

Endocrinology: An Update and Refresher for the Primary Care Physician
June 27-July 7, 2012

Faculty: Sherry K. Sussman, M.D.

14 Credit Hours

Clinical Assistant Professor of Medicine

Attending: Stony Brook University Medical Center, Stony Brook, NY

John T. Mather Memorial Hospital, Port Jefferson, NY

St. Charles Hospital, Port Jefferson, NY

St. Catherine of Siena Hospital, Smithtown, NY

Objectives: This seminar will provide a working knowledge of common endocrinological problems. The course will reinforce physiology, pathophysiology, clinical manifestations, diagnosis and management of most major endocrine disorders. The current treatment for these disorders will be developed in sufficient detail to permit independent management or active participation in care with the endocrinologist. Emphasis will be placed on clinical diagnosis and practical treatment with attention to evidence-based medicine. Upon completion, participants should be able to recognize the signs and symptoms of most endocrinopathies; educate their patients regarding the basic concepts and natural history of these diseases and participate with their patients and consulting endocrinologists in decisions regarding modern disease therapy and prevention. This seminar will be relevant to family physicians, general internists, endocrinologists and others who manage patients with endocrinological disorders.

Program

June 28	8:00-10:00 am	Diabetes Mellitus in the 21st Century I: Diagnosis & Management Guidelines
	10:00-11:00 am	Diabetes Mellitus in the 21st Century II: Insulin Pumps and Glucose Monitors
