Subject Clarification on Bulletin Number 1430 (Computer)

The information I sent, to be helpful, is **not a replacement** for Norton antivirus. It is Microsoft Updates!  
Also, some of you may not have this available on your computers.

**HOW TO KEEP YOUR COMPUTER PROTECTED :**

Linda Crawford shared with me the steps in maintaining an up-to-date virus protection for computers. In case you haven't already done this, it is worth the minute it takes to curtail aggravating freezes/shutdowns due to virus attack!

Begin at START.  
Go to SETTINGS.  
Select CONTROL PANEL.  
Select AUTOMATIC UPDATE. Click in third circle. Then OK.
