

PRIMARY CARE PULMONOLOGY

October 9-16, 2011

Faculty: Feroza Daroowalla, M.D., M.P.H.

Associate Professor of Medicine

Division of Pulmonary, Critical Care and Sleep Medicine

14 Credit Hours

Objectives: Upon completion of the course participants should be able to recognize common clinical presentations, review the diagnostic workup and appropriately manage the following pulmonary conditions: COPD, asthma, respiratory infections and community acquired pneumonia, mycobacterial disease, sleep disorders, pulmonary hypertension, thromboembolic disease, sarcoidosis and other interstitial lung disease, and occupational and environmental lung disease. Participants should also be able to describe pulmonary testing and measurement, review guidelines for pulmonary nodules and perform related risk stratification. The course will include interactive lectures and small group problem solving exercises to develop these competencies, with time for questions and answers within each set of sessions. This seminar is appropriate for primary care physicians and clinicians, family practitioners, internists, obstetricians and others who evaluate pulmonary disorders in outpatient and inpatient settings.

Program

October 10, 2011

9:00 am-12:00 pm

Overview and assessment of pulmonary disorders

COPD/Asthma

Respiratory Infections and Community Acquired Pneumonia

1:00 pm-4:00 pm

Mycobacterial disease

Evaluating a Pulmonary Nodule

Case Studies I

October 14, 2011

2:00 pm-4:00 pm

Sleep Disorders

Pulmonary Hypertension

October 15, 2011

9:00 am-12:00 pm

Thromboembolic disease

Pulmonary Testing and Measurements

Case studies II

1:00 pm-4:00 pm

Sarcoidosis and other interstitial Lung disease

Occupational and Environmental Lung Disease

Case Study III and course review
