HTML FOR COMPLETE BEGINNERS:

David Allen will be giving a talk on HTML on Friday, Sept. 5th in computer classroom A. A brief and simple introduction to html (hypertext markup language) for people who are interested in writing or editing their own Web pages. It is easy to use and doesn't even require learning any new software. All library staff are invited, but talk is *not intended for experienced html users*.

PHOTO CDs OF LIBRARY FUNCTIONS:

We are starting a collection of CDs with photos of our parties, farewells, retirements, conferences, special meetings and programs. Instead of clogging your in-box with large files of photos you can borrow a CD and look at your leisure. There will be a binder with a sign out/in sheet located in Administration. This should be available in a week or so. Keith and Jason, primarily, are burning the CDs. Note, the nifty labels are produced from our labeling system.

THANK YOU'S:
