## Stony Brook, Russia To Study Planets Together

By Wendy Greenfield

Stony Brook and the Soviet Union have entered into an agreement to collaborate on solar system research.

The Department of Earth and Space Sciences and the Institute for Space Research at the Soviet Academy of Sciences in Moscow, the leading institution for studying planets, will study planetary atmospheres, comets and the origin of the solar system.

Stony Brook is one of three American institutions to work with the Soviet Union on research in this field. Brown University and California Institute of Technology also have similar arrangements.

Astronomy professor Tobias Owen, who spearheaded the arrangement, said the exchange is important because the United States is falling behind the Russians in space research, largely as a result of the Challenger shuttle explosion and a lack of government funds.

"It's been 10 years since the United States has launched a mission to other planets," Owen said.

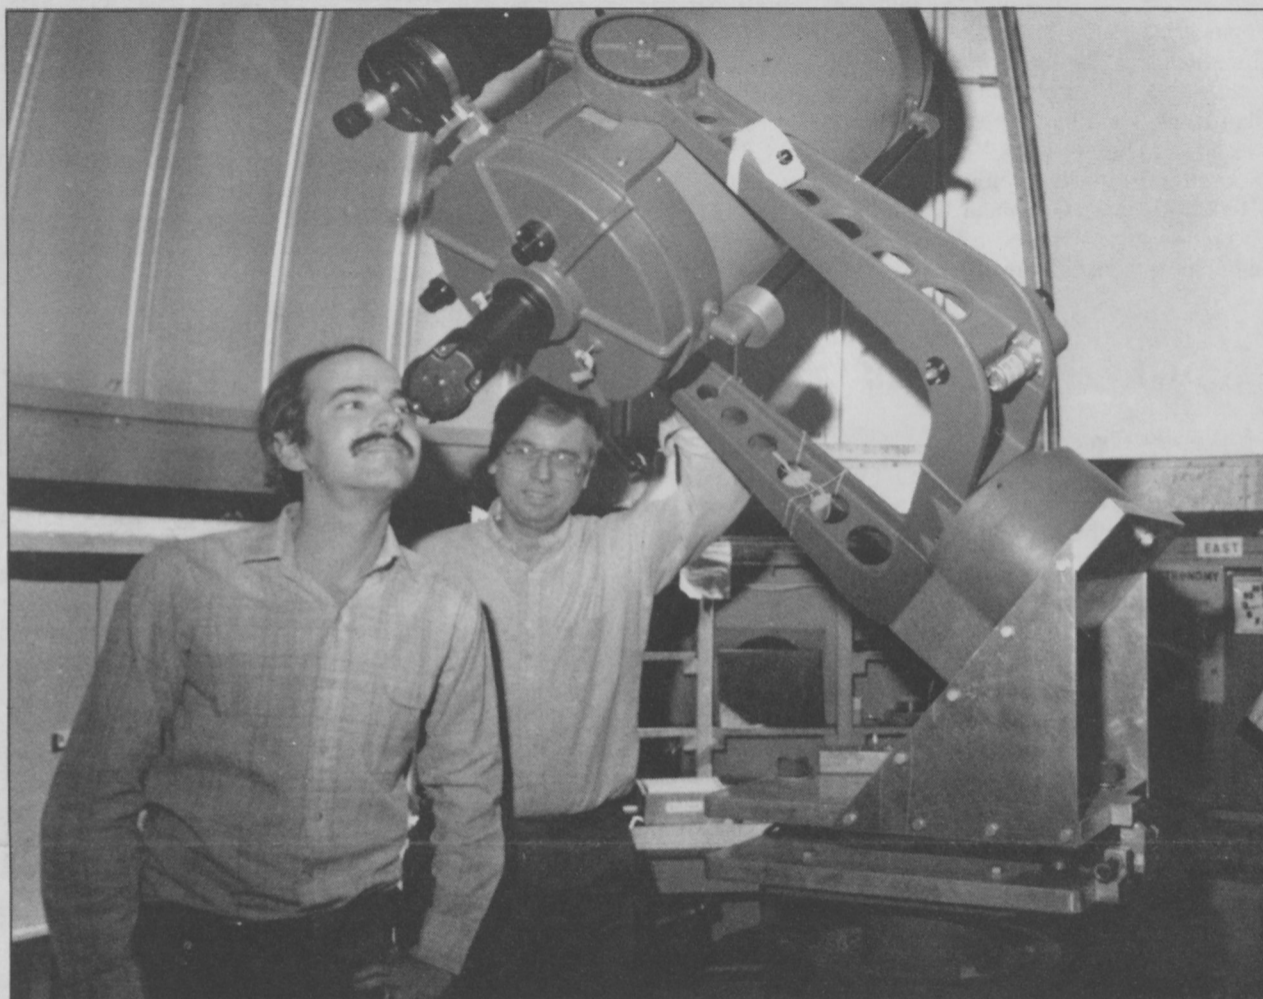

The Soviets sent two spacecrafts to Mars last summer and two to observe Halley's comet three years ago, Owen said. Though the U.S. government has been slow to fund projects, Stony Brook researchers have not sat still. They have been studying data on spacecrafts launched 10 years ago. Additionally, they are studying Mars, Neptune, Halley's comet and other comets in observatories in Hawaii, Chile and Arizona.

Owen said Stony Brook will exchange information on ground-based planetary observations with Soviet scientists who have made space-based investigations.

"Since we have been studying these things we have information they don't have, and vice-versa," he said.

The agreement came about after Owen was approached by Soviet scientists he had been working with over the past 15 years concerning research on Mars. In the past, he has invited Soviet researchers from the Space Science Institute to come to Stony Brook, but because of government restrictions they were unable to leave the country.

Under the agreement, each team of researchers will pay for their airfares, but the host country will pay for the visiting researchers' expenses once they arrive. Funds for Stony Brook researchers will come from the National Aeronautics and Space Administration, the National Science Foundation and SUNY. The first official visit is expected to take place in February when Stony Brook

Peering through the telescope are professors Jack Lissauer (left) and Roger Knacke (right), who will participate in U.S. - U.S.S.R. astronomy exchange program.

scientists will go to Moscow. Owen also said he plans to involve graduate students in the exchange program.

Astronomy professor Roger Knacke, who has been compiling information on Halley's comet and other comets he's observed over the past two years, said he "looks forward" to the new relationship with the Soviets.

"The Soviet Union has done a lot of work with comets, and they're willing to share their data," he said. "This will be a real gain for us."

Jack Lissauer, assistant professor of astronomy who received a Sloan fellowship this year to study the solar system, said he looks forward to working with Soviet scientists on how planets formed. Lissauer recently returned from a trip to the Soviet Union, where he gave a seminar and visited four scientific institutes.

"There is good science we can do if we can get over there," Lissauer said. "The agreement will make such visits much easier to accomplish."

## New Institute for Atmospheric Sciences To Research 'Ozone Hole,' 'Greenhouse Effect'

By Sue Risoli

This is the year of the atmosphere. Phrases like "ozone hole" and "greenhouse effect" have become firmly lodged in the public consciousness. Well before the era of popular concern, however, Stony Brook faculty were leaders in the study of atmospheric sciences.

Now the university has established an Institute for Atmospheric Sciences, through the state-funded Graduate Research Initiative. Located in the Graduate Physics building, the institute will initiate new research, as well as coordinate and augment current atmospheric studies being conducted by members of Stony Brook's Chemistry, Physics and Mechanical Engineering departments.

"We're also concerned with making this field more visible to graduate students, and attracting them to work at Stony Brook," said the institute's acting director, professor of physics Robert deZafra. "We see an important — indeed vital — future for the atmospheric sciences in our increasingly perilous global situation. There's a great need for more well-trained scientists in this area."

The institute will create new undergraduate and

graduate courses, said deZafra, "to strengthen our undergraduate concentration in atmospheric sciences, and to develop a coherent doctoral program." It will also sponsor seminars and workshops.

Two new faculty members and a permanent director (a nationwide search is under way) will join the institute's current staff of eight faculty and their graduate students and post-doctoral research associates. "That's just the beginning," said deZafra. "We look forward to continued growth of the institute, as the need for comprehensive global predictions becomes more acute."

Institute scientists are currently studying such phenomena as the global thinning of the ozone layer and the Antarctic ozone hole, the greenhouse effect and the atmospheres of other planets in our solar system.

There is an atmospheric research center at the State University of New York at Albany, deZafra noted, but he described it as having "rather different goals and interests from ours. They've concentrated on things like thunderstorm formation and the localized effects of pollution," he continued. "Our own concerns will be primarily with agents of change that act on a global scale, over both short and long time periods."

## Grumman Corporation Funds Scholarships, Fellowship For College Of Engineering and Applied Sciences

By Sue Risoli

The Grumman Corporation of Bethpage has established endowments to fund a graduate fellowship and undergraduate scholarships for students at Stony Brook's College of Engineering and Applied Sciences.

Stewart Harris, dean of the College of Engineering, said, "We are grateful to Grumman for its far-sighted vision in establishing these programs, which make a significant contribution to engineering education at Stony Brook."

James Emslie is the recipient of the first \$10,000 graduate Grumman Fellowship. The fellowship is funded by a \$125,000 endowment from Grumman. Emslie, who

received his undergraduate degree from Stony Brook with a major in mechanical engineering, is continuing at the university as a master's degree student in engineering this fall. Ten Grumman scholarships of \$2,000 were awarded to continuing undergraduate students and incoming freshmen for the first time in fall 1987. Grumman has pledged to continue the annual scholarships while contributing funds to build an endowment of \$275,000 to ensure the funding in perpetuity.

This year nine scholarships were granted. The four freshmen recipients are Michael Lubrano, Gregory Burke, Christine Quiery and Bonnie Smart. The continuing student recipients are Rajesh

Bendre, Craig Bratter, Wallace Marshall, Eric Olsen and Arun Seraphin.

Awarded this fall for the first time were three scholarships for minority undergraduate education. The \$2,000 awards were created with a \$5,000 donation from Grumman and an additional \$1,000 from the State University of New York. This year's recipients were seniors Joseph Citeno, Adolph Everett and Gustavo Nino.

Said Sharon Grosser, manager of community support programs at Grumman, "Grumman is pleased to assist the university as it prepares students to enter Long Island's high-technology industry."

## History Professor Studies America's Influence On France

By Wendy Greenfield

"Le weekend," blue jeans and Coca Cola are just a few signs that the French have accepted and embraced American cultural values.

From banning the sale of Coke in 1950 to urging Walt Disney to build a Disneyland outside of Paris for all of Western Europe last year, the French have clearly demonstrated they can no longer resist the American dream, says history professor Richard Kuisel, who is on a fellowship at the Woodrow Wilson International Center for Scholars in Washington, D.C. Kuisel is compiling material for his book on the

Americanization of France. He also received a Guggenheim fellowship this year to complete the research.

"The French, like everyone else, want the prosperity, consumer goods, comfort and prestige that American products represent," Kuisel said. "They can't resist them, even in a country as insular and narcissistic as France."

Kuisel is studying the influence of American products and values on France's economic and cultural development since World War II. On the one hand, Kuisel said, the French see American goods and culture as a model, while at the same time they view them as a menace.

The transformation of French society began after World War II with the Marshall Plan, he said, when the Americans used economic aid to instruct the French in American ways. At first there was much resistance by Gaullists, Communists and leftist intellectuals. But over time, Kuisel added, the French began to imitate and accept the Americanization. Yet, while Coke is a presence in France, it is worth noting that the French drink it as an aperitif and consume less Coke than their Western European neighbors (except for Italy).

"They Americanize, but do it in French ways," Kuisel said.

## Appointments

- ◆ Susan DiMonda has been named the new director of intramurals at Stony Brook. She comes from Hofstra University, where she was Director of Recreation.
- ◆ Will Wilberg, founder of the women's soccer program at East Carolina University, has been named assistant women's soccer coach at Stony Brook and Assistant Sports Information Director.
- ◆ Greg Collenda has been named assistant lacrosse coach at Stony Brook. He previously served as Assistant Lacrosse Coach at the University of Massachusetts.

## Presentations

- ◆ Edmund McTernan, dean of the School of Allied Health Professions, presented a talk on the "Utilization of Allied Health Education and Practice of Meeting Health Care Needs," at a Washington D.C. conference.
- ◆ Edmund McTernan, dean of the School of Allied Health Professions, appointed to the National Council on Health Professions Education (group advises Dr.

Otis Bowen, U.S. Secretary of Health and Human Services, on the allotment of Federal funds for the education of prospective health professionals.)

## Awards/Honors

- ◆ Susan Lehecka, a programmer/analyst in the materials Management Systems of University Hospital at Stony Brook has been named Employee of the Month by the Employee Activities Committee.
- Lehecka has created and maintained an on-line library of over 300 programs which has been beneficial to many of the hospital's departments.
- The honor comes with a U.S. savings bond, a Certificate of Appreciation, and a month long VIP parking space at the hospital.

## Obituaries

**Raouf Doss**

Raouf Doss, 72, professor emeritus of mathematics, died Sept. 8 at University Hospital of a heart attack.

Mr. Doss served on the mathematics faculty for 20 years, retiring in May 1986.

He was a member of the Institute for Advanced Study in Princeton, N.J., from 1949 to 1950, and received the State Prize for Science in Egypt in 1952 and 1964.

He is survived by a wife, Suzanne; two sons, Hani and Paul Doss; and a daughter, Eglal Doss-Quinbe.

**Aaron Janoff**

Aaron Janoff, 58, professor of pathology, whose work on emphysema and smoking gained him international recognition, died Sept. 11 at home after a long illness.

Mr. Janoff had been teaching at Stony Brook since 1971, having served on numerous committees and as the director of the graduate program in pathology.

Mr. Janoff was elected a fellow of the New York Academy of Sciences in 1978. He received a National Institutes of Health Method to Extend Research in Time (MERIT) award and the American Thoracic Society Presidential Citation last year. He also won last year a \$15,000 Alton Ochsner Award Relating Smoking and Health for nearly 20 years of research on the chemical links between cigarette smoking and emphysema.

He is survived by a wife, Lenore; a son, Gregory Phillip; two daughters, Diane Eve and Tami; and a granddaughter, Alissa.

## News in Brief

Think twice next time you crumple that piece of paper and toss it into the waste basket. On Wednesdays, the custodial staff will collect newspapers, magazines, office paper, computer paper and any other clean paper - no carbons - as part of a universitywide recycling effort.

"We're trying to educate people on the need to recycle as much as possible," said Ken Fehling, campus waste management and recycling coordinator. "An estimated 90 percent of waste generated in an office is paper."

For the first time this year a recycling program is being mandated by state law. The New York State Solid Waste Management Act of 1988 requires that every state agency institute a paper recycling program no later than July 1, 1989.

Fehling said the recycling effort will also help the university save money. Stony Brook spends \$600,000 a year to dispose of its general refuse, and the cost is steadily rising. In May, Brookhaven Town landfill increased its fee from \$18 a ton to \$30 a ton. With paper recycling, the university stands to save about \$100,000 a year, Fehling said.

The custodial staff will pick up paper stored in a cardboard box that can be obtained from the custodian. Materials should be stored flatly. Bins for special pick-ups, such as cleaning old archive papers can be arranged by calling the recycling office at 2-6226.

The custodial staff will not pick up trash from offices on Wednesdays. Also, as part of the recycling plan, there will be no garbage pick-up from compactors outside the building.

Not only will the recycling effort help save money, Fehling said, the university hopes to make money by selling paper for recycling. Paper can be recycled into paper towels, paper cups and building materials.

## Correction

The University Distinguished Lecture Series Ad that appeared on the last page of the Fine Arts Center Supplement in the Sept. 12 edition of Campus Currents contained misinformation. The corrections appear here and the complete, accurate roster for the series appears on page 4.

John E. Jacob, the president and CEO of the National Urban League, will give his lecture on Nov. 1, 1988 (not Nov. 11) at 8 p.m. in the Recital Hall of the Fine Arts Center.

Rev. William Sloane Coffin's name was misspelled.

Archbishop Desmond Tutu was shown as Bishop Benjamin Tutu. At this time, Archbishop Tutu is not scheduled to speak at Stony Brook.

The University Distinguished Lecture Series is sponsored by the Office of the Provost and Newsday and is free and open to the public. No tickets are necessary. For further information, call Ronnie Stewart at 632-7005.

We regret any inconvenience the errors may have caused.

## CAMPUS CURRENTS

Director of News Services  
Vicky Penner Katz

Assistant Director  
Sue Risoli

Managing Editor  
Joseph M. Caiola

Senior Writer  
Wendy Greenfield

Campus Currents is published weekly during the academic year by the Office of University Affairs, 322 Administration Building, State University of New York at Stony Brook, Stony Brook, NY 11794-0605. Phone: 516/632-6310.

Currents welcomes material from the university community. "People" items, Notices, and Calendar listings should be submitted two weeks prior to publication date of the issue in which they should appear. News of significant national or regional interest should be discussed directly with News Services Director Vicky Penner Katz or Assistant Director Sue Risoli (632-6310).

# Stony Brook

# Bulletin Board

## Notices

Academic and administrative notices should be directed to Assistant Director Sue Risoli, 319 Administration Building.

◆ Sign up now for Crafts Center courses in basic photography, pottery making, stained glass, batik, watercolor painting, sign language, amateur radio, and more. Call 632-6822 for more information.

◆ English as a Second Language, FALL '88: Sponsored by New York State and CSEA. Classes will begin Sept. 13 and go through Dec. 21 from 10 a.m. to 3:30 p.m. (dependent on the level) in SBS Room N115. Call Millie at 632-6575 for more information.

◆ The Stony Brook Women's Luncheon Group invites career women to participate in its monthly luncheons.

The group, which was initiated last semester through the Employees Relations Council, will invite members of the university community to speak at upcoming luncheons. Speakers will be announced at a later date.

If you plan to attend, please call Faith Devitt at 2-6338 by the Thursday prior to the lunch date so places can be reserved. Lunches have been scheduled as follows:

September 20- End of the Bridge;  
October 18- End of the Bridge; November 15- off campus (location to be determined); no program during December; January 17, February 21 (location to be determined); March 21- off campus (location to be determined); April 18, May 16 (location to be determined); June 20- off campus (location to be determined).

◆ Did you actually pay \$29.99 the last time you rented a car for that price? If you filled your gas tank or purchased the expensive collision waiver damage option you probably paid much more. Hidden charges for gasoline and insurance raise the cost of the \$29.99 a day car into the \$50 or more range. These high costs can be avoided by taking advantage of the Faculty Student Association (FSA) Fleet Service located on campus.

The FSA Fleet Service is a feature of the University Travel Plan. The four-door 1988 Dodge Shadows have the lowest area

rates for the university business trip of 100 miles or more. The rate for a 24-hour period is \$32.00 plus \$.04 mile. These charges include a \$6 million combined, single limit insurance umbrella and all gas, oil and maintenance costs. All 10 of the fully equipped, automatic sedans carry three major gasoline company credit cards. On your way back to campus there is no need for fill-ups since there is no charge for gasoline.

Each car is protected by the American Automobile Association. The cars can be reserved by calling Omega World Travel (2-7799) and picked up in South P Lot with a completed FSA Fleet requisition and voucher.

◆ The University Hospital Safety Committee is hosting a Safety Awareness Fair the week of Sept. 26 - Sept. 30 in the hospital lobby.

Exhibits and activities are scheduled throughout each day from 11 a.m. to 4 p.m. to explain and promote such pertinent issues as The Right To Know Law, accidental drowning, Hepatitis and AIDS, fire safety, child car seat safety, and bending and lifting techniques.

◆ Visitors to Korea, Spain, Russia and a host of other destinations can get a head start on the language and culture of the places they plan to see through a mini-course to be offered at the university in November.

The program will teach would-be travelers how to say hello, ask directions, order food, shop and conduct business in French, Italian, Spanish, Korean, Japanese, Chinese, German and Russian. It will also give participants a cultural overview (covering such topics as how to barter in open-air markets, and how to make introductions) and the option of dining out in a restaurant specializing in the cuisine of the country they will visit.

The four-session course will meet 6:30 p.m. to 9 p.m. Nov. 7, 10, 14 and 17. Classes will be limited to 16 people, and will be taught in a conversational format in the foreign language to be covered.

The mini-course, offered through the university's School for Continuing Education, will also be given in February and May 1989. There will be a fee of \$75. For registration forms and information, call Edna Zemanian at 2-7068.

### Important Notice

To maximize our coverage of Stony Brook University news and events, Campus Currents will no longer carry personal classified advertising. We will, however, continue to run job postings.

We regret any inconvenience the change may cause our readers. In place of the ads, however, will be even more news and features on Stony Brook's people and programs. We encourage faculty and staff to continue to submit items and ideas to the editors. Call 632-6310 or send information to Room 322 Administration.

# Upcoming

Calendar items, event material and photos should be sent to the Upcoming Editor, 322 Administration Building.

## Buonagurio Exhibit In The Fine Arts Gallery

When is a painting more than a painting? When it's an "excavation", as artist Edgar Buonagurio describes his work. He builds layers of acrylic paint over structured drawings, then abrades the surface with industrial sanding equipment to expose or "excavate" the surface below. An exhibit titled "Permutation and Evolution: Edgar Buonagurio"—presenting the artist's development over 15 years—will be on display Sept. 21 through Oct. 29 in the Fine Arts Center Gallery. Hours are noon to 4 p.m. Tuesday through Saturday and some evenings before Main Stage performances.

## Philosopher Althusser's Work Subject of Conference

A two-day conference on the work of Louis Althusser, one of the most controversial philosophers of western Marxism, will be held Sept. 23 and 24 at the Humanities Institute, Room E4340 Library.

The gathering will bring together an international group of scholars.

Althusser, born in France in 1918, is credited with shaping "structural Marxism" that emerged during the 1960s and transforming Marxist scholarship into a wide range of disciplines.

## Jacques Derrida To Speak On 'Freud and Deconstruction'

Jacques Derrida, one of the most well-known and influential French post-structuralist theorists, will speak on "Freud and Deconstruction" Sept. 26 at 4:30 p.m. in the Humanities Institute, Room E-4341 Library.

Derrida is director of studies at the Ecoles des Hautes Etudes en Sciences Sociales, Paris, and also teaches at the University of California at Irvine. The event is co-sponsored with the Philosophy Department.

## Monday September 19

Astrophysical Journal Club, Noon, ESS Room 450

## Tuesday September 20

Career Women's Lunch, Noon, End of the Bridge

## Wednesday September 21

Multi-Modality Imaging in Pediatrics: Thomas H. Smith, M.D., associate professor of clinical radiology, Department of Radiology, associate professor of clinical pediatrics, Dept. of Pediatrics, SUNY Stony Brook, Health Sciences Center, Lecture Hall 6, Level 3

## Thursday September 22

Molecular Endocrinology and Cell Biology Seminar: "Glycosylation Mutants and Functions of Mammalian Carbohydrates", 3 p.m., Dept. of Physiology and Biophysics, Basic Sciences Tower, Room 140, T-6 Dr. Pamela Stanley, Dept. of Cell Biology, Albert Einstein College of Medicine, Bronx, NY

Organic Seminar: 4 p.m., Room 412, Chem. Building: Shlomo Rozen, Tel-Aviv "Introducing Elemental Fluorine Into Organic Chemistry Methodology"

Astronomy Colloquium: "Evolution of Protostellar Disks", 4 p.m., Rm 450, ESS Building Speaker: Prof. R.B. Larson, Yale University

Surface Science Seminar: "Atom Diffraction, 3 p.m., Grad Physics, C120, T. Engel, Washington.

## Friday September 23

Women's Studies Colloquium: "Talking About Reproductive Technology" Prof. Isabel Marcus, SUNY Buffalo School of Law, Noon, SBS S207. All are welcome. Coffee, tea, cider available.
