhile.

Carl Schulz (senior) - A clearly defined meaning and associate purpose of life can only be found within the bonds of theology, and these are conflicting and unfounded from a scientific point of view; therefore, I believe that any purpose of life must be formulated within a particular society.

Elizabeth Coleman (English and Humanities Instructor) - To answer this question "in a few well chosen words", I would have to either be a fool or be facetious. Since I do not want to be facetious, and do not consider myself a fool, I cannot answer the question.

Bill Margulies (Junior) - Life is progress - the progress of humanity in general, the struggle to obtain knowledge for the benefit of humanity.

Within the next month, every student on this campus, as a member of the Polity, will have an opportunity to cast his votes for various members of the Polity Executive Committee. Members of all four classes will be electing the Polity Moderator, the Recording Secretary, the Corresponding Secretary, and the Treasurer. The individual classes, excluding the present senior class, will also be choosing class officers. How well informed will you be before you vote? Will you have any idea of the kind of responsibilities that you will be placing in your representatives' hands at that time?

As voting members of the Polity, it is part of your duty to know how much power is granted to the Executive Committee. Are you aware of the fact that it is this Committee that decides how much money from the Student Faculty Association shall go to each approved student organization?

Some of the people presently on the Executive Committee will be running for office again. Don't you think you should see how these people are voting on matters that are vital to you? Don't you want to know whether or not these people are granting large sums of YOUR money for items that you might consider wasteful?

Why not sit in on a few Executive meetings before the date of election. If you, yourself, are considering running for some office, attendance at at least one meeting is a requirement for qualification. The time and place of every meeting is posted on the Polity bulletin board.

Remember, it is your responsibility to elect responsible people.

* * *

On Thursday, April 6, the Senior Class is sponsoring the first college dance ever to be held off our campus. There are a few persons who have worked and still are working to make this dance the BIGGEST one yet. We don't think these people should be let down by poor attendance.

Though presented by the Senior Class, it is NOT for seniors only. This dance is open to everyone at State. If the people working on the dance thought that it would attract only seniors, they would never have ventured the dance to begin with. Let's face it! There aren't enough seniors to cover the cost of renting a night club for one evening.

Many students have grimaced at the price of the tickets - \$9.00 per couple, but it really isn't unrealistic. Just think what it would cost if you went on a Saturday night to a Night Club.

Remember, there aren't many big events left this year and this one certainly promises to be an enjoyable evening. Let's show the Seniors that we appreciate their effort, by attending this dance.

Campus Spotlight

Conny McCormack

The Statesman Spotlight for this issue falls on two of the newspaper's newly appointed editors, Judy Shepps, Associate Editor, and Jack Mattice, Sports Editor.

Judy Shepps, our new Associate Editor, hails from Flushing, New York. Judy came to State from Jamaica High School where she played the 'cello in the orchestra and was a member of the Leaders Club. Her decision to come to State rested on her preference for small schools and her desire to board at college but not to be too far from home.

At State, Judy has found the friendly atmosphere of a small school and has been able to major in her chosen field of Biology. A Sophomore, Judy has been an active member of the Statesman staff for the past two years. She has also worked as a Biology lab assistant and currently she is tending a couple of pet guinea pigs among other animals in the labs. When she graduates, Judy plans to enter the field of Biological Medical Research.

During the past two summers, Judy has worked as recreation playground assistant and a secretary-receptionist. This summer she hopes to find employment as

Jack Mattice, the new Sports Editor, is also a resident student. Jack's home town is Cobleskill, New York, where he attended Cobleskill Central High School. There he participated in soccer, basketball, baseball and track. Jack was also a member of the newspaper and yearbook staffs and the French Club.

A Regents Scholarship winner, Jack is majoring in Biology. He is particularly interested in the field of animal behavior. He plans to enter the teaching field when he graduates and to work for his MA.

Since his arrival at State Jack has served as a member of the Statesman staff and the Dorm Board. An active participant in the athletic program, he has competed in track and basketball, for the past two years. During the past year he was a member of the Varsity intercollegiate basketball team. Spurred on by the season this year, Jack is looking forward to terrific season in intercollegiate basketball next year.

Our Spotlight personalities of the week have done much in helping our college be a true community with a group interest. Congratulations to these two Sophomores for the great job they have done.

Judy Shepps

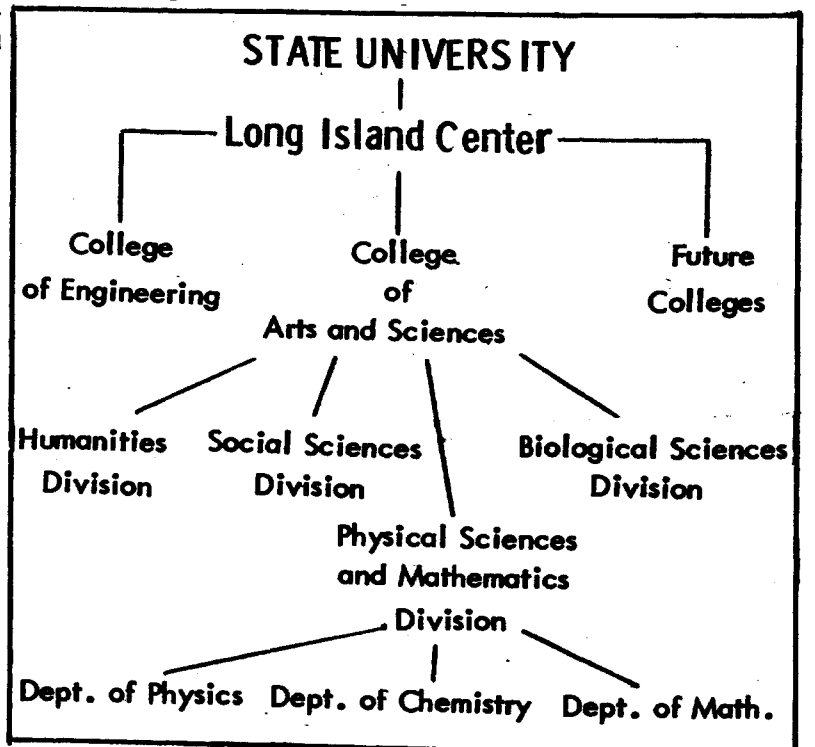

Biological Science Division Established at L. I. Center

On March 10, 1961, the Department of Biology was officially made a division in the College of Arts and Science. With this change that college now has four divisions, the other three being Humanities, Social Sciences, and Physical Sciences and Mathematics. The Division of Physical Sciences and Mathematics now includes the departments of Chemistry, Physics, and Mathematics.

The shift was made mainly to allow for the expansion of the biological sciences at our school. For the present, the new division will continue to operate as before, but it will make preparations for a greatly expanded program in biology at Stony Brook.

Mr. Frank C. Erk, head of the former Department of Biology is now Acting Chairman of the Division of Biological Sciences. He will remain in this capacity until further plans are worked out for the structure of the new division.

With the change in the Biology Department, the administrative structure of Long Island Center has been altered. A diagram showing the change is pictured below.

It is expected that more colleges may be added to the "Center" in the future.

Club News

The Chemical Society and Curtain & Canvas have been approved as recognized student organizations.

Astronomy

Weather permitting, there will be an evening observing session sponsored by The Astronomical Society this Friday night, March 24, at 7:00 P.M. at the Tennis courts.

Telescopes provided by members of the Society will be set up and directed at objects of interest, particularly Venus, now a very thin crescent in the evening sky and about to drop out of sight. The moon, Mars, and other objects will also be observed.

All persons interested are invited to attend.

Note the new observing site, the tennis courts.

State Troupers

The State Troupers, led by George Barber, have recently been devoting all their time to a workshop study of "Lilliom", the dramatic version of "Carousel".

Coming Up

Wednesday, March 22
4:30 p.m. PHYSICS SEMINAR - Rm. 1

Lecture by Mr. Raz.
3:30 p.m. HUMANITIES SEMINAR - Great Hall

Dr. George Santalyana will speak on the "Predictability of Science".
Registration for Polity Elections begins

Thursday, March 23
12:30 p.m. PHYSICS LECTURE - Rm. 1

Dr. Fox will give a talk on triodes and diodes.

Friday, March 24
12:00 noon - Deadline for signing up for badminton tournament.

4:30 p.m. CHEMISTRY SEMINAR - Rm. 1

Dr. Sidney Golden of Brandeis University will discuss the "Pressure Dependence in the UV Band Spectrum of CN"

Saturday, March 25
1:00 p.m. Women's Invitational Volleyball Playday-Gym

8:00 p.m. Saddle Hawkins Dance - Cafeteria.

Monday, March 27
Nominations for Polity officers begin.

Tuesday, March 28
4:30 p.m. BIOLOGY SEMINAR - Rm. 1

Friday, March 31
Spring recess starts

Thursday, April 6
9:00 p.m. Senior Class Dance - The Golden Slipper

Saturday, April 8
Open House for prospective students

Monday, April 10
Classes resume

8:00 p.m. BIOLOGY SEMINAR - Rm. 1

Tuesday, April 11
4:30 p.m. BIOLOGY SEMINAR - Rm. 1

Because Spring Recess and finals are so near, the Troupers are not planning to put on a play this term. George and Mrs. Coleman, the faculty advisor, both hope for a performance next semester. Reading for roles in "Lilliom" will take place on Tuesday, March 29. Texts may be obtained from George Barber, Phyllis Hauben or Mike Tax.

S. C. A.

The S.C.A., headed by Glenn Sharrock will hold elections of officers on March 19th. In the past, their meetings have been held in the Oyster Bay Methodist Church under the supervision of Rev. Robert Notar.

Recently the members were entertained by the performances of a Spanish choir. Discussions of pertinent religious topics have also been on the agenda.

Chemical Society

There has been a change of officers in the undergraduate Chemical Society. Jane Gilbert is now Secretary and John Krawczyk has become Treasurer. Plans for the future include speakers to talk about various vocations within the field of Chemistry. Whether or not to join the American Chemical Society is a question which will be put to the members shortly. If they do join, members will receive a monthly pamphlet in which they may advertise for desired situations.

Newman

The Newman Club, under the direction of Margot Fuhrman, planned a "Day of Recollection" on March 19th. The members congregated at St. Dominics Roman Catholic Church of Oyster Bay. After the 12:10 mass and a break for lunch, the afternoon was passed in a religious conference. A buffet supper was served to all the members. A communion breakfast is planned for the near future.

On Wednesday, March 8, the Newman Club elected the following new officers: President, Margot Fuhrman; Vice - President, Karl Mamola; Treasurer, Mary Ann Huck; Corresponding Secretary, Annette Marchese; and Recording Secretary, Caryl Sullivan.

Physical Society

On Thursday, March 16, Dr. Fox of the Physic's Dept. initiated a series of lectures on Electronics sponsored by the Physical Society. The first lecture, which was on the "Electrical Properties of Atoms", was followed on March 23 by a discussion of triodes and diodes.

The purpose of this series is to enable the club - members to obtain a good background in the study of electronics before starting on their major project - the building of a computer.

While these lectures are geared toward the specific goals of the Physical Society, everyone is invited to attend. The time is 12:30-1:30 p.m. every Thursday in Room 108, Butler Building.

Class Elections On April 27th

The Election Board has formulated the regulations governing Spring elections and has set April 27 as Election Day. Petitions may be submitted from March 27 to April 14. Voting registration will begin on March 22 and end on March 29.

A new procedure for registration will be in effect for these elections. Form #237-X71 must be obtained from Miss McMahon's desk and, when filled out, returned to the Election Board box in the Mail Room.

Those students who register will be able to vote on the members of the Executive Committee which are: Moderator, Corresponding Secretary, Recording Secretary and Treasurer. The Freshmen and Sophomore classes will vote for the President and Polity Representative of their class. The Junior class will elect a secretary, treasurer, and vice-president, besides a president and polity representative.

The complete regulations will be posted on all bulletin boards.

Dr. Ramirez

(Continued from page one)

phorus sesquisulfide in the lighting of an ordinary kitchen match."

Some reactions of phosphorus compounds are important in body chemistry also. One supporter of Dr. Ramirez's research is the Cancer Institute of the National Institutes of Health, which hopes that such basic study of the fundamental chemical processes which make up living things may help in revealing the secrets of cancer's deadly properties.

Such interest and support does not come without evidence of solid scientific achievement. Since beginning the present project in 1958 Dr. Ramirez and his group have published a steady stream of articles in the Journal of the American Chemical Society, each timely and significant enough to receive prominent listing. More such reports are in preparation. For a relatively new project housed in temporary laboratories, this is considered a major achievement indeed.

The scope of Dr. Ramirez's project includes (1) a comprehensive study of the chemistry of the element phosphorus in general, including the detailed mechanisms of its reactions in compounds with other elements; (2) study of the ways phosphorus compounds could be used in general organic synthesis; and (3) a long-range study of the behavior of those types of phosphorus compounds which are of interest in bio-chemistry (chemistry of living things).

"Such research is absolutely fundamental to a good state university today," states President John F. Lee of State University.

Calling All Girls...

(who are interested in boys)
You say you haven't had a chance to go out much lately? Or are you tired of the same old date? Well now's the time to rise up and get out of that rut. Take advantage of the opportunity that is offered only once a year - the **SADIE HAWKINS DANCE** - and you can be sure of having an exciting evening. The fellows are sitting on the edge of

their chairs wondering when the girls will get around to asking them out. So don't disappoint them, females!

You say you want some details about the fantabulous event? Why not? First of all, it will be (you know that already). The time is 8 P.M. on the night of March 25th. The scene is Dogpatch U.S.A. (re-decorated school cafeteria). There will be a real "live" band (no dead beats) and refreshments will include such yummys as cookies, sandwiches, and punch. Wearing of costumes is definitely optional, (as a matter of fact the dress is normal dance attire and if you come in costume you'll look pretty ridiculous). Cost of the affair? Why it's a measly \$1.50 per couple (even a movie is more expensive). Members of the Jewish Student Organization, who have been working very hard to make this dance a success, will be on hand every day from 9:30 to 2:30 in the lobby of Coe Hall selling tickets. And make note of this.... the admittance tickets will also be used in a drawing for a door-prize. Where else could one get so much so cheap?

One more thing, and this is directed to the "hims"...Fellows, if the girls are too shy to ask you to the dance it wouldn't be improper if you took it upon yourselves to ask them. After all you have had much more experience in such matters.

GEORGE MANIATAKIS

SOUND MEN'S SPORTS SCOPE

by Jack Mattice

During this intercollegiate basketball season, a majority of students professed, either verbally or by their attendance, a sincere interest in the present and future status of extramural athletics here at state. A situation has now developed which will, in the end, test the strength and truthfulness of this interest.

As you may know, a budget committee is now meeting to make recommendations to the Executive committee on the apportioning of the fund created by you through the student activities fee. Some members of the committee have expressed the opinion that, because the extramural athletic program offers no benefits to the students that are not already offered by the intramural program, extramural athletics are not needed in this college community, and have no place here. Some other members feel that the cost of extramural athletics is entirely out of proportion in respect to the number of students that benefit from these sports.

Because of these two factions, the cause for extramural sports needs your help in the form of active support. Without this support, athletics, on the extramural level, will disappear from State's extracurricular program.

Are you sincerely interested in intercollegiate sports? If you are, sit down and write a short note to Mel Reich, the chairman of the budget committee, and proclaim your support of the athletic program. Make sure that in your note you include the benefits that you have received from this program that you would not have received from the intramural program.

Your money is being used. You have the right to decide what it is to be used for. Use the power that has been given to you.

Are you sincerely interested in intercollegiate sports? Then ACT! NOW!!!

Intramurals

Softball

Softball intramurals are now forming. All those interested in playing should sign up as soon as possible on the lists posted on the athletic bulletin boards in the gymnasium and near the business office in Coe Hall. So far, enough men have signed up for three teams, but Mr. Von Mechow hopes to have four full teams of about twelve men each. Team captains will be chosen as soon as possible, and rosters will be determined no later than one week after Easter recess.

The program's organization will be similar to basketball intramurals, and games will be played on Tuesdays and Thursdays, with Mr. Haigh supervising.

Badminton

Twelve o'clock noon on Friday, March 24, is the deadline for signing up for the intramural badminton tournament; first round pairings will be posted early the following week. Three separate divisions are open: men's singles, women's singles, and coed doubles. Last year this tournament showed signs of becoming genuinely competitive, with student interest running very high, and the number of students already signed up indicates that this will probably be among the most avidly contested intramural championships.

Golf

Another intramural championship in which there seems to be significant student interest is the planned double elimination tournament in golf. Approximately forty students have signed up, and the tournament organizer, Frank Carr, informs us that ten additional students have expressed their desire to play, bringing the total to about fifty.

Only two problems are keeping the tournament in its formative stages: one is finding a course to play on, and the second is working out an equitable handicap system. Neither problem is insoluble.

Current plans call for a double elimination tournament for

doubles, match play (scoring by holes), best score by an individual rather than an aggregate score for the team deciding the winner of each hole, with a regulation match consisting of 18 holes.

Entrants will play as many practice rounds as possible. If interest warrants, plans call for a similar tournament for women, with matches lasting nine holes instead of 18.

Sign up on the lists posted on the athletic bulletin boards, or see Frank Carr.

Track and Field

The annual "Sophomore Challenge" track and field meet will be held on Friday, April 22 at 3:30 P.M. for field events, and Saturday, April 23 at 9:00 A.M. for the track events.

Prospective participants must compete in a minimum of five (5) supervised practice sessions, dates and times for which are also posted on the bulletin boards. All participants must be included in the list of entries in their class for the individual events, and each class must field three entries, and at least one relay team, to be eligible for individual events.

Each participant is limited to a maximum of 2 running events and the relay. Participation in field events is unlimited. There are events for both men and women. Sign up as soon as possible.

Weightlifting

Although not on a competitive basis, perhaps the most potentially effective program in terms of value to physical development now in existence is the weightlifting group currently supervised by Mr. Vinson and Mr. Kalechfsky. Anyone interested in acquiring a few more muscles or just toning up the old ones should feel free to drop in on these sessions. For place and times, see the weekly schedules of events posted on the athletic bulletin boards and the main bulletin board in Coe Hall.

Women's Volleyball Tournament

On Saturday, March 25, the Long Island Center will host its first Women's Invitational Volleyball Playday for women, at 1:00 P.M. in the gymnasium, under the supervision of Miss Masucci. Two women's volleyball teams from Nassau Community College will be our guests for a day of informally organized volleyball games against two teams of our own women.

The Athletic Department wishes to emphasize that this event is primarily social in nature, and only secondarily competitive, and represents an excellent opportunity for the women of our school to meet students from other schools in a social context. This is a goal that athletic activities are always capable of performing, but often do not, and an expansion of this concept is undoubtedly worth considering.

All girls interested in participation should give their names to Miss Masucci between 3:30 and 5:30 P.M. in the gym on Wednesdays and Fridays. Two teams will be needed for the competition.

Post Drops 2nd Bridge Match

Last Friday night, C.W. Post's new bridge team visited State University and dropped the second game of a home-and-home series.

In this team of four duplicate matches, the first four hands were split, but State won six of the next eight to clinch a tie at the end of three rounds. The last four boards were divided.

In the next bridge match, this Friday night at Post, the new IMP (International Match Point) scoring system will be used. In this system, all the hands are not weighted equally.

We are all looking forward to a close and exciting match.

There will be more informal inter-college bridge matches in the future, as well as a faculty-student team-of-four match. If you would like to participate in these or other duplicate bridge games, see one of the persons listed below.

State's bridge team: Mike Levy and Bob Victor, Alan Katz and Ellie Moscovitz.

Nat'l Individual Bowling Match

The qualifying round for the Eastern Regional Tournament of the Collegiate Individual Bowler Match Games Championship will be held at the Bowlor Recreation Center on Saturday and Sunday, April 15 and 16, and Saturday, April 22.

The entry fee is \$7.00 per man, which covers all tournament costs, including bowling fees. Prizes include trophies for all finalists and semi-finalists in the Regional Championships, and a handsome trophy, which will remain in possession of the school for one year, to the National Champion.

All students in good scholastic standing are eligible for the tournament. Entry is on an individual basis; entry blanks are available from Mr. Von Mechow. This is a fine opportunity for good bowlers to gain recognition both for themselves and for their school. See the athletic bulletin boards for complete information.

Hanhams Lead Hoop League As Season Ends, Carrs 2nd

Anticlimax

The last two weeks of intramural basketball ended with the Hanhams still in first place, after the Goldsteins, in one of the biggest upsets of the year, crushed the Carrs great comeback drive for the crown.

When the Hanhams triumphed over the Goldsteins 76-46, with big John Hanham leading the way with 26 points, it was necessary for the Carrs to win both of their last two games in order to walk away with intramural laurels for the year.

Hopes Dashed

Hopes ran high, when, after trailing 4-0 at the end of one of the lowest scoring quarters in intramural history, the Carrs went on a scoring spree that netted them an 18-16 halftime edge.

Not to be outdone, the Goldsteins, led by Pat Barry and captain Gerry Goldstein, who scored 30 of their teams 38 points in the last half of the game, put on a drive that led the final 54-50 score. Only Harry Farnworth's prolific scoring in the last two quarters kept the Carrs in the running.

Upset Attempt

In their last game of the season, the Margulies made a gallant attempt to upset the Hanham applecart, but after gaining the lead for the first time via a 20 point third quarter, they fell apart under pressure and lost 54-52. The winning Hanhams were led in scoring by Ken Gross and John Hanham, with 25 and 16 points respectively while Lance Lessler and Gene Shara hooped 17 points each for the Margulies.

Keglers Bowl In Tourney

On Wednesday, March 1, State entered a team of five champion bowlers in the Athletic Association of Long Island Colleges Bowling Championships, held at the Westbury Bowl in Westbury. State's team competed with Adelphi, C.W. Post, Hofstra, Kings Point and Queens' College.

Although the team finished last, its true potentialities were demonstrated in the warm-up game, when the members averaged well above the winning scores of the other teams. Bart Haigh, the coach of the team, said that he believed the team's poor showing in the tournament was due mainly to the team's lack of experience in playing against good competition.

The five man team was selected from the intramural league. The team consisted of captain Mike Levy, Jay Kirshebaum, Jerry Goldstein, Joel Bergman, and Bob Ondricek, who rolled the highest triple of the team. The team average was 155.

No other team events are planned for this year, but plans have been made to form a college bowling team next year.

Open House

Long Island Center's annual Open House will be held on April 8th, beginning at 1:30 in the afternoon. Those entering students, who have been accepted into the college, and their parents, have been cordially invited to visit the campus.

The visitors will meet in the Great Hall and be addressed by the President, Mr. Lee, and the Dean of Students, Dean Austill. They will speak briefly on the future programs of the students, the future of our institution, and the present campus. After these talks, there will be an opportunity for the students to ask questions.

It is hoped that this year's Open House will help the incoming student validly judge our institution by making the necessary data easily accessible to him.

The last game of the year, proved to be one of the highlights of the season, pitting the first place Hanham's against the second place Carr's.

The two teams exchanged baskets during the first quarter, but one team gaining the lead, then the other. At the whistle, however, the score stood 6-15 in favor of the Carr's. This seesaw battle continued in the second quarter, but in the last few seconds of the half two fast break buckets enabled the Carr's to pull ahead 29-24.

In the second half, the two teams played evenly right down to the wire. The Hanham's managed to gain back three points, but the game ended with the score 51-19 in favor of the Carr's.

High scorers were Frank Carr, "Corky" Uptegrove and Ed Farnsworth for the Carr's and Steve Wiener for the Hanham's.

SUMMER WORK SHOP

(Continued from page 1)

umbia University indicate that the Encampment is "a rare and successful experiment in democratic education."

Field trips to government, labor, management, farm, industry and community organizations located in New York, San Francisco and San Juan supplement the lectures, workshops and discussion groups. There is also a varied recreation program which makes use of the rich cultural and recreational resources of these cities--as well as daily on-campus activities that include all summer sports, dances, community sings, etc.

Each Encampment unit houses 100 students. The sessions will run from June 25 to August 5, 1961. The fee for tuition, room and board is \$350. Some financial assistance is available to students unable to meet the costs.

Mrs. Franklin D. Roosevelt is honorary chairman of the Encampment for Citizenship. Saal D. Lesser is executive director, Algernon D. Black, education director. Information and applications may be obtained by writing to the national office, ENCAMPMENT FOR CITIZENSHIP, 2 West 64th Street, New York City 23.

Crew Relocates

Construction is proceeding on a ramp and float for the crew. The old ramp had to be removed and replaced, because at low tide it was impossible to reach and at high it was unstable.

The crew has been moved from its former site at Stillwell's boat yard, Oyster Bay, to Seaman's boat yard, Bayville. This was necessitated by a change in ownership of the Oyster Bay property. Although the water in Bayville is better for rowing than is the rougher Oyster Bay water, the crew now has the difficulty of being able to row only when the tide sees fit.

The school was negotiating for another and better spot in Bayville but was turned down by the town council of Bayville. A third alternative was offered in Roslyn Harbor with excellent rowing facilities. No information is available as to why this location was not used.

Due to these difficulties, the crew will have at most three weeks of practice before their first race, if they row through the entire spring vacation.

Contracts have been made with Drexel, to row three teams against them in the first race. At present our team is comprised of eight men for the varsity shell and less than eight for the freshman crew. If any men are interested in rowing, please contact Mr. Von Mechow in his office in the Recreation Building.

Mr. Borghard now has an assistant. Mr. Long is an excellent and long experienced crew coach, who teaches at Wheatly High School.
