STONYBROOK

The Alumni Periodical of the State University of New York at Stony Brook

STONY BROOK

VOLUME IV NUMBER IV

WINTER 1990

1989-90: THE YEAR IN REVIEW

State University of New York at Stony Brook

The Undergraduate Experience:

In the 'Year of the Undergraduate,' the Honors College inducted its first freshman class.

Interdisciplinary seminars, the prospect of studying with Stony Brook's top-rated faculty "mentors" and \$1,000 scholarships attracted a blue-chip group of 30. Fostering small learning communities, the university also established its third "living/learning" center.

Graduate and Professional Education:

Enrollment was on the upswing amid improvements in student life.

New programs and increased enrollments in the Graduate School and School of Continuing Education underscored Stony Brook's role in developing the region's workforce. The new Center for Corporate Continuing Education and Training served 20 companies with campus and on-site programs.

in emergency medicine and dermatology.

Research:

A green light for the Long Island High Technology Incubator.

The New York State Legislature authorized \$2.8 million for construction of the long-awaited incubator facility, which will house start-up companies in such fields as biotechnology, information services and electronics. The project is a linchpin in the university's Economic Development Agenda.

Health Care:

8

Observing its tenth anniversary, University Hospital joined the School of Medicine in adding new programs. Stony Brook's medical center expanded its capabilities in psychiatric emergency, otolarynology and diabetes treatment, while establishing new residency programs

Private Giving:

Pull Out Section

The annual report of the Stony Brook Foundation.

Support from faculty, friends and alumni enabled the university to encourage outstanding achievement in all aspects of campus life.

Cultural and Social Outreach:

The Staller Center had a banner tenth season.

From the Stony Brook Symphony Orchestra to the International Theatre Festival, events at Staller set new records for attendance. Five Nobel laureates visited, while the university expanded its outreach to Long Island schools.

Economic Development:

A new regional task force confronted the challenge of economic diversification.

At a critical time of transition for the Long Island economy, Stony Brook's regional units pooled resources.

The University at Stony Brook is an equal opportunity/affirmative action educator and employer.

FROM THE PRESIDENT

John H. Marburger

MAXINEHICKS

You are about to read a chronicle of an extraordinary year in the history of the State University of New York at Stony Brook. In each of our primary missions of education, research and health care, Stony Brook made substantial gains. Seeking to translate these gains into benefits for the State of New York, Stony Brook broke new ground; in cultural and social development, in economic progress, in regional leadership, we are fulfilling our mandate of public service with a vigor and an impact as never before in our history. On the campus itself, students, faculty and staff are working in more attractive, more efficient facilities. We have scheduled more activities of every kind, particularly events and programs designed to create an attractive and stimulating learning environment for our students.

Unfortunately, these achievements were accomplished in an environment of statewide fiscal doubt and gloom. Certainly the most astonishing thing about Stony Brook's record is that our progress continues through bad budget years as well as good ones. How is this possible? How long can we keep it up? Will the worsening state economy finally bring Stony Brook's growth to an end next year?

These are important questions whose answers need to be understood by our friends as well as by ourselves. Our successes are made possible through extraordinary human effort and ingenuity. Our employees, faculty, students, and staff care deeply about Stony Brook and are extending themselves to find new ways of accomplishing goals, new forms of support and new habits of work, study and professional behavior that ensure not simply our survival

but our predominance within higher education. In short, we succeed in these difficult times because we refuse to give up our hard-won excellence. From energy conservation and recycling to imaginative use of computers and the largest revenues from non-state sources in New York public education, Stony Brook people are finding ways to keep moving ahead. We will pull the entire state along with us if that is what it takes.

We can maintain our momentum as long as New York's stewards of public education permit us to apply the fruits of our ingenuity and effort. Stony Brook is hammering at bureaucratic barriers established long before New York understood the ability of public research universities to solve their own problems. We have reached a level of maturity that permits us to fund state objectives that are beyond the means of tax support by tapping technology, philanthropy, federal sponsorship, and the free marketplace. But to do so we need new statutory authorizations; we need a new statewide flexibility initiative. We need to be able to privatize some of our activities, including educational activities, so that we can deliver expanded services to people who require them. We need new ways to build essential facilities, new ways to finance the replacement of expensive equipment, new attitudes toward the operation of health care facilities. To some of these needs the state is in fact responding, but ever so slowly. These difficult times demand more rapid change.

Next year looks grim for tax-supported programs, but

Stony Brook is favored by substantial works in progress, described within. Stony Brook is favored by the importance of our region to the state's economy. Stony Brook is favored by the strength of Long Island's elected officials, who worked magic for our "incubator project" in a gaunt year. Stony Brook is favored by the fame and excellence of its faculty, who receive more support from non-state sources for their work than all but a handful of other faculties throughout the nation.

But most of all, Stony Brook is favored by its people, who are not hypnotized by adversity. We will tighten our belts, operate more efficiently, and fight for the freedom to solve our own problems if the state cannot solve them for us.

If, after reading the following report, you are as impressed as I am with what our institution can do even in a bad year, I hope you'll lend us your support. If you are a member of the Stony Brook family, we need your understanding and cooperation as we try new ways of realizing our objectives. If you are a friend of the university, we need you to let others know how much you value our programs and initiatives. We would like to hear your ideas and your reactions to our progress. But we particularly want to share our pride in what is, after all, your university.

John H. Marburger

THE UNDERGRADUATE EXPERIENCE

Over the last five years, Stony Brook has placed special emphasis on strengthening the undergraduate experience by fostering small learning communities within the formal curriculum. This focus has produced such recent initiatives as the Undergraduate Research and Creative Activities (URECA) program, in which students and faculty work as partners on joint projects, and Stony Brook 101, a one-credit orientation course for freshmen and transfer students.

In 1989-90, establishment of the Honors College marked another major step in this direction. Designed by a faculty advisory council, the program offers exceptionally qualified students a four-year sequence of interdisciplinary seminars taught by some of Stony Brook's most respected faculty. Outside of class, participants become acquainted with faculty in informal weekly discussions and monthly excursions to museums and cultural events in New York City. All students who qualify for the program are offered a \$1,000 scholarship.

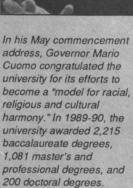

As Honors College master, biochemist and Distinguished Teaching Professor Elof Carlson provides the program's intellectual glue, structuring lectures and weaving together key concepts. Donna DiDonato, with the Office of Undergraduate Studies, manages the program's administrative aspects.

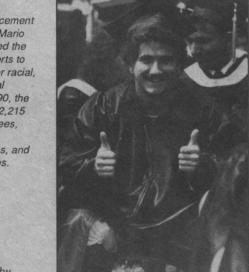

In 1989-90, the program introduced a remarkable freshman seminar, "Progress and Its Discontents," which surveys the major thinkers and theories that have shaped the concept of progress since the 19th century. In addition, the Honors College Advisory Council laid the groundwork for the sophomore seminar, to be introduced in the fall of 1990. Titled "Brief Lives," the course focuses on pivotal figures in literature and the arts, such as writers Eugene O'Neill and Jane Austen, architect Mies Van Der Rohe, Impressionist painter Berthe Morisot and vocalist Josephine Baker.

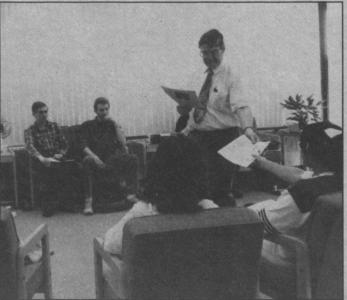

As expected, the program proved to be highly attractive. Thirty students—all with minimum SAT scores of 1200 and high school averages of 92—will advance to the program's sophomore class in 1990. Applications from outstanding high school seniors for the program's 30 freshman slots nearly doubled to 140.

With an eye toward a different kind of learning community, Stony Brook had demonstrated the success of the "living/learning" model with residential centers focused on international studies and human development. In 1989-90 the university transformed the Baruch College residence hall into a living/learning center in science and engineering. Attracting 250 technology-minded students, the center integrates academic pursuits and residential life. Headmas-

ter Joseph Lauher, an associate professor of chemistry whose enthusiasm for teaching prompted him to take a pivotal role in establishing the center, presided at a weekly honors seminar at Baruch, while a regular Tuesday colloquium featured a wide range of speakers in an informal setting.

EHICKS

As Honors College master, biochemist Elof Carlson has played a major role in developing interdisciplinary seminars offered in each of a student's four years.

Installation of 40 Macintosh computers in Melville Library increased undergraduates' access to word processing and spread sheets.

Other Curricular Enhancements

Designated the "Year of the Undergraduate" by the University Senate, 1989-90 saw a number of other enhancements in the undergraduate experience. For example:

- The Department of Mathematics and the Mathematics Learning Center developed computer-based curricula that simplify the teaching of math concepts in lower-division courses. Their innovations include a three-dimensional computer graphics program that enhances the teaching of calculus, as well as a new system of placement testing for incoming students.
- The Department of Computer Science, assisted by a \$1 million gift from Hewlett Packard, established a computer graphics laboratory that enables far more students to learn computer graphics techniques and supports such undergraduate courses as "Computer Vision," "Special Topics in Computer Art," and an honors seminar.
- The Division of Computing and Communications installed a cluster of 40 Macintosh computers in Frank Melville, Jr. Memorial Library, significantly increasing undergraduates' access to word processing, spreadsheets, and other applications.
- The Division of Social and Behavioral Sciences, aided by an award from the National Science Foundation, initiated construction of a state-of-the-art computer classroom with 27 networked personal computers and an overhead projection system. The room, which can be programmed by faculty from their offices, became available in the fall of 1990 for both classroom use and experimental research projects.
- The University Senate endorsed "Campus Life Time," a once-a-week period at midday when classes may not be scheduled. Implementation of the free period in the spring of 1991 is directed at enabling all students to participate more fully in student organizations and university events.

In addition, renovations distinctly improved such key student spaces as the End of the Bridge Restaurant and the Stony Brook Union cafeteria, which, with a new sports motif and large-screen television, has been renamed the Bleacher Club. Roofs on nine undergraduate residence halls were replaced, and construction of the long-awaited Indoor Sports Complex, which will add more than 100,000 square feet of recreation space, proceeded apace. It opened in the fall of

Changing Demographics

A steep decline in the number of students graduating from New York high schools has contributed to a significant shift in the composition of Stony Brook's student body. For the first time, Stony Brook in 1989-90 admitted more transfer students (1,800) than freshmen (1,500). Thirteen percent of all undergraduates enrolled at Stony Brook in the spring of 1990 were 25 years old or older.

Emphasis on Diversity

With the most diverse student population among the four SUNY university centers, Stony Brook has progressed substantially in creating a welcoming campus environment for students, faculty and staff of all races and cultures. Indeed, in his remarks at Stony Brook's 30th commencement in May, Governor Mario Cuomo congratulated the university for its efforts in this regard, noting that Stony Brook "is becoming a model for racial, religious and cultural harmony." Two initiatives in 1989-90 particularly reflect the university's commitment:

• Sixty students, many from small colleges with few laboratory resources, were hosted by the university in two

summer programs aimed at encouraging undergraduates—particularly minority students—to pursue careers in research. Funded by the Department of Education and the National Science Foundation, the programs made it possible for students in the physical and social sciences to work with Stony Brook faculty in a one-on-one research experience.

• Joining with 25 other public and private universities that received the greatest funding from the National Science Foundation, the university endorsed an initiative to attract more women and minorities to science and engineering careers. Among other things, the initiative calls on the institutional participants to assist in upgrading science and math curricula and teacher training in grades K through 12, to provide new employment and advancement opportunities in science and engineering for women and minorities at the university level, and to help industries attract and retain women and minorities in science and engineering positions.

At the graduate level, the university expanded to 70 the number of African-American, Hispanic-American, and Native American students receiving W. Burghardt Turner Graduate Fellowships. The state-funded fellowship, created in 1978, provides students with up to \$15,500 in tuition and stipends. In addition, Provost Tilden G. Edelstein appointed Myrna Adams, formerly assistant vice provost for graduate recruitment, as associate provost responsible for strengthening recruitment and retention of minority faculty and graduate students.

Traditions

The Alumni Association and its affiliate Student Alumni Chapter played an expanded role in student life. Highlights included the first annual "5K Run for Scholarships" at Homecoming and initiation of the "Life After Stony Brook"

series, which brings alumni back to campus for informal career discussions with seniors and graduate students. Thirty student teams, with materials limited chiefly to cardboard and duct tape, constructed and entered their boats in the second annual Roth Regatta, and I-CON IX, a three-day festival of science fiction, fantasy and high technology, drew more than 4,000 participants.

Athletics

The 1989-90 academic year produced outstanding team and individual performances in Stony Brook athletics. The men's basketball team collected 24 wins (the second best record in Patriot history) and captured the ECAC Metro New York/ New Jersey Championship in a thrilling 83-77 overtime victory

against the Merchant Marine Academy. Freshman Emeka Smith was named ECAC Metro Rookie of the Year, ECAC Second-Team All-Star, Skyline Conference All-Star, and Metropolitan Basketball Writers' First-Team All-Star.

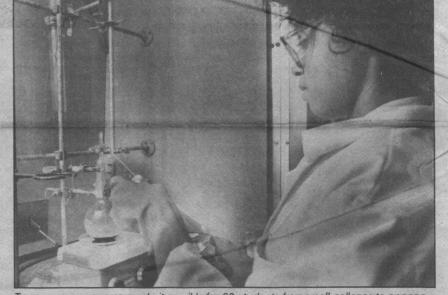

After just one year of Division I status, the men's lacrosse and women's soccer teams posted records of 12-2 and 6-12 respectively. Senior Lisa Shaffer was named to the All-Northeast Division I team. Particularly impressive was the men's lacrosse western swing, which produced victories against Stanford, the University of California at Berkeley and the Air Force Academy.

Participating in the NCAA Division III National Indoor Track and Field Championships, Sarah Lenchner became Stony Brook's first national champion. Lenchner's winning mark of 39 feet, 7 3/4 inches in the triple jump set a meet record. She also won the long jump, setting a new university record of 18 feet, 8 3/4 inches.

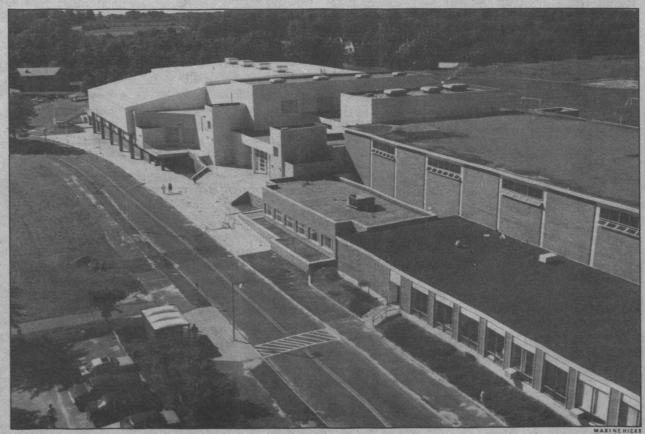

In football, freshman running back Oliver Bridges rushed for more than 1,200 yards, broke 14 university records and was named ECAC Rookie of the Year. Junior Katie Browngardt led the women's basketball team to a post-season bid in the New York State Women's Collegiate Athletic Association Championships and was recognized as Division III Player of the Year by the Metropolitan Basketball Coaches' Association.

Appointments

Paul W. Chase, formerly assistant vice president for student affairs, was appointed to the newly created position of dean of students. Egon Neuberger, professor of economics and former dean of the Division of Social and Behavioral Sciences, was named to a one-year appointment as vice provost for undergraduate studies pro tem.

Two summer programs made it possible for 60 students from small colleges to engage in research experiences with Stony Brook faculty.

Construction of the Indoor Sports Complex continued on schedule. Opened in October of 1990, the facility features an indoor track, squash courts and a 4,100-seat arena that will be the largest in Suffolk County.

GRADUATE AND PROFESSIONAL EDUCATION

The university's mission in graduate and professional education continued to expand as 1989-90 brought increased enrollments and a range of new credit and noncredit programs that broaden the university's response to the changing needs of the region's workforce.

Student Life

The Graduate School, which saw a 7 percent increase in enrollment and a 15 percent increase in applications, made important strides in improving the quality of student life. The basic student stipend was increased 5 percent to \$8,850. An initiative to increase faculty-student contact by assigning all students a faculty mentor was implemented in the fall of 1990. Construction of a new graduate complex behind Kelly Quad proceeded on schedule, with new quarters for married students opening in the fall of 1990.

Curricular Developments

The School of Medicine completed a major restructuring of its curriculum. Geared to better equip students to deal with the explosion in medical knowledge, the new program—implemented in fall of 1990—emphasizes problem-solving and maximizes applications of computerassisted instruction. Reflecting an increased emphasis on the role of medicine in contemporary society, 14 secondyear students spent ten days in Leningrad gaining a perspective on medical practice in the Soviet Union.

In other curricular developments:

 Assisted by a \$600,000 grant from the National Institute of Mental Health, the School of Nursing introduced a master's degree in gerontological practice. The school, which experienced a 15 percent increase in graduate and undergraduate enrollment, also inaugurated a master's specialization in child health, while enlarging its specialization in adult health to include primary and acute care as

well as critical care.

• The School of Dental Medicine, authorized to accept an expanded freshman class of 36 in the fall of 1990, created a post-residency program in advanced education in general dentistry. The school also maintained its record of placing 100 percent of its graduates in advanced postdoctoral education programs, approximately twice the national average.

- The Harriman School strengthened its graduate specialization in labor/management, and developed new programs in economics/finance and decision sciences.
- · Master's degree programs in teaching were approved in chemistry, physics, earth sciences and social studies.
- The Department of Earth and Space Sciences introduced a graduate concentration in hydrogeology.

Renovations were completed on the Chapin Apartment Complex, a key residence for graduate students.

Continuing Education

With enrollment increasing 20 percent, the School of Continuing Education (CED)—serving part-time, graduate and non-matriculated students-began the year with an

> array of new programs that address Long Island's educational, professional and business needs:

- Thirty-five candidates enrolled in CED's new program leading to a Master of Professional Studies. An additional 15 enrolled in another new CED offering: the Master of Arts in Teaching/Social Studies. The programs bring to three the number of CED's master's degree offerings.
- Forty candidates and a selection of nonmatriculated students enrolled in CED's new graduate certificate programs in Long Island regional studies, waste management, occupational health and safety and coaching—all designed specifically for working professionals.
- The new Center for Education on Substance Abuse sponsored its first conference. "Substance Abuse in the Suburbs" attracted 150 business, education and social service professionals.

the School of Medicine, while Alexander King (right) was named vice provost for graduate studies. offered management and trade seminars as well as classes in real estate and insurance licensing and applications of

Left: Construction of a new graduate complex behind Kelly Quad will provide new quarters for married students when completed in fall, 1990. Bottom: The School of Nursing, experiencing a 15 percent increase in graduate and undergraduate enrollment, introduced a master's degree in gerontological practice. Pierce Gardner (middle) was named associate dean for academic affairs in

In other areas, the School of Medicine's Office of Continuing Medical Education offered physicians more than 35,000 credit hours of instruction. A mammography course developed with a grant from the National Cancer Institute attracted more than 250 radiologists and technologists from around Long Island, where breast cancer mortality rates exceed those for the nation. The office also conducted symposia on occupational health problems and current

issues in family medicine.

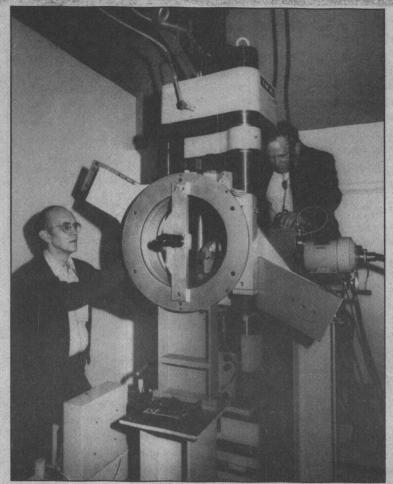

personal computers.

Alexander King, formerly associate vice provost for graduate studies, was named vice provost for graduate studies. Pierce Gardner, formerly chief of the Department of Medicine at Hartford (Conn.) Hospital and associate chair of the Department of Medicine at the University of Connecticut, was named associate dean for academic affairs in the School of Medicine. He had previously been a member of the medical faculty at the University of Chicago.

SC PHOTOGRAPHY SERVICE

RESEARCH

A site visit by the Science and Technology Center of the National Science Foundation may result in annual funding of \$2.5 million for the university's Mineral Physics Institute.

With research volume nearly tripling in the last decade, Stony Brook has joined the nation's top 25 institutions in projects funded by the National Science Foundation.

Crucial to this advance has been the state's Graduate and Research Initiative, which over the last four years has provided Stony Brook with \$7.2 million in support of developing the university's research infrastructure. The university has strategically combined these funds with federal and private resources to strengthen graduate education, enhance the university's research capacity and support regional economic and technological development.

In response to a strong regional mandate for the university to become the focus of new forms of economic activity on Long Island, Stony Brook in 1989-90 prepared a campus Economic Development Agenda—a set of activities that use the university's intellectual resources to reduce the regional economy's dependence on federal defense spending. These initiatives serve, in turn, to strengthen Stony Brook's ability to perform pure and applied research through expanded facilities, personnel and programs.

Areas identified as particularly ripe for further development as part of this agenda include:

- Medicine, expansion of which is directly related to the operation of University Hospital;
- Life sciences, still cresting on the development of Stony Brook's health care mission;
- Marine sciences, which, with its strong environmental emphasis, provides an ideal base from which to address such problems as sewage, water, and energy management;

The university has joined with 25 other major research universities in an initiative to attract more women and minority students to careers in research. One objective: to upgrade science and math curricula and teacher training in grades K through 12.

 Engineering, which has benefited from previous initiatives that strengthened computer science and applied mathematics;

FINANCIA CONTRACTOR OF THE PARTY OF THE PART

 Business and management, with the Harriman School continuing its evolution into a center offering advanced training and research opportunities in the art, science and technology of modern commerce.

A major advance came in late spring when the New York State Legislature appropriated \$2.8 million for the Long Island High Technology Incubator to be built on the Stony Brook campus. When completed within the next two years, the incubator will house 12 to 15 start-up companies in high-tech fields, including biotechnology, information services, electronics, medical products and environmental technology.

Also fulfilling the university's economic development agenda is a consortium led by Stony Brook physicist Michael Marx and including scientists from Brookhaven National Laboratory, Grumman's Space Systems Division, and Martin Marietta Astronautics. The consortium received initial endorsement from an advisory committee of the Superconducting Supercollider Laboratory on a proposal to build a more effective system of magnetic detectors for the facility. If funded, the EMPACT Project ("EMPACT" stands for "Electrons, Muons and Protons using Air Core Toroids") could create hundreds of jobs and make Long Island a capital of the evolving world of high-energy physics.

Acting as a resource to the region's electronics industry, Stony Brook established the Institute for Interface Phenomena. Staffed by members of the departments of Physics, Chemistry, and Materials Science, the institute conducts basic and applied research in electronics, with particular emphasis on high-temperature superconductivity. The institute received a \$630,000 grant from the Defense Advanced Research Project Agency (DARPA) to make possible more efficient use of superconducting materials.

In a promising development that could lead to annual funding of \$2.5 million for the university's Mineral Physics Institute, Stony Brook was one of only 30 institutions in the nation to be paid a site visit from the Science and Technology Center of the National Science Foundation. In the environmental arena, Stony Brook opened its first biological

The British Broadcasting Company (BBC) was one of a number of international news organizations to visit the campus in 1989-90. The BBC's interest: research into human origins by faculty in the Department of Anatomical Sciences.

field station on the shores of Swan Pond, a 2,500-acre park in Suffolk County. The station, to be operated by Stony Brook's Department of Ecology and Evolution, will be used for research on and education in the Long Island pine barrens and the headwaters of the Peconic River.

THE RESERVE OF THE PROPERTY OF

The School of Medicine, which saw research funding increase nearly 15 percent in 1989-90, experienced growth especially in molecular neurobiology, systems neurosciences, cell biology and functional and evolutionary morphology. Completion of new clinical research laboratories will enable the School of Dental Medicine, which conducted nearly \$2 million in research in 1989-90, to develop new research programs.

The humanities and social and behavioral sciences also expanded their research programs. The Division of Social and Behavioral Sciences received \$5.5 million in new funding in 1989-90, including \$3.5 million to the Department of Psychology from such sources as the National Institutes of Health and the National Institute of Mental Health. Faculty in the Institute for Decision Sciences received \$330,000 from the National Science Foundation for the study of topics in game theory.

Appointments

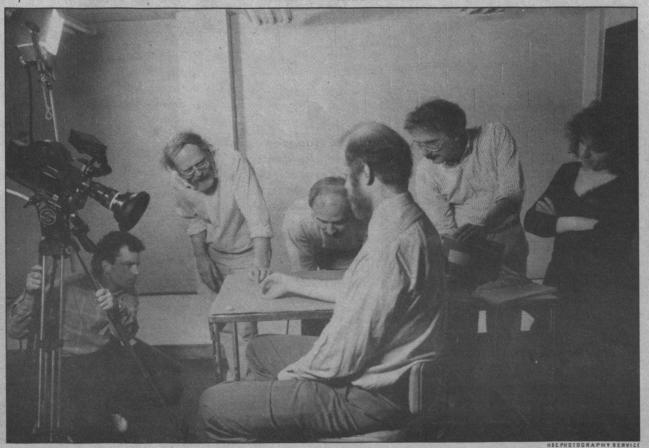

David C. Glass, professor of psychology, was named vice provost for research pro tem, while Robert F. Schneider, formerly associate vice provost for research, was named associate provost for research administration and campus manager of the Research Foundation. Craig Malbon, associate professor of pharmacological sciences, was appointed associate dean for biomedical research in the School of Medicine. Physicist Michael Gurvitch, previously with Bell Laboratories, was named director of the Institute for Interface Phenomena, while Marvin Geller, formerly with NASA, was appointed the first full-time director of the Institute for Terrestrial and Planetary Atmospheres.

Robert F. Schneider was named associate provost for research administration and campus manager of the Research Foundation.

David C. Glass, professor of psychology, was named vice provost for research pro tem.

MILESTONES AND BREAKTHROUGHS

Estelle James

Economist Estelle James made national headlines with her study, conducted for the U.S. Department of Education, in which she concluded that the college one attends is far less important than the studies undertaken there. Significant factors in predicting future earnings, says James, include the number of math courses a student takes and the grades earned.

Robert Cess

Robert Cess, professor of mechanical engineering, answered a key question about the role played by clouds in the greenhouse effect. Clouds, he and NASA collaborators concluded, have a net cooling effect but cannot be counted on to reverse the warming of the earth's climate. Cess is now directing a Department of Energy project aimed at improving the computer models used to predict climate change.

Fred Walter

Unforeseen problems with the Hubble Space Telescope won't stop astronomer Fred Walter from being an active member of the telescope's spectroscopy team. Results may come more slowly than expected, but Walter will continue to use data from the telescope in analyzing the composition of planets and stars.

K. Daniel O'Leary

K. Daniel O'Leary, distinguished professor of psychology and director of Stony Brook's Marital Therapy Clinic, found that physical violence tends to follow the onset of verbal aggression in couples within one year. His research pointed to an aggressive, impulsive personality and a history of fighting in junior or senior high school as other predictors of physical aggression.

Diane Doran

Anatomical scientist **Diane Doran** was selected by the Digit Fund to head the Karisoke Research Center in Rwanda, Africa. The subject of a feature in *Life* magazine, Doran, who received her Ph.D. from Stony Brook in 1990, continues the work begun by the late Dian Fossey, whose contributions were celebrated in the film *Gorillas in the Mist*.

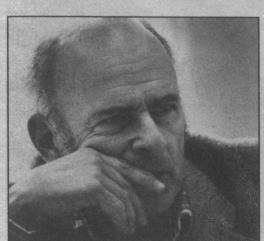

Paul Grannis

Physicist **Paul Grannis** led the successful installation of a \$60 million high-energy physics particle detector at the Fermilab (Fermi National Accelerator Laboratory) proton collider. The project, conceived and shepherded through a 10-year development phase by USB faculty, will produce subatomic collisions of energy three times greater than those produced before.

Glenn Prestwich

Professor Glenn Prestwich of the Department of Chemistry led a team of researchers that chemically modified hyaluronic acid, a natural substance in the body, to make it work better and last longer. Modification of the substance—a viscous material found inside the eyeball and in all joints of the body—could lead to more effective ways to treat eye disease, burns and other ailments.

Louis Simpson

Pulitzer Prize-winning poet and professor of English Louis Simpson received critical acclaim for two recently published works. Selected Prose was published in 1989 and The Room We Share was published in March of 1990, both by Paragon House.

Ilan Spector

Based on three-dimensional volume visualization technology created by computer scientist **Arie Kaufman**, anatomical scientist **Ilan Spector** and Kaufman's graduate student **Roni Yagel** created the first three-dimensional computer image of a living cell. Kaufman's innovation will enhance research in the fields of medicine, science and technology.

HEALTH CARE

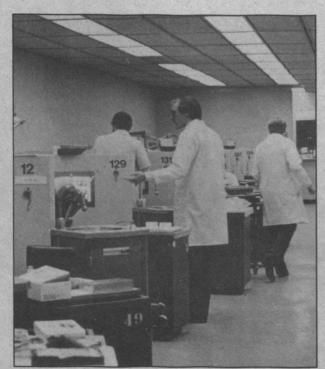

University Hospital has launched a major initiative to meet Suffolk County's increasing need for neonatal services. Four neonatal beds were added to the Perinatal Center in 1989-90, and ten more will be added in 1990-91.

University Hospital, a major component of the Health Sciences Center at Stony Brook, celebrated its tenth anniversary in February, marking a decade of growth that has seen it develop with the School of Medicine into a comprehensive, 500-bed tertiary-care academic medical center.

During 1989-90, the School of Medicine's full-time faculty of 379 physicians provided care to more than 20,000 hospitalized patients, including the delivery of 2,600 infants, representing more than 150,000 hospital days. The hospital performed some 5,000 major operations and recorded 321,661 outpatient care visits. Occupancy averaged 86 percent.

A number of special care programs conducted by medical school faculty are the only services of their kind offered in Suffolk County, which has a population of 1.5 million. These include the Lyme Disease Center, comprehensive diabetes treatment, AIDS treatment, the Burn Center, renal transplantation, adult and pediatric cardiac surgery, high risk maternity care and neonatal intensive care for premature infants. Also offered are clinics for multiple sclerosis, seizures, muscular dystrophy, headache disorders and geriatric psychiatry.

The School of Dental Medicine registered 38,000 patient visits at its Dental Care Center and provided care to nearly 900 disabled individuals

New Programs

The School of Medicine established a number of new programs in 1989-90, including:

- · a department of dermatology;
- · a division of otolarynology;
- · an innovative program in biliary lithotripsy for nonsurgical treatment of gallstones;
- · a psychiatric emergency program that improves access to care for patients with acute psychiatric problems;
- · a living skin bank in the Burn Center to provide burn patients with their own laboratory-grown skin for transplant.

In addition, the Department of Medicine's Division of Endocrinology established a tenbed acute care diabetes unit serving Suffolk County's 69,000 known diabetics. The unit is. the first on Long Island to offer comprehensive inpatient, outpatient and educational services, and provides community physicians with tertiary-care resources not previously available. The center also supports research efforts in the School of Medicine.

Responding to Suffolk County's need for additional neonatal services, University Hospital added four neonatal beds to the Perinatal Center, under the direction of the Department of Pediatrics. Additional

expansion, scheduled for completion in January 1991, will add 10 more neonatal special care beds, with three designated for intensive, six for intermediate and one for continuing care.

As the year drew to a close, a four-bed cardiac stepdown unit was opened and 15 beds were fitted with continuous electrocardiograph monitoring for patients with heart problems.

The Department of Radiology increased its capacity by breaking ground for the installation of the most advanced magnetic resonance imaging (MRI) unit currently available. University Hospital also joined with Brookhaven National Laboratory in operating a third linear accelerator, thereby making advanced therapeutic radiology services available to residents of eastern Suffolk.

The School of Medicine and University Hospital established two new residency programs. Initial accreditation was granted for a three-year program in emergency medicine to train six residents a year and for a three-year program in dermatology that will train two residents annually. Along with their colleagues in 29 other fields, these residents will enjoy the benefit of recently completed house staff sleeping quarters.

Staff training continues to be an important aspect of the hospital's activities. In conjunction with the School of Allied Health Professions, the hospital received approval for a rate adjustment from the New York State Department of Health that allows staff to receive training in clinical perfusion, an essential part of open heart surgery.

In collaboration with the School of Nursing, the hospital continued its critical care internship program for new graduates of nursing schools. In 1989-90, the preceptor program allowed 122 recent graduates to gain advanced training at full pay in such critical areas as adult critical care, pediatric and neonatal intensive care and high-risk maternal and fetal care.

A \$128,000 grant from the New York State Health Department enabled the hospital to collaborate with several other educational institutions to develop programs that will provide paid study opportunities for employees in its clinical laboratories. Another grant from the Health Department allowed the hospital to join with 58 other institutions in the region in offering advancement programs leading to positions as registered nurses. Through Project LINC, funded at \$310,000, participants may maintain full salary and benefits while attending school full time and working part time.

In other patient care activity, the School of Dental Medicine registered 38,000 patient visits at its Dental Care Center and provided care to nearly 900 disabled children and adults. With funding from the Department of Health

The Long Island Veterans Home, operated by the Health Sciences Center, will provide comprehensive inpatient and outpatient services for veterans when it

and Human Services, the School of Dental Medicine established a two-year residency program in general dentistry and a new postdoctoral program in orthodontics.

Structural work on New York's second state-operated veterans home—currently under construction on a site near the hospital—continued toward its expected completion date in early 1991. The 350-bed facility will provide comprehensive inpatient and outpatient services for veterans who require skilled nursing care.

Believed to be the nation's first university-based nursing home, the facility—operated by the Health Scien under the direction of Irwin S. Lamm-will complement the hospital's regional role by providing comprehensive care to meet the medical, nursing, rehabilitation, social and personal needs of its residents. Physicians on the faculty of the School of Medicine will offer the full range of medical specialties, while regular clinics will offer medical, dental, optometric, podiatric and speech audiology services. Nursing staff will work closely with faculty in the School of Nursing, and additional therapeutic services will be offered in conjunction with the School of Allied Health Professions.

CULTURAL AND SOCIAL OUTREACH

The Toronto Dance Theatre was one of the highlights that contributed to the Staller Center's record-breaking tenth anniversary season.

Stony Brook continues to grow as a center for culture and the arts on Long Island. Cultural diversity, a distinct emphasis in campus life, is reflected in the rich diversity of programs offered to the public.

Staller Center for the Arts

The Staller Center for the Arts opened its tenth anniversary season with a sold-out performance by the English Consort conducted by Trevor Pinnock. Other highlights included the East Coast premiere of Nijinska's Le Train Bleu, Claire Bloom's Then Let Men Know-A Portrait of Shakespeare's Women, and performances by the Kodo Drummers of Japan, Kronos Quartet and Toronto Dance Theatre. The Newark Boys' Choir and the National Black Touring Circuit performed in commemoration of the birthday of the Rev. Martin Luther King, Jr. Attendance at paid events reached 80 percent for the season, an increase of 10 percent over the previous year.

The 1990 International Theatre Festival—sponsored by British Airways, Rankin Realty, North Fork Bank and Days Hotel—attracted national attention with productions from England, China, Czechoslovakia, France, Ireland and South Africa. Ticket sales doubled those of 1989, and box office income tripled. Shakespeare's Romeo and Juliet, with Roland Gift, lead singer of the Fine Young Cannibals as Romeo, proved to be the biggest draw in Staller Center history.

All six productions of the Stony Brook Theatre, the performance arm of the Department of Theatre Arts, played to capacity houses. Offering several instrumental and vocal series, the Department of Music saw record attendance for the Stony Brook Symphony Orchestra, and—in an unusual cooperative venture with the Center for Italian Studiesproduced a fully staged performance of The Marriage of Figaro.

Distinguished Visitors

Each year, the university hosts hundreds of conferences, seminars, and lectures, allowing the community to engage with many of the outstanding thinkers of our time. Highlights of 1989-90:

- The University Distinguished Lecture Series, sponsored by the Office of the Provost and Newsday, brought to campus such provocative speakers as journalist Neil Sheehan, author Mark Mathabane, attorney Sarah Weddington and actress Phyllis Frelich.
- The Humanities Institute brought to campus such scholars as Donna Haraway, professor of history at the University of California at Santa Cruz, and Australian feminist theorist Meaghan Morris.
- Speakers in the Distinguished Corporate Scientist Lecture Series included Jeffrey McKelvey, director of neuroscience research and pharmaceutical discoveries for Abbott Laboratories; Craig Rosen of the Roche Institute; and Amy Weiner of Chiron Associates.

Other distinguished visitors included Isidore Singer of Massachusetts Institute of Technology, Jean-Francois Lyotard of the University of Paris, and Nobel laureates Arno Penzias, James Watson, Gertrude Elion, Howard Temin and Rosalind Yalow.

Other Highlights

The university made its mark on the region's cultural life in numerous other areas in 1989-90:

•The university's Pollock-Krasner House and Study Center in East Hampton, now in its second year, was awarded \$3,000 by the New York State Council on the Arts to assist in housing the center's rich collection of materials and recorded interviews illuminating 20th-century American art. Helen Amy Harrison, formerly curator of Guild Hall in East Hampton, was named the center's site director.

• In cooperation with Port Jefferson's Theatre Three and the Greater Port Jefferson Arts Council, the Humanities Institute sponsored two film series, one featuring women directors, the other Latin American directors.

• The University Art Gallery, observing its tenth anniversary, mounted six highly acclaimed exhibitions, including "Haitian Art," "Fiber Explorations," and "Prints by Printmakers."

• WUSB 90.1 FM, the university's eclectic radio station, made much-needed equipment upgrades with \$26,000 contributed by listeners, in the station's second on-air fundraiser.

School Partnerships

The university extended its outreach to Long Island schools in 1989-90. The new Student Research Support Program, sponsored by the Center for Science, Mathematics and Technology Education, assisted some 500 high school students in developing projects for science competitions. Of 26 Long Island students who qualified as Westinghouse Talent Search winners, 21 participated in the Stony Brook

As regional coordinator for the state-funded Liberty Partnership program, the Center for Excellence Innovation in Education joined forces with four Suffolk County school districts to assist students facing personal or social obstacles to learning. The university also sponsored a summer "Space Camp," in which 35 teens spent three weeks exploring the legal, social, and scientific implications of establishing a colony on the moon.

Faculty and Staff Contributions

The generosity of faculty and staff made Stony Brook a Long Island leader in the SEFA/United Way campaign. With the number of contributors increasing 244 percent, total contributions increased 60 percent to \$81,000. President Marburger headed the Long Island SEFA campaign and has been invited to lead the 1991 Long Island United Way campaign. Faculty and staff also turned out in record numbers for the university's annual blood drive.

Sarah Weddington (left), the lawyer who successfully defended Jane Roe in the landmark case Roe v. Wade, and Tony Award-winning actress Phyllis Frelich (above), were two distinguished lecturers who came to campus last year. The Guild Trio (below) was designated "Trio in Residence" at the Music Center at Tanglewood. Making up the trio are Stony Brook graduate students (from left) Janet Orenstein, violin; Brooks Whitehouse, cello; and Patty Tao,

ECONOMIC DEVELOPMENT

At a critical transition period for the Long Island economy, Stony Brook's burgeoning partnership with the region's private sector plays a vital role in developing globally competitive, knowledge-based industries.

As part of the university's Economic Development Agenda, Provost Tilden G. Edelstein named a university task force charged with coordinating the university's economic development efforts. Appointed chair was J. R. Schubel, dean of the Marine Sciences Research Center and a recent appointee to the Governor's Task Force on Coastal Resources. As an additional step, the provost appointed Ann Marie Scheidt to the newly created position of special assistant to the provost for regional development.

In its first year the Regional Economic Development Task Force completed an inventory of university programs that foster regional development and sparked two outreach initiatives: the Long Island Environmental-Economic Roundtable, a forum of public officials committed to establishing a working balance between environmental conservation and economic development, and the Regional Ash Utilization Council, a consortium of companies, agencies and nonprofit institutions with a shared interest in developing commercial applications for recycled incinerator ash.

Comprising the task force are representatives of centers, departments, and schools that, with missions directly linked to regional development, made substantial contributions in 1989-90. For example:

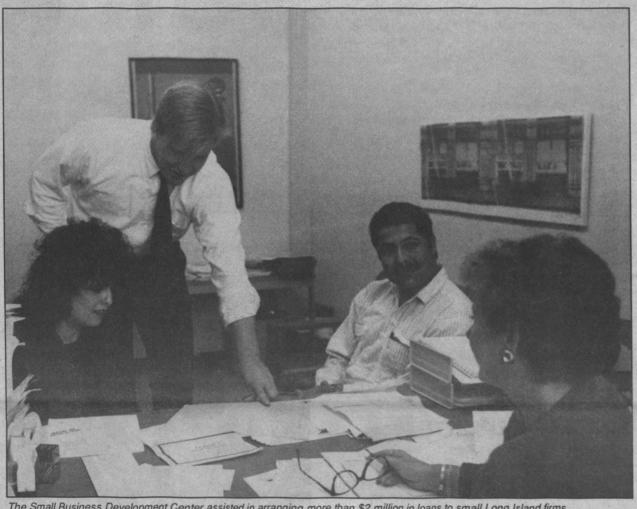

• The Stony Brook Foundation and Research Foundation, playing expanding regional roles, created a subsidiary corporation to oversee the university's burgeoning initiatives to "incubate" high-tech start-up firms. Pending completion of the 40,000 square-foot Long Island High Technology Incubator—toward which the New York State Legislature in 1989-90 authorized \$2.8 million—the university will continue to house promising start-up firms in specially allocated space in the Life Sciences Building.

• The Center for Regional Policy Studies initiated development of a comprehensive strategic plan for the Long Island economy. Under the direction of Lee Koppelman, director of the Long Island Regional Planning Board, the center also took the initiative in coordinating potential regional development of high-speed Maglev trains.

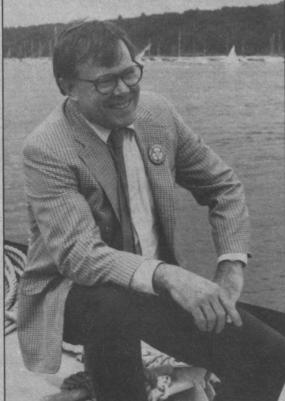

• The Harriman School for Management and Policy sponsored conferences on topics as diverse as quality improvement and the emerging workforce of the 1990s. Its Small Business Development Center provided assistance to 400 clients and assisted in arranging more than \$2 million in loans to small Long Island firms. Directed by Judith McEvoy, who was recognized as Long Island's Small Business Advocate of the Year, the center sponsored 30 training workshops and seminars addressing such topics as franchising, economic diversification, and contracting with government agencies.

• The Center for Biotechnology, which awarded \$500,000 in seed grants in 1989-90, joined with Brookhaven National Laboratory, Cold Spring Harbor Laboratory and North Shore University Hospital in sponsoring a major three-day conference, "Biotechnology on Long Island." Other initiatives included a DNA workshop aimed at creating a high school curriculum in molecular biology and a biotechnology job fair attended by representatives of 20 Long Island corporations.

• The Marine Sciences Research Center played a leading role in developing a strategy for dealing with floatable ocean waste and assisted in developing a recycling program at Port Jefferson Harbor. Bringing together experts from around the world to discuss major environmental problems, the center also conducted its first Long Island International Forum on the Environment in Montauk, focusing on the effects of sewage plant discharge on coastal waters.

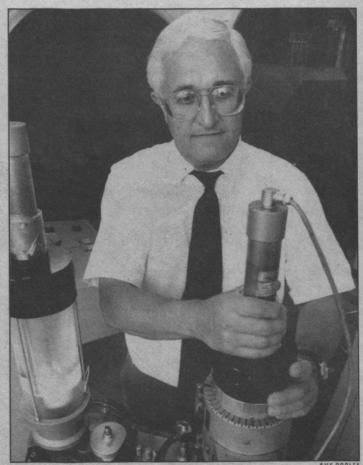

The Small Business Development Center assisted in arranging more than \$2 million in loans to small Long Island firms.

J. R. Schubel, dean of the Marine Sciences Research Center, was named chair of a university task force charged with coordinating the university's economic development

Stony Brook faculty teamed with industry on more than 150 joint projects in 1989-90. In one such partnership, Stony Brook's Thermal Soray Laboratory—directed by materials engineer Herbert Herman-is working with Long Island-based Moltech Corp. to develop applications of diamond films in computers.

MANAGEMENT INITIATIVES

After three decades of rapid growth, Stony Brook took stock of its campus services and fiscal operations in 1989-90, adjusting vice presidential responsibilities in both areas to better reflect a maturing institution.

With duties divided between two new vice presidents, coupled with a major effort to manage sensitive resources, the campus is already benefiting from steps to improve maintenance, expand services, conserve energy, streamline business operations and strengthen budgetary systems.

Academic Priorities

A student-faculty-staff Presidential Advisory Committee on University Priorities chaired by Provost Edelstein was formed to develop priorities in allocating university resources. The committee will be on-going.

Other steps to strengthen management of the academic sector include:

- · Continued decentralization of decision-making among colleges and divisions;
- Development of a pilot program to decentralize management of grants and contracts;
- · Assumption by the campus of many functions previously performed by the Research Foundation.

Conserving Resources

President Marburger initiated "Project Prometheus" in the fall of 1989 to coordinate management of sensitive resources, including energy, water, sewage, municipal solid waste, toxic and hazardous waste, and medical waste. Chairing the effort, J. R. Schubel, dean of the Marine Sciences Research Center, oversaw a series of working groups charged with developing a strategic plan for managing each resource. The aim: to achieve significant near-term cost savings while developing a sound long-range plan for resource management.

Conservation efforts underscored the potential benefits of such an approach. Building on a major energy conservation program initiated in 1988, the university in 1989-90 trimmed its electrical bill by \$2.1 million and saved \$1.4 million on expenditures for oil and natural gas. Major savings were achieved by converting boilers to burn either oil or natural gas, consolidating campus activities during the summer, and closing a number of campus buildings during the Christmas holiday and intersession.

Construction of a cogeneration plant that will meet Stony Brook's full energy and thermal needs is projected to begin in 1992. In cogeneration, heat produced as a by-product of electrical generation is used to generate steam and hot water. At Stony Brook, steam and hot water heat and cool more than 100 buildings, including 1.75 million square feet in the Health Sciences Center alone.

Physical Plant

Vice President for Campus Services Harry P. Snoreck has set a high priority on upgrading the university's physical plant, introducing bimonthly quality assurance tours of randomly selected buildings to more quickly identify and correct problems ranging from broken locks to overfilled dumpsters.

Other steps to improve efficiency and productivity included:

- · Consolidation of mail delivery, woodcraft, upholstery, waste management, and recycling operations.
- Relocation of Public Safety to larger quarters and expanding staff and training facilities. In addition, former acting director Richard Young was named director of Public Safety, and two assistant directors were appointed—one to oversee the night shift, the other for University Hospital.
- · Creation of a Department of Parking and Transportation Services to coordinate university parking and transportation needs.

Fiscal Improvements

Under the direction of Vice President for Finance and Management Glenn H. Watts, significant improvements were achieved in the university's conduct of its fiscal affairs in 1989-90.

A new Planning, Budgeting and Reporting Initiative was developed to change the approach and practices used in determining Stony Brook's financial needs, allocating dollars and evaluating how effectively dollars are spent. The new initiative, which begins with Phase 1 allocations for the 1990-91 fiscal year, will allow managers to make allocation decisions with a greater awareness of their financial resources.

Soon to be implemented is a computerized recordkeeping system that, when fully operational, will standardize payroll, personnel and accounting operations now performed by several automated systems.

SPECIAL REPORTS

University committees in 1989-90 probed such diverse issues as the quality of campus life, the university's regional impact, student housing standards, and the university's transportation and energy needs. Key reports included:

Campus Master Plan

The university's Master Plan, completed in 1989, provides a substantive guide to future physical growth and

University improvement projects included upgrading road surfaces and parking areas.

Glenn H. Watts

Harry P. Snoreck

development of the campus through the year 2015. The SUNY Construction Fund agreed to map out high-priority capital projects of the new Master Plan.

Planning will begin this fiscal year on conversion of Central Hall into a Student Activities Center and construction of a new facility for the life sciences to provide space for instruction and research. A third high priority project, developing a plan to landscape the entire campus, also is expected to be funded in fiscal 1990-91.

Parking And Transportation Services

A Campus Services report details the planned operation of a new Department of Parking and Transportation Services, including administrative structure and goals. It outlines a five-year plan to make the transportation system self-sufficient and to provide the campus with a safe and effective means of transportation and access.

Campus Housing

The Division of Campus Residences conducted ongoing quality of life assessments, polling at least 20 percent of residence hall occupants on a variety of subjects related to student life. The surveys provided the impetus for development of a written policy spelling out minimum living conditions for residence halls. Division staff also shaped a written list of rights and responsibilities for those who live on campus.

FACULTY HONORS

Among major fellowships and honors awarded to Stony Brook faculty members during 1989-90:

American Academy for the Advancement of Science Fellows

- Ronald Douglas, Vice Provost for Undergraduate Studies
- Abraham Krikorian, Department of Biochemistry and Cell Biology
- · Alexandra Logue, Department of Psychology

Fulbright Awards

- William Arens, Department of Anthropology
- Susan Bird, International Programs
- Ruth B. Bottigheimer, Department of Comparative Studies
- Aaron S. Carton, Department of Linguistics
- Brooke Larson, Department of History
- Molly Mason, Department of Art
- Stacey M. Olster, Department of English
- Susan M. Squier, Department of English
- Jason Stanley, Department of Philosophy, a senior at the time of the award and the first Stony Brook undergraduate to be awarded a Fulbright full scholarship.

John Simon Guggenheim Memorial Foundation Fellowship

 Daniel F. Bogenhagen, Department of Pharmacological Sciences

National Endowment for the Humanities

- Ellen Broselow, Department of Linguistics
- Elizabeth Stone, Department of Anthropology

National Institutes of Health MERIT (Method of Extended Research in Time) Awards

- Ira S. Cohen, Department of Physiology and Biophysics
- Barry Coller, Departments of Medicine and Pathology
- Lorne Golub, Department of Oral Biology and Pathology
- Simon Pilkis, Department of Physiology and Biophysics
- Jakob Schmidt, Department of Biochemistry and Cell Biology
- Lorne Taichman, Department of Oral Biology and Pathology
- Peter Tegtmeyer, Department of Microbiology
- Eckard Wimmer, Department of Microbiology

National Science Foundation Presidential Young Investigator Awards

- Vladimir Goldman, Department of Physics
- John Grove, Department of Applied Math and Statistics
- Scott McLennan, Department of Earth and Space Sciences
- Clinton Rubin, Department of Orthopedic Surgery
- Johanna Stachel, Institute for Theoretical Physics

Alfred P. Sloan Foundation Fellowship

• Vladimir Goldman, Department of Physics

Honorary Societies

- Nandor Balazs, Department of Physics, elected to the Hungarian National Academy of Science
- William Lennarz, Department of Biochemistry and Cell Biology, inducted into the National Academy of Sciences
- Egon Neuberger, Vice Provost for Undergraduate Studies, elected president of the Association for Comparative Economic Studies
- Sidney Strickland, Department of Pharmacological Sciences, elected to the board of trustees of the Cold Spring Harbor Laboratory

Other Awards, Honors, Grants and Fellowships

- Scott Anderson, Department of Chemistry, Camille and Henry Dreyfus Foundation Award
- William Arens, Department of Anthropology
- Joseph Fenstermacher, Department of Neurosurgery, Javits Neuroscience Investigator Award
- Jorge Galan, Department of Microbiology, Pew Scholar
- David Halle, Department of Sociology, Russell Sage Visiting Scholar
- Eva Kittay, Department of Philosophy, American Association of University Women Dissertation Fellowship
- Felix T. Rapaport, Department of Surgery, Samuel L. Kountz Award, Solomon A. Berson Medical Alumni Achievement Award, and Hoenig Award, National Kidney Foundation
- J. R. Schubel, dean of Marine Sciences Research Center, was appointed by Governor Cuomo to the Governor's Task Force on Coastal Resources
- Philip Solomon, Department of Earth and Space Sciences, Alexander Von Humboldt Foundation Senior Scientist Award
- Dieter Zschock, Department of Economics, Pew Charitable Trusts Award

What's Happening at Stony Brook?

Currents keeps you in touch.

News and feature stories keep you up to date on issues affecting the university community.

In Currents, which is published monthly by Stony Brook's Office of Public Relations and Creative Services, you'll find the latest on research, new programs, faculty achievements and student activities.

You'll also stay up-to-date on more than 2,000 events that take place on the campus each year: speakers, conferences, films, performances in the arts, and more.

☐ Yes, p	please send me 10 issues of <i>Currents</i> . The enclosed check for \$4, payable to the University at Stony Brook, will cover postage and handling.

Gatherings

On the High Seas

More than 80 alumni, family and friends set sail for an afternoon of whale watching near Montauk aboard the Finback II on August 25. Though no whales were seen, everyone enjoyed the beauty of the Atlantic Ocean. Elizabeth Sterrett-Rothstein '75 shared the trip with her husband, Kenneth, and sons Adam Noah and Jacob.

Over this past summer and fall, the Office of Alumni Affairs and the Stony Brook Alumni Association organized several programs and events to bring Stony Brook alumni together for fun and relaxation. Whether it was the Thomas Jefferson Paddle Boat Cruise on Long Island Sound, where more than 70 alumni enjoyed an evening of star gazing and dancing, or a classroom in New York City, or a barbecue picnic in Lubber Run Park in Arlington, VA, alumni turned out in record numbers. The following chronicles some of those events and the people who attended.

Take Me Out to the Ball Game

On Saturday, Sept. 15, early morning clouds gave way to afternoon sunshine at the annual Stony Brook Alumni Mets baseball game. More than 200 Stony Brook alumni, family and friends joined the 45,000 Shea faithfuls to watch the Amazin's beat the Philadelphia Phillies 4-2.

College Day 1990:

Stony Brook in the Big Apple

For the first time, the annual College Day program was held in New York City, at the Fashion Institute of Technology, Sept. 8. More than 50 New York area alumni attended an intriguing day of presentations and discussions led by some of Stony Brook's top faculty, including Andrew Policano '71, dean for Social and Behavioral Sciences; Jordan J. Cohen, dean of the School of Medicine; Lee Koppelman, director of the

Center for Regional Policy Studies; E. Ann Kaplan, director of the Humanities Institute; and sociology

professor Michael Kimmel (above) who spoke on

'Men's Changing Roles in American Society."

Support of the Alumni Association through lifetime membership dues has built Stony Brook's alumni program. Alumni dues have supported the growth of special programs including Homecoming, class reunions, regional club and travel programs, awards and scholarships and the university's growing Student Alumni Chapter.

To maintain this level of activity, the Alumni Association Board of Directors has established lifetime membership dues at \$160 and alumni couples membership at \$250. Your support today will provide high-quality programs and services for alumni and students in the years ahead.

In addition to supporting the Alumni Association, members receive discounts on university events as well as on alumni programs and activities.

Yes, I would like to join the Alumni Association

☐ Individual Lifetime Membership, \$160 ☐ Alumni Couple Membership, \$250

Please make checks payable to Stony Brook Alumni Association. Send this coupon to the Office of Alumni Affairs, 330 Administration, University at Stony Brook, Stony Brook, N.Y. 11794-0604. Payment can be made in two installments. For more information, contact the Office of Alumni Affairs at (516) 632-6330.

More than 60 Stony Brook alumni and their families went aboard the Spirit of New York for a cruise around Manhattan, July 29. Food, fun and entertainment made for a perfect atmosphere to share with old friends. Norm Prusslin '73, Kathy Donnelly '86, Karen Catel '75 and Shelly Cohen '77 (above) take in the New York City skyline while Laurel Perlin '85 and Ellen Kim '85 (left) soak up the sunshine. The Catel and Cohen families took the opportunity to get better acquainted.

For more information on future events in your area, contact Ann Begam, director of alumni affairs, 330 Administration, University at Stony Brook, Stony Brook, NY 11794-0604 or call (516) 632-6330.

Rain, Rain, Go Away.

Like Hugo the year before, Lili leaves her mark, but she didn't dampen the spirits.

For the second straight year, one too many guests was invited to Stony Brook's Homecoming Weekend. Last year it was a hurricane named Hugo, this year it was Lili.

Though she literally rained on our parade (torrential rains at that), it wasn't enough to dampen the spirits of the nearly 650 alumni who returned for the weekend celebration.

This year's homecoming was marked by several important events, including the dedication of the new Stony Brook Indoor Sports Complex, Oct 11. Visitors and guests attended ceremonies, banquets and tours to mark the event.

Later that evening, seniors Yves Gabriel and Michelle O'Connor joined an impressive list of Stony Brook students as they were crowned Homecoming king and queen. Even though their crowning ceremony at halftime of the Patriots-Bentley College Falcons game was a bit rainy, they accepted their crowns with pride and enthusiasm.

On Saturday, Oct. 13, several departments and organizations hosted reunions, including the School of Medicine, computer science, biology and biochemistry, Student Polity and orientation leaders. Later that evening, the reunion classes of 1965, 1970, 1975 and 1980 enjoyed a dinner/dance in the Stony Brook Union Ballroom while the Class of 1985 met at the End of the Bridge.

Three special people were recognized for their achievement and commitment to Stony Brook. Stuart Goldstein '74, owner of SDG Properties, a commercial real estate firm in New York City, and Les Paldy '62, director of Stony Brook's Center for Science, Mathematics and Technology Education, received the Distinguished Alumnus Award. Elof Carlson, Distinguished Professor of Biochemistry and Honors College Master, received the first Outstanding Faculty Award.

On Sunday, Oct. 14, the second annual "1-Mile Fun Run and 5K Run for Scholarships" was held under beautiful sunny skies. Keith Field of Manorville, NY, finished the race with the impressive time of 15 minutes, 52 seconds.

Following the race, Stony Brook administrators had their work cut out for them as they prepared breakfast for 200. Vice presidents Harry Snoreck, Tilden G. Edelstein, Frederick Preston and Glenn Watts and faculty members Norman Goodman, Paul Chase, Howard Scarrow, Gerrit Wolf and Les Paldy were among the gourmet chefs.

Recipients of this year's Alumni Association Awards were (from left) Stuart Goldstein '74, Distinguished Alumnus Award; Elof Carlson, Outstanding Faculty Award; Les Paldy '62, Distinguished Alumnus Award; with President John H. Marburger.

- 1. Everyone got wet at the Stony Brook-Bentley football game.
- 2. A future Stony Brook alum.
- From left, Gallen Bauman, Rachael Boatwright and Tom Boeo dressed for the Mardi Gras 4. The Jackie Robinson Center Marching Band.
- 5. Residents and staff of Hand College stand with their float in front of the Stony Brook Union.
- 6. The Class of 1965.
- 7. Tau Kappa Epsilon's entry in the Homecoming
- parade.

 8. Harriman Dean Gerrit Wolf was one of several faculty and staff who prepared Sunday breakfast.

- The start of the 5K Run for Scholarships.
 The Class of 1975.
 Homecoming king and queen, Yves Gabriel and Michelle O'Connor, are crowned by President Marburger.
 12. The Class of 1970.
 13. The Class of 1980.

- 14. Larry '77 and Debi Ahlgren '77, and son Randy finished the 5K race together.

HELAINE MESS

FROM THE CHAIRMAN

he University at Stony Brook, the region's only comprehensive research university, has several missions and responsibilities which reflect the complex nature of the institution. In the pursuit of these missions it serves a multitude of populations. The newborn infant in University Hospital, the performers at the Staller Center for the Arts and the region's corporate leaders who look to the university to provide scientific and technical innovation — all are members of the Stony Brook family.

So, too, the activities of the Stony Brook Foundation reflect the university's many roles. In all its work, however, there is a single underlying motive — the support of university programs, faculty and students.

As we look back on a quarter century of Stony Brook Foundation service to the university, we take pride in what has been achieved. The foundation has indeed fulfilled its role of providing an avenue for private philanthropy. In human terms, this translates into scholarships and fellowships for undergraduate and graduate students, flexible funding, which assists the faculty in their research activities, and funds to encourage and recognize outstanding achievement in all aspects of campus life.

These are extraordinarily important to the university. Yet, as the foundation begins its second quarter century of service, its role becomes ever more critical. As traditional sources of funding for higher education provide an ever-decreasing proportion of the budget, we must assure that the university is still able to achieve and maintain the highest possible standards. We are committed to bridging the gap between the university's needs and its revenues, and to making certain that no one is denied an opportunity to learn, seek and serve.

I take this opportunity to express my sincere appreciation to those who have helped the university through support of the Stony Brook Foundation over the past year. We have enjoyed a most encouraging response to the Telefund appeal for the Annual Fund from alumni, faculty and staff, and the second annual Stony Brook Foundation Golf and Tennis Tournament in support of scholarships doubled its revenues over last year's event. My special thanks are also due to the members of the Stony Brook Foundation Board of Directors. Their generosity and enthusiasm contributed greatly to the foundation's success in the past year.

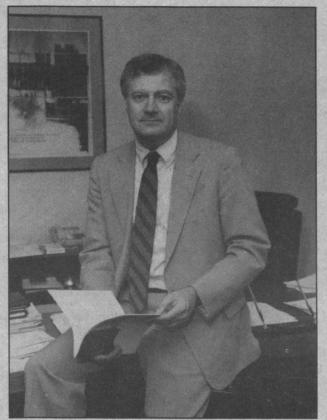

Over the past year, we said farewell to Denise Coleman, who served as executive director of the Stony Brook Foundation during a period of great change and new directions. We are sincerely grateful to Ms. Coleman for the leadership she provided, and for her unfailing dedication to the foundation and the university. We wish her every success in her new career.

On behalf of the board of directors, I am delighted to welcome Carole G. Cohen as president of the Stony Brook Foundation. Ms. Cohen comes to Stony Brook with a wealth of experience in public sector higher education philanthropy. In the past several months, we have become familiar with her many talents in fundraising, her energy and her intelligence. We look forward to a period of significant growth and unprecedented success for the foundation under her leadership.

James H. Simons

ON THE COVER: This untitled screenprint, produced by Jackson Pollock in 1951, was part of a four-month retrospective (May through August 1990) at the Pollock-Krasner House and Study Center. The center is operated under the auspices of the Stony Brook Foundation, Inc. Photo by Noel Rowe.

State University of New York at Stony Brook and the Stony Brook Foundation, Inc. are affirmative action/equal opportunity employers.

John H. Marburger

FROM THE PRESIDENT

he past fiscal year has been a challenging one for the University at Stony Brook. The state budget posed problems but we were able to overcome them by vigorous management and the high leverage funds provided through the Stony Brook Foundation. New ways have been found to fund the university's missions and we have seen real advances: the authorization for some funding for the Long Island High Technology Incubator facility, the signing of the ground lease for the new hotel/conference center, and the imminent completion of the Indoor Sports Complex are all new examples of Stony Brook's ongoing commitment to excellence.

In these and other ventures, the Stony Brook Foundation continues to play its vitally important role. The

foundation development staff worked with alumni, friends, corporations and foundations in soliciting and acquiring the philanthropic funds that support the margin of excellence in our educational, research and service activities at Stony Brook. The foundation's assets have increased steadily over the year and now stand at a figure

somewhat in excess of \$13 million. I want to thank all those who help the university through their support of the foundation.

The past year saw changes in the leadership of the foundation: the departure of Denise Coleman, executive director for four years and the appointment of Carole G. Cohen as president of the Stony Brook Foundation and vice president of university affairs. Ms. Coleman was an effective leader, dedicated to the foundation and the university, and I am grateful to her.

On behalf of the campus community, I welcome Carole G. Cohen to the university. Ms. Cohen brings extensive experience from positions held at a variety of institutions, the most recent being associate chancellor for development at the University of Illinois at Chicago and campus development officer for the University of Illinois Foundation. During the months that Ms. Cohen served as associate vice president for development at Stony Brook, she impressed many with her quick grasp of the campus' development needs and her understanding of the culture of a large research university. I look forward to working with her during a period when the Stony Brook Foundation will play an important role in achieving Stony Brook's ambitious goals.

John H. Marburger

Carole G. Cohen

. Cohen

Named president of the Stony Brook Foundation in 1989 and vice president for university affairs in June, Carole G. Cohen brings with her 20 years of development experience. Cohen was formerly associate chancellor for development at the University of Illinois at Chicago and deputy director of the University of Illinois Foundation. Prior to that, she was director of university relations for the University of Massachusetts system and director of public information and development at the University of Massachusetts Medical Center.

A graduate of Wellesley College, Cohen is an avid tennis player and sailor who is "delighted to be back in close proximity to the Atlantic."

FROM THE SBF PRESIDENT

am very pleased to report to you on the activities of the Stony Brook Foundation for the past fiscal year my first as president.

The year has been one of change and transition as the foundation moved toward becoming more active in development to support educational, research and service programs at the University at Stony Brook and in providing the campus with the means to achieve capital expansion, such as the planned hotel/conference center, without using state funds.

One of the most gratifying results of our work this past year has been the response of Stony Brook alumni to our new Telefund program. Almost 2,000 alumni, who had never contributed before to their alma mater, pledged \$210,000. Overall alumni giving increased this year by 37

percent with an increase in total dollars from alumni through the Telefund of 115 percent.

Alumni of the School of Allied Health Professions helped to establish the Edmund McTernan Scholarship Endowment in honor of their dean on the occasion of the 20th anniversary of the school. Other alumni, led by Stony Brook's first All-American, Stuart D. Goldstein '73, have formed a committee to raise an endowment for the new Indoor Sports Complex.

Faculty and staff, not to be outdone, have also been extremely generous. Vice provost for undergraduate

studies Egon Neuberger and his family endowed the Paul Neuberger Scholarship, and Elof Carlson, master of the Honors College, established two scholarships in honor of two of his former teachers. Altogether, almost \$200,000 was added to scholarship funds this year.

Friends of the university have continued to support many of our programs generously, often through the support groups that come under the foundation umbrella. Gifts to the Staller Center for the Arts, the Burn Center, Korean Studies, the Hospital Auxiliary, the Very Important Patriots and other groups provide the flexible funding so critical to maintaining and strengthening the high quality of Stony Brook. These friends are joined by many corporations and foundations who also believe that an investment in the university will go on to pay dividends in the education of our young people, the discovery and application of new knowledge and the delivery of services so vital to the region, the state and the nation.

All of these achievements could not have happened without the devotion and energy of the staff of the foundation who have worked with me this past year. My thanks go also to President John H. Marburger, Chairman James H. Simons and the board of directors of the Stony Brook Foundation for their support, confidence and counsel.

Annual Fund Adds 2,000 to Honor Roll

articularly gratifying in the 1989-90 Annual Fund campaign—which generated pledges of nearly \$210,000 through the Telefund program—were new records in both alumni and faculty/staff contributions. The "Telefund" program staffed by student callers added nearly 2,000 new alumni names to the donor rolls.

"Stony Brook is a magnet, a cornerstone of Long Island. It is a fundamental part of the region's economy," notes Richard Zuckerman '81, chair of the Annual Fund Council. "We need to recognize and applaud what the university does for us as individuals and as a community."

Leonard Spivak '64 wrote a letter of introduction for Telefund '90 to all alumni, asking their support when a student calls. In many cases, employers matched the contributions of their employees. Such corporate matching gifts amounted to \$22,400 in 1989-90.

The student callers also generated new faculty/staff contributions for 1990-91 amounting to nearly \$14,000. Total faculty/staff pledges in 1989-90 amounted to \$20,000, plus payroll deductions of \$9,300 received during the year.

Telefund is only one part of the Annual Fund. An additional \$76,000 was donated through direct mail, a fall phonathon, and other efforts. The year's total brings to more than \$1 million the cumulative contributions made by alumni, parents, faculty and staff, and friends since inception of the Annual Fund in 1984.

Annual Fund gifts are used to enhance the Stony Brook experience in several ways. Student activities, such as athletics, freshman orientation, opening week and commencement are supported by the Annual Fund, as are a variety of lectures and conferences. Emergency student loans and scholarships for exceptionally talented students are provided for by designated gifts to the Annual Fund. Indeed, \$27,000 of 1989-90 Annual Fund contributions from faculty, staff and alumni are designated for undergraduate scholarships.

Where Do Your Contributions Go?

Funds contributed to restricted accounts within the Stony Brook Foundation enable departments throughout the university to carry out the university's mission of teaching, research, patient care and regional cultural and economic development.

Following is a small sampling of what your dollars achieved in 1989-90.

\$13	Purchased a box of computer diskettes to help an African student learn to speak English. The student was enrolled in the Summer Institute in American Living.
\$45	Enabled Chaplaincy Services in University Hospital to purchase food for the family of a child brought to the pediatric emergency room.
\$96	Enabled the AIDS Community Service Project to purchase personal supplies for patients in University Hospital's AIDS Treatment Center.
\$188	Enabled a faculty member to purchase data processing services in conducting research in molecular parasitology.
\$278	Funded a reception for participants in "The New Age of U.SJapan Relationship," an international conference sponsored by the Harriman School.
\$350	Brought to the campus a distinguished historian to lecture in the Humanities Institute's Feminist Colloquium Series.
\$359	Furthered research in the Department of Psychiatry through the purchase of a computer graphics software program.
\$500	Funded a scholarship through the Black Faculty/Staff Scholarship Fund.
\$500	Assisted a Fulbright Scholar until his stipend became available.
\$600	Equipped the Pollock-Krasner House and Study Center with a video recorder and monitor required for its oral history project.
\$850	Enabled the Department of Music's Contemporary Chamber Players to perform in New York City's Merkin Hall.
\$1,040	Furthered Lyme disease research through the purchase of computer software.
\$1,530	Enabled four outstanding students in the Undergraduate Research and Creative Activities (URECA) program to attend a national conference on undergraduate research at Union College.
\$1,842	Enabled a graduate student in the Department of Ecology and Evolution to attend the summer session at Duke University's Marine Laboratory.
\$2,500	Enabled faculty in the Department of Physiology and Biophysics to deliver papers at a national conference on diabetes research.
\$3,000	Funded design and set construction for <i>The Marriage of Figaro</i> , presented jointly by the Center for Italian Studies and the Department of Music.
\$6,900	Enabled the Center for Science, Math and Technology Education to publicize and produce course materials for 35 teacher training programs.
\$8,850	Funded a one-year stipend for a doctoral student in Korean Studies.
\$10,000	Enabled the Marine Sciences Research Center to bring to the campus, as part of its Distinguished Visiting Scholars Program, four internationally prominent scholars in marine and environmental science for a week-long series of lectures and internation with students.

interaction with students.

Pollock-Krasner House Expands Programs

The Pollock-Krasner House and Study Center in East Hampton, N.Y. instituted an exhibition program this spring. A suite of six screenprints by Jackson Pollock, derived from his series of black paintings of 1951, was the first exhibit.

Renowned photographer and filmmaker Hans Namuth gave the second annual Pollock-Krasner Lecture at Guild Hall in East Hampton last summer. He discussed three of his films on the work and times of Jackson Pollock, initiating a summer series of informal talks with artists and East End historians.

Helen Harrison was named the full-time director of the center March 1, under the auspices of the Department of Art. She is an art critic for *The New York Times* and former curator of Guild Hall in East Hampton.

Under her direction, the Pollock-Krasner House instituted an education program for local schools, funded by the Town of East Hampton. A gift of 350 art books and exhibition catalogues from an East Hampton resident, Arnold Hoffmann, Jr., strengthened the center's library.

The New York State Council on the Arts funded the study center's summer lecture series. In addition, a technical assistance grant from the council will enable the center to produce architectural plans to adapt the existing facility to accommodate its growing library, archive and oral history collections. The oral history project is supported by a grant from Warner Communications.

Helen Harrison

ANN CHWATSK

The William and Florence Catacosinos Awards for Young Investigators are made annually to researchers who demonstrate particular promise in the area of cancer research, while the William and James Catacosinos Fellowship is awarded to an outstanding graduate student in the Department of Computer Science. From left: James Catacosinos; Florence and William Catacosinos; Miguel Berrios, Department of Pharmacological Sciences; Deborah French, Department of Pathology; Janet Hearing, Department of Medicine; R.C. Sekar, Department of Computer Science; and President John H. Marburger.

Research, Arts and Scholarship Gain Support

The Stony Brook Foundation continued to present awards on behalf of the Catacosinos family to faculty members who have made significant contributions to the field of cancer research.

Three William and Florence Catacosinos Young Investigator Awards were made to assistant professors engaged in cancer research at the School of Medicine. Recipients were Deborah French in the Department of Pathology, Janet Hearing in the Department of Medicine, and Miguel Berrios in the Department of Pharmacological Sciences.

In addition, R.C. Sekar, a graduate student in the Department of Computer Science, was awarded the William and James Catacosinos Fellowship in Computer Science

The awards were established in 1979 by William Catacosinos, chair of the board of the Long Island Lighting Company. He is a former member of the board of directors of the Stony Brook Foundation and continues

to support the university in these and other areas.

Also in support of graduate education, the Grumman Corporation funded a \$10,000 fellowship for a graduate student in electrical engineering.

In addition:

• The Paul and Gabriella Rosenbaum Foundation of Chicago is funding a Distinguished Visitors and Lecturers Series at the Institute for Mathematical Science.

• A graduate scholarship in the Department of Art was created by a bequest from the late Maurice M. Goldberger of Sayville, N.Y., an appraiser of antiquities.

• The first Maurice M. and Miriam H. Goldberger Scholarship was awarded to a student in studio art.

• Marion Steinberg and Donald Squires established an endowment for presidential awards for distinguished doctoral students. Four outstanding doctoral students who have completed their dissertations will receive the first awards in 1991.

Cogeneration, Incubator Projects Advance

The Stony Brook Foundation was instrumental in 1989-90 in pulling together agreements on two major construction projects—a cogeneration plant and an incubator for new business ventures.

Construction of a cogeneration plant to meet Stony Brook's full energy and thermal needs is projected to begin in 1992. Heat produced as a by-product of electrical generation will provide steam and hot water. The foundation will sell excess electricity to Long Island Lighting Company, bringing funds back to the university. The two developers of the project are CEA-USA, Inc. and Gas Energy Cogeneration Inc.

The Long Island High Technology Incubator at Stony

Brook will nurture the creation and development of high technology firms to expand regional development. A 40,000 square-foot facility will be built with \$2.8 million authorized by the New York State Legislature last spring.

In addition to these two projects, the SBF Realty Corp. continued to make progress toward private construction of a 150-room hotel/conference center at the university's main entrance. Leases were signed with developers James Rubin of New York, Paul Goldberg of Cleveland, and the Kahler Corporation of St. Cloud, Minn. The next step for the project is to arrange for financing.

Where Giving Makes a Difference

A championship golfer from a family with deep roots in the practice of medicine has established the School of Medicine's first philanthropically supported chair.

Evelyn Grollman Glick, who has played with such golf greats as Babe Zaharias and Patty Berg and was featured in Sports Illustrated, established the chair, which will enable the school to support a senior faculty member in the Department of Pharmacological Sciences. The Evelyn Glick Chair of Experimental Medicine was commemorated in May with an inaugural lecture by Nobel laureate Gertrude Bell Elion, whose work on biochemical selectivity led directly to the development of drugs to treat cancer and various infectious diseases.

Glick grew up with three brothers who became physicians and a fourth who became a pharmacist. One brother, Arthur, was a prominent researcher in kidney and cardiovascular diseases. Arthur P. Grollman, his son, is chair of Stony Brook's Department of Pharmacological Sciences.

Glick has honored the memory of her brothers by establishing visiting professorships at the University of Maryland, where she has also established a chair in honor of her parents. A resident of Baltimore, she has funded medical research at The Johns Hopkins

Despite surgery for lung cancer in 1988, Glick continues to play golf daily and, at age 70, recently won the Woodholme Country Club championship.

Evelyn Grollman Glick

Mary Ann Tupper, third from left, mounted a major volunteer effort to raise funds in support of Lyme disease research conducted by John Halperin, M.D., far right. Pictured with them are Lorraine Cavolina, cochair of Lyme Disease Dance Committee, and husband, William Tupper.

Another Way To Say Thanks

Mary Ann Tupper is a woman with a cause. It started two years ago when the Southampton resident developed a severe case of Lyme disease after she was bitten by a tick in her backyard. A month later, she developed a rash on her leg and was given antibiotics to treat the disease. Healthy all her life, Tupper was not prepared for what was to follow. She developed an allergic reaction to the drugs, becoming ill each time she

As the disease progressed, she developed severe pain in her leg and suffered memory loss. Doctors thought she had phlebitis or spinal ailment, but a CAT scan turned up negative. She was then sent to an orthopedic surgeon who told her she had a neurological problem in her leg. Help finally came from John Halperin, associate professor of neurology in Stony Brook's School of Medicine. He found an antibiotic to which she was not allergic and monitored her carefully during the course of treatment.

To show her appreciation, Tupper initiated a fundraising effort to support Dr. Halperin's Lyme disease research. Enlisting the help of three friends who had had Lyme disease, she canvassed for food donations, solicited contributions from local businesses, and sold more than

300 tickets to a 1950s-style "Sock Hop." When it was all over, she had collected \$18,000.

But her efforts don't stop there. So successful is this volunteer fundraiser that she has inspired other community members to raise money for Lyme disease research at Stony Brook. She has also become an eloquent spokesperson for this effort and its funding needs. VIIBO

'I know that Lyme disease is not AIDS or cancer,' says Tupper, "but you don't have to die to have part of your life taken from you."

Tupper's Lyme disease mission continues. She and her friends have formed an organization called East End Lyme, a support group and information service whose members speak to community groups and distribute literature in Southampton schools about the disease. And additional fund-raising events are scheduled.

"It's become a preoccupation," Tupper says of her efforts. "The most important thing is to try to spare somebody else some of the experiences you had to undergo.'

Preserving the **Marine Environment**

A \$120,000 grant from the John M. Olin Foundation is helping scientists and corporate managers work together in preserving Long Island's coastal environment. Supported by the three-year grant-which is administered by Marine Sciences Associates, one of the foundation's 12 major support groups-Olin Fellow Doreen Monteleone has played a pivotal role in establishing Port Jefferson harbor's first recycling initiative and in arranging key conferences and strategy sessions.

Pay Raise Donated For Scholarships

To ensure that salaries of SUNY presidents remain competitive with those at comparable institutions, the Board of Trustees for two years running has voted raises for presidents who head SUNY centers that have health sciences centers.

Also for two years running, President John H. Marburger has turned over those raises to the Stony Brook Foundation. The result: a total contribution of more than \$10,000 to the foundation's endowment for undergraduate scholarships. The contribution is above and beyond the annual gifts that he and his wife, Carol, make to the Staller Center for the Arts, University Hospital Auxiliary, and other campus organizations. The foundation will use the gift as a challenge to stimulate further contributions to the scholarship endowment by faculty and staff.

"I believe it is critically important not only for our students to have access to this kind of support, but for the university to have the resources to attract outstanding students," he says.

Throughout John Marburger's 10 years as president, both he and Carol have demonstrated a deep commitment to undergraduate education. Recognizing Carol Marburger's contributions, the foundation named a scholarship in her honor, awarded for the first time last year to a student in the Honors College. John Marburger's interest in undergraduate life gained international prominence last fall when Cable News Network reported on a day-long "Trading Places" event in which he and an undergraduate psychology major switched roles. While junior Angela Tu met with the council of vice presidents, a perspiring (but smiling) John Marburger was shown sneakering his way through an early morning aerobics dance class.

Carol and John H. Marburger

Giving Back To the Game

Stony Brook's first All-American athlete, who went on to become a world-class squash professional, pledged a leadership gift of \$25,000 to the new Indoor Sports Complex. In recognition, the squash lounge will be named in honor of Stuart D. Goldstein, '73. He is the first of the university's former athletes to pledge a major gift in support of the athletic program.

Goldstein came to Stony Brook as a tennis player, but quickly learned that squash was his game.

"He came to watch us practice, but stayed to play for four years," says Bob Snider, varsity squash coach. Goldstein became a squash pro at the Fifth Avenue Racquet Club upon graduation and returns to campus every year to play against team members.

Now a real estate manager and developer in New York, he has donated increasingly generous amounts to the squash team for the past several years. In recognition of his service to the university, he received the Outstanding Alumnus Award at this year's Homecoming, Oct. 11-14.

Now retired from competitive squash, Goldstein has turned to golf. Goldstein's 9-year-old son, Darin, is following his father's early footsteps, playing his first competitive tennis match this fall.

Maintaining a Tradition

The Othmar Ammann Scholarships, established by Margot Ammann, daughter of the Swiss-born engineer who built the Golden Gate Bridge and numerous tunnels and bridges in New York City, have helped many students over the years to pay for their Stony Brook educations. Dr. Ammann (seated, second from left), recently renewed her family's commitment by increasing the Ammann endowment to provide additional scholarship support and to fund improvements in Ammann College, the G Quad residence hall named in her father's honor. She is pictured here with recipients of the 1989-90 Ammann Scholarships. To her right is Egon Neuberger, who served as vice provost for undergraduate studies pro tem in 1989-90. To the far right is Carole G. Cohen, vice president for university affairs.

Top Priority: Scholarships

argeting undergraduate scholarships as its top fund-raising priority, the foundation added nearly \$100,00 to the university's scholarship endowment in 1989-90.

The exact amount was \$99,333, and it brought the total undesignated scholarship endowment to approximately \$200,000.

This is in addition to \$1.15 million currently in the designated endowment for named scholarships.

The foundation adopted the recommendation of a university advisory committee which urged the establishment of 100 one-year scholarships and 15 four-year scholarships of \$1,000 each to be awarded on the basis of merit as a key step in improving the quality of undergraduate education. It is only through scholarship support, noted the committee, that Stony Brook can continue to be accessible to all qualified students and to attract those with greatest academic potential.

Through consolidation of a portion of the endowment, the new Honors College was able to award each of 24 freshmen admitted last fall a \$1,000 award, and will continue to make such awards to all students accepted to

the program in the future.

Remaining scholarships are now administered under the umbrella of the Presidential Honors Scholarship Program. Freshmen and transfer students competed for \$1,000 Othmar H. Ammann Scholarships, William and Maude Pritchard Scholarships, Republic Aviation Scholarships and Grumman Engineering Scholarships, all for one year.

Fifteen additional students were awarded Empire State Minority Honors Scholarships for two or four years,

at \$1,000 each year, based on merit.

The Marcia and Matthew Simons Scholarship was awarded for the first time last fall to an Honors College freshman. Marcia Simons of Newton, Mass., mother of James Simons, chair of the Stony Brook Foundation, established the endowment to fund two four-year scholarships for undergraduate excellence. They are the most prestigious scholarships that Stony Brook offers because they continue throughout a student's undergraduate years at the university.

Other Honors College students were awarded the first Carol Marburger Scholarship, a two-year Grumman Scholarship and several one-year scholarships named for Cecil L. and Claire D. Hall, Esther and Jack Spivak and

Advancement of Commerce and Industry.

Egon Neuberger, professor of economics, became the first faculty member to endow a scholarship for undergraduates. An out-of-state student will be awarded a \$1,000 scholarship each year in the name of his father, Paul Neuberger. Neuberger was vice provost for undergraduate studies pro tem when he established the award.

In addition to scholarships, the foundation supports awards that recognize outstanding undergraduate achievement and individual initiatives. Thanks to support from James Simons, for example, 14 high school students—each awarded a \$1,000 fellowship—were able to work collaboratively with faculty through the summer on artistic and research projects. Moreover, four students were able to present papers at the fourth annual National Conference on Undergraduate Research held at Union College in Schenectady, N.Y.

A Tribute to Great Teachers

Two remarkable teachers heen memorialized by scholarships established in 1989-90 by Elof Carlson, Distinguished Teaching Professor in the Department of Biochemistry and Cell Biology and master of the university's new Honors College.

One \$1,000 scholarship—to be awarded to a student in the Honors College— is in memory of Morris Gabriel Cohen, who taught at Thomas Jefferson High School in Brooklyn in the 1940s and 1950s.

The second \$1,000 scholarship honors the late Charles T. Davis, who taught freshman English at New York University. Davis, one of the first black professors at a major university, later established Black Studies programs at Princeton and Yale. The award is for any student from a traditionally underrepresented group in the freshman, sophomore or junior year of the Honors College.

In the following, Carlson—who himself is one of Stony Brook's most compelling and committed teachers—describes the profound impact these two teachers have had on his life.

Elof Carlson

Morris Gabriel Cohen

Morris Gabriel Cohen (1901-1975) was a high school teacher at Thomas Jefferson High School in Brooklyn. After serving in the army during World War I, he attended Columbia College where he received a bachelor's degree in the humanities,

He used to joke about his diverse interests and said, "I majored in everything useless." This was not a regret; he loved the humanities and studied Oriental philosophy, linguistics, archaeology,

Morris Gabriel Cohen

comparative literature, history and the Greek and Roman classics.

During my senior year in high school, I met Mr. Cohen through my habit of reading by the light of an exit sign in the darkened auditorium as I waited for school to begin. Mr. Cohen, who was blind, must have heard me

and he liked my passion to learn. He asked me to read aloud the classics in translation each morning before classes started and we would do so for 45 minutes, five days a week throughout the school year.

I continued this over the next four years while I attended NYU, stopping off for my daily dip into the great books. We began with Aeschylus's *Prometheus Bound* and we ended up five years later with Freud's *Civilization and Its Discontents*. It was like having a private tutor, in the tradition of the 18th century.

Mr. Cohen's blindness was progressive and inherited (Leber's optic atrophy). He trained himself to retain much of what he heard and he had a gift for relating everyday events to his vast range of scholarly knowledge.

He insisted that I look at the "big picture" and not just the details of life and knowledge. He encouraged students to major in the unusual fields and among his many students who chose academic careers there are a philosopher of science, a literary critic (Dante), a physicist, a psychologist, a geologist (crinoids) and a linguist.

Until Mr. Cohen's death, I used to call him at his home during the Christmas break to wish him well and to let him know what I was doing. I dedicated my first book to him and I gave his middle name to my oldest son.

Charles T. Davis

Charles T. Davis (1918 - 1981) was an English teacher at NYU when I was an undergraduate. He later joined the English Department at Princeton and founded its African Studies Program. He ended his career at Yale where he founded its African Studies Program and served as Master of Calhoun College, a residential college there, until his death in 1981.

At the time I knew him (1949-1953) he lived in a housing project in Harlem and he was completing his Ph.D. in American Literature at NYU (his bachelor's

degree was obtained at Dartmouth and his master's degree at the University of Chicago).

Professor Davis conducted a remarkable course in introductory English composition, the beginning course that all students took in their freshman year at NYU. He would read aloud our weekly "themes" and criticize

Charles T. Davis

His voice was

sonorous and eloquent and he enriched our writing by frequent references to well turned phrases in the short stories and essays that we read. He selected the best themes each week and analyzed our style and thought processes, often making us aware of what was an unconscious process when we wrote them. His love for literature and good writing was infectious. He arranged for the best themes of the year from all sections of the composition course to be published by the English Department in a work he called *Good Themes*.

I was particularly grateful to Professor Davis when I was at a low ebb and wondering whether the field I chose (genetics) was a mistake and that I might be happier as an English major. He gently explored what I was reading (lots of books on evolution and biology and only a few in philosophy and literature) and urged me to hang on and that in graduate school I would experience a new life with rekindled enthusiasm. He was right.

This willingness to listen to students when they felt troubled had a lasting effect on me and I have learned, in turn, the lesson he taught me: teaching can be as powerful out of the classroom as it is within it.

Professor Davis was one of the first black professors at a major American university and his brilliance and sympathy must have touched the lives of hundreds of students, black and white, long before there was a Civil Rights movement.

Another Success in 'Score for Scholarships'

As predicted, the second annual "Score for Scholarships" golf and tennis tournament was even bigger and better than the first. Through the efforts of Richard Romanski and his committee, there was greater corporate participation, the number of players increased and the proceeds doubled—to \$25,000.

The participation of former New York Yankee pitcher Whitey Ford added to the festivities. The May 14 tournament was held at two sites, St. George's Golf and Country Club in Stony Brook and the Port Jefferson Country Club at Harbor Hills.

Score for Scholarships
With more than a little help from Dick Romanski
(left) and Whitey Ford, the second annual "Score for
Scholarships" golf and tennis tournament generated
\$25,000 for undergraduate scholarships.

Society Assists Korean Studies
The Society for Korean Studies, one of the foundation's 12 major support groups, has been instrumental in the rapid development of Korean Studies in the Stony Brook curriculum. Under the direction of Ikhwan Choe (above), director of undergraduate studies for the program, the university has established an undergraduate minor in Korean Studies, developed close relations with Yonsei University in Seoul and Seoul National University, and is now developing a Korean exchange program.

Scholarships in Engineering

Support from the Grumman Corporation enables Stony Brook to offer ten \$2,000 scholarships to undergraduates in the College of Engineering and Applied Sciences. Pictured here are the Grumman Scholars of 1989-90.

Institute Focuses on Ethics and Medicine

Gifts from a number of individuals and foundations enabled Stony Brook's School of Medicine to expand research programs, enhance instruction and broaden the school's examination of ethical issues in the practice of medicine

Among the highlights of 1989-90, the School of Medicine created the Institute for Medicine in Contemporary Society under the direction of the Rev. Robert Smith, director of chaplaincy at University Hospital. Its role is to explore the relationship between teaching and practicing medicine and subjects such as philosophy, art, law, and literature. A preliminary conference on "Decisions to Limit Medical Treatment" was in part underwritten by grants from Gerard C. Smith of Merrifield, Va., and the Irving and Esther Schatz Foundation of New York City. In addition:

• Donald A. DiRenzo of Muttontown, N.Y., created an endowment for an annual lecture in neurological surgery in the School of Medicine.

• The Frederick Paul Sheinbaum Research Foundation was established by Sydell Sheinbaum of Woodmere, N.Y., for the study of Alzheimer's disease and related

the State University of New York.

disorders in the Department of Psychiatry's Center for the Study of Aging.

• Leo and Judith Zickler supported the 1989 Zickler Lecture in Chemical Biology, delivered by Nobel prize winner Howard Temin.

• The School of Medicine created new endowment programs in memory of two highly regarded faculty members who died in 1989. The Maynard M. Dewey Leadership Fund, honoring the late chair of the Department of Anatomical Sciences, will support an annual lecture in the biomedical sciences.

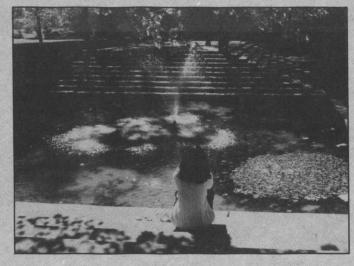

• The David Kreis Trauma Research Fund, honoring the late founder of the Department of Surgery's trauma division, will support continued research in this area.

• A bequest by Baier Lustgarten, a prominent businessman from Quogue, will support cancer research in the Department of Radiation Oncology.

• The estate of Selma B. Harris will establish a research laboratory in pulmonary medicine under the direction of Edward H. Bergofsky. Another gift will establish the Selma B. and William C. Harris Laboratory for Pulmonary Research.

Support for Lyme Disease Research
More than 250 guests in vintage flapper attire attended a Roaring 20s dinner-dance at Gurney's Inn in
Montauk. Television personality Dick Cavett and his wife, actress Carrie Nye, were honorary chairpersons
for the July 15, 1989 event, which benefited Lyme disease research at Stony Brook. Pictured above are, from
left, John H. Marburger and his wife, Carol; Frederick Braun III, of Marine Midland Bank and chairman
of the event, and Mr. and Mrs. Donald Blinken. Mr. Blinken was formerly chair of the board of trustees of

HONOR ROLL OF DONORS

We wish to express our sincere thanks to everyone who provided financial support to Stony Brook during the foundation's 1989-90 fiscal year.

The Honor Roll recognizes those alumni and friends who made a gift to the University at Stony Brook through the Stony Brook Foundation from July 1, 1989 to June 30, 1990.

Donors who contribute \$5,000 or more to the university through the Annual Fund during the July 1 to June 30 fiscal year, are invited to become members of the President's Circle. Lifetime membership may be established by making an endowment gift of \$50,000 or more. Stony Brook Associates offers membership to all donors who make an annual contribution of \$1,000-\$4,999 to the Stony Brook Foundation. The Stony Brook Forum recognizes donors of \$500-\$999 annually. Century Club members are those who contribute \$100-\$499 annually.

In addition to those who have contributed to the Annual Fund, we thank those friends who have supported various designated areas of the university.

Although the list has been compiled with care, errors may appear. If your name has been listed incorrectly or omitted, please accept our apologies and bring the mistake to the attention of the Stony Brook Foundation at (516) 632-6336.

About the Stony Brook Foundation

The Stony Brook Foundation, Inc. is a not-forprofit corporation established in 1965 as the sole official fundraising and private gift receiving agency for the University at Stony Brook. An elected board of directors made up of business, professional and community leaders manages the funds received by the foundation. These funds support every aspect of university endeavor: research, education, public service, faculty and student development, economic and cultural development and health care.

In addition, the foundation provides a corporate entity to support new initiatives at the university such as the hotel/conference center and the Long Island High Technology Incubator.

Working in close coordination with the university's Office of University Affairs, the

foundation receives gifts of cash, securities and real and personal property, as well as deferred gifts such as bequests, life insurance, and life income agreements to support the university's many programs.

Several support groups, each dedicated to a different aspect of campus activity, come under the foundation's umbrella. These self-governing groups enhance the university's development effort and enrich life on campus.

The current roster of support groups includes: the Alumni Association, Center for Industrial Cooperation, Center for Italian Studies, Center for Korean Studies, Friends of the Staller Center, Marine Sciences Associates, Museum of Long Island Natural Sciences, University Hospital Auxiliary, Very Important Patriots and the Volunteer Firefighters Burn Center Fund.

MAKING A GIFT TO SBF:

There are many ways to make a gift to the University at Stony Brook through the Stony Brook Foundation.

Outright Gifts. The most common gifts received by the foundation are outright gifts. They are usually cash, but gifts of securities, real property and personal property are also welcome.

Deferred Gifts. Deferred gifts, also known as planned gifts, are arranged during the donor's lifetime, but the principal benefits do not accrue to Stony Brook until later, usually after the donor or named beneficiaries are deceased. Bequests are the most common deferred gifts; others include life insurance policies and life income agreements (gift annuities, pooled income funds, unitrusts, annuity trusts lead trusts, and revocable trusts).

Gifts to the Annual Fund. The Annual Fund is the general university annual giving program. Gifts to the Annual Fund are solicited annually from alumni and friends through mailings and telefunds for the benefit of academic and other university programs.

Designating Gifts. Any gift may be restricted to a particular college, school, department, program or special area such as faculty development, the libraries, student aid, capital needs (building and equipment) or athletics. Unrestricted gifts are especially important to the university. They are used to meet immediate needs and take advantage of special opportunities.

Special Projects. The university regularly seeks funds for special needs identified as having high priority. Lyme disease research and the Indoor Sports Complex are examples.

Other Gifts. Development personnel are able to assist donors in identifying appropriate memorial and honorary gifts. The Stony Brook Foundation participates in corporate matching gift programs.

If you would like to know more about the Stony Brook Foundation and the Office of Development and their programs, clip and return the coupon or call (516) 632-6535.
