

**Pathology Grand Round Seminar Series: 2010**

Kenneth B. Marcu, PhD  
Professor  
Department of Biochemistry & Cell Biology  
Stony Brook University Medical Center, Stony Brook, NY  
"NFkB Signaling and Damage Control"  
December 16, 2010

Mark E. Sobel, MD, PhD  
Executive Officer  
American Society for Investigative Pathology, Association for Molecular Pathology and Association of Pathology Chairs  
"Pathology in the Genome Era: Challenges to Diagnosis, Prognosis and Therapy and Implications for Training"  
December 2, 2010

Roland Wolkowicz, PhD  
Assistant Professor  
Department of Biology  
San Diego State University, San Diego, CA  
"Novel Cell-Based Assays for the Discovery of Anti-Virals"  
November 18, 2010

Todd K. Rosengart, MD  
Professor and Chair  
Department of Surgery  
Stony Brook University Medical Center, Stony Brook, NY  
"Cardiac gene and stem cell therapy; what ever happened to that?"  
November 11, 2010

Fenghuang Zhan, MD, PhD  
Associate Professor and Director of the Myeloma Program at Huntsman Cancer Institute  
University of Utah, Salt Lake City, UT  
"Translational Research in Multiple Myeloma: Defining Molecular Mechanisms in the Context of a Large Clinical Trial"  
October 21, 2010

Christian Steidl, MD  
Research Fellow  
Department of Pathology  
British Columbia Cancer Agency  
Vancouver, Canada  
"Molecular Characterization of Hodgkin Lymphoma: Genome-Wide Approaches for Biomarker Discovery"  
September 23, 2010

Khush Mittal, MD  
Director, Obstetric and Gynecologic Pathology  
Tisch and Bellevue Hospitals  
New York University School of Medicine, New York, NY  
"Distinction of Well Differentiated Endometrial Adenocarcinoma from Complex Atypical Hyperplasia"  
July 22, 2010

David V. Gold, PhD  
Director of Laboratory Administration and Full Member  
Garden State Cancer Center, Belleville, NJ  
"Detection, Diagnosis and Treatment of Pancreatic Adenocarcinoma"  
July 8, 2010

Angelo M. De Marzo, MD, PhD  
Professor of Pathology, Urology and Oncology  
Director, Tissue Microarray Core Facility  
Division of Pathology-Genitourinary Pathology  
Johns Hopkins University  
"Update On MYC and Inflammation In Prostate Cancer"  
June 17, 2010

Natalia D. Marchenko, PhD  
Assistant Professor  
Department of Pathology  
Stony Brook University Medical Center, Stony Brook, NY  
"Stress-Mediated Nuclear Stabilization of p53 is Regulated by Ubiquitination and Importin- $\alpha$ 3 Binding"  
June 10, 2010

Elizabeth F. Redente PhD  
Post Doctoral Fellow  
Department of Pediatrics  
National Jewish Research Center, Denver, CO  
"The Potential Role of TNF- $\alpha$  in the Resolution of Pulmonary Fibrosis"  
May 13, 2010

Robert Soslow, MD  
Professor  
Department of Pathology and Laboratory Medicine  
Weill Medical College of Cornell University and Memorial Sloan Kettering Cancer Center  
"Endometrial Carcinoma and Lynch Syndrome: A Practicing Pathologist's Perspective"  
April 30, 2010

James J. Manfredi, PhD  
Professor  
Department of Oncological Sciences Mount Sinai School of Medicine  
"Exploiting The p53 Pathway In Cancer Therapy"  
April 29, 2010
