Hi everyone,

I wanted to follow up with all of you on a question that was raised at our meeting last week, I believe, by Dylan. When we discussed the newly adopted smoke free campus on the east side, I noted that LISVH and Chapin were exempt from this policy, but was unaware of the reasoning re: Chapin.

Yesterday, I had a conversation with Scott Law, (asst director campus public safety) and brought the topic to his attention. It seems that Chapin, as a residence hall, falls under different jurisdiction, and currently has in place a regulation that prohibits smoking within 35 feet of the building. Scott added that since the last meeting of the smoke free committee, he has been contacted by Fred Sganga, director of the LISVH, who inquired as to how he can adapt the new policies on this side to his population at the LISVH. The LISVH also has DOH guidelines to which it must adhere that make it a little trickier to implement a smoke free policy, but they are headed in that direction.

As a point of information, Scott also indicated that nationwide, healthcare facilities are all moving towards a smoke free environment, so there is considerable precedent in our favor on this side of the campus. I remain hopeful that a re-submission of our proposal to the university senate, as discussed at our last meeting, will meet with a more favorable result this time.

On a separate but related issue, I would like to note that with Gil's encouragement, and after several conversations with him and the representative from the School of Medicine, I have agreed to co-chair the newly formed East Campus Environmental Committee. They have agreed that all entities on this side of the road will be included (meaning the other HSC schools and the LISVH as well as SOM and UH) in this process, and have assured us that they want to work collaboratively with our committee, although they are not amenable to becoming a sub committee of our committee. I am sure we are all delighted to know that so many people here are interested in improving the campus, and I'm sure there is a great deal we can learn from each other. I look forward to working with this new group and to functioning as a liaison of sorts between the two committees.

Thanks to all for your continued support, and best wishes to all for a Happy Thanksgiving!

Subject Smoking Policy

Bernie,

The University Senate Campus Environment Committee was informed that the University cannot receive LEED Certification for new buildings unless the University has a smoking policy that prohibits smoking in all buildings and within 25 feet of building entrances or air intakes. Yesterday the committee agreed to the policy on the attached statement to replace the existing smoking policy.

It has been written just to meet the needs of the LEED Certification. You may wish to visit this site.
<http://www.usgbc.org/DisplayPage.aspx?CategoryID=19>

I recommend that the Executive Committee of the Senate consider it as soon as possible so that it might be considered at the December 1 Senate Meeting.

While the committee would have preferred a more smoking comprehensive policy, this is required now.

We believe that if the Senate passes this policy, Pres. Kenny would most likely accept it.

Gil

Subject East Campus Environment Committee

The School of Medicine Senate has established an East Campus Environment committee. I suggested that possibly they could be a subcommittee of the University Senate Campus Environment Committee. The following is a response I received from Laura Fochtman the Secretary of the School of Medicine Faculty senate.

We will discuss the relations between the two committees today.

Gil

Subject: Re: East Campus Environment Committee

Dear Dr. Hanson:

As secretary of the School of Medicine Faculty Senate, I thought that I should respond to your email since I believe that Dr. Steigbigel is out of town.

As you recall, the SoM Faculty Senate was enthusiastic about the need for an East Campus environmental committee after hearing your presentation at our meeting last January and there was a vote at that meeting affirming that such a committee should be established (see attached). We subsequently went through the process needed to amend the bylaws of the SoM faculty senate so that this would be included in our committee structure. It was clear in that initial discussion which you attended and in the subsequent ByLaws change that this committee would work collaboratively with the University Senate Campus Environment Committee, which we agree is crucial.

To change the reporting structure at this point, eliminating the committee from the SoM Faculty Senate committees and making it a subcommittee of the University Senate, seems likely to lead to further delays in initiating the committee. Obviously, we would like to avoid this as there are many important environmental concerns to be addressed.

The collaborative element seems to be a key element of your proposal, a point with which we are in obvious agreement. We had envisioned having a liaison from the University Senate committee attend the East Campus Committee meetings and a second liaison from the East Campus Committee attend the University Senate committee, to maximize opportunities for communication and information exchange. In addition, having a member of the University Senate Committee co-chair the East Campus Committee has also been raised as a possibility. However, we would be open to other ideas. We thought that both of these options would fulfill our shared goal of keeping the Campus Environment Committee informed about environmental issues across the University.

Hopefully, this clarifies the SoM Faculty Senate process that occurred in establishing this committee but if you have additional questions, let me know.

I'm sure that Dr. Steigbigel would also be happy to address any questions, as well.

Thanks again for all of your work in bringing the work of your committee to our attention and in encouraging us to establish the East Campus Committee. We are all very enthusiastic about the prospects of ongoing collaboration to improve the environment of the entire campus!

Attached is a ppt that you can use to announce the next **Our Environment** in your classes and a flyer for posting.

On Sunday November 9

Paul Pontieri, the Mayor of the Village of Patchogue ,

will present

Patchogue: A Community in Transition

In ESS 001 at 7 PM.

Since its Incorporation in 1893 the Village of Patchogue has gone from a Port of Entry/industrial river community to a tourist destination, with 1000 hotel rooms, to one of the largest commercial/retail downtowns to a depressed, vacant downtown of the 1990's. It is now 2008 and Patchogue has begun its transition to a 21st Century Village and Downtown Community of: Restaurants, Retail, a Hotel, Theatre, and Affordable Artists' Lofts all supported by an ambitious Work Force Housing initiative designed to keep our young families home.

Subject Our Environment Sunday October 19

Reminder:

Martin Schoonen the interim Dean of Southampton will present

“Sustainability and Stony Brook Southampton: a New Paradigm in Education”

on Sunday October 19 at 7:00 PM in ESS 001.

Sustainability is rapidly becoming a buzzword along with “greening”. Global population growth, rising energy consumption, shrinking non-renewable energy resources, and loss of arable land are some of the factors that conspire to force a change in human behavior. The transformation to a sustainable society will require a rethinking of current consumption patterns, transportation systems, and housing among other things. To affect the transition to a sustainable society will require a new cadre of professionals. Professionals who have been trained in tackling the complex problems at hand. At Stony Brook Southampton we have initiated several new program that have been designed to train this next generation of professionals at the undergraduate level.

Martin Schoonen, Interim Dean of Stony Brook Southampton, will introduce the concept of sustainability and discuss the new program launched at Southampton.

Subject Re: HIS 414 Podcasting test 

Kathleen,

Excellent. I knew we had it covered but thought I'd mention the releases again as we were talking about it yesterday in house. To get to the podcasting server goto:

<https://podcast.ic.sunysb.edu/weblog/his414/>

Once there, enter your net ID and password which can be found in a section of your SOLAR account.

Jennifer Adams sent me this upload cheaters note yesterday:

"New Entry
title and description
click the advanced button
browse for you file. usually mp4, m4v, m4a, mov work best.
choose and save

It should show up immediately."

As for Debra, we saw her yesterday and she indicated that she had replied to the students in the afternoon about her appointment. They should have a note today. The others, at this point, I think need phone calls. Gil Hanson is on campus and should be reached at his office. Susan is usually very punctual in her responses, I don't have the number but Kristen might. Camarda is at: 201-934-6124. Cassidy, I only have 631-751-4892 (a 2001 dated number).

If these don't work, we can get some people in-house who would be willing to help. There are a number of staff who were here in the library from the 1970s onwards.

Best,

Jason

Subject: Re: HIS 414 Podcasting test

Dumb question #1: where do I go to find this podcast (I found email w/ log in info but am still unclear as to where the link might be)...and yes, I will be reminding students about the permission forms next Mon. when we do some "practice" interviews in class...as for scheduling, as of now:

Menzies is now confirmed for 10/31. 3-5 PM

Mr Goldstein would like to do his interview anytime on Tues., 10/21--the students are okay with that--how about you (as well as the equipment and a room?)?

Britton-Riley remains unconfirmed for the 10th...she has not replied to repeated emails from the students and they're getting concerned..do you or Kristen know her and might get in touch? She replied to their first email asking for a date other than the first one suggested (11/7) but has not replied since...

Similarly, Cassidy, Carmada, Hanson, & Tango have not replied at all to repeated emails from the students assigned to them...any suggestions?

Thanks, k

Kathleen,

We tested the podcasting upload yesterday using a simple ten second clip we got off the internet. Everything is in place to allow the students to view the uploaded video that is shot. Additionally, please remind them that each of the students need to fill out a permission form to release their interview. If you haven't done so, could you have them all fill one out? Otherwise, we'll have them with us when they come in for their interviews.

See you tomorrow,

Jason

We had a CEC meeting today, but only a few people showed up. I found that part of the reason was that the list I used for the e-mail was truncated so that most of the people whose e-mail address began with M to Z were not included on the list. I am very sorry about that.

Last year we met the third Tuesday of the month from 1 to 2:30 PM. Please let me know if that day and time is possible for you. It is very difficult to find a day and time that everyone can attend.

Tentatively our next meeting will be Tuesday October 21.

Please let me know if you would like to be removed from this e-mail list.

The first meeting of the Campus Environment Committee for this Academic year will be on Tuesday September 16 from 1 to 2:30 in the University Senate Conference room 125 Psychology B.

Please let me know if you can attend.

Gil

Draft of Agenda, please send additions or comments.

Introductions -

Review of the Minutes - N. Koridis

Status Reports

Environmental Master Plan - Barbara Chernow

Status of Hotel - Barbara Chernow

Developments at the Research and Development Park - Barbara Chernow

Campus Sustainability Task Force/Recycling - Amy Provenzano

Committee Reports

University Safety Committee

Parking and Transportation Subcommittee - Ramona Walls

Friends of Ashley Schiff.

Other:

Recap of committee function for new members

Selection of Chair of the committee

Plans for the coming year

Subject Fwd: [AASHE Bulletin] AASHE Digest 2007 - Annual Review
of Campus Sustainability + More

So many great projects! We need to get going on some imaginative project so Stony Brook can make AASHE headlines too!

How about a pilot project of making the Admin building energy self sufficient with solar power and hot water? It's got a flat roof so nothing would show. Maybe we could get LIPA or NYSERDA to pay for the installation?? Former Congresswoman Claudine Schneider (2007 Earthstock keynote speaker) would surely advise us.

Malcolm
Senate Environment Committee

News

1. Washington Post Features Article on Campus Sustainability
The Washington Post recently featured a front-page article on campus sustainability entitled, "Higher Learning Adapts to a Greening Attitude." The article discusses the increase in sustainability in the curricula at college campuses across the US, and mentions, in particular, the University of Maryland, the University of Virginia, Catholic University (DC), Goucher College (MD), the University of Oregon, and Johns Hopkins University (MD). The article also mentions co-curricular sustainability activities at George Washington University (DC) and green facilities projects at Frostburg State University (MD) and JHU. The article attributes the change to the

increasing concern about climate change, and cites the hundreds of college and university presidents that have signed the American College & University Presidents' Climate Commitment and the significant increase in membership for AASHE over the past two years as evidence. Additionally, the article mentions a survey completed by the Princeton Review which found that two-thirds of prospective college students would value having information about a college or university's commitment to the environment. Nearly a quarter of those surveyed said it would strongly influence their decisions about where to attend.

2. Stanford to Establish Center for Advanced Molecular Photovoltaics
Stanford University (CA) has received a \$25 million grant from the King Abdullah University of Science and Technology to fund Stanford's new Center for Advanced Molecular Photovoltaics. The center aims to make solar electricity at a cost that is competitive with coal plants by constructing solar cells that are more efficient and last up to 10 years longer.

3. Colorado State U Pilots Smart Grid Technology
Colorado State University, in partnership with Spirae Inc, has developed the InteGrid Laboratory, which seeks to address challenges of taking intermittent wind power and turning it into a stable and reliable renewable resource. This "smart grid" project is being implemented in Denmark.

4. Appalachian State U to Install Wind Turbine
The Appalachian State University (NC) Renewable Energy Initiative has announced plans to install a 100kW community-scale wind turbine on campus. The turbine proposed for the project will stand 115 feet tall, will have a blade diameter of 66 feet, and is expected to produce 150,000 kilowatt hours of electricity annually. The organizers do not yet have a timeline for installation.
See also: List of Campus Wind Turbine Installations

5. Duke U Residence Hall Receives LEED Platinum
Duke University's (NC) Home Depot Smart Home, a 10-person student residence hall for green living and learning, has achieved LEED Platinum certification. The building features a green roof, solar cells, and rainwater cisterns. The Smart Home was designed to be adaptable, environmentally sustainable and technologically integrated. In addition to being built with recycled and sustainable materials, Smart Home boasts a fiber-optic network with the fastest Internet access on the campus, about 40 gigabytes per second.

6. Oklahoma State U Completes Energy Upgrades
The Oklahoma State University Center for Veterinary Health Sciences has completed energy efficiency upgrades to five buildings that are expected to realize approximately \$9 million in energy savings over the course of a 20-year performance contract with Johnson Controls, Inc. Based on a utility bill comparison, the project has already delivered more than \$154,000 in operational savings during the installation period. The savings are a result of upgrades that range from glazing windows and installing lighting controls to retrofitting the buildings' plumbing and air flow systems. Work began on the project in September 2006.

7. NYU to Pursue Re-use of Existing Buildings Rather than Build New
New York University President John Sexton and Manhattan Borough President Scott M. Stringer announced that NYU, elected officials, and

local community groups have agreed to a set of principles to guide the University's future expansion. As outlined, NYU, which projects a need for 6 million square feet of space over the coming decades, will pursue re-use of existing buildings before developing new facilities and will actively pursue academic and residential centers outside the Washington Square area. In addition, the principles are designed to emphasize contextual development, mitigate the effects of construction, enhance community consultation, and support community sustainability, such as preservation efforts aimed local retail businesses. As embodied in the principles, NYU will also engage in extensive community outreach for new projects, work to minimize negative effects of construction including noise and dust, and develop a relocation policy for legal residential tenants displaced by University projects.

8. Furman U Opens Green Cottage

Furman University (SC) has opened its Southern Living Showcase Home, Cliffs Cottage. The Cliffs Cottage was built to be a model of environmentally responsible design, sustainable building techniques and materials, and energy-saving systems. The building features bamboo flooring, insulated windows, rooftop solar panels, a rainwater collection system, and organic and formal gardens. The cottage is currently open for public tours.
See also: [Cliffs Cottage Homepage](#)

9. U Arizona Uses Ice to Cool Buildings

The University of Arizona has created the University Thermal Ice Storage Project, an award-winning chilled water production and distribution system that spends the evening and early morning hours freezing water that is then used to cool buildings across the main campus and at the Arizona Health Sciences Center. The system involves the use of water chillers, cooling towers, pumps and pipes that snake around the campus through underground pipes that connect the plants. The project can produce more than 900 tons of ice per hour and the pipes feed the melting ice, or cooled water, to campus buildings. The process moves the bulk of the UA's electrical load from the hot daytime hours to the cooler nighttime hours. UA recently received the Energy Efficiency Leader in Education Award from Trane for being one of a few institutions to have such a project up and running. And, just recently, the UA partnered with the American Society of Heating, Refrigerating and Air-Conditioning Engineers' Tucson chapter to begin teaching engineering students about chilled water technology and other heating and cooling processes.

10. Dalhousie U Switches to Green Cleaning Products

Dalhousie University's (NS) Facilities Management Department has begun using green cleaning products. The products, an all-purpose cleaner, a disinfectant and a degreaser, have been third-party approved with Canada's Environmental Choice logo and the United States' Green Seal certification.

11. U Waterloo Establishes Green Bus. Practices Research Chair

The University of Waterloo (ON) and Export Development Canada (EDC) have announced the creation of a new research chair, funded by EDC, to identify financial products and practices that will help companies engage in business practices such as socially responsible investing and integrate social and environmental performance measures into their business activities. The new chair will seek to identify tools companies can use to address environmental issues such as climate change and environmental sustainability in emerging markets. The EDC

Chair in Environmental Finance, based in the University's Centre for Environment and Business, will also help businesses identify new ways to commercialize "green" technologies and services as well as explore carbon financing and clean energy funds. The University will also hire an additional professor in a related field, to further expand its Centre for Environment and Business.

12. Purdue U Installs Energy Efficient Supercomputer

Purdue University (IN) has installed a new supercomputer designed to use up to 80 percent less energy and be more effective in some situations. The system is designed for high performance computing used in research supercomputers, and its processors draw 600 milliwatts of power each, compared to 25,000 milliwatts in standard supercomputers.

13. Iowa State U Increases Sustainable Food Purchasing

Iowa State University has completed its first year of the Farm to ISU program. Over the past year, ISU has spent approximately 10 percent of its dining budget on organic and local food products, which is 5 percent more than expected. 76 percent of dairy purchases, 0.2 percent of bakery goods and grocery items, and 3 percent of meat purchases were made through the Farm to ISU program last year, while 1.5 percent of the produce was local. Additionally, all of the honey was purchased locally, and some tea and spices were organic. ISU plans to continue and expand the program in the coming year.

14. Case Western Commits to Corporate Social Responsibility

Case Western Reserve University (OH), the city of Cleveland, and Cleveland Clinic have made a joint commitment to corporate responsibility towards the environment, human rights, labor rights and anti-corruption. The three organizations have become members of the United Nations Global Compact, an international initiative to promote responsible corporate citizenship. Cities, corporations, academic institutions, non-profit groups and other organizations join the compact to promote corporate citizenship to make business part of the solution to the challenges of globalization. By joining, these organizations voluntarily take responsibility for the impact of their activities on customers, suppliers, employees, shareholders, communities and other stakeholders, as well as the environment through sustainability and ethical business practices.

15. 3 NJ Campuses, SUNY New Paltz Donate Unwanted Items

Planet Aid held its first annual College Initiative this year, rescuing close 13,000 pounds of clothing and shoes. Rowan University, Montclair State University, Rider University, and the State University of New York in New Paltz students, faculty, and staff all participated in Planet Aid's event.

16. Natl Recycling Coalition Announces Recycling Bin Grant Winners

The National Recycling Coalition and The Coca-Cola Company have announced the recipients of their Spring 2008 Recycling Bin Grant program. 23 of the 75 grant recipients were colleges and universities. Recipients were chosen based on a number of criteria, including where bins are likely to have the most impact on recovering beverage containers from the waste stream, ability of recipients to sustain their program in the future, and intention to support collection programs with recycling education and promotion.

17. Clemson U Awarded for Commitment to Green Buildings

Clemson University's Habitat for Humanity chapter has been named Campus Chapter of the Year by Habitat for Humanity International. Its

campus chapter was selected for being a leader in green building practices. Last year the chapter sponsored a design contest with Clemson's Emerging Green Builders as a service-learning project for architecture, landscape architecture and construction science students. Students designed environmentally friendly houses, and the winning design, named "Green House," was constructed nearby. The chapter now is working on a house that will apply for LEED certification.

18. Appalachian State U Prof Receives Winds Advocate Award
Appalachian State University Professor Dennis Scanlin has received the "Small Winds Advocate of the Year" award from the U.S. Department of Energy Wind Powering America program for his leadership in small-scale wind energy activities in Western North Carolina. Dr. Scanlin is also a the Coordinator of the Appropriate Technology Program in the ASU Department of Technology.

New Resources

19. AASHE Digest 2007 - Annual Review of Campus Sustainability
AASHE has released AASHE Digest 2007, a publication that offers a comprehensive review of campus sustainability efforts from 2007. The 230-page report includes over 800 stories about higher education institutions leading the way to a sustainable future. It is organized into 24 chapters spanning education, research, campus operations, administration, and finance.
See also: <http://www.aashe.org/resources/pdf/aashedigest2007.pdf>

20. U Texas at Austin GHG Report
The University of Texas at Austin has released a draft report of its first carbon footprint analysis. The report has been prepared for the President's Sustainability Committee by an interdisciplinary student/faculty team through a summer course in the School of Urban and Public Affairs. It characterizes the university's greenhouse gas emissions in 2005, forecasts emissions in 2010 and 2020, then proposes a framework for setting reduction targets and develops reduction scenarios based on those targets. The report, produced in a very short time frame, is being issued in draft form so that members of the committee and other interested parties can participate in reviewing it. Comments are invited.
See also: List of Campus GHG Inventories

21. Sustainability in Business - Educational Video
Arnold Creek Productions, Inc. has released Naturally Successful: Entrepreneurship that redefines the bottom line, a new DVD that explores entrepreneurship from the perspective of the triple bottom line: businesses committed to economic, social and environmental measures of success. Eleven top experts, consultants and authors offer insights on building a values-driven business, providing meaningful leadership, achieving results beyond profits, serving customers, thinking long-term, seizing opportunities in new and existing markets, creating a thriving business and embracing a new type of capitalism. They cite numerous examples to explain why companies that are embracing green practices are experiencing outstanding growth, higher profits, lower risk and stronger brand recognition. A preview of the video is available online, and the full version can be purchased for around \$30.

Opportunities

22. Join US Youth Network at the UN Climate Negotiations, COP14
The SustainUS Agents of Change program is now accepting applications for its delegation to the UN Climate Negotiations, the Conference of Parties 14, to be held in Poznan, Poland this December. COP14 will determine the future of international policy on climate change, and this is an opportunity for youth to make their voices heard. The SustainUS delegation, comprised of key leaders in the youth climate movement from various organizations and backgrounds, will have the unique opportunity to represent American youth at the COP. Delegates will work with each other and with international youth in advance of the conference to educate themselves, develop policy priorities, acquire skills in effective lobbying, and engage the broader youth population in a conversation about international climate policy.

23. AASHE Student Sustainability Leadership Awards
AASHE is now accepting applications for the 2008 Student Sustainability Leadership Award, to be presented in November at AASHE 2008: Working Together for Sustainability - On Campus and Beyond. The Student Sustainability Achievement Award honors an undergraduate student from an AASHE member institution who has demonstrated outstanding leadership in promoting campus sustainability. Applications are due August 1, 2008. The Student Sustainability Leadership Award includes a \$750 prize. In addition, the winner of this year's award will be featured in Sustainability: The Journal of Record.

24. CFP: Climate Action Planning at US & Canadian Campuses
The International Journal of Sustainability in Higher Education (IJSHE) and the Association for the Advancement of Sustainability in Higher Education (AASHE) have announced a call for papers for a special issue of the Journal on climate action planning at campuses in the United States and Canada. Judy Walton, AASHE's Acting Executive Director, will guest edit this special issue. Submitted articles must be between 2,000 and 4,000 words in length. The closing date for submissions is August 29, 2008.

Jobs & Internships

25. Climate Program Manager, AASHE
AASHE, the Association for the Advancement of Sustainability in Higher Education, seeks a Climate Program Manager to lead AASHE's efforts to support signatories of the American College & University Presidents Climate Commitment (ACUPCC). A bachelor's degree in a related field is required (graduate degree preferred). Applicants should also have 5+ years experience in energy management and/or emissions mitigation. Review of applications will begin on July 2nd, and will continue until the position is filled.

26. Director, Rachel Carson Institute and Sustainability, Chatham U
Chatham University (PA) seeks a Director for its Rachel Carson Institute who will also assume the responsibilities of Director of Sustainability for all Chatham campuses. The ideal candidate will be an excellent communicator who will lead collaboration and communication among all constituencies; be creative and energetic; have advanced knowledge of environmental issues; and have substantial experience in leading an organization that develops outreach activities to complement academic programs. This individual will lead the President's Climate Committee, will be responsible for sustainability policies and efforts at all campuses, and will coordinate the environmental and sustainability efforts of all Chatham

constituencies. This position will report to the Vice President for Academic Affairs. Extensive knowledge of sustainability issues and practices is required as well as at least five years of administrative experience in a university or related setting. Deadline for receipt of applications is July 7, 2008.

27. Director, Sustainability Programs, Iowa State U
Iowa State University seeks a Director of Sustainability Programs to work with university units to develop and coordinate a process leading to creation of sustainability standards and policies that can be implemented at an institutional level; serve as a member of the President's Advisory Committee on Energy Conservation and Global Climate Change and act as a liaison to decision making bodies, such as the ISU Council on Sustainability and student groups to provide information about sustainability issues and initiatives that will promote sustainability at Iowa State; and serve as the coordinator of the Sustainability Program's Revolving Loan Fund. A Bachelor's degree and a minimum of five years experience implementing environmental or sustainability programs are required. Applications are due July 18, 2008.

28. Director of Sustainability, U Alaska, Anchorage
The University of Alaska, Anchorage invites applications for the full-time position of Director of Sustainability. Reporting to the Vice Chancellor of Administrative Services, the Director will lead UAA's Office of Sustainability, consult with members of UAA's executive leadership team, and work with the Sustainability Council which serves as an advisory board. Responsibilities include creating, enhancing, supporting, and leading existing and new sustainability programs and initiatives, promoting waste and carbon footprint mitigation, providing oversight for UAA's recycling program, and promoting sustainability on campus, locally, and regionally through educational outreach. The Director will work closely with students, faculty and staff to conduct programs on sustainability and work to foster collaboration across the areas of teaching, research, campus operations, student life, and community service. Qualifications include a Bachelor's degree in a related field of study or equivalent combination of training and experience. Review of applications will begin July 22, 2008 and will continue until the position is filled.

29. Director of Sustainability, U Chicago
The University of Chicago (IL) seeks a Director of Sustainability to integrate sustainability practices into the operational and educational functions of the university; incorporate sustainability principles into Chicago's current capital program; implement education, training and other programs; and manage a communication plan to include website and other media. A Bachelor's of Science degree in Environmental Science or a related degree with an environmental focus is required. A Master's degree and LEED accreditation is preferred.

30. Sustainability Coordinator, UCLA
The University of California, Los Angeles seeks a Sustainability Coordinator to work with all elements of the campus community to communicate and further the goals and initiatives of the campus sustainability program, foster partnerships among academic, research and operational departments to further campus sustainability goals. Other responsibilities include establishing and maintaining an effective communication strategy, and developing and coordinating education and outreach programs in support of UCLA's sustainability,

energy management, and resource conservation programs. A Bachelor's or Master's degree or equivalent in an appropriate field is required. The application deadline is July 7, 2008.

31. Sustainability Manager, U California, Davis

The University of California, Davis invites applications for Sustainability Manager within the newly created Environmental Stewardship and Sustainability group in the Office of Resource Management and Planning. The Sustainability Manager is a new position that will provide leadership, analysis and program recommendations to the Assistant Vice Chancellor for Environmental Stewardship and Sustainability, to campus executive leadership, and to the campus community for development of a program that will achieve sustainability goals. One of the first and most important duties of the sustainability program is the development of a Climate Action Plan for reducing greenhouse gas emissions. Qualifications include knowledge and significant experience in environmental planning, environmental science, physical planning or a related field with an emphasis on sustainability. The review of applications will begin July 7, 2008 and continue until filled.

32. Recycling Manager, Southeastern Louisiana U

Southeastern Louisiana University invites applicants for the position of Recycling Manager for the Physical Plant. Qualifications include experience in management, budgeting, and writing grants and reports; experience with MS Office and creating and maintaining web pages; and a Bachelor's degree in Science, Environmental Studies, or a related field. A Master's degree is preferred. Responsibilities include researching and developing a recycling program on campus; maintaining, managing, promoting, and improving the recycling program; and writing grants to help expand the program. Applications are due July 7, 2008.

33. Student Activities Coordinator, MIT Energy Initiative

The MIT Energy Initiative is seeking a Student Activities Coordinator to be responsible for the timely planning and implementation of projects to advance MITEI objectives in student networking, energy education, and related outreach. Other responsibilities include maintaining and strengthening relationships with energy, environment, and sustainability student groups, including organizing student leader networking events, providing guidance to student groups and student projects on project planning, and participating in selected events and activities. A Bachelor's degree in a related field is required.

Events

34. Webinar - Utilizing Performance Contracting to Meet the ACUPCC
July 8, 2008; 1pm Central; Online

T.A.C. is hosting "Utilizing Performance Contracting to Meet the Presidents' Climate Commitment," a free, one-hour webinar followed by a questions and answers session. The webinar aims to demonstrate how a performance contract can help signatories achieve climate neutrality. Topics to be covered include establishing a carbon footprint using Clean Air Cool Planet's Campus Carbon Calculator; identifying and evaluating mitigation strategies; developing meaningful reports and meeting program deadline requirements; and evaluating funding options for implementing improvements on campus.

35. CFP - Fifth World Environmental Education Congress

May 10 - 14, 2009; Montreal, QC

The Organizing Committee of the 5th World Environmental Education

Congress invites submissions for abstract proposals. The presentations may be in the form of a poster, oral, or round table presentation, or a workshop or NGO forum. Themes include relationships between ecology and economy; the issue of sustainability; questions of fairness in socio-ecological issues; environmental health; urban challenges; greening colleges and universities; school and community; and more. Each participant is limited to a maximum of two proposals. The deadline for presentation submissions is September 30, 2008. The deadline for presenter registration is February 1, 2009.

36. Greenbuild 2008

November 19 - 21, 2008; Boston, MA

The U.S. Green Building Council will host its 2008 Greenbuild International Conference and Expo - Revolutionary Green: Innovations for Global Sustainability. USGBC's Greenbuild conference and expo is an opportunity to connect with other green building peers, industry experts, and influential leaders as they share insights on the green building movement and its diverse specialties. Speakers include Archbishop Desmond Tutu, E.O. Wilson, and Janine Benyus. The conference will feature over 100 educational sessions, LEED workshops, off-site educational sessions. Students, universities, and professionals are invited to attend. The early registration deadline is September 8, 2008.

37. Practical Steps to Zero Waste Webinar

July 15, 2008; Online; 12pm EST

The National Recycling Coalition and the College and University Recycling Council (CURC) will host "Practical Steps to Zero Waste," a webinar that will answer some of the basic questions about the zero waste concept. The production will also provide examples of schools that are working to implement policies and practices that move them closer to that ultimate goal. The webinar will be moderated by Christine von Kolnitz Cooley, the Sustainability Manager at the Medical University of South Carolina. Presenters include Rob Gogan, the Recycling and Waste Manager at Harvard University (MA); Jack DeBell, board member of CURC; and Pete Pasterz, founder of CURC.

Subject Re: Campus Environment Committee 

Gil-

President Kenny is aware of the concept of regional planning for energy use. She has a copy of the related University Senate motion voted on when you gave your excellent report. Her staff under Barbara Chernow is already engaged in regional transportation planning and implementing some solar methodologies proposed by the electric company. You may recall that I prevailed on Amy Provenzano to come to the University Senate meeting in April to present the status of the several projects they have under way. That belongs in your summary to the CEC.

The smoking policy issue is more complicated. The GSO passed a resolution asking Dr Kenny not to implement the policy that the University Senate passed and she is considering the issues.

If you look at the "substitute motion" that the University Senate passed, you will see that it contained only the matter of distance from the buildings and the requirement for early review of progress. None of the other elements of your committee's motion such as the smoke-free mall or an education policy were in it.

As you may have surmised, I was not the author of the substitute motion and I was not in favor of presenting it but I was out-voted. I particularly didn't think that it should be made as a substitute motion since all that was needed were a couple of one-word amendments to the CEC motion. Substitute amendments create a need to go by strict parliamentary rules because they can lead to crafty in-fighting.

I took at face value the idea that the author of the EC motion had mirrored the Smoking Policy subcommittee's motion and I did not study its actual wording as read out by Aimee De Chambeau.. Issues like a smoke-free mall and an education program were in fact in the subcommittee's motion and not in the motion that the University Senate passed. They were also not all in the GSO motion that Louis distributed at the meeting. That confused me. When I offended you by saying that your committee had not done anything, I was in fact talking about the policy as adopted.

We will have to make another try in the Fall to get the subcommittee's motion adopted by the University Senate. As you said during the Coordinating Council meeting in April, it was good enough and represented a lot of work.

-Bernie

Subject Campus Environment Committee

Bernie,

The Campus Environment Committee is having the last meeting of the Academic Year on Tuesday June 17. I would like to report on the progress of the resolution on the University playing a larger role in regional planning and the Smoking Policy both of which were passed by the University Senate this year. Have they been submitted to the Administration and if so, any reactions?

Subject Meeting Tuesday May 20

Usually we do not meet during the last month of the semester. We did set up a meeting for Tuesday May 20. Please let me know if there is a compelling reason why we should meet. Otherwise we will meet the third Tuesday in June.

The University Senate met last Monday and voted in favor of the proposed Campus Smoking policy with is attached with an amendment prohibiting smoking within 50 feet of entrances and within 20 feet of buildings and that the policy should be reviewed by the CEC after one year.

Gil,

Re: Suffolk County Bottle Bill. Both Malcolm and Shirley (see below) have now suggested that we bring the use of plastic water bottles to the University Senate with the hope that they would endorse trying to back away from use, at least at official functions. If we're really lucky perhaps we can get them to not be sold at Chartwells/Campus Dining Services. Any suggestions you have would be appreciated.

Thanks,
Larry

Subject Re: Suffolk County bottle bill 📎

I think actually we've used up our supply of Stony Brook water. I don't use water in plastic bottles myself when it can be avoided, so I certainly agree with your sentiment. I can ask our lawyers to look the suggestion over, but I wonder if it isn't better just to go to the Senate so there will be a buy-in. The other possibility is to talk to Chartwell's about having other water available.

Robert Swanson/MSRC

Robert Swanson/MSRC

Subject Suffolk County bottle bill

Dear Dr. Kenny:

Attached is an email from Suffolk County announcing the new law passed by the legislature banning the use of plastic drinking water bottles for much of Suffolk County's official business and in its facilities. This law, sponsored by Vivian Viloría Fisher, is in part an outgrowth of an Op-Ed piece (attached) that Christine O'Connell (a SoMAS Ph.D. candidate) and I wrote for *The New York Times* on Earth Day 2007. The law is being forwarded to County Executive Levy for his signature. It is anticipated that he will sign it.

The reason that I am passing this on is to request that SBU establish a similar policy for this campus, the Southampton Campus, etc. If we did proactively adopt such a policy, it would probably be a first for SUNY campuses. It would be a great way to show our commitment to reducing our carbon footprint and a good advertisement of our sustainability goals. It would also reduce the volume of our waste stream and hence contribute to a reduction in waste hauling expenditures. We in WRMI have noticed that at campus-catered events, Stony Brook-branded bottled water is served. In our office, we are now using reusable pitchers filled with tap water for events to reduce waste.

I would be willing to work with whomever you choose to draft such a policy for the campus.

Sincerely,
Larry Swanson

Subject Report of the Smoking Policy Subcommittee of the Campus Environment Committee

Hi Gil,

I read the report of the Smoking Policy Subcommittee of the Campus Environment Committee (CEC), and specifically the proposal that it wishes to present to the University Senate after, I assume, it is vetted and approved by the CEC. In connection with that proposal, I have a few suggestions for the CEC to consider when considering the subcommittee's proposal: (1) The change from the 15-foot prohibition of all building entrances to a 20-foot prohibition is essentially no change at all. That distance will still leave a residue of dangerous and unhealthy second-hand smoke through which non-smokers have to walk to get in or out of a building. On the East Campus, the required distance is 50 feet, which makes much more sense. (2) Allowing a new policy to stay in place without reviewing it for five years is tantamount to nothing more than a delay in considering any necessary changes. A trial period of one year would be a much more appropriate and responsible approach. (3) While it need not be part of a proposal, the CEC should be clear how the "impact and effectiveness" of the new policy would be gauged and include that in any discussion of the proposal if it is presented to the University Senate. (4) In the prior discussion of this issue in the University Senate, it was pointed out that there needs to be better signage regarding the appropriate distance smoking can occur with respect to building entrances, placement of appropriate receptacles at the required distance, and increased enforcement of existing and any proposed new policy. I don't see any reference to any of these in the proposal.

I would appreciate the CEC considering these issues as it discusses the report of its subcommittee.

Cheers,

Norm

P.S. I find it interesting that there were no faculty on the subcommittee.

Subject Re: Senate Meeting

Our department's rep to the senate just sent around an email that "For the first time I felt that something did come out of the University senate meeting yesterday." Her comment was in response to Gil's presentation and the ensuing discussion. I would like to commend the committee for its great work on making on improving the University and let you know that at least a few members of the University community appreciate all your work. Kudos to the administration as well, since much of the progress we are seeing is due to initiatives from Barabara's and Amy's offices.

Ramona

Subject Senate Meeting

The presentation on "**Why Stony Brook University should take on a Regional Environmental Leadership Role**" was very well received yesterday. The senate voted without dissent to approve the following Guiding Principles.

Why Stony Brook University should take on a Regional Environmental Leadership Role Guiding Principles

Stony Brook University will

- commit to making regionally impacting decisions in collaboration with impacted entities, rather than unilaterally.
- earnestly work to solve its own local problems using solutions and partnerships that extend beyond its campus borders.
- identify environmental problems in the community that, with our unique status, resources and size, we can take a lead in solving.

I have attached the presentation as a pdf file.

Bernie,

Yes I do plan to make a presentation at the Dec. 10 University Senate meeting on

"Why Stony Brook University should take on a regional leadership role"

It will be a ppt presentation.

Peter Baigent informed me that the President is already making plans to do this. I am meeting with Peter Baigent next Monday to discuss what these plans are hopefully could include these in the presentation.

I can provide a short summary of the presentation to accompany the title after our meeting.

Subject: presentation at Univer Senate mtg 12-10-03

Gil-

Do you still plan to make a 10 minute presentation at the December 10th University Senate meeting? If so, we will need a short title for the agenda. The Senate has a laptop and projector so you can build you talk around a power point if you want to. We can also distribute copy electronically or as paper. Laurie will help you with the facilities and handouts.

I thought that what you showed us at the Coordinating Council was very interesting and will generate heated discussion by the Senate as it did at the Council. The topic might in itself attract an audience at the Senate meeting if we give it advanced billing so the title and/or the electronic distribution matters.

If you want to talk about this, I am at 4-2224.

-Bernie

Subject Re: Charge

Ramona et al:

The reason I bring these issues up is that I believe there are major environmental crises looming on our campus. In my opinion the property is reaching its limit as to how much the ground can absorb precipitation (we cannot funnel runoff into the sewer system, which after treatment, flows into PJ Harbor).

The recharge basins near the train station burst some 15 years ago and flooded Hwy 25A, sending huge amounts of water into the Village. Fortunately, no one was drowned, but a train wreck was averted when someone stopped the eastbound train at St James. In September 2005, the adjacent Mann Canyon (located next to the train tracks) filled to its brim with water, and according to Richard Mann, came within 6" of overflowing. Consequentially it was drained at great expense and is currently not being used.

Campus growth means more students, more faculty, more staff, more cars, more parking needs, more buildings, more roads and paved areas, all with consequences for land use and runoff management.

Sewage disposal is another big headache. This could be covered under "waste management" although that term is sometimes restricted to solid waste, radioactive waste, but not sewage. We could change the descriptor to "water and waste management".

Climate neutrality. I agree this could be covered under "conservation", although the implications of the Presidents' Climate Commitment are profound. For example, every tree, every photosynthetic natural area and every manicured lawn becomes a key component in trying to balance the campus carbon budget. It puts conservation in a whole new light; from just protecting pretty areas, to fighting climate change by CO2 sequestration.

We live in interesting times!

Malcolm.

On Nov 27, 2007 9:14 AM, Ramona Walls <rwalls@life.bio.sunysb.edu> wrote:

I think that we need to exercise some restraint in what we include in the charge. If we specify every task we plan to cover, we run the risk of being too specific. This then would allow future committees to say they can't deal with an issue because it is not included in the charge. I do think it is important that we expand our charge to include more of the

tasks we actually deal with, but it is also important that the charge be general enough to allow the flexibility to address future, unpredictable problems. We have already proposed that we deal with conservation of natural areas, energy efficiency and waste management, which cover the three topics Malcolm proposes (sewage treatment and disposal, runoff management, and climate neutrality).

Since our proposed charge does cover those three topics, we are free to address them at future meetings.

Subject Re: Charge

Gil:

Since we drafted the new CEC (soon to be UEC) charge, new challenges have appeared:

1. Sewage treatment and disposal. Suffolk County always wants us to reduce nitrogen loading from sewage discharges into Port Jefferson Harbor. How to effectively manage sewage wastes from an ever expanding university community?
2. Runoff management. We have to manage all storm water runoff within the perimeters of our various properties. More students, faculty and staff means more parking lots, more buildings, less natural vegetation to absorb runoff, with threats of catastrophic failure of recharge basins.
3. Climate neutrality. President Kenny recently signed the American College and University Presidents' Climate Commitment <www.presidentsclimatecommitment.org>. This commits us to:

- i) initiate the development of a comprehensive plan to achieve climate neutrality as soon as possible;
- ii) initiate two or more tangible actions to reduce greenhouse gases; and
- iii) make the action plan, inventory and periodic progress public.

These are profound and enduring challenges, which if taken seriously will commit us to many changes in the way we use energy, conserve natural areas and green space (CO2 abatement), commute, recycle, treat wastes, develop renewable energy sources, etc. If taken seriously, everything we do will have to change.

I believe we should weave the three issues listed above into the charge before submission to the Senate Executive Committee.

Malcolm.

Subject Charge

Bernie,

The following is the new charge and name change for the Campus Environment Committee. How do we go about getting it adopted?

Gil

We recommend that the "Campus Environment Committee" should be re-named the "University Environment Committee." The latest revision of our charge is

Recommended University Environment Committee Charge:

This committee shall examine all aspects of the university environment, including but not limited to conservation of natural areas, ecological preserves, and historical landmarks, transportation and parking issues, infrastructure, facilities planning, human health issues, safety and security, energy efficiency, recycling and waste management, and general appearance of the University. This committee will consult with and advise the Vice-president for Facilities and Services.

Subject Re: University Leadership in planning

As I discussed with Gil and Ramona, it might be a good idea to put a reference to the Advanced Energy Research and Technology Center that just had its ground-breaking ceremony at the R&D campus, possibly on a slide that highlights what Stony Brook is already doing in this direction. Some points for a slide:

- The AERTC is being designed to obtain a LEED Platinum rating
- Its overall goal is research into advancing energy efficiency in environmentally sensitive ways, with initial emphasis in these directions:
 - Direct solar energy, using photovoltaics
 - Biofuels
 - Energy-efficient lighting
 - Fuel cells and more efficient transportation systems
 - More efficient power transmission systems (strongly supported by National Grid -- formerly Keyspan)

John (Murray)

Dear All,

In March 2007, Lee Koppelman published the "Third Nassau and Suffolk Counties Comprehensive Plan, 2000-2030." I have a copy in the University Archives and can bring it to the meeting on November 15. SBU's influence on the region is noted throughout the plan. If anyone would like to consult it prior to the meeting, please contact me.

Subject Campus Environment Committee

I met with the Executive Committee of the University Senate at Coordinating Council meeting yesterday where I presented the recommendation that the Senate Request that "Stony Brook University should be a leader in developing a regional master plan." I also presented our Recommended Campus Environment Committee charge. There was enthusiastic support for these two items. I have been asked to make presentation to the full Senate on December 10 on both items.

They would like us to develop more fully what should be in the Regional Master Plan, which should do at the November 15 meeting of Campus Environment Committee. It would be useful if we would discuss this by e-mail before. So send out some ideas.

While we have reviewed the Recommended Campus Environment Committee Charge several times. Please look at it again. Once it is approved this committee will be living with it for quite a while. For the presentation I would also need to state how many might be represented on the committee from the Research and Development Park and Southampton. Do we need to include someone from Manhattan? These considerations are important because other committees will also need to think about how the other campuses will be represented on their committees. We are the first committee to directly address representation of the other campuses.

Recommended Campus Environmental Committee Charge:

This committee shall examine all aspects of the campus environment, including but not limited to conservation of natural areas, ecological preserves, historical artifacts, transportation, parking issues, infrastructure, facilities planning, human health issues, safety and security energy efficiency, recycling, waste management, and general appearance of all campuses. It will consult with and advise the Vice-president for Facilities and Services.

great news, Gil, thank you!

I still have some concerns about how the charge itself reads, insofar as it now gives the sense that this committee has oversight and responsibility of all the items mentioned, which I don't think is the intent. It's my understanding that we essentially act in an advisory capacity on many of the issues, ie, parking and transportation, because we don't set policy. We do of course, have a responsibility to bring concerns to the attention of the VP for Facilities, and where possible, make recommendations for corrective measures. I just don't want there to be an misconception down the road that we can, and should, do more than we really have the "power" to do.

Perhaps we can clarify it all by restating the last sentence to read that "... the committee will consult with and advise the VP for Facilities on the aforementioned matters and work with the office of the VP to reach mutually agreeable solutions"?

thanks for your consideration,

Campus Environment Committee

Draft Agenda for Thursday October 18 Meeting
1:00 p.m. Room 221 Administration

Introductions - all

Review of the Minutes - Ramona Walls for Nick Koridis

Status Report

Environmental Master Plan - Barbara Chernow
Developments at Southampton – Barbara Chernow
Developments at the Research and Development Park – Barbara Chernow
Campus Sustainability Task Force - Amy Provenzano
Recycling on Campus - Amy Provenzano
University Safety Committee – M. Hotaling
Parking and Transportation Subcommittee -- R. Walls, P. Siegel, B. Dethlefs and M. Hotaling

How do we move forward on?

Parking and Transportation
Stony Brook University should be a leader in developing a regional master plan.
Extend bike paths and sidewalks on and off campus.

Subcommittee Reports

Smoking -- Bill Dethlefs, Bill is leaving for El Paso
Friends of the Ashley Schiff Park Preserve –

Other - All

Next Meeting - All
Adjourn

Recommended Campus Environmental Committee Charge:

This committee shall examine all aspects of the campus environment, including but not limited to conservation of natural areas, ecological preserves, and historical artifacts, transportation, parking issues, infrastructure, facilities planning, human health issues, safety and security energy

efficiency, recycling, waste management, and general appearance of all campuses. It will consult with and advise the Assistant or the Vice-president for Facilities and Services.

Subject Fwd: Recommendations for 5 year plan from Environmental
Club

----- Forwarded message -----

From: **Justin Grimm-Greenblatt** <jgrimmgr@gmail.com>
Date: Oct 1, 2007 4:38 PM
Subject: Recommendations for 5 year plan from Environmental Club
To: Emily.Thomas@sunysb.edu, skenny@notes.cc.sunysb.edu, Shirley.Kenny@stonybrook.edu
Cc: "aprovenz@notes.cc.sunysb.edu" <aprovenz@notes.cc.sunysb.edu>

Dear President Kenny and Ms. Thomas,

Below are the recommendation the Environmental CLub would like to propose for the 5 year plan part 11 "Support Sustainableity Through a Green-Campus initiative."

Comments on Goal 11 of the Draft Five Year Plan:

- On Expanding Eco-literacy:
 - o Place environmental facts & tips around dining area
 - o Place a sticker on how to recycle and save energy on the back of each door in the residence halls
 - o Integrate eco-literacy into freshman classes and intro writing classes, as well as orientation
 - o Publicize Recyclemania more, possibly by making it into an inter-campus or inter-quad competition

- Fossil Fuel Reduction:
 - o Install more motion detectors for residence halls and academic buildings to reduce energy usage
 - o Install individual thermostats for classrooms and residence halls
 - o Reward commuters that use mass transit or ride bikes to campus
 - o Buy 30% green energy
 - o New campus buses should run on 100% vegetable oil
 - o Add carbon offsets to business flights for staff and faculty
 - o Create preferred parking for "clean pass" vehicles
 - o Create literature on bicycle-riding safety tips and where you are allowed to ride your bike
 - o Build a storage facility for food storage and to reduce daily transportation of food
 - o Make sure sprinklers are not facing bike racks and add weather barrier to bike racks.

- o Use street lamp lights with LED lights.
- Sustainable Practices in Construction & Maintenance:
 - o Clean up construction debris
 - o Plant trees to replace ones being cut down due to construction
 - o Plant additional 500 trees per year on campus.
 - o Buy wood from sustainable companies
- Green Computing Policy:
 - o Create default duplex printing; establish test area to try out settings
 - o Set Pharos system to print out one cover page per student, not per file, or create a default header instead of cover page
- Water Reduction:
 - o Rain detectors for the sprinkler system
 - o Low-flow sinks and showerheads
 - o High-efficiency washers and dryers; place signs in laundry room on how front-loading machines work
- On Increasing Recycling and Resource Conservation:
 - o Use reusable utensils and plates
 - o Buy cellulose-based containers
 - o Discontinue use of Styrofoam containers and aluminum
 - o Create separate rooms for trash and recyclables
 - o Place redemption machines on campus
 - o Create trash receptacles for hazardous waste, such as batteries, cell phones, etc.
- Other Comments:
 - o Use less pesticide, or use bacteria to create self-sustaining lawn
 - o Use local plants in gardening
 - o Increase awareness on how printer cartridges and toners can be recycled

Thank you for taking time to look over these.

Justin Grimm-Greenblatt

Subject Comments on Draft

Shirley,
Members of the Campus Environment Committee are providing you with the following Comments on the Draft Five Year Plan.
Gil

Draft Five-Year Plan: 2007-2012

The Draft Five-Year Plan recognizes SBU's status as "one of America's great research Universities (p.3) and as one that will "continue to develop its role as greater Long Island's research university, supporting a robust regional economy and contributing to a vital regional community, with *a focus on environmental sustainability* (p.3., italics added). However, SBU currently has a very large negative impact on the regional environment and quality of life, particularly in terms of traffic, but also on other dimensions such as housing, waste effluence, trash generation, and greenhouse gases emissions. It is well known that SBU's reputation as a neighbor to the surrounding communities and environmental steward is a poor one. The planned increase to 27,000 students, and associated increases in staff and faculty, will only serve to intensify these impacts. Furthermore, it is the role of great universities to show society the way to new and better ways of living, and this is a unique time for SBU to finally come into that role.

The goal of Priority 12 of the Draft Five-Year plan ("Support sustainability through a green campus initiative") is a significant step in the right direction. However, it does not reach far enough in that all of its action items are limited to simply adjusting the level (e.g. "increase, "decrease", "expand") of initiatives that are already underway. While laudable, they are modest, and shortsighted. Rather, SBU has the unique ability to play a leadership role because of our size, stability, intellectual and financial resources. SBU should work to bring together the many key players in the regional and state economy and government, in order to work in a coordinated manner not otherwise possible. Because SBU is a recognized regional and local entity, we have the clout as well as the intimate knowledge and sensitivity of our community not held by state or federal agencies. Regional environmental problems cannot be solved by uncoordinated, piecemeal efforts. SBU is in the ideal position to provide the needed leadership and coordination on Long Island. SBU needs to think outside the limits of our campus borders and five year time horizon in order to embrace this role.

Therefore, we call upon the University to include the action item under the Five-year plan of:
Stony Brook will initiate and lead the regional community in producing and implementing a long-range, regional master plan.

This plan will apply the most modern planning methods, including "form based planning", and other techniques designed to involve the regional community in developing a shared vision of

how they would like greater Long Island to be in 10 to 30 years. This will include developing sustainable transportation, waste management, housing, open space preservation, and other policies in an integrated manner, and then shepherd the implementation of these policies over the long term. Determining the specifics is a major part of this process, so the first step simply involves the bringing together of the relevant parties to achieve consensus needed to move forward. This could be done within the year and could dovetail on the momentum created by the decision of the University to become a zero-carbon emissions campus.

Subject Regional Master Plan for 5 year plan

John Robinson has drafted the following to be sent to Pres. Kenny representing the Campus Environmental Committee's response for the need of the University to lead in developing a Regional Master plan. Please send me your responses, comments, edits.
Gil

Draft Comment on Draft Five-Year Plan: 2007-2012 27 Sep 2007 J. Robinson

The Draft Five-Year Plan recognizes SBU's status as "one of America's great research Universities (p.3) and as one that will "continue to develop its role as greater Long Island's research university, supporting a robust regional economy and contributing to a vital regional community, with *a focus on environmental sustainability* (p.3., italics added). However, SBU currently has a very large negative impact on the regional environment and quality of life, particularly in term of traffic, but also on other dimensions such as housing, waste effluence, trash generation, and greenhouse gases emissions. It is well known that SBU's reputation as a neighbor to the surrounding communities and environmental steward is a poor one. The planned increase to 27,000 students, and associated increases in staff and faculty, will only serve intensify these impacts. Furthermore, it is the role of great universities to show society the way to new and better ways of living, and this is a unique time for SBU to finally come into that role.

The goal of Priority 12 of the Draft Five-Year plan ("Support sustainability through a green campus initiative") is a significant step in the right direction. However, it does not reach far enough in that all of its action items simply adjust the level (e.g. "increase, "decrease", "expand") initiatives that are already underway and are limited to. In no way do these action items attempt to have the University *lead* the regional community. While laudable, they are modest, uncreative and shortsighted. Because of its size, stability, intellectual and financial resources, SBU has the unique ability to bring together many players in the regional and state economy and government, to work in a coordinated manner not possible otherwise. But being a regional entity, SBU also has the local clout, regional sensitivities, and intimate knowledge of the community not held by state or federal agencies. Regional environmental problems cannot be solved by uncoordinated, piecemeal efforts, and the needed coordination can best be provided by a regional leader. SBU is the only entity that can provide this on Long Island, but SBU needs to think outside of its campus borders and its one or even five year time horizon in order to embrace this role.

Therefore, we call upon the University to include the action item under the Five-year plan of:

Stony Brook will initiate and lead the regional community in producing and

implementing a long-range, regional master plan.

This plan will apply the most modern planning methods, including “form based planning”, and other techniques designed to involve the regional community in developing a shared vision of how they would like greater Long Island to be in 10 to 30 years. This will include developing sustainable transportation, waste management, housing, open space preservation, and other policies in an integrated manner, and then shepherd the implementation of these policies over the long term. Determining the specifics is a major part of this process, so the first step simply involves the bringing together of the relevant parties to produce the consensus needed to move forward. This could be done within the year and could dovetail on the momentum created by the decision of the University to become a zero-carbon emissions campus.

I thought that members of the committee who are not already familiar with the new 600 bed dormitory site and design might be interested in the attached figure published from the SEQRA report of 23 July (site preparation began in August). To my knowledge it is not yet posted on the facilities and construction websites.

Subject Re: Fw: Wednesday Walk

Dear Friends of Ashley Schiff Park Preserve (FASPP):

Yesterday I accompanied 2 distinguished brothers and SBU alumni in a stroll through the preserve. [Vincent Gallucci](#) was a 1963 graduate of Stony Brook University's Physics Dept., and is now the Wakefield Professor of Ocean and Fishery Sciences with the [School of Aquatic and Fishery Sciences](#) at the University of Washington. He delivered the Provostial lecture at SBU on Monday on **Sharks in Perspective: Predators, Prey, and Art History**. See <<http://ws.cc.stonybrook.edu/sb/provlec>>.

His brother is Robert Gallucci, Dean of the School of Foreign Service at Georgetown University <<http://explore.georgetown.edu/people/galluccr/>> and a former Assistant Secretary of State in the Clinton administration <http://en.wikipedia.org/wiki/Robert_Gallucci>. Robert was also a graduate of Stony Brook University ('67) and a former student of Ashley Schiff. He is a donor to the Ashley Schiff Preserve Scholarship Fund.

Their father Samuel worked in the SBU Physics Department stockroom from 1969-78.

Vincent and Robert were delighted with the preserve and I was able to share our maps and forest guides with them. Robert hopes to return for Wolfstock Homecoming on October 19 - 21 <<http://ws.cc.stonybrook.edu/communicatio/Homecoming/>>. We might try to meet with Robert as a group during that visit.

Malcolm.

Subject Wednesday Walk

Mary, can you forward this to the rest of the committee?

This morning, Wednesday Sept 19, we began the Weekly Wednesday Wellness Walk in the Woods. We met at the Trail Head of the Ashley Schiff Preserve and headed into the woods at 8:02.

We did 4 laps of the preserve in 50 minutes. (This was taking the "Poison Ivy Path", the shortcut between the two north and south trails, instead of walking out into the parking lots at South Campus.)

Do we have a mileage estimate for the trail? I would guess that I covered about 2.75 miles, one lap being about .70 miles.

Doing laps works really well, because then latecomers can participate by catching up with us, and we can notice different things each time we go around. If slower walkers show up, we can aim for 3 laps instead of 4.

Today I was the only walker, because advertising hasn't gotten out yet. But that's fine. "Build it and they will come."

I can't wait until next week! Hope you will join us!

Margaret

Subject Draft Agenda for Sept 20 CEC meeting

Following is a draft agenda for tomorrows meeting. Please send me any proposed changes.
Gil

Campus Environment Committee

Draft Agenda for Thursday September 20 Meeting

1:00 p.m. Room 221 Administration

Introductions - all

Review of the Minutes - Ramona Walls

Election of Chair, Vice Chair and Recording Secretary for 2007-2008

Status Report

- Effluent from County Sewage Plant on Campus – Barbara Chernow
- Environmental Master Plan - Barbara Chernow
- Developments at Southampton – Barbara Chernow
- Developments at the Research and Development Park – Barbara Chernow
- Campus Sustainability Task Force - Amy Provenzano
- Recycling on Campus - Amy Provenzano
- University Safety Committee – M. Hotaling

New Business

- What items should be of major concern to the committee for the coming year?—All
- Suggestions from the August 27 meeting
 - Parking and Transportation
 - Stony Brook University should be a leader in developing a regional master plan.
 - Extend bike paths and sidewalks on and off campus.

Subcommittee Reports

- Smoking -- Bill Dethlefs
- Friends of the Ashley Schiff Park Preserve – Mary LaCorte

Other - All

Next Meeting - All
Adjourn

Recommended Campus Environmental Committee Charge:

This committee shall examine all aspects of the campus environment, including but not limited to conservation of natural areas, ecological preserves, and historical artifacts, transportation, parking issues, infrastructure, facilities planning, human health issues, safety and security energy efficiency, recycling, waste management, and general appearance of all campuses. It will consult with and advise the Assistant or the Vice-president for Facilities and Services.

Subject CEC August minutes draft

Attached, please find the first draft of the August minutes. If possible, send me changes before Thursday's meeting. Please see my questions as throughout in italics, and answer if possible.

Since we are voting on officers at the next meeting, let me say that if someone else is willing to take over as secretary, I would be happy with that.

Thanks,
Ramona

Subject Campus Environmental Committee

Bernie,

The Campus Environmental Committee met today and decided that oversight of Critical Incident Management is too large for our committee to handle in addition to our other environmental issues. We recommend that the University Safety Committee be rejuvenated and include oversight of the Critical Incident Management efforts on campus and that another Senate Committee be set up to interact with that committee. Because Safety and Security are part of our agenda we would also have a committee member participating with these committees, who would report to us regarding these issues. Mary Hotaling has agreed to do this.

Gil,

I regret that another commitment will prevent my attendance at this meeting, as I feel very strongly about this issue. I can tell you that I am personally aware of another software program that is available and in use on a number of campuses as well as with the US Army and some state Governments. The company is Great American Technologies, based in Newark, an incubator company; I happen to know the CEO. If the committee agrees that this is a topic we should tackle, we should investigate options like this and the one noted in the NYTimes article; perhaps set up meetings where they can come and demo for us.

Please let me know the outcome of the conversations at the meeting today and how the committee agrees to proceed.

thanks

Subject Security aspects of critical incident management

Gil-

SBU is mounting an effort to prevent a Va Tech type problem. The first step is a statement by the faculty that it will learn to recognize behavioral disturbances and will bring them to the attention of the agencies that can deal with them. I asked the Undergraduate Council to be the University Senate's voice on the project because it is that group's mission to make such commitments in the name of the faculty. The GC received good crisp language from the administration so the statement required only a little editing and we will be able to present it at the first University Senate meeting of the year.

The GC saw that there will be a need for security and communication to make a program effective and called attention to a newspaper article about how Va Tech is moving on it. Campus Environment is the right Senate committee to interact with the administration in making security effective. If you are willing, I would like you to take this on. It is very important that governance be supportive and also contribute to the planning.

I am attaching the draft critical events management statement that the administration drafted and GC is perfecting.

This is the body of Brian Colle's email about the NYTimes article devoted to Va Tech's responses:

...given the NYTimes article today on the Virginia Tech report, there was some email chatter among the UG Council today whether the Critical Incident Management Initiative does enough.

Is an emergency communication system planned for Stony Brook? How will the reporting of incidents in learning spaces outside the classroom be handled, as in the library? Is the intention just to record the incidents, or to deliver the information to the appropriate people?

From the NYTimes on Virginia Tech:

"Some of the changes recommended in today's report have already been put in place. For example, the university began using a new system in July called VT Alerts, which sends out text messages to individual cell phones concerning emergency situations.

James A. Hyatt, the school's executive vice president and chief operating officer, said that as of last week, about 12,500 students, staff members and others connected with the school had signed up for the service.

The university already employs an emergency communication system that makes use of e-mail, an emergency web page, sirens and telephone trees to get information out about a crisis, he said.

Mr. Hyatt led a committee that examined security on campus for the report. The panel made also recommended several other changes or improvements:

• Replacing the hardware on all perimeter doors of buildings. During his rampage, Mr. Cho chained several doors shut, which impeded efforts by law enforcement officials to stop him; hardware of different design might have made that difficult or impossible for Mr. Cho to do.

• Installing locks on the inside of classroom doors. That has already been done, officials said.

• Creating a system of electronic card-key entry to certain academic buildings around the clock. In the event of an emergency, the campus police could lock such buildings by remote control.

• Studying the feasibility of installing video surveillance cameras at key locations on the campus.

• Installing electronic message boards at busy places on campus to alert students and faculty to emergencies, with instructions about what to do.

• Creating an electronic "people locator system" for members of the university community to let concerned relatives, friends and colleagues receive updated information on their status during an emergency."

Gil, thank you for your continuing good work. I told Brent Lindquist that I was going to ask you to tackle this and he was supportive. You can contact Brent, Security or anyone else with whom you think you should be interacting. If there is anything you and I should discuss, please call me. You are also welcome to be at an University Senate Executive Committee meeting to exchange views if it will be useful to you.

jfogarty, jjmurray, jrobinson, Kathleen.Weber.1, kety87, knyitray,

I thought we all agreed that Little Acre Woods could/should be removed because it's a done deal?

I am unable to attend the meeting as I have another meeting off campus at that time.

thanks

{In Archive} Re: UA webpage 
Kristen Nyitray to: F.Jason Torre

06/25/2007 11:42 AM

Jason,

I found the Jimi Hendrix picture on the "Traditions" page, although it originally it came from the collection here. I deleted some old files that I was keeping on the server. I am now able to access it, so I will change the UA page to the new one.

David B. called about the files for the Melville Authors (content dm). He said he was working on the records and asked about Gil Hanson: the video states "Gil" but the authority file in STARS is "Gilbert N." He was going to make a cross reference.

History:  This message has been replied to.

Jason,

My server died and I think that it is best to archive some of the sites that were on the server. These include student and faculty, research reports, theses, science walks on and off campus and abstracts from the Long Island Geologists conferences. I would guess the total to be about 1.5 Mb.

Subject CHOICES newsletter - Smoking Ban Article

Gil & Ramona,
If a reminder is sent out for the June meeting of the Campus Environment Committee I would like this Student Health Services newsletter attached. It includes a reprint of the Statesman article on the smoking ban and the action of the University Senate. We had discussed revisiting the smoking ban proposal during our next meeting. This article will provide background information. It was forwarded to me by Kate Valerio, a member of the smoking ban proposal subcommittee.

It will not need to be sent until you are ready.

Thanks,

Bill Dethlefs

Adjourn

Present charge

This Committee shall examine all aspects of the campus environment, including but not limited to safety, security, facilities planning, state of facilities, and general appearance of the campus. It will consult with and advise the Assistant Vice President for Facilities and Services.

Recommended Campus Environmental Committee Charge (2-26-07):

This committee shall examine all aspects of the campus environment, including but not limited to conservation of natural areas, ecological preserves, and historical artifacts, transportation, parking issues, infrastructure, facilities planning, human health issues, energy efficiency, recycling, waste management, and general appearance of all campuses. It will consult with and advise the Assistant or the Vice-president for Facilities and Services.

Subject Agenda April 16

The revised agenda for our meeting on Monday April 16 at 1 p.m. in 221 Administration.

Campus Environmental Committee

Agenda for Monday April 16 Meeting
1:00 p.m. Room 221 Administration

Introductions - all

Review of the Minutes - Ramona Walls

New Business

Shall this committee consider security inside buildings. If so, we need to add it to our revised charge- All
(Richard Young will represent the campus police.)

Status Report

Campus Environmental Committee Charge: Gil Hanson
Effluent from County Sewage Plant on Campus – Barbara Chernow
Environmental Master Plan - Barbara Chernow
Developments at Southampton – Barbara Chernow
Developments at the Research and Development Park – Barbara Chernow
Campus Sustainability Task Force - Barbara Chernow
Association for the Advancement of Sustainability on Campus – Amy Provenzano
Recycling on Campus - Amy Provenzano

New Business

Parking – Barbara Chernow
Zip or Flex Cars
How an increase in enrollment to 25,000 will affect Environment of Campus – Barbara Chernow
Administration plans for environmental restoration of Tasha's Pond – Malcolm Bowman
Bike Path Gap – Fred Walter

Subcommittee Reports

Status of Smoking Policy –Bill Dethlefs
Friends of the Ashley Schiff Park Preserve – Mary
'Little Acre Woods' – Paul Siegel

Other - All

Next Meeting - All
Adjourn

Subject issue for environment committee

Hi Gil,

I'd like to initiate a discussion of the state of the bikepaths on campus (which is generally fine, except that cars seem to have the right of way everywhere). I'd like to focus on the link from the campus bikepaths to the town bikepaths, which is non-existent.

I've documented what I see when I bike in. Go to
<http://www.astro.sunysb.edu/fwalter/BIKEPATH/>

I'd like to request

- A.) a clearly marked bike lane on Health Sciences Drive
- B.) a clearly marked bike lane through the HSC loading dock, or perhaps above ground on north side of the loading dock
- C.) a prohibition on trucks parking under the pedestrian overpass

I'm open to suggestions.

If you think this is appropriate, please place it on the agenda for our next meeting, and distribute the link above.

It won't take long. I could bring my Mac and show the pictures if a projector is available.

Cheers,
Fred

Subject SUNY Task Force

Gil,
The SUNY Energy Task Force released it's recommendations last Tuesday. A summary from the Star Gazette, a quote from Chancellor John Ryan and a summary of the Task Force's recommendations follow:

- Establish campus targets for reducing energy use by 2010, so the University's total energy use is 37 percent lower than 1989-90. The average reduction to meet that goal is about 20 percent.
- Cap greenhouse-gas emissions at current levels and decrease emissions 20 percent of total use by 2014.
- Increase the use of renewable energy purchased or generated on campus to 30 percent of total use by 2014.
- Create and improve academic programs to address current and future challenges regarding energy, the environment and the economy.
- Expand energy-related research to achieve national leadership in developing renewable energy, conservation and the efficient use and conversion of energy.

" As one of the largest energy users in New York State, SUNY has a responsibility to act now to reduce energy consumption, increase its use of renewable energy resources and leverage its vast intellectual resources to help address the energy challenges facing New York and the Nation"

HEADLINE: April Madness: My College Outrecycles Yours!

BYLINE: By JAN ELLEN SPIEGEL

BODY:

C. J. MAY is not happy.

"My boss and others want to know if Harvard is doing better than Yale, and they want to know why," moaned Mr. May, 44, a Yale graduate turned Yale employee.

The news is bad. Harvard is beating Yale. That the competition is in recycling does not diminish the angst. "It is personally troubling to me," said Mr. May, who has been Yale's recycling coordinator for 17 years. "I've been working very hard to make Yale recycle. I know we can do better."

It's now or never for Mr. May and his fellow Elis, as the 10-week national competition known as Recyclemania enters its final week. The contest ends April 7.

Begun in 2001 as a friendly wager between the recycling directors at Ohio and Miami Universities, the contest this year involves 201 colleges and universities, more than double the number from last year, including 12 from New York State, 8 from New Jersey and 3 from Connecticut. (There are none from New York City.)

The campuses compete -- for bragging rights only since there is no monetary prize -- in several categories, most of which use a formula to tally the amount each student, teacher and staff member recycles, so large and small schools can compete more equitably.

While winning is fun, the real goal, campus recycling coordinators and experts say, is actually getting young people, living on their own, to pay attention to where they throw their trash.

"We have, in the United States, been establishing a recycling infrastructure for three decades, but when we look at rates, we are not improving," said Kate M. Krebs, executive director of the National Recycling Coalition, a nonprofit trade organization in Washington that runs the contest with the Environmental Protection Agency.

National data shows that recycling over all is flat, Ms. Krebs said, but it is especially poor among college-age people, even though they grew up with recycling as a widespread practice. "When you look at demographics, the 18- to 24-year-old sector makes little if any effort to recycle," she said. "It is heartbreaking for those of us who have been in the field for a long time."

College recycling directors say the competition helps shine a light on their efforts, which generally have been in place for years but are often ignored.

"If you don't make it absolutely convenient -- you walk out your door and there it is -- they don't want to walk to the end of the hall," said Kevin Lyons, director of purchasing at Rutgers University and a professor of environmental management.

Mark Smith, a sophomore at Princeton and Recyclemania coordinator, agreed. "There are

kids that don't want to recycle -- aren't going to do it no matter what," he said. "There are kids who carry around a bottle all day until they find a receptacle for it. And then there are the kids who would do it if it was convenient. That's who we want to get."

Mr. Lyons has run the recycling effort at Rutgers for 19 of its 20 years. He prides himself on a recycling rate that approaches 60 percent and includes 20 different items, from the usual paper, bottles, cans and cardboard to fluorescent bulbs, electronic waste (like inkjet and toner cartridges) and food.

Still, Mr. Lyons admitted, Rutgers "didn't do so hot" last year in its first Recyclemania. But this year, as of Week 7, it was close to being tied for the lead with California State University at San Marcos, a two-time winner. (Standings can be found at recyclemaniacs.org.) Rutgers was also leading or contending in per capita recycling and three other categories: bottles, cans and corrugated cardboard; food service; and "gorilla," which measures gross tonnage.

To improve student participation, Mr. Lyons's office ran a two-week shredding effort (which collected 75,000 pounds of paper and 4,700 pounds of cardboard), dormitory competitions and a sculpture contest using items that otherwise would have been thrown away.

All great for promoting recycling, but he would also like to beat Princeton. "We would have a parade on Nassau Street," Mr. Lyons said, referring to the main road adjacent to that campus.

Princeton, however, is intent on topping the other four Ivy League participants (Brown and Dartmouth are competing, too), despite an audit that showed that 35 percent of the contents of dormitory trash cans were filled with recyclables.

Which is why Princeton's building services director, Jonathan Baer, says Recyclemania is a plus -- win, lose or draw. "I think it's a good time, once per year, in an increased way, to focus on recycling that's not punitive or paternal," he said. "It's a time to reinforce our focus with some renewed energy."

Michael Youdelman, **Stony Brook University's** recycling and resource management director, said he figured the best way to get students to recycle was to take the bins to them. So over Christmas break, some 3,500 mixed-paper recycling bins were put in every dorm room. People "caught green-handed" -- doing something environmentally desirable -- are entered in a drawing for a green iPod. Jennifer Myatt, a graduate student and outreach coordinator, runs a recycling information table offering pencils recycled from used currency and old jeans.

"Education, that's pretty much the hardest thing -- just educating people and getting them in the habit of recycling," Ms. Myatt said. "We don't even think about taking out our trash. We can do the same with recycling."

The Lamont-Doherty Earth Observatory of Columbia University, a small graduate research school in Palisades, N.Y., with fewer than 600 students, discovered that all it needed to do well was to do what it had always done: generate research proposals, which typically use huge amounts of paper. In its first year of competition, the college is sitting atop the recycled paper category.

"The next step is to figure out how to generate less of it," said Mary Reagan, who heads

Lamont-Doherty's Recyclemania effort. But the contest, she said, had given her "cold hard numbers" for the first time confirming that recycling works.

Amy Cabaniss, environmental coordinator at Connecticut College in New London, drew the same conclusion after finishing in the top five in four categories last year, including second in food service -- a result of the college's long-standing practice of sending food waste to a pig farm. (Princeton has a similar arrangement; at Rutgers, food waste is pulped and dried, and what is left is sold to a cattle farm .)

This year, a student at Connecticut College mapped outdoor pedestrian patterns so recycling and trash bins could be placed more strategically, Ms. Cabaniss said. As of Week 7, Connecticut was in the top five in bottles and cans and fourth in food service, and ahead of in-state rivals Wesleyan and Yale, but just behind another small college in the area, Bard College, in Annandale-on-Hudson, N.Y.

Bard's environmental resources auditor, Laurie Husted, said that despite offering prizes donated by local businesses, student participation had not been as strong as she had hoped. Still, Recyclemania was "stirring the pot -- I'm seeing the effects in other ways," she said.

Which is what brings Mr. May at Yale, ever the optimist, back to Recyclemania for the fourth time. He may never be able to overcome the inherent problem of Yale's historic buildings, which have no halls, so recycling bins are in the basement, requiring a lot of student motivation. But he hopes a new plan to pick up paper directly from desks will help. "Our goal is to try to get up to 40 percent recycling in the next few years," Mr. May said.

"If we can beat Harvard in the process, all the better."

HEADLINE: OUR NATURAL WORLD;
IN THE FIELD;
Predicting Nor'easter's devastation

BYLINE: BY JENNIFER SMITH. jennifer.smith@newsday.com

BODY:

Meteorological advances have made it easier to track and predict the path of hurricanes and nor'easters. But what if there was a way to forecast the flooding that serious storms bring?

With nearly half a million residents in the floodplain of the South Shore, Long Island is particularly vulnerable to the devastating effects of storm surge - the wall of water that storm winds push toward shore.

So it's only fitting that a computer model to more accurately predict storm surge is being developed here. For the past five years, scientists at **Stony Brook University's** Marine Sciences Research Center have been working the kinks out of a system they hope local governments will be able to use to decide where - and when - to evacuate as storms roll in.

"It's like weather forecasting for the ocean," said Malcolm Bowman, a Stony Brook oceanography professor working on the project.

Water rises rapidly when pushed by a hurricane's fierce winds, but the surge typically recedes after a few hours as the storm moves on. By contrast, a nor'easter might hang around for nearly a week, long enough so that "water can get in every corner," Bowman said.

Tides add another variable. The water piled on by a lingering nor'easter can wreak havoc each time high tide rolls in. A hurricane that bears down during low tide might cause minimal flooding, but high tide elevates the height of a surge.

That height spells bad news for people and property along Long Island's low-lying South Shore, which experts say could flood as far north as Sunrise Highway in a bad hurricane.

The fragile string of barrier islands to the south provide little protection from the open waters of the Atlantic. As recently as 1992, a nor'easter rammed through a Westhampton beach to create Pike's Inlet, destroying scores of houses and causing more dramatic tidal fluctuations along the South Shore until the breach was plugged by the Army Corps of Engineers.

The goal of the Stony Brook project is to predict dangerous storm surge some 48 hours before it hits - enough time for local governments to arrange for shelters and move residents out of harm's way.

To do that, researchers sandwiched two different computer models together. The top one simulates and predicts the weather - atmospheric conditions and precipitation - while the bottom one does the same for the water.

Both models are built from mathematical equations that describe how the atmosphere and the oceans move as forces drive them. "The heat of the sun causes winds to blow, and the wind pushes the oceans around," Bowman said.

The models have been running since 2002, tracking sea level and storm surge at stations from New York Harbor to the northern coast of Long Island Sound. Researchers see how

well their predictions line up with the behavior of actual storms, and then make adjustments accordingly. The more storms researchers observe, the better they understand their behavior. "Each storm has its own personality," Bowman said.

Eventually, Bowman hopes to offer the model to the National Oceanic Atmospheric Administration for use.

But it's not quite ready for prime time. On a recent day, the difference between predictions for storm surge in Kings Point and the actual observed level ranged between nearly 1 1/2 feet to spot on.

"We're fine-tuning it," Bowman said. "There are all sorts of knobs we can twiddle, changing equations and such."

Ramona,

I think the newly configured "charge" is appropriate, and I will support it in the Senate when it is proposed.

I think the letter to DPW is fine. I did not mention in the CEC meeting but the kind of contaminated groundwater break-through into coastal waters referred to in the letter as an eventual possibility appears to have occurred in the Forge River area on the south shore where we have initiated a research program. Believe me, we wouldn't want similar phenomena here. If it did occur in the present case, it would be virtually impossible to remediate. More carefully thoughtout solutions must be found.

I would propose the following minor alterations:

Insert something like: "naturally functioning" after "valuable" and before "open space" in item 3. Other wording is possible but it is important to emphasize that retaining natural soils and forested regions is not simply for the sake of open space per se but also to maintain their roles in natural biogeochemical and hydrological cycling, and of course, as refugia for diverse plant and animal communities (a more explicit expansion of "ecological impacts").

Also, in item 3. I suggest adding at the end a sentence which indicates the broad support within the campus community to retain natural areas. Perhaps: "The proposal also is counter to past resolutions of the University Senate, a representative body of the entire campus community, which have unanimously supported preservation of forested area on campus to the greatest extent possible."

(The last such general resolution of the Senate regarding natural areas was in 2001. Malcolm Bowman and I plan to reintroduce the same proposal to the Senate for reaffirmation, and to ensure that it is recorded in electronically available minutes).

Finally, Barbara Chernow's formal position as VP should be indicated in the copy line of the letter.

Thanks for doing this.

Bob Aller

Subject letter to DPW and committee charge

Gil (and others):

Attached is the draft of the letter to Ben Wright at the SCDPW. Please check that I spelled his name correctly, and also the name of Bernie Lane (who should perhaps be Bernard?). Below is the revised CEC charge:

The committee shall examine all aspects of the campus environment, including, but not limited to, conservation of natural areas, ecological preserves and historical artifacts; transportation and parking issues; facilities planning; human health issues; energy efficiency; recycling and waste management; and general appearance of all campuses. It will consult with and advise the Vice-president for Facilities and Services or her/his designated assistant.

Subject Re: Fw: a topic for the Standing Committee on Campus Environment

Gil:

Parking is one of the big issues that threatens to overwhelm the campus. We are rapidly becoming an extension of the Suffolk County highway system with traffic everywhere, moving and parked. Given the completely inadequate state of suitable public transport services, the Senate Environmental committee needs to urge the construction of more (yes they are expensive) many-storied parking buildings to minimize the parking footprint and protect our campus natural areas from further obliteration.

We also might investigate the possibility of working with Suffolk County to put on free bus services to campus, serving say, an eight to twelve mile radius). Look what the clever (make that brilliant) people at Google Inc, are doing:

<<http://www.nytimes.com/2007/03/10/technology/10google.html>>.

Malcolm.

p.s. I thought the committee might like to see the present condition of what was formerly a very picturesque recharge basin (located between MSRC and the Dental School and known affectionately down here at South Campus as "Tasha's Pond"), a favorite spot for passing waterfowl.

It was recently emptied, scraped clean of sediment, a cesspool-type drain installed, and it was supposed to stay dry. Obviously it is filling up again and will presumably return to its natural level that I have observed as quite steady over the last 35 years.

What an eyesore to walk by! I can only assume we are waiting for the mess to be cleaned up and the perimeter restored to its former pleasantly vegetated state.

Subject
a topic for the Standing Committee
on Campus Environment

Gil-

I have received a few comments (complaints) about the parking situation on the East Campus. This unrewarding topic falls by default into the Campus Environment Committee mission. In simplest terms, there have been more parking permits issued than can be accommodated at peak periods of some and maybe most days. The result is that people cruise around in the garages for extended periods looking for a freshly vacated spot. Since there are a fair number of clinical faculty and staff who have obligations both in the HSC and at medical and hospital administration offices at Tritech Technology Park on rte 347 and other off-campus sites, this actually interferes with attending to state business. In addition, students can end up being late for classes and many people are trapped on the campus at lunch time when they would prefer to go to a local restaurant or run an errand.

Parking has always been a problem because there has been constant program expansion and increases in size of the various student bodies in the HSC schools. I am sure that attention is being paid to it by the administration since there has been a lot of asphalt laid down but the problem for the users remains. I don't think that your committee can do more than assess the administration's approach but it would be good to show that the University Senate is interested and sensitive to its constituents' needs and desires. Holding hearings is probably unnecessary. A letter of inquiry to the proper administration office should be sufficient to get an answer. Adding the topic to your agenda and putting the results of your

research into your annual report would do that. There is always the chance that you put in a constructive suggestion.

we've discussed it in the past, which has resulted in improvements, so some people might find it informative to hear again why the garage has limited expansion capabilities (structural as well as financial) and what future plans might be. My feeling is that this is certainly a topic that falls under the CEC, where individual department security certainly does not.

{In Archive} Computer theft and other CEC issues 

Robert Aller to: Gilbert Hanson

03/11/2007 07:50 PM

Cc: aprovenz, atopolovec, bchernow, chorgan, cvetter, ddegruchy, dnappigonzal, donna.diaz, dshannon, ftorre, fwalter, ghanson, gkaczmarczyk, jfogarty, jjmurray, jrobinson, Kathleen.Weber.1,

Gil,

Although I am no longer a voting member of the committee, I will offer my opinion as an at-large member. I have always assumed that the aspects of campus security dealt with by the CEC concerned issues external to buildings. In particular, these would be issues that intertwine personal security and environment such as lighting, routing of walkways, pedestrian and traffic safety, and so on. I think the CEC should not be involved with issues of security internal to buildings, personal altercations, etc.

On another front, I think that the CEC should critically examine the environmental implications of the administration's new student enrollment target of 25,000. In my opinion, continued unconstrained growth will not only lower the quality of the academic and work experience for all at the University (not a CEC issue) but must necessarily significantly degrade the campus environment (a CEC issue). As a University Senator and faculty member, I have requested a copy of the quantitative analysis that the administration must have done concerning the multiple impacts of the continued dramatic enrollment increases but my requests have been ignored up to now.

Subject Computer theft

Gil-

The President of the School of Medicine Senate came to the University Senate Executive Committee a couple of weeks ago to tell us about recent thefts of computers in the HSC. We suggested that he go to Security with the specific issue and try to get help in finding the computers and developing a system to secure them in the future. I saw him yesterday and he told me that the Head of Security said that there would be no central solution and that departments would have to develop electronic surveillance and other methods on their own and at their own expense.

This is a topic that your Campus Environment Committee could address. A lot of people would appreciate an improvement in security and maybe some kind of insurance if things are stolen. Have you already worked on this issue? If not, do you think that you could contribute.

Subject Re: Fw: Computer theft

The proposed changes to our charge do not include security. This was an intentional decision by the committee, as we felt that security was not really part of the campus environment. However, this charge has not yet been approved by the senate, and our current charge does specifically say that we shall "examine all aspects of the campus environment, including... security..." Until our charge is changed, we do have an obligation to address the issue, although clearly it would be going to far to say that the CEC is responsible for campus security. I suggest that we add this item to next month's agenda.

Ramona

Here are my thoughts on the topic.

To expect the university to be responsible for this type of thing is, I think, unreasonable. It seems that the university is, as it should be, responsible for security in the larger context of ensuring that police are on campus, patrolling, securing areas affected by an emergency, providing adequate lighting, work spaces that are free from obvious hazards (i.e., asbestos) and such, but the individual departments must take on the responsibility of securing those items that are at the greatest risk of theft. This is likely to differ vastly from department to department, including anything from computers to lab equipment.

At SHTM, we have for years, assumed the responsibility of installation and maintenance of an alarm system, and within the last two years also paid for the installation of security cameras in the faculty/staff office area. Our expectation is that in the event of an alarm, campus security will respond and investigate as needed, but beyond that, it's completely the responsibility of the department. We have worked hard over the years to increase security awareness among our faculty and staff; it can be onerous and tiresome, but it has paid off.

My recommendation is that Dr. Lane consult with Scott Law and Jim Lang to determine the best ways to secure his area, then work to educate his faculty and staff in being more aware and security minded in order to avoid a recurrence. This issue, in my opinion, is way beyond the scope of this committee.

The President of the School of Medicine Senate came to the University Senate Executive Committee a couple of weeks ago to tell us about recent thefts of computers in the HSC. We suggested that he go to Security with the specific issue and try to get help in finding the computers and developing a system to secure them in the future. I saw him yesterday and he told me that the Head of Security said that there would be no central solution and that departments would have to develop electronic surveillance and other methods on their own and at their own expense.

This is a topic that your Campus Environment Committee could address. A lot of people would appreciate an improvement in security and maybe some kind of insurance if things are stolen. Have you already worked on this issue? If not, do you think that you could contribute.

Gil,

It sounds like an interesting topic of debate. I guess the question revolves around the definition of security as given the charge of the committee, "including but not limited to safety, security" etc. Our department got hit by a thief two years ago and we lost a couple of laptops, a Proxima projector, and an air conditioner. The department absorbed the loss.

I do not agree that security of physical items on campus is the responsibility of the Senate Environment Committee. It would seem to me that this policy needs to be jointly broadcast by Campus Police, Rich Reeder and Jim Lang so that departments know that they must insure these items and are solely responsible for their safe keeping.

Subject Fw: Rare Plant at Southampton Campus

----- Forwarded by Gilbert Hanson/CAS on 03/08/2007 04:52 PM -----

Ojjhblanchard@aol.com
03/08/2007 04:11 PM

To Gilbert.Hanson@sunysb.edu
cc
Subject Rare Plant at Southampton Campus

Hi Gil:

I am a professor of biology at the C.W. Post Campus of Long Island University, and the Vice President of the Long Island Botanical Society.

I just had occasion to visit via the internet the minutes and related information for the Stony Brook committee that you chair that deals with the campus environment, and when I read that someone had (or would) present a plan for the Southampton Campus to the committee, it occurred to me that you might be the right person for me to contact.

The edge of the Southampton campus hosts the only known occurrence in New York State of the Silvery Aster, *Symphyotrichum (=Aster) concolor*. I was last there about 4 years ago, and there still were a few plants. I presume that an environmental impact study had to be performed, but I also know that things like this can easily be missed.

It would be a shame if the population could not be preserved, and particularly so if it is unintentionally destroyed out of ignorance of its presence. Is this a matter that your committee ought to look into?

Sincerely,
Orland ("Skip") Blanchard

Subject Next Meeting

The next meeting of the Campus Environment Committee will be on Monday March 19 at 1 p.m. in 221 Administration Building.

Please send me any additions or subtractions to the draft agenda that follows as well as to suggested changes in the proposed Campus Environmental Committee charge at the end of this e-mail.

Draft Agenda for Monday March 19 Meeting
1:00 p.m. Room 221 Administration

Introductions - all

Review of the Minutes - Ramona Walls

Status Report

Campus Environmental Committee Charge: Gil Hanson

Effluent from County Sewage Plant on Campus – Gil Hanson

Use of Brookhaven Town Kettle Park Kettle as a sump. - Gil Hanson

Environmental Master Plan - Barbara Chernow

Developments at Southampton – Barbara Chernow

Developments at the Research and Development Park – Barbara Chernow

Campus Sustainability Task Force - Barbara Chernow

New Business

Recycling on Campus - Amy Provenzano

How the University Ranks Renovations – Barbara Chernow

Subcommittee Reports

Status of Smoking Policy –Bill Dethlefs

Friends of the Ashley Schiff Park Preserve – Mary

'Little Acre Woods' – Paul Siegel

Other - All

Proposed new Campus Environmental Committee charge

This committee shall examine all aspects of the environment on all Stony Brook University Campuses, including but not limited to conservation of natural areas, ecological preserves, and historical artifacts, transportation, parking issues, infrastructure, facilities planning, human health issues, energy efficiency, recycling, waste management, and general appearance. It will consult with and advise the Assistant or the Vice-president for Facilities and Services.

Subject CEC meeting on Feb. 26

This is a reminder that we will not be meeting today, because of the holiday. The next CEC meeting is scheduled for Monday, Feb. 26, at 1:00, in the VP Admin. conference room.

I will send around a revised version of the minutes later this week.

Subject Revised CEC Minutes for Nov. 13

Attached is a revised version of November's minutes, with changes that were sent to me highlighted in blue. I still need electronic copies of the letter presented by Terry Hulse and the report by the Little Acre Woods subcommittee. If folks who have those could please forward them to me, I would appreciate it. If you have any other changes, please try to get them to me by Friday, so I can update the minutes before our meeting on Monday.

{In Archive} Re: Aerial of campus 

Gilbert Hanson to: F.Jason Torre

01/05/2007 04:51 PM

This message is digitally signed.

History:  This message has been replied to.

Jason,

You can try Aero Graphics to see if they will sell you an air photo. (1575 Smithtown Ave, Bohemia, Tel. 589 6045) They have a recent image. I tried and was unsuccessful in getting them to send me the information so I could order.

I also requested an air photo of the campus from the State which has high quality ortho-images. A fellow from New York State Homeland Security came to our Department quite convinced that I might be a terrorist. He talked to our chair but did not come to see me. They never ever replied to my request. On the web the images of the campus are low resolution or degraded. I gather at the request of NYS Homeland Security.

I can get you a DEM of the Campus that was created by a student at Stony Brook. It is based on a recent two foot contour map with 1 meter spacing. Would that be of use?

I really would like to get a good air photo also.

Gil

Subject Draft Campus Environment Committee minutes for Nov. 13

Attached please find a draft of the minutes of last month's meeting. Some of my notes were unclear about who made certain statements, so please look at the names and see if you can correct them. Please highlight changes that you send back to me. I will be out of town for two weeks, and will make corrections when I return.

Thanks,
Ramona

Subject Reminder

The Campus Environmental Committee meets today Nov. 13 at 3 p.m. in 221 Administration.

Campus Environmental Committee

Agenda for Monday Nov. 13 Meeting

Introductions - all

Review of the Minutes - Ramona Walls

Status Report

Environmental Master Plan - Barbara Chernow

Old Kings Highway Historical Marker – John Fogarty

Follow-up; Brookhaven ‘Kettle Hole Park’ as a sump- Gil Hanson and Barbara Chernow

Review committee charge from the University Senate – Malcolm Bowman

Present Charge:

It shall examine all aspects of the campus environment, including but not limited to safety, security, facilities planning, state of facilities, and general appearance of the campus. It will consult with and advise the Assistant Vice President for Facilities and Services.

Draft Modified Charge:

To promote conservation of natural areas, ecological preserves and historical artifacts, examine transportation and parking issues, infrastructure and human health issues, energy efficiency, recycling and waste management on all campuses. It will consult with and advise the Vice President for Administration, the Assistant VP for Facilities and Services and their staff.

New Business -

Effluent from County Sewage Plant on Campus - Barbara Chernow

Subcommittee Reports

Status of Smoking Policy Sub-committee - Bill Dethlefs

Friends of the Ashley Schiff Park Preserve – Mary Woodward

‘Little Acre Woods’ - All

Other - All

Next Meeting - All
Adjourn

Actually the new dates are better for me to work (I don't need to take time off work!). **I'll take November 4 for a full day 9:00 - 3:00. Thank you for giving me the opportunity .**

Give Jason Torre a call or e-mail to let him know if he is needed for tomorrow, October 13. He can't work in November!

How did the golf event go? The Library decided to donate to the raffle that was held then - it was a pair of center, front tickets to Leahy at Staller Center. Leahy is a dance troupe (like Riverdance).

Subject Habitat for Humanity 

Hi MaryAnn,

I just spoke with Kathy at habitat and the work scheduled for this Friday is Sheetrock; painting is now scheduled for brand new dates, Nov 4 and 11. If you would prefer to paint, just let me know, as we have a large group of 12 students going on Friday, so we have plenty of coverage. I have not advised anyone of the Nov dates yet, so if you want them, they're yours.

thanks

Subject Campus Environment Committee - Meeting Notice Monday, Oct. 16, 3-5 pm; 221 Admin

Campus Environment Committee members,
During yesterday's meeting, the first in the new term, three new officers were elected. Gil Hanson was elected as Chair. Mary Woodward was re-elected as Vice Chair and Ramona Walls, was elected as Recording Secretary, after her new position was created and approved by committee vote. Congratulations to all of you! The minutes from the meeting will be available soon.

Dr. Hanson will be chairing our next meeting on Monday, Oct. 16th, from 3 - 5 pm, in the conference room of 221 Admin. Bldg. Our new members will also be invited. They include Frederick Walter, elected during the University Senate elections to represent Physics, and a new At Large member from Advancement, Kathleen Weber. Both of them should be welcomed during our next meeting. There are still three faculty representative vacancies that will need to be filled by appointment. Two are for faculty members from Humanities and Fine Arts. The other must be a faculty member from Social & Behavioral Sciences, as per University Senate guidelines.

Two other items require your attention. A draft of the committee's fiscal year annual report has been attached for your review. Please respond by Sept. 25th if you have any changes to the text. If there are no other changes it will be forwarded to the University Senate. There are six pages of text and one attachment to review.

Finally, our committee proposal to ban smoking on campus will be part of the University Senate meeting on Monday, Oct. 9, from 3:30 - 5 pm in room 302 of the Student Activities Building. It will be presented for a vote. Please attend if you can.

Thank you for your support and active involvement with the committee's wide range of issues over the last two years. I look forward to continuing on and supporting the committee's new leadership.

Bill Dethlefs, Past-Chair

CEC Year End Report 2005-2006 Revised.doc

CAMPUS ENVIRONMENT COMMITTEE

2005/2006

Charge: It shall examine all aspects of the campus environment, including but not limited to safety, security, facilities planning, state of facilities, and general appearance of the campus. It will consult with and advise the Assistant Vice President for Facilities and Services.

Bill Dethlefs, Ph.D., Office of Alumni Relations, East Campus, Stony Brook University, L3-122 HSC, Stony Brook, NY 11794-8304, (631) 444-8305

Subject Campus Environment Committee - Meeting Reminder
Monday, Sept. 18, 3-5 pm; 221 Admin

Campus Environment Committee members,
As a reminder, the next meeting of the committee will be on Monday, September 18th from 3-5 pm in the conference room of 221 Admin. Bldg. This meeting will be the first of the new term and a few new members joining us. During the meeting an election must be held for the committee chair. A proposal to revise the charge we are given by the University Senate will also be reviewed as initiated by Malcolm Bowman. The minutes from our last meeting and the new proposal are attached below.

Over the summer the annual University Senate election was held that included all standing committee positions. As it happens there are still three faculty representative vacancies on the Campus Environment Committee that will need to be filled by appointment. Two of these positions must be filled by faculty members from Humanities and Fine Arts. The other must be filled by a faculty member from the Social & Behavioral Sciences. If you know of interested individuals from these areas that might want to be a member of this committee please let me know. I am very willing to contact them.

Pending the outcome of yesterday's University Senate meeting, regarding the status of our proposed campus-wide no smoking proposal, the distribution of this message was delayed. Because time for a special town hall meeting was needed the vote on our proposal was deferred until October. The vote will now be held on Oct. 9, from 3:30 - 5 pm in room 302 of the Student Activities Building.

Thanks for your attention.

Bill Dethlefs, Chair

Subject Meeting Reminder, Mon. Sept. 18, 3-5 pm., 221 Admin Bldg.

Campus Environment Committee members,
Our next meeting is scheduled for Monday, September 18, from 3-5 pm, in the conference room of 221 Administration Bldg. This will be the first meeting of the new term. Additional members, those that were elected over the summer, will be joining us at that time. As part of starting a new term, one of the items on the agenda will be the election of a new chair and vice chair.

Prior to this meeting, probably on Sept. 11, will be the first meeting of the new term for the University Senate. One of the agenda items is our own proposal to ban smoking on campus. It was presented for information purposes during the May meeting. It is being presented again for a vote. Please attend this meeting if you can.

The minutes from our last meeting will be distributed in the near future.

Please enjoy the rest of the summer,

Bill Dethlefs, Chair
Campus Environment Committee

For Immediate Release: June 27, 2006

Albany – SUNY Chancellor John R. Ryan today directed the Office of University Life and the Student Life Committee of the SUNY Board of Trustees to develop an implementation plan to prohibit smoking in all residential facilities operated by and for SUNY, as of the beginning of the Fall 2007 semester.

SUNY’s State-operated residential facilities are currently 87 percent smoke-free. Only a limited number of campuses allow smoking in some of their dorms and residential facilities.

“We need to make this 100 percent,” Ryan told the Board of Trustees at its June 27, 2006, meeting. “Smoking is not only a health risk but also a safety risk as cigarettes serve ignition sources that result in fires. Our job is not just to educate students, but also to keep or start them on a path towards a healthy lifestyle.”

The plan, said Ryan, would be limited to residential facilities, while the remainder of the campus would be subject to the Clean Indoor Air Act, which prohibits smoking in public facilities, as well as local campus rules, which may restrict this activity further. SUNY will need to address certain campus concerns and implementation issues in order to help campuses and students in these regards.

During the legislative session, the State Senate and Assembly were considering a proposal to prohibit smoking in residential facilities at SUNY, CUNY and the private college campuses throughout New York State. Ryan encouraged the Board of Trustees to take the lead on this issue and ban smoking in all residential facilities operated for and by the State University. Under Ryan’s leadership, SUNY has implemented smoke-free policies in residential facilities at two colleges.

Many SUNY campuses currently prohibit smoking in their residence halls. Some instituted policies in the early 1990s, and others more recently followed suit. Last year, Upstate Medical Center became the first SUNY campus to go completely smoke-free.

The State University of New York is the largest comprehensive university system in the United States, educating more than 414,000 students in 7,669 degree and certificate programs on 64

campuses. To learn more about how SUNY creates opportunity, visit www.suny.edu

Subject Campus Environment Committee, Next Meeting, Thurs.
August 24, 1 - 3 pm

Campus Environment Committee members,
Our next meeting has been scheduled for Thursday, August 24, from 1 - 3 pm in the conference room of 221 Administration building. Yesterday's meeting was quite interesting, especially the demonstration of the Automatic External Defibrillator by the University Police. The minutes from that meeting will be sent shortly.

Regarding a related issue, Bob Aller found this article on Yale's use of biofuel to power their campus shuttle buses. Barbara Chernow indicated that Stony Brook is also shifting over to the use of biofuel to power campus vehicles.

Yale Shuttle Bus Powered by Cooking Oil

N

e
n
,
C
o
n

n. — Yale will run one of its shuttle buses at Commencement with biodiesel fuel made with cooking oil recycled from its dining halls, University officials have announced.

The University has been operating the bus for the past month with a test blend of fuel that is 50 percent biodiesel. The bus will be run for the first time solely on biodiesel at the 2006 Commencement. “The experiment with 100 percent biodiesel complements Yale’s use of alternative fuels in the rest of its shuttle fleet,” said Associate Vice President for Administration Janet Lindner. “The University has converted all of its shuttle buses to biodiesel, in a blend with ultra-low sulfur diesel, as part of its commitment to a greener campus and cleaner air. We have been making use of alternative fuel vehicles, such as hybrids, within our fleet and this month we began using alternative fuel in all Yale shuttle buses. These efforts will help promote a healthier environment for the New Haven community.”

The project to recycle cooking oil originated when a student who wanted to power his automobile with vegetable oil approached David Johnson, a research scientist at Yale. Working together, they applied a catalyst to remove the glycerin in the cooking oil and separate out the biofuel. “By removing the glycerin from vegetable oil, we essentially reduce its flashpoint from 600 degrees to 300 degrees, which allows us to use it as heating oil,” Johnson said. “Any car, truck or bus will run on it, with minimal modifications.”

Because the oil is a natural byproduct of plants growing in the United States, there’s no negative effect on the atmosphere, said Johnson. “The plants pull carbon dioxide out of the air; burning the fuel puts it back into the air, thus the effect is neutral,” said Johnson. “Whereas with fossil fuel, which was trapped hundreds of years ago, there are no plants to pull the carbon dioxide out of the air, so burning those fuels raises CO2 levels, which in turn leads to global warming.”

The bus ran for the first time solely on biodiesel at the 2006 Commencement.

The use of biodiesel made in the United States can also help reduce dependence on foreign oil supplies. “If we put our heads together, we can put a dent in it,” Johnson said of dependence on foreign oil.

The biodiesel fuel is made in laboratories on the Yale campus. Oil used for frying in the dining halls is collected by Yale Recycling and delivered to Sterling Chemistry Laboratory, where Johnson works with students to turn the waste oil into biodiesel.

Donald Relihan, director of support services at Yale, said, “The ultra-low sulfur diesel (ULSD) combined with biodiesel runs much cleaner than conventional diesel fuel.” He said the sulfur content of ULSD is reduced from approximately 500 parts per million to 15 parts per million and can reduce particulate matter air pollution by up to 14 percent. When combined with a 20 percent biodiesel (B20), particulate matter air pollution is further reduced 10–15 percent. Relihan added, “B20 is currently the most common form of biodiesel, derived from soybean oil, and requires no vehicle, equipment or infrastructure modifications to use. In preparation for the switch, the Yale buses were recently retrofitted with oxygenating catalytic converters and specialized filters that capture crankcase emissions.”

“The conversion has been painless,” said Ed Bebyn, Yale’s manager of parking and transit. “We are happy to be out in the forefront with environmentally friendly fuels and vehicles.”

The use of biodiesel from recycled cooking oil is part of the University’s effort to support a greener, more sustainable community. Use of ULSD B20 helps reduce the negative impact of diesel air emissions on campus. In addition, B20 when combined with ULSD helps engines run more smoothly and last longer.

Subject Policy Proposal - Smoking Ban on Campus - Wide Circulation

Campus Environment Committee members,
As President of the University Senate, Brent Lindquist has broadly distributed our proposal to ban all smoking on campus for comment and response. (See below). He also informed me that it has been placed on the September meeting agenda for a final vote. If you receive feedback on this proposal please bring it with you to our next meeting on June 15th. (As the attachments have been forwarded in the past they are not included with this message).

During the June meeting we will need to review the initial implementation date of the proposal. As was approved by unanimous vote of the committee the proposal indicates the first phase is to be implemented during the Fall of 2006. Since that is the date of the vote itself, a more distant implementation date should be considered.

This policy proposal appears to have strong support on campus. I hope it continues to build in that direction between now and September.

Bill Dethlefs, Chair
Campus Environment Committee

P.S. The next meeting of the committee will be on Thursday, June 15th, from 1 - 3 pm, in the conference room of 221 Admin.

Bill Dethlefs, Ph.D., Office of Alumni Relations, East Campus, Stony Brook University, L3-122 HSC, Stony Brook, NY 11794-8304, (631) 444-8305

Subject FYI

Bill, Am forwarding the note below (with your attachments) to the various governance units on campus - Brent

In the fall of 2007, the Campus Environment Committee of the University Senate intends to recommend to the University Senate the smoking policy contained in the attachment document:

University Senate - No Smoking Policy Recommendations 4-28-06.doc

The recommendation proposes a total ban on all smoking inside and outside of all campus buildings. These recommendations allow for a transition phase from the existing policy, to a reduction of designated smoking areas on campus, to an ultimate ban of all smoking within a period of no more than three years. This interim period is only to announce the policy and provide an opportunity for public education and smoking abatement for individuals. This time frame parallels that given to passengers before the airline industry went smoke free, as followed by a number of hotel chains.

This policy recommendation follows the total ban on smoking that was implemented by SUNY Upstate Medical University in 2005:

Upstate Medical Center - Smoke Free Campus Policy.doc

As reflected in the attached press release,

Upstate Medical Center Press Release 2005.doc

there was strong campus-wide support for this policy change including that from the unions.

This recommendation and justification supports the significant role the university has in promoting employee and student wellness, and health care cost containment. It also addresses related environmental concerns over smoking-related littering. The university should no longer be in a compromised position of being both an advocate for good health, while at the same time tolerating unhealthy smoking behavior.

As the adoption of such a policy will directly impact all faculty, staff, students, patients, and other visitors to campus that smoke, the University Senate Executive Committee is circulating this announcement to governance units on campus, requesting that the policy be discussed in your respective unit. Please forward any concerns that may be raised in your discussions to the Senate Secretary, Laurie Theobalt, ltheobalt@notes.cc.sunysb.edu

Laurie will forward these concerns to the Senate Executive Committee and to the Campus Environment Committee.

Regards,
Brent Lindquist
President, University Senate

Subject Campus Environment Committee - Next Meeting, June 15, 1
- 3 pm, 221 Admin. Conf. Room

Campus Environment Committee members,
The next meeting of the committee will be on Thursday, June 15, from 1 - 3 pm. It will again be in the conference room of 221 Admin. Building. Please mark your calendar now.

As a follow-up to our last meeting, our recommendation to ban all smoking on campus within three years was well-received by members of the University Senate during their May meeting. Instead of being the target of wrath there were actually two rounds of applause. This presentation was for informational purposes only. A formal presentation will need to be made during the University Senate's September meeting. My thanks to those of you that attended the meeting. I was anticipating a less than wonderful response.

During the meeting one of the faculty indicated there is now a SUNY-wide effort to ban smoking on all campuses. If so, we will be hearing more about this issue over time.

Subject: Draft Recommendation- University Senate: No Smoking Policy

Brent,

In your role as President of the University Senate, I ask that you please forward this message to the members of the University Senate Executive Committee. These recommendations are made in response to their request for reconsideration of our original recommendations on the Stony Brook University no smoking policy.

The attached recommendations propose a total ban on all smoking inside and outside of all campus buildings. It will directly impact all faculty, staff, students, patients, and other visitors to campus that smoke. These recommendations allow for a transition phase from the existing policy, to a reduction of designated smoking areas on campus, to an ultimate ban of all smoking within a period of no more than three years. This interim period is only to announce the policy and provide an opportunity for public education and smoking abatement for individuals. This time frame parallels that given to passengers before the airline industry went smoke free, as followed by a number of hotel chains.

This policy recommendation follows the total ban on smoking that was implemented by SUNY Upstate Medical University in 2005. As reflected in the attached press release, there was strong campus-wide

support for this policy change including that from the unions. A copy of the Upstate policy is attached for review. Paralleling our own efforts Dr. Thomas Biancanello of the Stony Brook Medical Center recently forwarded Upstate's policy to President Kenny and other senior managers on campus, also proposing a total smoking ban on campus.

This recommendation and justification supports the significant role the university has in promoting employee and student wellness, and health care cost containment. It also addresses related environmental concerns over smoking-related littering. The university should no longer be in a compromised position of being both an advocate for good health, while at the same time tolerating unhealthy smoking behavior.

Please let me know if you have comments or concerns.

Subject University Senate - CEC Recommendations Monday, May 1,
3:30 - 5 pm 302 SAC

Campus Environment Committee members,
Brent Lindquist, the President of the University Senate, has asked us to make an introductory presentation on our no smoking proposal during Monday's meeting of the full University Senate. This meeting will be held in 302 SAC from 3:30 - 5 pm. All three documents; our proposal, the Upstate press release, and the Upstate no smoking policy will be distributed during the meeting.

This is not expected to be a decision-making meeting. Instead it is an opportunity to air the issues during the final meeting of the term. The next meeting of the University Senate will not be until September.

Please try to attend if your schedule allows.

Bill Dethlefs, Chair

Subject Draft Recommendation- University Senate: No Smoking Policy

Brent,

In your role as President of the University Senate, I ask that you please forward this message to the members of the University Senate Executive Committee. These recommendations are made in response to their request for reconsideration of our original recommendations on the Stony Brook University no smoking policy.

The attached recommendations propose a total ban on all smoking inside and outside of all campus buildings. It will directly impact all faculty, staff, students, patients, and other visitors to campus that smoke. These recommendations allow for a transition phase from the existing policy, to a reduction of designated smoking areas on campus, to an ultimate ban of all smoking within a period of no more than three years. This interim period is only to announce the policy and provide an opportunity for public education and smoking abatement for individuals. This time frame parallels that given to passengers before the airline industry went smoke free, as followed by a number of hotel chains.

This policy recommendation follows the total ban on smoking that was implemented by SUNY Upstate Medical University in 2005. As reflected in the attached press release, there was strong campus-wide support for this policy change including that from the unions. A copy of the Upstate policy is attached for review. Paralleling our own efforts Dr. Thomas Biancanello of the Stony Brook Medical Center recently forwarded Upstate's policy to President Kenny and other senior managers on campus, also proposing a total smoking ban on campus.

This recommendation and justification supports the significant role the university has in promoting employee and student wellness, and health care cost containment. It also addresses related environmental concerns over smoking-related littering. The university should no longer be in a compromised position of being both an advocate for good health, while at the same time tolerating unhealthy smoking behavior.

Please let me know if you have comments or concerns.

Subject Re: Meeting Reminder- Thurs. Apr. 27, 1-3 pm, 221 Admin
Conf. Room.

Hi Bill:

If I may I would like to add a couple of short items to the agenda:

i) a brief PowerPoint presentation (less than 5 minutes) of slides and movie clips taken during my recent visit to the University of Cantabria, Spain, of compartmentalized garbage cans at Madrid airport, roadside recycling bins, and traffic roundabouts in operation. The latter are particularly interesting, located in the northern city of Santander, and noted for their efficiency and beauty.

ii) An Op Ed column in the New York Times, 21 April, written by Thomas Friedman: "The Greenest Generation". This challenges students on campuses across the nation to encourage and help implement the concept of "net zero CO2 emissions".

I may be late to the meeting as we have an overlapping function at MSRC.

Malcolm.

Subject Archive of Historical Documents Relating to Ashley Schiff
Park Preserve

Bill and Mary:

Donna Digiovanni of Ecology and Evolution has collected and distributed a valuable archive CD (pdf about 11 MB) of correspondence, memos, sketches, maps and surveys relating to the creation and dedication of the Ashley Schiff Park Preserve. The Conservancy is in the process of posting these documents (with an index) to the SBEC website, but they should be posted on university websites as well, for information, education and safekeeping.

The University Senate website

<<http://naples.cc.stonybrook.edu/Admin/usenate.nsf>>,

the SEC site

<<http://naples.cc.stonybrook.edu/Admin/usenate.nsf/pages/environment>>),

and the Ashley Schiff Park Preserve website

<<http://pbisotopes.ess.sunysb.edu/a-schiff/home.html>> are all obvious places.

So I put the proposal to the SEC and the FASPP committee that we do it!.

Best,

Malcolm.

p.s. If anyone needs a copy of the CD, please let me or Donna know.

Subject Transportation Town Meeting- Campus Environment
Committee Invited on Mar. 29, 1-2 pm.

Campus Environment Committee members,

During our last committee meeting Terence Harrigan made a presentation on the preliminary results from the recent traffic study that was done by **Wiley Engineering**. The committee then asked for the opportunity to hear the final results from Wiley Engineering. A special Transportation Town Meeting has been arranged by Barbara Chernow's office to present the results. It will be held on **Wednesday, March 29th, in the Student Union Auditorium, from 1 - 2 pm**. Faculty, staff, and students are invited.

Subject Campus Environment Committee Minutes from March 9th

Campus Environment Committee members,
As a reminder, the next meeting of the committee will be on Thursday, April 27th, from 1 - 3 pm in the conference room of 221 Administration Building. The preliminary agenda is found on page 5 of the attached minutes from our last meeting.

One of the agenda items requiring additional attention is in regard to the recommendations on the campus no smoking policy that were forwarded to the Executive Committee of the University Senate. Several members of the Executive Committee let me know that we were not taking a strong enough position and asked that we reconsider our position. By their request, this item will be open again for discussion during our April meeting.

In the mean time, if there are other agenda items that should come to the attention of the committee then please let me know in advance.

Thanks for your attention.

Subject Campus Environment Committee - Next Meeting; Thurs., Apr.
27, 1 - 3 pm, 221 Admin.

Campus Environment Committee members,

The next meeting of the committee will be on **Thursday, Apr. 27, from 1 - 3 pm** in the conference room of 221 Administration Building. This date is one week later than what was discussed at the end of the last meeting. Please mark this date in your calendar now. The minutes from our last meeting will be available soon.

In the mean time, the University Senate is seeking nominations for both Senators and standing committee members. The Campus Environment Committee will need two nominees from Humanities & Fine Arts and one HSC faculty position in order to have all positions filled by the start of the new term in September. In addition, my own term as chair will end in September. An election will be held at that time for my successor. Please give serious thought to taking on this rewarding role.

Thanks,

Bill,

The change to the CEC report regarding the history of the Greenbelt concept is factually correct and should be made. Steve Englebright originally proposed the specific integrative idea of the Greenbelt to the University Senate. It is worth noting, however, that at the time of his presentation the University Senate and the CEC had been and were examining ideas for conserving significant natural areas on campus along the lines of Cornell Plantations at Cornell University. The invitation to Steve Englebright to address the Senate and his proposal to the Senate was in the context of that general effort and subsequently became a distinct goal in itself. So, while it was certainly a major galvanizing step forward for which he should be properly credited, the concept of a regional Greenbelt encompassing both public and private lands should also be viewed as a natural evolution of the sustained efforts of both the University community (as embodied in the representative University Senate and its committees) and residents of the surrounding community to find ways to retain as much of our local natural heritage as possible. I might add that part of the reason that the SBEC, rather than a strictly campus based organization, subsequently came into being to help achieve these goals was because President Kenny declined to support the formation of a campus organization comparable in any way to Cornell Plantations.

On another front, I thought that the CEC might be interested in how other major universities are attempting to balance environmental and development concerns. I have attached a section from my Yale alumni notes regarding recent building designs. I look forward to the day when SBU might be proudly cited for comparable progressive actions.

Yale Honored For Building Design (<http://www.yale.edu/opa/v34.n17/story6.html>)

Yale has been recognized for its successful efforts to incorporate the Farmington Canal Heritage Trail into the design of the recently completed Malone Engineering and Research Building. The University is being honored for choosing the most difficult but most environmentally sensitive solution to the problem of constructing the new engineering building alongside a section of the recreation trail running through the Yale campus. Yale's design for the new structure avoided filling in the canal trail or building over it.

Subject Next Meeting - Thursday, March 9th, 1 - 3 pm, 221 Admin
Bldg. - Two New Items

Campus Environment Committee members,
As a reminder, our next meeting will be on Thursday, March 9th, from 1 - 3 pm in the conference room of 221 Administration Bldg. The minutes from our last meeting will be available soon.

There are two brief items below that need your attention.

First, the University Senate asked that we give shared credit to NY Assemblyman Steve Englebright along with the Stony Brook Environmental Conservancy for the Stony Brook Environmental Greenbelt reference in our annual report. I said that I would make the change. (See details below).*

Second, Susan DiMonda, Director of Campus Recreation, is requesting a representative from the University Senate for their newly organized Advisory Board for the construction of the new Campus Recreation Center. The Executive Committee of the University Senate indicated that a nominee from the Campus Environment Committee would be most appropriate to serve in this advisory capacity. The time commitment should be limited. Please let me know if you would be willing to represent our interests on this Campus Recreation Advisory Board.

Bill Dethlefs, Chair
Campus Environment Committee

*Highlight point number 3 (page two) states that "Acquisition of the Gyrodyne Property coincides with the greenbelt proposal from the community-based SBEC..." It is in the minutes of the Senate that the Greenbelt proposal originated with Assemblyman Englebright, before SBEC even existed. While the SBEC has "taken up the cause", factual accounting should accord the greenbelt proposal to Englebright.

Subject University Senate Resolution - Campus Environment
Committee Membership Clarification

Jason,

When I sought candidates to fill the new positions created by the University Senate resolution on December 5th, 2005 it was my impression that passage of the resolution would create four new positions. Instead it only adds three. The fourth position would have added a second representative from the Library. Unfortunately, I did not know this was an error until today. It means the position as to which you were appointed does not exist. For confirmation, please see the membership information below and the full resolution which is attached to this message. I do apologize for misleading you, Kristen Nyitray and the other members of the Campus Environment Committee. Of the 13 Standing Committees of the University Senate only two are authorized to have more than one library representative. It will be our loss due to your high degree of support by members of the committee.

Even though I cannot offer the opportunity for you to be an official representative, as per the University Senate bylaws, I do hope that you will attend our meetings. I welcome input from all of our at-large members, of which there are many. The next meeting of the Campus Environment Committee will be held from 1-3 pm on February 9th, in the conference room of 221 Administration building.

Thank you for your understanding.

Bill Dethlefs, Chair
Campus Environment Committee
University Senate

(As of 12-05-05) The Campus Environment Committee shall consist of:

- ~~one~~ two faculty members from each of the electoral divisions of Arts and Sciences
- ~~one~~ two faculty members from Engineering and Applied Sciences
- two faculty members from Health Sciences
- one library faculty member
- one professional employee each from West Campus and East Campus
- two undergraduate students;
- one graduate student;
- the Director of Environmental Health & Safety (*ex officio*, non-voting).

Subject Campus Environment Committee - Next Meeting Thurs., Feb.
9, 1 - 3 pm, 221 Admin. Conf.

Campus Environment Committee members,

As a reminder, the next meeting of the committee will be on Thursday, February 9th, from 1 - 3 pm, in the conference room of 221 Administration Building. The agenda includes approval of the annual report and clarification of the recent University Senate resolution expanding our membership. The preliminary agenda is attached.

The annual report has been reviewed by a number of people and has been modified for length, grammar, accuracy, and clarity. Please take time to read the attached copy (five pages plus attachments) prior to the meeting. Once finalized it becomes a historical document and therefore needs to be an accurate reflection of our activities.

The recent action by the University Senate that expanded our membership gave us three additional positions not four. We do not have a second position representing the Library as was initially understood. A copy of the approved University Senate resolution is attached for your review.

Please let me know if there are additional items that should be added to the agenda.

Thanks,

Bill Dethlefs, Chair

Subject Reminder - Campus Environment Committee - Thurs., Feb.
9, 221 Admin Bldg. Conf. Room.

Campus Environment Committee members,

As was decided during our last meeting, the next meeting of the committee will be held on Thursday, February 9th, from 1 - 3 pm in the conference room of 221 Admin. Bldg. Two new members will be joining us as we start to fill the additional positions that were recently approved by the University Senate. Bob Aller will be officially joining us as a faculty representative from Natural Sciences. In addition, Jason Torre, University Archivist, will be joining us as an official representative from the Melville Library. With these new additions there are still three membership positions available. Two from Humanities and Fine Arts and one is from Social & Behavioral Sciences. If you know of faculty from these departments that would be interested in the committee's mission and role please contact me.

Since our required annual report is overdue please let me know if you have any additions or changes. The draft report was sent previously. I will need to submit the text in the near future. As a final note, the minutes from our last meeting are being finalized and will be sent in the near future.

Bill Dethlefs, Chair
Campus Environment Committee

CAMPUS ENVIRONMENT COMMITTEE
2005/2006

Charge: It shall examine all aspects of the campus environment, including but not limited to safety, security, facilities planning, state of facilities, and general appearance of the campus. It will consult with and advise the Assistant Vice President for Facilities and Services, Barbara Chernow.

Jason,
This is terrific. Let me know if you have any other questions.

Subject Re: Campus Environment Committee - Library Member Vacancy- Interested? 

It would be my pleasure to fill the slot until the summer. Please mark me down as an acceptance.

I look forward to meeting you all at the next meeting.

Regards,

Jason Torre

Subject Campus Environment Committee - Library Member Vacancy-Interested?

History:  This message has been replied to.

The Campus Environment Committee is a standing committee of the University Senate. As a result of recent action by the full senate we have been granted four additional membership slots for faculty representing the Library, Natural Sciences, Engineering, and Humanities & Fine Arts. Your name was recommended by Kristen Nyitray to as a candidate for the additional library position. You would be added by appointment if you are willing to join us until the summer University Senate elections are held.

The committee has been meeting on a near monthly basis and the meetings are never more than two hours in length. The minutes are posted on the Campus Environment Committee pages of the University Senate website at <<http://naples.cc.stonybrook.edu/Admin/usenate.nsf/pages/environment>>. The next meeting has been scheduled for Thursday, Feb. 9, from 1 - 3 pm in the conference room of 221 Administration Building.

Based on this information would you be interested in joining our committee?

Thanks for your attention.

Bill Dethlefs, Chair
Campus Environment Committee Chair

The charge to the Campus Environment Committee from the University Senate is as follows:

**CAMPUS ENVIRONMENT COMMITTEE
2005/2006**

Charge: It shall examine all aspects of the campus environment, including but not limited to safety, security, facilities planning, state of facilities, and general appearance of the campus. It will consult with and advise the Assistant Vice President for Facilities and Services, Barbara Chernow.

The administrative contact is Richard Mann, Vice President for Administration.
