Disclosure Policy: All those in control of CME content are expected to disclose any relevant financial relationship with the provider of commercial products or services discussed in the educational presentation or that have directly supported the CME activity through an educational grant to the sponsoring organization(s).

All commercial relationships that create a conflict with the planners, speakers, author's control of content must be resolved before the educational activity occurs.

PROGRAM PURPOSE

The purpose of the Symposium is to educate the community physicians, dentists, and numerous specialties on the importance of a team approach to the care of these patients. Many different surgeries and procedures can be done in coordination with one another.

Birth deformities of the face and mouth are amongst the most common birth defects observed. These children and their families have their best chance for success through early and coordinated therapy from a team approach. The basic etiology, pathophysiology and current treatment modalities will be discussed. The timing and basic technique of each of the treatment modalities will be presented by the various practitioners on the Cleft Palate Craniofacial Team. Continuity of care by the specialist in a particular area is necessary to ensure quality care but it cannot be optimally done in isolation. The interdisciplinary team approach allows for optimal management of the multiple problems encountered by these patients such as with speech and hearing.

This symposium will allow the training and information necessary to help the community physicians, dentists, and specialists care for their patients in coordination with each other to give their patients the best possible care.

PROGRAM OBJECTIVES

Upon completion of this program, physicians, dentists, and other specialists should be able to:

- ❖ Describe what the Cleft Palate Craniofacial Center is all about and how different specialties can make use of our service.
- ❖ Coordinate the necessary care of their Cleft Lip/Palate and Craniofacial Anomaly patients with other physicians, dentists, and specialists to assure the appropriate treatment is being given.
- ❖ Identify these patients and the different specialist referrals that may be necessary.
- ❖ Identify the different diagnosis' that may go along with these birth defects.
- ❖ Develop the most effective treatment plan for these patients and be able to monitor that the patient and his /her family are following this plan.
- ❖ Identify the role each member of the Cleft Palate Craniofacial Team plays in the care of the child.
- ❖ Identify the timing of medical, surgical, and dental intervention necessary in the care of children with Cleft Lip and/or Palate from birth through adolescence.
- ❖ Identify the basic etiology, pathophysiology and the treatment modalities of Cleft Lip and Palate.

PROGRAM CO-DIRECTORS

Fred Ferguson, D.D.S.
Professor and Associate Pediatric Dentistry
School of Dental Medicine

Alexander Dagum, M.D.
Professor of Clinical Surgery and Orthopaedics
Division of Plastic and Reconstructive Surgery

PROGRAM*

8:00 – 8:15 a.m.	Registration and Continental Breakfast
8:15 – 8:45	Welcome and Introduction
Co-Director	Fred Ferguson, D.D.S.
Coordinator	Kristen Santos
8:45 – 10:15	Team Component – Presentation I
Genetics	Patricia Galvin- Parton, M.D. The Genetics of Cleft Lip/Palate Children
Feeding/Lactation	Kathy VanDeventer, RN, PNP Feeding the Infant with Cleft Lip and Palate
Pediatric Dentist	Fred Ferguson, D.D.S. Oral Health and Appliance Therapy
Plastic Surgeons	Alexander B. Dagum, M.D. Cleft Lip/Palate and Craniofacial Cleft
Otolaryngology	Wasył Szeremeta, M.D. Ear Concerns with Cleft Palate Children
Audiology	Jamie Barbera, Au.D Hearing Loss and the Cleft Palate Child
10:15 – 10:30	BREAK
10:30 a.m.–12:00 p.m.	Team Component –Presentation II
Speech	Kerri Elorriaga, MS, CCC/SLP Speech and Resonance Concerns in Children with Cleft Palate
Pulmonologist	Khalid Ahmad, M.D. Cleft Palate and Sleep Apnea
Orthodontist	Richard Faber, D.D.S. Orthodontic Care of Children with Cleft Palate
Oral/Maxillofacial Surgeon	Salvatore Ruggiero, D.M.D., M.D. Alveolar Cleft Bone Grafting
Social Work	Geoffrey O'Connell, LSCW/R Insurance Issues with Cleft Palate Children
Orthodontist	Leon Klempner, D.D.S. Volunteers Overseas: The Rewards and Challenges of Cleft Care in the Developing World
A Parent's View	Erin Lakios Lisa Stroveglia Michelle Surette Thomas Kasperowicz (Child's View)

*Lectures include time for questions and answers.
