PREFACE.

THAT part of this book which relates directly to the boundary stone of Nebuchadrezzar I. from Nippur was originally presented to the Faculty of Philosophy of the University of Pennsylvania, in partial fulfillment of the requirements for the degree of Ph.D. The author has since continued his studies of the Babylonian boundary stones, and now offers Chapter One as a general introduction into this interesting field of Babylonian studies. The questions which the Babylonian boundary stones open up are so numerous and varied that their contents are not only of interest to the specialist, but their legal enactments offer material to the student of ancient law, their religious features are of interest to the student of ancient religion, while their symbols claim the attention of the student of ancient astronomy. When we realize that these symbols are the oldest astronomical charts which are in existence, they are seen to possess an unusual importance. The attempt seemed, therefore, warranted to secure, if possible, a complete collection of all the symbols and to present them in the form of an astronomical atlas. This original plan, however, had to be given up, because the Museums of Berlin and London declined to permit the publication of the material in their possession, inasmuch as it had been "reserved for publication by the Museum." As a result the author was compelled to restrict himself to a collection of all the material that had been published thus far. In the case of the boundary stones discovered by the French at Susa, and now preserved in the Louvre at Paris, photographs of several originals were secured through the kind assistance of Dr. Léon Heuzey, Director of the Louvre, for whose valuable help the author wishes to express publicly his gratitude. Through these photographs it was possible to give not

only an improved drawing of the important stone, Susa No. 1 (fig. 24), and to offer accurate drawings of Susa Nos. 16 and 20 (see figs. 10 and 30), but also to substitute several halftone pictures in place of the drawings given in the *Délégation en Perse* (see figs. 2, 17, 18). The publication of the symbols on the boundary stone of Merodach-baladan II., now at Berlin, was made possible through the kindness of Prof. Clay, who placed at my disposal a set of photographs which he had secured from Berlin. The symbols on III R. 41 and 43 (see III R. 45, Nos. 1 and 2) were redrawn from casts of these stones in the Museum of the University of Pennsylvania, by which a more accurate representation of these important monuments was secured. The excellent drawings, prepared under the direction of the author, were made by Mr. P. F. Goist, an artist of Philadelphia, who spared no pains in making them as accurate as possible.

The new boundary stone of Nebuchadrezzar I., whose "important inscription" was announced in 1901 by Prof. Hommel, will doubtless fulfill all expectations, as there are few *Kudurru* inscriptions which surpass it in interest. Inasmuch as the boundary stone of Marduk-ahê-erba had never received an adequate treatment and its inscription had not been translated in full, it was thought fitting to add it as an Appendix, with some brief notes on its linguistic features.

The Concordance will be found to contain the proper names which occur in all the *Kudurru* inscriptions published thus far. In order to make it as complete as possible two lists of symbols were added. Although the symbols are given at length in Hommel's *Aufsätze*, yet inasmuch as his list does not include the latest finds since made at Susa, and as it seemed desirable to have one place in which all this information could be found conveniently grouped together, the author concluded to repeat the list, with such additions as were necessary, and to add another alphabetical list, which brings out more prominently the number and variety of the symbols represented.

The Glossary, while not aiming at absolute completeness, was prepared to include all the words used in the inscriptions and most of the passages in which the words occur, with the exception of some of the most common words, for which it seemed unnecessary to quote any passages.

In conclusion, the pleasant duty remains to express my gratitude to my teachers and friends who have aided me in my study. Prof. Hilprecht not only permitted me most kindly to publish the important inscription of Nebuchadrezzar I., but he has also given me during the whole course of my study his generous assistance and encouragement. He has still further increased my obligation by reading the proof-sheets as they passed through the press, to which he added many valuable suggestions, the most important of which are duly acknowledged in their respective places. With Prof. Clay I spent many delightful hours, discussing with him the problems connected with these inscriptions. I owe much to his stimulating suggestions. Prof. Jastrow has given me the benefit of his thorough knowledge of the literature involved and has supplied me with a number of references for the list of the gods. Through the kind mediation of my friend, Dr. Ranke, of the Egyptological Department of the Royal Museums at Berlin, Dr. Ungnad kindly undertook the task of collating a number of passages for me on the stones in the Berlin Museum. His readings have been credited in the Concordance as well as in the Glossary. Finally, I wish to thank the Publication Committee of the University for generously undertaking the publication of my book, and especially the liberal founder of this Fund, Mr. Eckley Brinton Coxe, Jr. To all these friends I owe much, and I can only hope that the result of my studies may be worthy of their interest.

WILLIAM J. HINKE.

BABYLONIAN BOUNDARY STONES.

BABYLONIAN boundary stones and their inscriptions have long been the subject of study and investigation. Among the earliest Babylonian monuments which arrived in Europe was the now famous *Caillou de Michaux*, found by the French botanist, C. Michaux, at the Tigris, a day's journey below Bagdad, in the ruins of a palace, and brought by him to Paris in the year 1800. Published by A. J. Millin in 1802,¹ its inscription was at once studied and translated by the German professor, A. A. H. Lichtenstein, of Helmstädt. His attempt was, however, a failure, for he made out the inscription to be Aramaic, read it from right to left, and declared it to be a dirge addressed by a certain Archimagus to wailing women at an annual mourning festival.² After this unpromising beginning no progress was made in the interpretation of Babylonian boundary stone inscriptions until after the epoch-making decipherment of the great Behistun inscription by Sir Henry C. Rawlinson in 1851. Among the scholars who at that time devoted all their energies to the decipherment of the new language was Jules Oppert,

² *Tentamen Palæographiæ Assyrio-Persicæ*, Helmstädt, 1803, pp. 111-134; pls. III-VII. The inscription is rendered in a Latin poem. Its contents are described as follows:

Nænam quasi quamdam ab Archimago parentantibus feminis inter Sabæos, sive Persas eius ævi, quæ nuper maritos, fratres vel alios cognatos amiserant, et comitantibus præficis, die festo, quando sollemnia sacra luctus publici ob defunctos quotannis celebrantur, prælegendam, vel recitandam.

who in 1856 gave the first approximately correct rendering of the Michaux stone. During the next two decades the text of the first four *kudurru* inscriptions¹ was published by Sir H. C. Rawlinson in his monumental work, *Cuneiform Inscriptions of Western Asia*, Vols. I-IV, 1861-1870. An important step in advance was made in 1877 by the joint work of Oppert and Menant, *Documents juridiques de l'Assyrie et de la Chaldée*, in which the four inscriptions referred to were transliterated and translated.

A brief history of the publication and interpretation of boundary stones till 1891 was given by C. W. Belser in B.A., II, 112-114. Since that time the following scholars have made contributions to this subject: Prof. F. E. Peiser furnished transliterations and translations of fifteen *kudurru* inscriptions for the *Keilinschriftliche Bibliothek*, Vols. III-IV. Prof. H. V. Hilprecht published two boundary stones (O. B., I, 83, 149) and two fragments (O. B., I, 80, 150), together with an exhaustive discussion of the inscription of Ellil-nâdin-aplu (*Assyriaca*, pp. 1-58). Prof. H. Winckler gave a transliteration and translation of the stone of Shamash-shum-ukîn (*Altorientalische Forschungen*, I, 497-503). Dr. L. W. King published three boundary stones (C. T., IX, pls. IV-V; X, pls. III; IV-VII). Finally Prof. V. Scheil published three large Cassite stones

¹ The most common name applied to Babylonian boundary stones is *abnunarâ*, literally "a stone (NA) that is engraved (RU)"; so Jensen, *Kosmologie*, pp. 349, note, 440, and K. B., III, 1, p. 37 note *. The name *kudurru* is employed less frequently with a direct reference to the stone on which the inscription is written (cf. London, 103, V, 39; VI, 21; London, 101, I, 1; Susa 3, III, 53; I R. 70, II, 8; Neb. Nippur, heading l. 2). Other names are *abnu*, "stone" (London, 101, III, 2; London, 103, III, 30; London, 102, V, 6), *asumittu*, "a sculptured and an inscribed stele" (London, 103, VI, 26), *tuppu*, "an inscribed tablet" (I R. 66, II, 5; C. T., X, pl. III, 23; V. A. 2663, IV, 56; V. A. 208, 48; V. A. 202, II, 11; V, 13), and *li'û*, "a tablet" or "document" (Neb. Nippur V, 8; Susa 9, II, 9, 12; *isuli*, Susa 16, III, 11, 15; see Chap. I, p. 10). Finally, the term *kan-gi* (= *kâniku*) is used in the sense of "a sealed document" in London, 102, VI, 14.

and twelve fragments¹ (*Delegation en Perse*, Vols. II, IV, VI). For a full list of all the known boundary stones, together with their literature, see our *Bibliography*.

At the present time (June, 1906) we have twenty whole boundary stones with inscriptions more or less complete, together with sixteen fragments of other boundary stones. They cover the period from about 1350-650 B.C., or from the reign of Nazi-Maruttash to that of Shamash-shum-ukîn.

But while boundary stones, properly so called, do not make their appearance until the Cassite dynasty, we find other similar monuments at a much earlier period. The oldest monument of this kind is a *national* boundary stone, erected by Entemena,² one of the early rulers of Shirpula, about 3500 B.C., to mark the boundary between Shirpula and the neighboring city Gish-hû. Its important inscription closes, in perfect agreement with the later boundary stones, with a series of curses:

“Whenever the people of Gish-hû shall cross the boundary canal of Ningirsu or the boundary canal of Ninâ, in order to bring this land under their power—whether they be the men of Gish-hû or the men of the mountain—may Enlil destroy them, may the great net of Ningirsu overthrow them, may his sublime hand and sublime foot be lifted up high (over them), may the warriors of

¹ These fragments are: One of the reign of Bitiliâshu (D. E. P., II, 93f.), one of Rammân-šum-ušur (D. E. P., II, 97f.), one of Meli-Shipak (D. E. P., II, 112), two of Marduk-apal-iddina I (D. E. P., VI, 39-41; 42, 43), and six undated Cassite fragments (D. E. P., II, 113f.; 115; 116; VI, 44f.; 46; 47). A boundary stone fragment is perhaps also the broken stone of Meli-Shipak (D. E. P., IV, pls. 16, 17). The phraseology of the curses points in that direction. Its shape resembles the stone of Marduk-apal-iddina I. = IV R.² 38. Finally, the stone of Agabtaḥa (D. E. P., II, 95) must also be included, for it is a private deed, recording a grant of land. Cf. below, p. 11.

the city be filled with rage, and, in the midst of the city, may fury be in their hearts.''

Another series of monuments closely related to the later boundary stones are the doorsockets of the ancient kings of Agade and other early rulers. The doorsockets and thresholds of temples were evidently regarded as their boundary. A doorsocket of Ur-

Ninâ has actually the shape of a boundary stone,¹ while all their inscriptions close with the identical formula of the later boundary stone inscriptions. Thus, *e.g.*, the second doorsocket inscription of Shargâni-shar-âli, published by Prof. Hilprecht,² reads:

Whoever shall alter this inscribed stone, may Ellil and Shamash tear out his foundation and carry off his seed.”

Other inscriptions of Naram-Sin, the kings of Gutî and Lulubî and of Gudea close with similar curses.³ It seems in fact that most *public* monuments were placed by these imprecations under the protection of the gods, to guard them against destruction by ill-disposed persons. A conspicuous example is furnished by the famous stele of Ḥammurabi, containing his code of laws, in which twelve of the great gods are invoked (Col. XLII, 45-XLIV, 90) to punish anyone who abolishes his judgments, overrules his words, alters his statues, effaces his name and writes his own name in its place (Col. XLII, 27-35).

² Thureau-Dangin calls attention to the fact (cf. I. S. A., 233) that *naṣṣaku* alternates with *nakâru*, especially in the Code of Ḥammurabi: Col. XLI, 74, *u-zu-ra-ti-ia a u-ša-zi-iq*; Col. XLII, 10, *u-zu-ra-ti-ia la u-na-ki-ir*.

A., 246. The statue of Gudea, numbered C, contains also a curse, Col. IV, 5-17 (Thureau-Dangin, I. S. A., 119). Similar curses are found on a number of Elamite monuments, e.g., the stelæ of Karîbu of Shushinak: (a) Scheil, D. E. P., II, 64, Col. III, 1-6; (b) Scheil, D. E. P., IV, 6-7, Col. V, 1ff.; (c) Scheil, D. E. P., VI, 3-4, Col. II, 20-30, and the inscriptions given by Thureau-Dangin, *l.c.*, pp. 252-258. An example of a Sumerian curse during the Cassite period occurs on an inscription of Kadashman-Turgu (Hilprecht, O. B. I., Vol. I, 63, 14-20).

Turning now to the boundary stones, properly so called, the first question that engages our attention is the probable origin and introduction of boundary stones into Babylonia to mark the limits of private property. All that is known for certain is that they first make their appearance during the third or Cassite dynasty. But when we consider the fact that, although there are many transfers

(Susa, No. 15.)

of land in the earlier periods, no traces of boundary stones for private land have come to light, and when we consider furthermore that there was no marble, basalt or limestone in the alluvial soil of Babylonia to provide the material for boundary stones, but that they had to be imported, we are almost forced to the conclusion that the erection of boundary stones on private lands was a foreign custom, which

originated in a mountainous country where there were plenty of stones to supply the demand. As the Cassite rulers were foreigners, who came most likely from the mountainous regions east of Babylonia,¹ it is natural to conclude that they caused the introduction of this custom.² This conclusion is somewhat supported by the interesting fact, which ought to be emphasized, that all the twelve boundary stones of the Cassite period which have come down to us, in whole or in part,³ contain either the record of a royal grant or the confirmation of such a grant when no earlier deed had been

¹ Cf. Hommel, *Geographie*, p. 36.

² While this book was passing through the press I had an opportunity of consulting Edouard Cuq, *La propriété foncière en Chaldée d'après les pierres-limites* (extrait de la *Nouvelle Revue historique de Droit français et étranger*, de November-December, 1906, pp. 701-738). Unfortunately I am unable to agree with the author in many of his positions. His statement (§ 10, p. 735) that the introduction of boundary stones was a sign of a degeneration of law, and was caused by the inability of the Cassite kings properly to protect land, does not seem to be borne out by the facts. A number of the later Cassite rulers have the determinative *ilu* before their names, which implies that they enjoyed divine honors (Hilprecht, B. E., XX, pt. 1, p. 51f.). If they were regarded as divine surely their power was sufficient to protect property. Again, several of these kings, e.g., Nazi-Maruttash (Susa 2, I, 2), Rammân-shum-ušur (D. E. P., II, 97, 8), Meli-Shipak (London, 101, I, 13) and Marduk-apal-iddina (D. E. P., VI, 42, Col. I, 24), used the title *šar kiššati*, which implied a claim of supremacy over Babylonia, Assyria and Mesopotamia (cf. Winckler, *Forschungen*, I, 222-232). If they could rule practically all of Western Asia, they could surely protect the property of their subjects at home. There may have been a degeneration of law at the close of the Cassite period, but the introduction of boundary stones had nothing to do with it. Finally, no inferences of that kind can be drawn from the stone of Meli-Shipak (London, 103), which contains the record of several lawsuits, for it does not appear that the case was reopened by the *same* party after the king had rendered an adverse decision, but *different* parties made claims under different reigns.

³ As the *Bibliography* shows, eighteen boundary stones of the Cassite period have been published thus far. Six of them are, however, so fragmentary that the name of the king has not been preserved, nor is enough of their inscriptions left to enable us to classify them as to the nature of the grants they contained.

executed or when the land had been in dispute. Gradually, however, during the second Isin (PA.SHE) dynasty, these stones were also used to record transfers of private property, while still later their use was even further extended.¹ It is also interesting to note that all the boundary stones published thus far come from Babylonia; none have as yet been found in Assyria. Even the stone of Sargon is dated in the Babylonian city of Dêr (Col. II, 25). There are a number of similar grants of land by the Assyrian kings Adad-nirari, Tiglath-pileser III, Ashur-bân-aplu and Ashur-êtil-ilâni, but they are written on clay tablets.²

DOCUMENTS FOR PUBLIC AND PRIVATE USE.

From the evidence at hand it seems that at least in all royal grants of land two documents were used³—one a large conical block, to be placed as a public monument upon the field for the information of the people in general, the other a private document, to be

¹ A stone, dated in the reign of Nabû-shum-ishkun (M. D. O. G., No. 4, March, 1900, pp. 14-17), has the shape of a boundary stone. It has also the various symbols on top (see p. 97) and its inscription contains the usual curses. It is, however, no boundary stone, but a document recording the investiture of a Nebo priest of Borsippa, Nabû-mutakkil, with certain rights and privileges pertaining to his office. The analogy of the stone of Nazi-Maruttash (see p. 22) and of the Nippur stone (see p. 123) leads to the inference that the priest himself wrote the inscription and caused the selection of this undoubtedly sacred monument bearing the symbols of the gods, because the transaction was one of great importance, at least for himself and his family.

³ This fact had already been recognized before, e.g., by Prof. Hilprecht, O. B. I., Vol. I, pt. 1, p. 38, note 8. The inscriptions on the private documents were, however, not exact copies of the public boundary stones. As to the differences see below, p. 13.

held by the owner of the field as a proof of his ownership. Of the former class there was in each case but one copy.¹ This is evident from the repeated references in the inscriptions to the boundary stone of the field (*ku-dur-ri eglu šu-a-tu*); the plural of *kudurru* is never used in this connection. The same inference can be drawn from the name of the stone of Nazi-Maruttash: *^dNabû-nâšir-kudur-eqlâti*, and also from the curses of Ninib. That the boundary stones were actually placed on the fields appears from the curses, which show that they were public monuments which could be removed from their place; hence we find provisions that the stone shall not be removed from its place (London, 101, III, 2), that it shall not be placed in a secret place where it cannot be seen (Susa, 3, Col. V, 43, 44), that it shall not be hidden in the earth (III R. 41, II, 12). It can also be inferred from the fact that the lowest part of the stones was not covered with writing (cf. D. E. P., II, pls. 21-23; VI, pls. 9, 10; 11a; IV R. 43; I R. 70, etc). But the

¹ This is in contrast to Egyptian custom, where a number of boundary stones seem to have been used for one tract of land. In a number of cases at least we have clear proof that such was the case. A cemetery at Abydos was marked by two stelæ (Breasted, *Ancient Records of Egypt*, Vol. I, §§ 766-772). At Tell-el-Amarna were fourteen landmarks to indicate the extent of the city (Breasted, *l.c.*, II, §§ 949-972). The extent of the jackal nome was marked by fifteen boundary stones (Breasted, *l.c.*, I, § 632). Egyptian boundary stones resemble those of Babylonia in several respects: (a) They are elaborate stone monuments, set up on the boundaries of fields (Breasted, *l.c.*, IV, § 332). (b) Frequently the stone had a name (Breasted, *l.c.*, IV, 479): A list of such names is given by Maspero, *Dawn of Civilization*, 3d ed., p. 329. (c) The inscriptions of the boundary stones carefully define the demarkations of the fields on all four sides (Breasted, *l.c.*, IV, §§ 479-483). (d) The historical circumstances leading to the grant are sometimes given (Breasted, *l.c.*, I, § 768; II, § 1043). (e) In some cases there are also curses uttered in the name of the gods or prohibitions not to erase the inscription (Breasted, *l.c.*, II, §§ 925, 968; IV, § 483). (f) Not only the land but also immunity from taxation was granted by the king in some instances (Breasted, *l.c.*, IV, §§ 147-150). All these features appear also on the Babylonian boundary stones, see below, pp. 37-39.

clearest proof consists in the repeated reference to the actual removal of the stone from the field in the course of a litigation (cf. Susa, 16, III, 5-10; London, 103, II, 20-III, 2; O. B. I., 83, I, 10-14).

The existence of the second class of documents, dealing with land grants, depends upon the following evidence: The stone of Bitiliâshu refers to a field granted in the reign of Kurigalzu (D. E. P., II, 94, Col. II, 8-12). A duplicate copy of the original grant was produced during a litigation in the reign of Bitiliâshu. Again we learn that of the grant of Nazi-Maruttash a record was written on a tablet of terra cotta and set up before the god (*narâ ša hašbi išturma maḥar ilišu ušziz*, D. E. P., II, 91; Med., I, 3-5). The latter refers evidently to a private document and does not exclude the existence of a public boundary stone. Both the public and the private documents are referred to on the new stone of Marduk-apal-iddina I, which reads:

𐎶 𐎶 *u tup-pi eqli ka-nik di-ni ik-nu-uk-ma a-na* ^m*Mu-un-na-bit-tum id-din. I-na ka-nak* 𐎶 𐎶 *u tup-pi eqli* ^{abnu}*kunukki di-ni šû-a-tum . . . iz-za-az-zu* (D. E. P., VI, 34, Col. III, 11-15). The group

𐎶 𐎶 cannot be read with Scheil I *ammatu* and rendered "l'aune," from which he concludes that there is here a reference to the sealing of the yardstick alongside of the sealing of the tablet. This is clearly excluded, for on the new stone of Nebuchadrezzar I. the phrase: *Ina ka-nak* 𐎶 𐎶 *šû-a-tu*, etc. (Col. V, 8), occurs alone, which, following Scheil's rendering, would lead us to the impossible conclusion that no sealing of a tablet took place. The true reading of the signs in question can be inferred from the stone of Merodach-baladan II, where Bâbili (Gen.) is written Bâbi + li (𐎶) while ili, resp. ilê, "gods," appears as 𐎶𐎶 (V. A., 2663, I, 26; II, 2); hence (𐎶) has the value *li* and the signs under discussion ought to be read *li-û*.¹ While the term *l'û* refers to the public boundary

¹ I owe this explanation to Prof. Hilprecht. In support of it he calls attention to the fact that the use of *NI* and *NI.NI* is exactly parallel. The single *NI* is often read *li*, while *NI.NI* is used for *ili* (Br. 5356) and *ilê*, e.g., in the name *Shamash-bêl-NI.NI*, see Ranke, *Personal Names*, p. 213, note 3.

stone (cf. D. E. P., II, 94, 8, 12), the term *tuppu* refers to the private tablet,¹ both of which were sealed in the presence of witnesses.²

But, what is more important, the existence of private documents recording grants of land cannot only be inferred from the inscriptions; we are also in the possession of actual copies that have come down to us. Being stored in the temple (cf. D. E. P., II, 91; Med., I, 5) or held by the owner, they were not exposed to destruction by strangers, and hence the most characteristic feature of the public boundary stones, the long-drawn-out curses, are naturally wanting on the private monuments. Taking this absence of the curses as our guide, we can classify the following stones as documents kept privately: (1) The tablet of Agabtaḥa (D. E. P., II, pl. 20), recording a grant of ten *gur*³ of cultivated land by King *Bi-ti-li-ia-a-šu* to Agabtaḥa, a fugitive of Haligalbat. (2) The charter of Nebuchadrezzar I (C. T., IX, pls. 4, 5), granting land and immunity from levies to two priests of Eria. (3) The stone of Ellil-nâdin-aplu (O. B., I, 83), confirming the grant of a tract of land to a temple of the goddess Ninâ at Dêr. (4) The stone of Za'aleh (I R. 66), granting exemption from levies to one called the Ishnunakean. (5) The grant of King Nabû-apal-iddina to the temple officer Nabû-apal-iddina.⁴ (6) The grant of land, made in the eleventh year of King Marduk-shum-iddina, by Bêl-iddina to his son Kidîni (V. A. 208). (7) To this

¹ There are of course cases in which *tuppu* refers to the public monument (see above, p. 2, note 1). The statement in the text has only reference to its use on the stone of Marduk-apal-iddina I. (Susa 16).

² Another reference to a private document occurs in a stone of Meli-Shipak (London, 103), where it is distinctly stated that the sealed document had been deposited in the house of the owner of the field (*kunuk šîmi eqli ša ana bîti ša mBêlâni šaknu*, Col. III, 9-10).

³ The reading of *gur* is made certain by the interesting discovery of Prof. Clay that it is represented in the Aramaic endorsements of the Murashû tablets by 𐤂𐤁; cf. his forthcoming article on the "Aramaic Endorsements of the Murashû Tablets" in the William R. Harper Memorial Volumes.

⁴ See C. T., X, pl. 3.

same class of private records belongs also the stone of Nazi-Maruttash (Susa, 2 = D. E. P., II, pls. 16-19). Its inscription states distinctly that it was a copy of a terra cotta tablet which had been set up in the temple, and in perfect harmony with this is the fact that it has no curses against the removal of the stone. Nevertheless when a new copy was made it was written upon a block like those of the public boundary stones. Originally then, as we may infer from this case, private deeds were written upon terra cotta or perhaps clay tablets.¹ In course of time stone tablets were substituted, and in exceptional cases even stone blocks, such as were commonly used for public boundary stones. The characteristic features of these private deeds during the Cassite and P.A.SHE dynasties were as follows: (1) With the exception of the stone block of Nazi-Maruttash, they are stone tablets and not conical blocks. (2) Their inscriptions contain no curses against the removal of the boundary stone. At most there are curses against any change in the status of the field (D. E. P., II, pl. 17; III, 11-15), or admonitions not to change the boundary nor to curtail the field (O. B. I., 83, II, 21-24). (3) No witnesses are mentioned. (4) There is no demarcation of the field. (5) All but the Nazi-Maruttash stone have no symbols. The two later private deeds, made under Nabû-apal-iddina and Marduk-shum-iddina, differ in several respects from the earlier tablets. They have both witnesses and demarcations

¹ It is of course *possible* that the introduction of boundary stones was earlier than the Cassite period, and that even in the earlier period stone tablets were used. The above inferences are drawn from the material now at our disposal. Later discoveries may compel us to modify our statements. Such a modification would even now be necessary if the statements on the stone of Ellil-nâdin-aplu (Col. I, 11, 12) implied that the governor of Bit-Sin-mâgir took away the original boundary stone granted under Gulkishar. This, however, is not at all necessary; because, when the custom was once introduced during the Cassite period, it would be quite natural to have copies of the private documents made, in order to erect them on the fields.

noted in their inscriptions, and in addition the one of Nabû-apaliddina has also symbols. The close connection of all these stone tablets with the public boundary stones is proved by their similarity of language and the fact that both record grants of land, originally royal grants alone.

FIG. 4.—Symbols on a Cassite boundary stone. (Susa, No. 18.)

Babylonian boundary stones and boundaries were sacred to the god NIN.IB, hence he is called *bêl kudurri* (D. E. P., II, 113) or *bêl mišri u kudurri* (Neb. Nippur, IV, 19). Sometimes his wife Gula is associated with him (O. B. I., 149; III, 1) and mentioned with him in the curse to tear out the boundary stone of the enemy (V R. 56, 39–40). In at least one case, however, the boundary stone is placed under the protection of Nabû, the god of agriculture,¹ for this is clearly implied in the name of the stone of Nazi-Maruttash: *Nabû-nâšir-kudur-eqlâti* (Col. IV, 34).

An interesting reference to boundary stones in the religious literature occurs in the *Shurpu* series, in a prayer which is remarkable for its ethical contents. In this prayer the priest intercedes for the worshiper, and implores the deity to forgive him by asking the following questions: *Kudurru lâ ketti uktadîr, kudurru ketti ul uktadîr, usa mišra u kudurru uštêli*—i.e., “Has he drawn a false

boundary? Has he omitted to draw a true boundary? Has he removed the confines, the limits or the boundary stone?"¹

¹ Shurpu II, 45-46. It is remarkable that no punishment for the removal of the boundary is referred to in the *kudurru* inscriptions aside from the curses. Only once, in an inscription of Sennacherib, do we find a threat of hanging in case a man tears down his old house and rebuilds the new extending into the royal highway (*ša bītsu labiru inaqqaruma eššu ibannū ša uššé bītišu ana girri šarri irruba šir bītišu ana gašiši illalāšu*, I R. 7 F 24-27; cf. Peiser, *Acten-Stücke*, p. IX, note 2).

LEGAL TRANSACTIONS IN THE KUDURRU INSCRIPTIONS.

According to the various legal transactions recorded on the boundary stones, they naturally group themselves into two general divisions—first, those which represent royal grants; second, those which represent transfers of private land from one individual or family to another.

(I) In the first group there are again several sub-divisions:

(a) Royal grants to faithful and distinguished officials, of which we have the following specimens:

King Rammân-shum-ušur granted a tract of land to an official whose name is partly broken off (D. E. P., II, 97).

From the reign of Meli-Shipak we have three grants of this kind:

The longest and most interesting inscription (Susa, 3 = D. E. P., II, pls. 21-24) records in seven columns ($52 + 54 + 60 + 60 + 57 + 53 + 51 = 387$ lines) a grant of 84 *gur* 160 *qa* of cultivated land of the city of Tamakku, the communal land (*ugâru*) of the city of Akkad (A-ga-de), situated at the royal canal, belonging to Bît-Pir-^dAmurru.¹ It was deeded by the king to his son and

¹ The translation of *bîtu* as "tribe" by Scheil and the far-reaching conclusions of Edouard Cuq, based on this translation, that the royal grants during the Cassite period were essentially transfers of tribal land to private property, are not justified. The land granted was always taken from the *ugâru* or communal land of some city or district (for this use of *ugâru* see Meissner, A. P., 123). That the term *bîtu* refers to a district consisting of smaller villages and towns appears from its usage. The stone of Marduk-nâdin-aḫê (III R. 43) refers to twenty *gur* of seed land, the communal land of Alnirêa, at the banks of the canal Zirzirri, in (*ina*) Bît mA-da. In other cases the term *piḫātu* (French: *gouvernement*; in German: *Regierungsbezirk*) is prefixed to *bîtu*, as *piḫât Bît-maSin-ma-gir* (Susa 2, I, 28), which is parallel to *piḫât mât aluḫu-da-di* (Col. II, 4). Again, *piḫât Dupliāš* (Col. II, 9) is placed alongside of *piḫât Bît-maSin-ašaridu* (Col. II, 14). There can hardly be any question that these are all districts. Moreover, the curses contain provisions that the land is not to be returned to the *piḫātu* (III R. 41, II, 2; Neb. Nippur, III, 28; C. T. X., pl. VII, 34, etc.), but there is no reference to any tribe. The communal land of the cities was evidently public land of which the king could make disposition.

successor Marduk-apal-iddina I. The grant embraced four tracts, for which a compensation was given (Col. I, 26).

A second grant of 50 *gur* of cultivated land, the communal land (*ugâru*) of the city Shaluluni, at the banks of the royal canal, in the district of Bît-ⁿPir(?) -^dAmurru(MAR.TU), was made to Hasardu, a *sukallu*, son of Sumê (London, 101).

A third grant was made by Meli-Shipak to [Me]li-Hala, son of Zumê[a]. Unfortunately but a fragment of the inscription remains (D. E. P., II, 112), which does not enable us to give the exact size or location of the field.

Of the reign of Marduk-apal-iddina I. two grants to officials have come to light:

One, now in the British Museum (London, 99 = IV R.² 38), records a grant of 10 *gur* of cultivated land, the communal land of the city Dûrzizi, at the banks of the Tigris, in the district of the city Gur-^dNinni, to Marduk-zâkir-shumu, a governor (*bêl pahâti*).

By another stone, Marduk-apal-iddina I. confirmed a grant of land, which had originally been made by King Rammân-shumu-uşur to Rammân-bêl-kala, a royal officer (*šaq-šarri*). The reason for this confirmation was that no sealed document had been given by the former king (Susa, 17 = D. E. P., VI, 42, 43).

During the period of the second Isin (PA.SHE) dynasty we also find several royal grants to distinguished officials.

Nebuchadrezzar I. granted 22 *gur* and 170 *qa* of cultivated land, at the Tigris, of the communal land of the town of Mâr-Ahattûa, in the district of Bît-Sin-scheme, to Nusku-ibni, the son of Upahhir-Nusku, a priest of Ellil at Nippur, perhaps for aid rendered in the reorganization of the temple services at Nippur.

Marduk-nâdin-aḫê ordered the grant of 20 *gur* of cultivated land at the Zirzirri canal, of the communal land of Alnirêa, in the district of Bît-Ada, to Rammân-zêr-iqîsha, a *šaq-shuppar*, for valuable services in a war with Assyria. The transfer of the land

was made by Marduk-il-naphari (DUL), the chief of Bît-Ada (London, 106 = III R. 43).

Under Marduk-aḫê-erba 12 *gur* of the royal domain, in the district Bît-Pir-^dAmurru, was granted by the king to Kudurra, a Habirean (O. B. I., Vol. I, No. 149, pls. 65-67).

FIG. 8.—Symbols on the boundary stone of Marduk-apal-iddina II. (Berlin, V. A. 2663.)

Finally, Marduk-apal-iddina II., the Biblical Merodach-baladan,¹ granted four tracts of land of the royal domain, in all 109 *gur* 126 *qa*, to Bêl-aḫê-erba, a dignitary (^h*ša-ku*) of Babylon. The transaction took place at Babylon, in the seventh year of Merodach-baladan (714 B.C.), in the presence of Iqîsha-Marduk, son of the king, and nine high dignitaries of the realm (V. A., 2663 = B.A., II, 258-271).

(b) Two other stones record grants of land to fugitives.

Agabtaḫa, a fugitive of Haligalbat, fled to King Bitiliâshu, and after having made for the king some object of leather (*pa-gu-mi*)

¹ Cf. Isa. 39 : 1ff.; II K. 20 : 12-19.

the king granted him 10 *gur* of cultivated land in the city of Padan (D. E. P., II, pl. 20).

Shamûa and Shamai, two priests of the god Eria, fled from Elam to Nebuchadrezzar I., who not only received them, but accompanied by them went to Elam, devastated the country and transferred the statues of Marduk¹ and Eria to Babylon. From there the statue of Eria was taken to Hušši, in the district Bît-Sin-asharidu, not far from Opis. There the priests were settled and a tract of land was granted to them, to be held by them as temple property. It was moreover freed from all imposts and territorial obligations (London, 92, 987 = C. T., IX, pls. 4, 5).

(c) The last forms a natural transition to two others which are royal grants to temples.

The earliest known boundary stone of Nazi-Maruttash, c. 1350 B.C., records a grant of several tracts of land opposite Babylon, in all 700 *gur*, to the god Marduk. But only 494 *gur*, divided into eight sections, which were located in six different districts (Bît-Sin-mâgir, Dûr-Papsukal, Hudâdu,² Dupliash, Bît-Sin-asharidu and Upê), were given directly to the god; the remaining 206 *gur* were given to Kashakti-Shugab, the son of Aḥu-bânî. The reason for the last act is not stated. But the two "medallions," which form the distinguishing feature of this monument, state that "Kashakti-Shugab, the son of Aḥu-bânî, wrote a memorial tablet of terra cotta³ (*narâ ša ḥašbi*) and set it up before his god. In the reign of Marduk-apal-iddina, the son of Meli-Shipak, a wall fell upon that tablet and

¹ The god written *iluEN* is always Marduk, never Enlil of Nippur; see Schrader, K. A. T.², 174; also article of Prof. Clay on "The God Ellil of Nippur" in A. J. S. L., July, 1907.

² Not to be read *Bagdadu*, a Persian word, but *Hu-dâdu*, the opposite of *Hu-aibu*; see Hommel, *Geographie*, pp. 252², 345.

³ The meaning of *ḥašbu* is definitely established by a terra cotta dog, found by Scheil at Sippar (*Fouilles à Sippar*, p. 90, fig. 13), which bears the inscription: *Ana dME.ME (Gula) bêlti kalbu ḥašbi epušma aqîš*; l.c., p. 92.

broke it. Shuhuli-Shugab, the son of Nibi-Shipak, wrote upon a new monument of stone a copy of the original and set it up." This interesting statement shows (1) that Kashakti-Shugab, the new owner of the land, himself wrote the tablet recording the grant; (2) that he placed it before his god, *i.e.*, he put it into the temple archives; (3) that the original tablet was of terra cotta. All this makes it very probable that Kashakti-Shugab was one of the priests of Marduk. His ability to write, his anxiety to preserve a record of the transaction, and his setting it up in the temple, all point in that direction. This also explains why he is mentioned on this document which purports to record a grant to Marduk: he was one of his priests. The reference to the original terra cotta tablet is distinctly interesting. Does it imply that there was no public boundary stone? This can hardly be inferred from the statement of Shuhuli-Shugab, because the copy which he executed on stone was the transcript of the original *private* record of the transaction, and therefore leaves the question of a *public* record out of consideration.

Another grant in favor of a temple of the goddess Ninâ, located in the city of Dêr, which had originally been made by Gulkishar,¹ a king of the sea country (*šar mât tâmdî*), was partly set aside by E-karra-iqîsha, the then governor of the district Bît-Sin-mâgir, in which the land was located. Thereupon the priest of Ninâ, Nabû-shum-iddina, appealed to the king Ellil-nâdin-aplu (c. 1130 B.C.), who ordered at once the governor to restore the land to the temple (O. B. I., Vol. I, pls. 30, 31).

(d) There are several other grants which involve restorations.

King Nabû-apal-iddina (c. 865 B.C.) granted the restoration of three *gur* of cultivated land and five gardens to a priest, Nabû-apal-iddina, the son of Atnai, after they had been bought by his

¹ The reading *GUL.KI.SHAR* is most likely to be retained. The sign *gir* has also the value *gul* (kul), see Code of Hammurabi, XLIII : 19, in *tu-kul-ti and Concordance*.

uncle. Nabû-apal-iddina, the priest, appealed to the king for their restoration, basing his request on the plea that the king should not allow a part of his paternal estate to be alienated from the family. It was granted at Babylon, in the presence of five witnesses, in the twentieth year of Nabû-apal-iddina, the king of Babylon (London, 90, 922 = C. T., X, pl. 3).

The latest boundary stone, of the reign of Shamash-shum-ukîn, dated in his ninth year (658 B.C.), records the restoration of a certain estate which had been taken away from a Chaldean nobleman, Mushêzib-Marduk, during the political disturbances under Esarhaddon, but which had been restored to him by Esarhaddon. Before, however, this king could give him a proper deed, both he and Mushêzib-Marduk died. Hence the nobleman's son Rammân-ibni appealed to king Shamash-shum-ukîn, who restored to him Bît-Ha'rahu with all its fields, and gave him a proper deed confirming the restoration by Esarhaddon (London, 87, 220 = C. T., X, pls. 4-7).

(e) Several of the boundary stones contain royal grants, involving lawsuits.

To this class may belong the stone of Bitiliâshu, by which he confirmed 120 *gur* of cultivated land at the town Rishshagidi to Uzub-Shipak. This grant had originally been made to him by Kurigalzu, for services in a war with Assyria. It was confirmed by Bitiliâshu, either because one of the neighbors of the grantee had contested the grant by a lawsuit or, what is just as likely, Kurigalzu had failed to give him a sealed document, or perhaps both reasons were involved, as in the following case (Susa, 9 = D. E. P., II, 93).

A stone of Marduk-apal-iddina I. (Susa, 16 = D. E. P., VI, pls. 9, 10) begins by stating that a certain tract of land, situated within the limits of the town Shaknanâ, at the banks of the canal Mêdandan, in the district of Hudâdu, had been given by King Meli-

Shipak to his servant Munnabittu, the son of Tābu-melû. Officials of the king having surveyed the field it had passed into the possession of Munnabittu. Unfortunately the king failed to draw up a document recording his grant. Meanwhile Munnabittu remained in peaceful possession of the field till the first year of Marduk-apal-iddina I., when one of his neighbors, Aḥunêa, the son of Daian-

FIG. 10.—Symbols on a boundary stone of Marduk-apal-iddina I., discovered at Susa. (Susa, No. 16.)

Marduk, claimed a part of the field, namely three *gur* and twenty *qa*. Munnabittu appealed to the king, who summoned Kidin-NINIB, the former governor of Ḫudādu, under whom the field had been granted, and Šir-shum-iddina, his successor in office, and the

old city officials (*paršê labirûti*),¹ whom the king questioned about the field. They were unanimous in saying that the field belonged to Munnabittu. The king thereupon sent the governor, Šir-shum-iddina, and the scribe, Bêl-bashmê, who measured the field and found it to be thirty *gur* as Munnabittu claimed. The king then confirmed the land to Munnabittu. This inscription gives us an interesting insight into the workings of a Babylonian court; we notice the summoning of witnesses and the taking of testimony. The part played by the elders (the *šibû* of the Code of Hammurabi) reminds us of the modern jury.

Another lawsuit of a much more complicated nature dragged through the reigns of the kings Rammân-shum-iddina, Rammân-shum-ušur and Meli-Shipak. Unfortunately the stone in question (London, 103) is much broken, so that many of the details of the various transactions escape us. From what remains we gather the following facts. The house of Tâkil-ana-ilishu being without direct heirs, the question of succession arose. During the reign of Rammân-shum-iddina a claim was made for the property by two men (Col. I, 26, 27). But as they had not been recognized as sons by their father their claim was rejected, and the property was awarded to Ur-Bêlit-muballîṭat-mîṭûti, a brother of Tâkil-ana-ilishu (Col. I, 37-39). During the reign of the next king another attempt to secure a share of the property was made by another person, who claimed to be a grandson of Tâkil-ana-ilishu (Col. I, 40-43). But his effort, as it seems, was likewise unsuccessful. Meanwhile a part of the land, ten *gur*, had passed through purchase (Col. III, 9, 10) into the hands of Bêlâni, but upon an appeal of Ur-Bêlit-

¹ The reading *paršû* is to be preferred to *maššû* (Br. 1930), because it connects the word with the well-known stem *parâšu*, which occurs frequently in the Code of Hammurabi (e.g., Col. VI : 9; XLI : 90; VIII : 65) and in the Letters of Hammurabi (King, *Letters of Ham.*, Vol. III, p. 287), as a synonym of *pardsu*. The ideogram *BAR.SU(D)* points in the same direction.

muballiṭat-mītûti to the king, Bêlâni was compelled to surrender the land again, upon the payment of a certain amount of grain equivalent in value to the purchase price (Col. III, 25-36). After the death of Ur-Bêlit-muballiṭat-mītûti, Aḡu-dârû, another brother of Tâkil-ana-ilishu (Col. IV, 23), took the field by force, whereupon Marduk-kudur-uṣur, a son of Ur-Bêlit-muballiṭat-mītûti, appealed to the king, Meli-Shipak, who, after some delay and after the death of Aḡu-dârû, decided the case in favor of Marduk-kudur-uṣur. All of which, with many other details, too much effaced to be deciphered, was duly engraved upon the stone.

Another lawsuit seems to have been involved in a stone of Marduk-apal-iddina I. (Susa, 14 = D. E. P., VI, 39-41), in which the king is referred to as listening to an appeal (Col. I, 15), and a certain sum of money is mentioned as having been paid as a fee (*atru*). The land in question was a part of the district Bît-Pir-Amurru, adjoining with its eastern side the canal Radanu. The name of the grantee is broken off.

(f) Besides the royal grants of land already considered, there is still another class by which not only the land in question was conveyed, but also special favors were secured, such as exemption from taxation or immunity from forced labor, or, as in some cases, this freedom from territorial obligations alone was granted.

Of the first kind we have the grant of King Meli-Shipak to his son Marduk-apal-iddina, granting to him not only four tracts of land, but also freedom from all territorial obligations. No levies were to be raised to build, maintain and dyke the royal canal, or guard the cities of Bît-Sikkamidu and Dâmiq-Rammân against inundation (Col. II, 18-27). The people were not to be compelled to work at the sluices of the royal canal, to close or open them or dig up the bed of the canal (Col. II, 28-33). No governor of Bît-Pir-Amurru had the right to draft farmers, sojourners, citizens or councilmen (Col. II, 34-42). Neither king nor governor nor any other

FIG. 11.—Boundary stone of King Meli-Shipak, granting land to his son Marduk-apal-iddina I. (Susa, No. 3.)

official had the right to forage wood or grass, straw, wheat or any other grain (Col. II, 43-50). Nor could they for this purpose demand wagons with harness, asses to draw them or men to drive them (Col. II, 51-53). During the low water level of the connecting canal, which joined the canal Râti-Anzan with the royal canal, no water could be taken from its canal or reservoir, nor could its system of irrigation be diverted to other fields (Col. II, 54-III, 2). The grass of its fields could not be cut by king or governor, nor were they allowed the right of pasturage (Col. III, 13-21). Neither roads nor bridges could be constructed for king or governor (Col. III, 22-27). Neither king nor governor could order any new work or the reparation of the old (Col. III, 28-41).

Similar immunities were granted by King Marduk-nâdin-aḥê to Rammân-zêr-iqîsha (III R. 45, No. 2). No river or land officers were to take away the freedom of the town Alnirêa, from forced labor. No (royal) officials, who were appointed over Bît-Ada, had the right of entry in Alnirêa; the government of Bît-Ada was not to be introduced there; the canal was not to be stopped up; asses and oxen were not to be taken into the city by the tax collector.

Nebuchadrezzar I. granted to the priest Nusku-ibni certain immunities. None was allowed to make use of the pasture lands (III, 21); no canal officer was to seize a canal digger under the pretext of a levy (III, 25); no land officer was to cut any grass (III, 26). The same king exempted the land granted to the priests Shamûa and Shamai from several obligations, ordering that "officers of the canals and officers of the land shall not go into the city; its servants, oxen and asses they shall not bind (*i.e.*, impress them to forced labor); its sheep they shall not seize; its chariots they shall not hitch up; from all forced labor whatsoever he has freed them" (C. T., X, pl. V, 33-39).

The stone of Za'aleh records a similar grant of freedom (*zakûtu*)

from forced labor. Unfortunately much of the section in which it was recorded (Col. I, 6-II, 1) has been effaced (Col. I, 11-20).

The most notable charter of freedom is that granted by Nebuchadrezzar I. to his distinguished officer, Ritti-Marduk, the chief of Bît-Karziabku. Here we find the following immunities. The

FIG. 12.—Symbols on the boundary stone of Marduk-nâdin-aḫê, in the British Museum. (III R. 45, b = London 106 and No. 90,840.)

officers of the king and of the governor of Namar have no right of entry (Col. I, 51, 52). Neither stallions nor mares are to be taken into the cities of Bît-Karziabku by the master of the horse (Col. I, 53-54). Taxes on oxen or sheep are not to be levied for the king or governor (Col. I, 55). Dues on gardens are not to be given to

the tax-gatherer (Col. I, 56-57). The master of the royal horse cannot enter the cities to take out mares for riding horses (Col. I, 58, 59). The hedges(?) of the parks and date palm groves are not to be cut down, and the walls of the cities Bit-Shamash and Bit-Shanbasha are not to be torn down (Col. I, 60-II, 1). Bridges are not to be built and roads are not to be constructed (Col. II, 2). Nor shall the soldiers of the king who live in the district have the right to impress any one into service (Col. II, 3-5). From all the territorial obligations of Namar Nebuchadrezzar freed the cities of Ritti-Marduk (Col. II, 6-8), but the soldiers stationed in its cities he assigned to the extraordinary support of the governor and palace commander (Col. II, 9, 10).

An analysis of these provisions shows that the ordinary territorial obligations in Babylonia were threefold¹—to the king, to the governor and to the community. (1) The king could levy men to keep up the royal canal, to work its sluices, to dig its bed or to preserve its embankments. By forced labor he could build bridges and roads and carry on any government work that was needed. He could draft men for service in the army. His master of horse could demand horses for the royal stable. The king had the right of forage, for which he could demand wagons, asses and men. He had also the right of pasturage. His privilege to cut the herbage (Neb. Nippur, III, 26; Susa, 3, Col. III, 13, 14) was no doubt parallel to the Hebrew "king's mowings" (Amos 7 : 1), which appear to have been a tribute levied by the kings of Israel on the spring herbage, to be used as provender for their horses (cf. I K. 18 : 5). (2) The governor had the right to levy a tax on wood, grass, straw, wheat or any other grain. He had also the right of pasturage. He could demand wagons and their harness, asses and men for forced labor. He levied taxes on oxen and sheep and dues on gardens. (3) The community could make use of private

¹ Cf. Edouard Cuq. *La propriété foncière en Chaldée*, p. 730.

canals during the period of low water level. It could use private reservoirs and cut branches from any system of irrigation to water neighboring fields.

(II) Having exhausted the list of the royal grants we turn to the remaining stones dealing with the transfer of private property.

(a) There are two boundary stones which record the grant of land to daughters as their dowry.

The famous Caillou de Michaux (I R. 70) records the grant of twenty *gur* of cultivated land, of the communal land of the town Kar-Nabû, at the banks of the canal Mêdandan, in the district Bît-^mHabban, by Şîr-uşur, son of H̄abban, to his daughter Dûr-sharru-kênaiti, the bride of Tâb-ashâb-Marduk, as her dowry (*mulugu*). In connection with this transaction the bridegroom had to swear, "by the great gods and the god Şîru," not to raise any claim against that field.

A similar grant of land was made in the reign of Nabû-mukîn-aplu (London, 102) by Arad-Sibitti, son of Atrattash, to his daughter SAG-mudammîq-sharbi, wife of Shamash-nâdin-shum. This grant of three *gur* of cultivated land was made by Arad-Sibitti in the fourth year of king Nabû-mukîn-aplu, in the presence of seven sons. But not all the children having been present at the transaction it was confirmed by the others in the following year. Besides this dowry grant the monument also contained the record of several earlier transactions, extending from the second year of NINIB-kudur-uşur to the fifth year of Nabû-mukîn-aplu, parts of which are so badly defaced that it is impossible to make out the details. It is at all events certain, that Burusha, father of Shamash-nâdin-shumu, and Arad-Sibitti were engaged in litigation, which seems to have been ended by the marriage of the two children and the settlement of the tract of land upon the daughter of Arad-Sibitti as her dowry.

(b) There finally remain several cases in which land was acquired through purchase.

FIG. 13.—Symbols on the Caillou de Michaux, now in Paris. (I R. 70.)

A boundary stone from the reign of one of the kings of the second Isin (PA.SHE) dynasty, most likely Nebuchadrezzar I. (III R. 41), records the purchase of five *gur* of land, belonging to the district of Bit-Hanbi, by Marduk-nâsir, an officer of the king (^h*ša*q *šarri*), from Amel-Ellil, son of Hanbi, for one wagon, several horses,

FIG. 14.—Symbols on III R. 41. (III R. 45a = London 105 and No. 90,841.)

asses, oxen, harness, grain and clothing, in all worth 816 pieces of silver.

Another stone, dated in the reign of Marduk-shum-iddina (c. 850 B. C.), records the purchase of a field by Kidîni, son of Bêliddina, from Iddinâ, for one and five-sixths mines of silver.

But this purchase occupies only the latter part of the inscription. The former is taken up with a bequest of Bêl-iddina, a priest of Dilbat, to his younger son Kidîni, giving him his share in the paternal property. It consisted of three parts. First, an income derived from his position as priest (*amelu* TU) of the temple of the goddess Lagamal (l. 33). Second, a piece of land, consisting of

FIG. 15.—Symbols on the boundary stone of Sargon, dated 711 B. C. (V. A. 209.)

four *gur* of uncultivated land and an orchard. Third, a lot with a house on it in the city of Dilbat. The first transaction is dated in the twenty-eighth year of Nabû-apal-iddina, the second in the eleventh year of Marduk-shum-iddina (V. A., 208).

A still larger number of transactions is recorded on the stone of

Sargon (V. A., 209).¹ Nabû-ile'i, the son of Nûr-Sin, owned a piece of land in the city of Dêr. But as he desired to enlarge its size, he offered to his neighbor, Ina-eshê-êtir, another property at the new canal in exchange for the one next to his own lot. At the same time he asked him to give him a sealed document for his own lot. This may have been due to the fact that Ina-eshê-êtir was its former owner, who sold it to Iddina-Nabû, and the latter in turn to Nabû-ile'i. To this exchange and request Ina-eshê-êtir consented, with the condition that Nabû-ile'i give him six sheqels as a fee for concluding the transaction, which was done. A second property, adjoining his own, Nabû-ile'i bought from Sharâni for fifty-six sheqels of silver. A third property, adjoining that of Sharâni, Nabû-ile'i bought from Uşalli, for one and one-third mines and four sheqels of silver. A fourth property, adjoining the one bought from Sharâni, Nabû-ile'i acquired from Iddina and Shamâ, sons of Erbâ, for one and one-third mines and five sheqels. Then Nabû-ile'i won a lawsuit against Bêl-usâtu; but instead of taking the sum of money awarded to him he accepted several lots (*bûtâti*) which Bêl-usâtu had in Dêr. Another claim for one mine and thirteen sheqels was settled in a similar way. Nabû-ile'i gave his creditors fifty sheqels in exchange for a house and an orchard in the confines of the city of Dêr. All these six transactions are duly recorded on this stone, which is dated in the eleventh year of Sargon or 711 B.C. The combination of so many transactions upon one document is a well-known Babylonian custom, which may have been dictated by a desire on the part of Nabû-ile'i to have a permanent record of all the transactions involving his property.²

CONTENTS OF THE KUDURRU INSCRIPTIONS.

The different parts of a kudurru inscription are usually as follows:

(1) In a number of cases the stone has a name. It is called *^dNabû-nâṣir-kudur-eqlâti* (Del., II, pl. 17; III, 34, 35), or *^dRammân-limuttu(?) -pattinu-da(?) -riš* (London, 101, Col. I, 3), or *^dNIN.IB-u-^dNusku-mukîn-kudurri* (Neb. Nippur), or *Mukîn-kudurri-dârâti* (III, R. 41).

(2) Then follows the description of the field or fields in question; the total area is given and the different sides are carefully bounded by referring to the adjoining properties. In a few cases the exact length of each side is added.

(3) Next we find a statement of the circumstances which led to the grant. The grantor and the grantee are mentioned. In this section we often find important historical information, as well as elaborate eulogies on the king from whom the grant proceeded.

(4) The next section contains the most characteristic feature of these inscriptions, namely, elaborate curses against all kinds of officials and persons who might interfere with the land, its area, its privileges and its owners. This section has usually several well-marked subdivisions:

(a) An enumeration of the individuals admonished not to raise claims or warned not to interfere with the land—kings, princes, governors, prefects, judges, overseers, counselors, magistrates, relatives and neighbors. Thirty different officials are found in this section on the various stones.

(b) Next follow the acts of violence which are forbidden. No claim or lawsuit is to be made against the land. It cannot be confiscated, turned over to the state, nor given to a temple. The extent of the field is not to be changed. Its ditches and boundaries are not to be removed. Its canals are not to be closed up, nor its water supply to be diverted to other fields. The boundary stone, more-

over, is not to be touched, not to be thrown into fire, water or a dark place. It is not to be broken nor to be hidden in the dust. The inscription finally is not to be erased, nor anything else put in its place. No irresponsible person is to be engaged to carry out any evil intentions against the land or the boundary stone.

(c) Then the great gods are invoked, either by enumerating them first and then ascribing one curse to them all, or by giving a separate curse to each deity. The latter is the more common method. In the curses themselves all kinds of diseases or calamities are threatened to the would-be offenders. Although there is some regularity in ascribing the various curses to the different deities, yet there is considerable variation.

(5) The last section usually contains a list of the witnesses present during the transaction, and sometimes even the date is added.

These various sections follow by no means in a set order, but it was left to the individual scribe to arrange them as he saw fit. In some instances one or more sections are omitted. In other cases new sections are added, as, *e.g.*, the hymn to Ellil on the new boundary stone of Nebuchadrezzar from Nippur (Col. I, 1-22), the glorification of Marduk on the stone of Merodach-baladan II. (V. A., 2663, I, 1-24), together with the elaborate eulogy on Merodach-baladan (I, 25-III, 35). On the various charters (D. E. P., II, pls. 21-24; V R. 55, 56; Neb. Nippur; C. T., IX, pls. 4, 5; I R. 66; III R. 45, No. 2) the section treating of the territorial immunities¹ and exemptions is also peculiar to these stones.

Several of the above sections are important enough to deserve further discussion.

As to the orientation of the fields, there is considerable difference on the various stones. Most of them begin the enumeration of the sides of the fields with the upper length (*šiddu elû*); only three start with the upper width (*pātu elû*), namely, D. E. P., II, 112; IV R.² 38, and O. B. I., 150. Taking the upper length as the

determining factor, we find that eight stones locate that side towards north (*iltānu*), namely, London, 103; 101; Susa, III; Susa, XVI; III R. 41; III R. 43-45; O. B. I., 149; 150. Five stones locate it towards west (*amurrû*), namely, Neb. Nippur; IV R.² 38; London, 102; Br. M. 87,220; V. A., 208. Three locate it towards

east (*šadû*), namely, D. E. P., II, 112; I R. 70; Br. M. 90,922. On two stones (V. A., 209, and V. A., 2663) several fields are mentioned, which are differently oriented. Three fields on V. A., 209, have the upper length towards south (Col. II, 31; III, 2, 19); one field has it towards east (Col. IV, 9), and one towards west (Col.

V, 26). On V. A., 2663, three fields are oriented towards south (Col. III, 44; IV, 23; IV, 35) and one towards west (Col. IV, 7).

OFFICIALS OF THE KUDURRU INSCRIPTIONS.

To show the number and variety of the various officials mentioned in the curses it will be best to reproduce the passages in full, leaving out the connecting particles and the names of the

places in connection with which many of the titles occur. We shall quote the various lists in their chronological order.

³ For the reading *Meli-Shipak* instead of *Meli-Shiḫu* cf. Clay, B. E., XV, 3, note 4.

⁴ That the reading *ša te-mi* must be given up has long been apparent from the writing *hšakin*(GAR-*in*) *te-mi* on the stone of *Marduk-aḫê-erba*, O. B. I., 149, II, 3; cf. also Susa 16, III 30.

šarru, mâr šarri, ḫ[ša]-kan, ḫša-pi-[ru], ḫha-za-an-nu (Col. II, 32-33).

Here we have in fifteen inscriptions thirty officials and dignitaries from the king downwards. Arranged in alphabetical order they are as follows:

(1) *aklu*, (2) *etellu*, (3) *itû*, (4) *USH.SA.DU*,¹ (5) *bêl bîti*, (6) *bêl pahâti*, (7) *gugallu*, (8) *gutaku*, (9) *daianu*, (10) *dikû*, (11) *hazannu*, (12) *la(u)puttû*, (13) *manzaz pân šarri*, (14) *mâr šarri*, (15) *mu'irru*, (16) *mušêrišu*, (17) *nâgiru*, (18) *PA.TE.SI* (*iššakku*), (19) *qîpu*, (20) *rabû*, *malik šarri*, (21) *rê'û*, (22) *ridû*, (23) *šaknu*, (24) *šakin tēmi*, (25) *šakkanakku*, (26) *šâpiru*, (27) *šaqu*, (28) *šašarri*, (29) *šarru*, (30) *šatam*.

The largest number of officials, ten, occurs on the stone of Marduk-apal-iddina I (D. E. P., VI, pls. 9, 10); the smallest number, namely two, is found on the *Caillou de Michaux* (I R. 70). No principle of arrangement can be detected except that *aklu* heads the list five times; *laputtû* occurs four times in second place, following *aklu*, and *hazannu* five times in third place. Several titles occur in pairs—*aklu* and *šâpiru* (Nos. 2, 8), *aklu* and *laputtû* (Nos. 5, 10), *hazannu* and *šakin tēmi* (Nos. 12, 13), *šarru* and *mâr šarri* (Nos. 14, 15).

Only a few of these officials appear in these *kudurru* inscriptions outside of the curses, and then only in the act of measuring the fields. In one case (London, 101, I, 18–21) a *hazannu*, a *tupšarru* and a *šašarri* measure the field, in another (Susa, 3, I, 28–38) a *šašarri* and a *hazannu*, in a third a *šaknu* and a *tupšarru* (Susa, 16, II, 5–10). In a fourth case it is an *amel pahâti*, a *šakin tēmi* and two other men whose official position is not given (D. E. P., VI, 44; I, 9–15). Later a *sukallu*, who is also the *bêl bîti*, appears in the same act (III R. 43, I, 9–13), while in the last instance on record (O. B. I., 149, I, 15–20) two *tupšarru*, a *šakin tēmi* and a *hazannu* measure the field. In one case the measurement of the field is performed by a certain officer of Nippur, ideographically written *GÛ.EN.NA* (London, 103, III, 26).

¹ It seems doubtful whether *UŠ.SA.DU* has the meaning "neighbor" in this connection, especially as it appears in the midst of the officials on Susa 16. At any rate its occurrence among the officials should be noted.

It is evident that the enumeration of the officials in the curses was not arbitrary, but depended upon the actual number and character of the officials who held office in the district where the land granted was located. Whether they were royal officials

FIG. 19.—Boundary stone found by the German expedition at 'Amrân, in December, 1900, now at Berlin.

or chosen by the community in which they lived does not clearly appear, but from the fact that the king dealt directly with them it is more likely that they held office by the appointment of the king. As they are enjoined in the curses from engaging in certain acts, it must of necessity follow that under ordinary circum-

stances they enjoyed certain rights over the public lands and most likely derived income from them.

In private transfers of property, in which the king does not appear, these officials are omitted, but their place is taken by brothers, sons, family, members of household and relatives, male and female servants (*aḫê, mârê kimti, nišûti, salâti, ardên û kinâti*; London, 103, V, 28, 29; I R. 70; II, 2-4; London, 102, IV, 36-37; V. A., 208, 43, 44; V. A., 209, I, 32, 33). The stone of Marduk-nâdin-aḫê (III R. 43; III, 2-3, 8-15) has both lists.

INJUNCTIONS AGAINST ACTS OF VIOLENCE.

The possible acts of violence against which the officials are warned, and from whose committal they are solemnly enjoined, may be classified under eight heads.

1. The officials might enter lawsuits against the land. They might direct their mind to the seizure of the field (*ana tabâl eqlâti annâti uzunšu išakkanu*).¹ They might sue or cause a suit to be made (*ina eli eqlu šu'atum idabbubu ušadbabu*).² They might raise a claim or cause a claim to be raised (*iraggumu ušargamu, ipaqqiru ušapqaru*).³ They might give false testimony, saying the field has not been granted (*eqlu annû ul nadin-mi iqabbû*),⁴ or it is not a gift of the king (*eqlu ul niditti šarri-mi iqabû*),⁵ or it has not been measured

(*iqabû eqlu ul maših*),¹ and a sealed document has not been given (*kunukku ul kanik iqabû*).²

2. The officials might not only raise claims against the field, but they might actually take it and thus change its ownership. They might turn it over to the state again (*eqlâti šinâti ana pihâtîšina utarrû*),³ give it to a temple, to the king, to a representative of the king, to a representative of the governor, to a representative of his council or to any other person (*ana ili lu ana šarri lu ana iššakki šarri lu ana iššakki ḥšakin lu ana iššakki bît tēmišu lu ana mamma šanumma išarraqu*).⁴ They might give it to a stranger (*ana aḥânu išarraqu*),⁵ exchange it for another field (*eqlu kîmu ittanaššû*)⁶ or appropriate it to their own use (*ana ramânišu išakkanu*),⁷ and thus change the royal grant (*nidinti šu'atu ušannû*)⁸ or overthrow it entirely (*šarqi eqlu šu'atu inamdû*)⁹ by taking it away or causing it to be taken (*itabbalu ušatbalu*).¹⁰

3. The officials might change the extent of the field. They might curtail it or cut it up (*niširta qiššata ina libbi išakkanu*).¹¹ They might change its ditches and boundary lines (*ika mišra ittiqû*)¹² or alter its confines, limits and boundary (*usa mišra û kudurrašu ušannû*).¹³

NAMES AND TITLES OF THE GODS.

As to the names of the gods which are employed in the various curses, we can refer to the discussion of the subject by Prof. Jastrow in his *Religion Babylonians und Assyriens*, Vol. I, pp. 182-187, and to our Index. Attention must be called to the longest list of gods that has been found thus far on any boundary stone. It occurs on a stone of Marduk-apal-iddina I. (Susa, XVI), recently published by Prof. V. Scheil (D. E. P., VI, pls. 9, 10). It begins with the four gods, Anu, Ellil, Ea and NIN.HAR.SAG, a title of the Bêlit of Nippur. Then follow a series of pairs, Sin and his wife NIN.GAL, the gods of Ur; Shamash and his wife Ai, the gods of Sippar, together with three lesser gods, forming the court of Shamash, Bunene, Kittu (NIN.GI.NA) and Mêsharu (NIN.SI), and two gods the reading of whose name is not yet certain, AT.GI.MAH¹ and SHE.-RU.SHISH. These are followed by Marduk and his wife Zarpanî-tum, the gods of Babylon; Nabû and his wife Tashmêtum, the gods of Borsippa; NIN.IB and his wife NIN.KAR.RA.AG, a title of Gula, worshipped chiefly at Nippur; Zamama and his wife Bau, the gods of Kish. The next group consists of five goddesses, Damu and GESHTIN.NAM (GESHTIN is explained as *bêlit šêri*,² see Br. 5008), Ishtar, Nanâ and Anunîtum. Then follow Rammân and his wife Shala, together with Mi-šar-ru (the latter is also associated

¹ Perhaps to be read *maliku šîru*, since *AT.GI* = *ma-lik*, cf. Br. 4170, and belonging with *ŠE.RU.SIS* to the attendants of Shamash. Their position between Bunene and Kittu points in that direction.

² *Bêlit šêri* occurs in the Gilgamesh epic as the scribe of the under world, kneeling before Ereshkigal (col. V, 47, cf. K. B., VI, 190). In IV R. 27, No. 5, 29, 30, *dNIN.GESTIN.NA DUB.SAR MAH* corresponds to *dbe-lit ši-ri tup-šar*, cf. also II R. 59, Rev. 10-11, b, c, where *dGESTIN* is given as the equivalent of *dbe-lit šêri*, as well as *dGESTIN.AN.NA*. *dNIN.GESTIN.NA* is placed alongside of Nanâ on K 2613, Obv. II, 13, cf. B. A., V, 701. *dGAS.TIN.NAM* appears alongside of *NIN.KA.SI*, a wine goddess, = Siris, in Reisner, *Hymnen*, IV, 64, 65. In I R. 43, 32, *dGAS.TIN.NAM* is mentioned among the deities of Erech (*ilâni ašibât Uruk*).

with Rammân and Shala¹ in D. E. P., VI, 46, III, 2); Nergal and his wife Laš, the gods of Kutha; Ishum and Shubula, the latter being known as the goddess of Shumdula.² Their juxtaposition here proves them husband and wife. Next come LUGAL.GIR.RA and SHIT.LAM.TA.E, two forms of Nergal, here perhaps regarded as male and female; LUGAL.GISH.A.TU.GAB.LISH (to be read Bêl-šarbi),³ also a form of Nergal, the god of Baš, and his wife Ma'-me-tum, usually named as the wife of Nergal.⁴ Next LIL and NIN.BAD,⁵ together with Tishhu,⁶ and probably his wife KA.DI, the goddess of Dûr-ilu, and finally the three pairs Nusku and his wife Sadarnunna, IB (or Urash) and his wife NIN.E.GAL (also called Mama, according to the Code of Hammurabi, II, 29), the gods of Dilbat, and Shuqamuna and his wife Shumalia.

The number of all the gods invoked in the curses on the various boundary stones published thus far is fifty-eight. This large number is mainly due to the new stone of Marduk-apal-iddina I. (Susa, XVI), which alone enumerates forty-seven deities. Omitting this stone the number on all the other stones is but thirty-six, and even of these hardly a dozen occur frequently. The deities invoked on the *Caillou de Michaux* give a fair representation of the most favored gods, because all of them occur more than six times. They are Anu, Ellil, Ea and NIN.MAH (a title of the Bêlit

¹ The same association occurs also in Craig, *Religious Texts*, pls. 57, 22; 58, 24.

⁴ Cf. Böllenrücher, *Gebete an Nergal*, No. III, 8, p. 20; but LUGAL.GIŠ.A.-TU.GAB.LIŠ is placed alongside of *dMa-mi-tum* also in *Shurpu Series*, VIII, 14.

⁵ *dNIN.BAD.NA* is called the wife of LUGAL.AB.BA, cf. III R. 68, 73, a, and LUGAL.A.AB.BA is a title of Nergal, cf. II R. 59, 37, 38, e; hence *dLIL* must also be a title of Nergal, which agrees very well with the context, in which various forms of Nergal are enumerated.

⁶ For the pronunciation *Tishhu* see Ranke, *Personal Names*, pp. 169 and 207; Thureau-Dangin, I. S. A., 249, note 9.

of Nippur), Marduk, Shamash, Sin and Ishtar, NIN.IB, Gula, Ram-mân and Nabû. Besides these nearly all the stones of the Cassite period mention the Cassite gods Shuqamuna and Shumalia. As lesser gods, which occur at least three times, are invoked Nergal and Nusku, NIN.E.GAL and Zamama, Bau and Zarpanîtum.

Numerous titles are applied to the gods on the boundary stones.

Anu, Ellil and Ea,¹ and in some cases also NIN.HAR.SAG² or NIN.MAH,³ are called the great gods (*ilâni rabûti*).

Of all these titles only a few of a more general nature are exchanged between the gods; *bêlu rabû* is common to Anu, Ellil and Marduk; *abi ilâni* is attributed to Anu and Sin, and *šar šamê u iršiti* to Marduk and NIN.IB. In the other cases the titles seem to have become firmly attached to the several gods. At least no transfer can be observed.

THE CURSES OF THE KUDURRU INSCRIPTIONS.

The calamities and disasters which the gods are asked to send down upon would-be offenders are even more numerous and varied than their titles. We quote them under the names of the gods with whom they are connected.

Anu is asked:

May she destroy his foundation (*išidsu libit*, London, 101, III, 15).

poniard in his eyes, may he cast down his face be-
fore his captor and may the latter, unmindful of his
pleading, quickly cut off his life. In the collapse of
his house may his hands get into the mire, as long as he

Here then we have nearly one hundred curses, uttered in the name of nearly thirty gods. It will be of interest to review briefly the most characteristic of these curses. Ea is asked to send melancholy, Gula a destructive sickness, Ishtar loss of weapons in battle, Marduk dropsy, Nabû want and famine, Nergal death in battle, NIN.IB removal of boundary and death of children, Nusku burning of root and headache, Rammân destruction of fields through floods, Sin leprosy, Shamash blindness, deafness and lameness or unfavorable decision in law, Zamama bad luck in battle. The other curses are couched in vague and general terms.

It is remarkable that the presence of witnesses was not always recorded upon the boundary stones. In view of Hammurabi's law (§§ 7 and 123) that a contract without witnesses was invalid, it is hardly possible to infer from these instances that no witnesses were present. We can only note the fact that on some of the finest boundary stones their names are omitted. The stone of Meli-Shipak (D. E. P., II, pls. 21-24), the sale of land to Marduk-nâşir (III R. 41), the *Caillou de Michaux* (I R. 70), and the stone of Marduk-aḫê-erba (O. B. I., 149) omit this feature. When witnesses were present and their signatures were added, their number varied from at least three (IV R.² 38) to sixteen (III R. 43).

Several stones have a pictorial representation of the king who made the grant. III R. 41 shows the picture of one of the first kings of the second Isin(PA-SHE) dynasty. London, 102, represents Nabû-mukîn-aplu. C. T., X, pl. III, shows Nabû-apal-iddina, and V. A., 2663, Merodach-baladan II. Finally, the stone of 'Amrân (M. D. O. G., No. 7, p. 26) shows the picture of a king, who resembles the one on III R. 41 so much that they are most likely pictures of the same king, perhaps of Nebuchadrezzar I.

THE SYMBOLS OF THE BOUNDARY STONES.

The last remarkable feature of the boundary stones are the symbols which are sculptured either on top or on one of the sides of the stones. They are found on all the public boundary stones and on three of the private documents (the stone of Nazi-Maruttash, D. E. P., II, pls. 18, 19; that of Nabû-apal-iddina, B. O. R., I, 65; and the one of Marduk-šum-iddina, V. A., 208). They also occur on the stone of Nabû-šum-iškun, which records the appointment of Nabû-mutakkil as priest of Nebo at Borsippa.

Various theories have been proposed as to the meaning and purpose of these symbols. According to one theory (*Guide to Babylonian and Assyrian Antiquities*, 1900, p. 85f.) they are "representations of certain powers of evil from which the owners of the lands wished to preserve their property, or powers of good whose favor they wished to secure." According to another theory they are the representatives of the gods invoked in the inscription. This is the view of Prof. Scheil (*Recueil de Travaux*, 1901, Vol. XXIII, pp. 95-97), of Dr. Ward ("The Asherah," A. J. S. L., XIX, 33, 44), of George Thiele (*Antike Himmelsbilder*, Berlin, 1898), and partly of Prof. Jastrow (*Religion Babyloniens und Assyriens*, Vol. I, p. 191f.). According to a third view they represent the signs of the zodiac. This was first suggested by Oppert (*Documents juridiques*, 1877, p. 85f.). It was adopted by Pinches (*Guide to*

FIG. 20.—Boundary stone of Marduk-apal-iddina II. (V. A. 2663.)

the *Nimroud Central Saloon*, 1886, pp. 40-60), and more fully developed by Epping and Strassmaier, who identified three emblems as belonging to the zodiac (*Astronomisches aus Babylon*, 1889, pp. 149, 150). It was most fully elaborated by Prof. Hommel (*Aufsätze und Abhandlungen*, 1900, pp. 236-272, 350-372, 434-474). It has since been accepted by Prof. H. Winckler (*Preussische Jahrbücher*, Vol. 104 (1901), p. 226) and by F. K. Ginzel (*Beiträge zur Alten Geschichte*, Vol. I, p. 7f.). A fourth view recognizes in them only in part signs of the zodiac and in part other stars. This is held by Franz Boll (*Sphaera*, Leipzig, 1903, pp. 198-208).

FIG. 21.—Fragments of boundary stones found at Susa, Nos. 7-9.

In view of this uncertainty it is not surprising that many scholars agreed with Oppert, who declared: "It would be rash to pretend to explain these symbols." Recently, however, the problem has passed into a new stage through the discovery by the French expedition at Susa of a number of new boundary stones, on which the symbols are repeatedly referred to. Before that time there was but one reference to the symbols on IV R.² 38, III, 29-31: *ilāni ma-la i-na narī šū-a-tum eš-ri-tu-šū-nu ud-da-a—i.e.*, "the gods whose shrines are shown on this stone." Now we read on the stone of Nazi-Maruttash (D. E. P., II, pl. 17, III, 19-22): *šum-šū-nu za-ak-ru i^ukakku-šū-nu kul-lu-mu ù šū-ba-*

tu(m)-šú-nu ud-da-a—i.e., “whose names are mentioned, whose weapons are shown, whose seats are indicated.”

Meli-Shipak, VII, 26–34 (D. E. P., II, pl. 23) reads: *ilâni rabûti ma-la i-na abnu narî an-ni-i šú-um-šú-nu za-ak-ru šú-ba-tu-šu-nu ud-da-a i^ukakkê-šú-nu ku-ul-lu-mu ù ú-šu-ra-tu-šu-nu uš-šu-ra—i.e.*, “the great gods as many as are mentioned on this stone by their names, whose seats are indicated, whose weapons are shown, whose reliefs are sculptured.”

D. E. P., II, 89, note 3, reads: *ilâni mala [ina eli n]arî annî*

FIG. 22.—Babylonian temples as they appear on the boundary stones.

šum-šu-nu [šut]uru KI.DUR.MEŠ-šunu uddâ u i^uDIB.MEŠ-šunu [u]-zu-[zu], and the fragment D. E. P., II, 113, 20, 21 reads: *ilâni mala i^una narî annî šum-šunu] za-ak-ru u-šu-ra-[tu-šu-nu uš-šu-ra]*.

These passages make it plain that the symbols represent three different things: (1) The seats or shrines of the gods, called *šubâti* or *êšrêti*; (2) the weapons of the gods, called *i^ukakkê* and *i^uDIB.MEŠ*,¹ and (3) the bas-reliefs of the gods, called *ušurâti*. The shrines are no doubt to be recognized in what scholars (Pinches

and Hommel) have been in the habit of calling altars. That these shrines actually represent ziggurats appears not only from the names *ešrêti*, "sanctuaries," which is applied to them, but also from the fact that a ziggurat is clearly drawn on IV R.¹ 43, third row,¹ last figure. The dragon, crouching before the stage tower, with a wedge standing upright on its back, corresponds to the wedge lying flat on the usual form of shrines (London 100; 106; 105; I R 70, etc.).² The stage tower on IV R.¹ 43, has four stories, and when we examine the other shrines more closely we find that they also contain four oblong squares within each other. It is the ground plan of a stage tower (cf. Bezold, *Nineve und Babylon*, p. 102).

These shrines, however, are not the stations of the planets or of the moon (Hommel, *Aufsätze*, pp. 244, 272, 435¹), but more generally the seats of stellar deities (Boll, *Sphaera*, p. 203). This is particularly clear in the figure of the seated goddess on the stone of Nebuchadrezzar I. (V R. 57, fifth row),³ which is not King Nebuchadrezzar, but the goddess Gula, as is definitely stated on a new stone from Susa (D. E. P., VII, p. 140, fig. 452).⁴ Here the shrine evidently indicates the dwelling place of the deity; however, not an earthly temple (for all Babylonian deities are stellar in their nature), but a heavenly sanctuary. As the prototypes of all earthly conditions are to be found in heaven, according to the belief of the Babylonians, so earthly temples had their heavenly models.⁵

The shrines are not represented in connection with all the symbols. The largest number of shrines (ten) occurs on the stone of Meli-Shipak (D. E. P., II, pl. 24).⁶ There we have two shrines with

tiaras, one with a ram's head, one with a pin and a horseshoe-like figure, one with a spear, one with a brick¹ and a wedge, one with a goddess, one with a lightning fork, one with a chisel, and one with a sea-shell. Besides these, there are shrines with a tortoise (London

106),² with a winged dragon beside it (V.A. 2663),³ with a pyramid-shaped object (Susa 15),⁴ with a square object (Susa 15),⁵ with a round object with two horns (Susa 15),⁶ with another round object (Susa 13),⁷ one on the back of a monster carrying a vase on its

¹ Instead of one brick there may also be several rows of bricks, cf. Susa 16¹¹ (fig. 10, p. 25), which shows twelve bricks in four rows. Compare also Susa 20⁶, where three rows of bricks are given. It is the symbol of Nabû, which follows the spear, the symbol of Marduk. The same arrangement seems to be followed on Susa No. 15 (fig. 2, p. 6). The spearhead of Marduk in the third row is there followed by a pyramid-shaped figure, which is no doubt a variant representation of the bricks of Nabû.

⁶ This object is probably a variant form of the horseshoe-like figure, which follows usually the symbols of Anu, Ellil and Ea (cf. Susa 3⁷, Susa 20⁴, I R. 70⁷, V. R. 57⁹). It is the symbol of Ninḫarsag. See below, p. 95.

⁷ This round object is perhaps identical with the tortoise, see London, 106 (fig. 14, p. 34).

head (Susa I), and one with a stylus-like object¹ (V. A. 2663). The shrines occur therefore thus far in connection with eighteen symbols. It seems to have been left to the choice of the artist to reproduce the shrine or to omit it. Accordingly we find the spear of Marduk on a shrine (V R. 57),² or on a dragon (IV R.¹ 43),³ or alone (Susa 16);⁴ the ram's head of Ea is on a shrine (London 105),⁵ or on a goatfish (IV R.¹ 43);⁶ the lightning fork of Rammân is on a shrine (Susa III),⁷ or on a crouching ox (IV R.¹ 43),⁸ or it stands alone (I R. 70).⁹ Indeed a close examination of the symbols reveals the fact that they can be represented in three ways, corresponding to the three classes of objects mentioned on the stone of Meli-Shipak (shrines, weapons and reliefs of the gods, VII, 23-34). Either the weapon is shown alone, or, secondly, the weapon and the shrine or the weapon and the animal figure are placed together, or, thirdly, weapon, shrine and animal figure are combined into one group. In other words, either one, two or three figures constitute the symbol.

A few examples will show the nature of this variation.

(1) The spear of Marduk is found alone on Susa I, II, Susa IV.¹⁰

¹ The stylus is a substitute for the wedge, the symbol of Nabû. This appears from the following considerations: (1) The symbol of Nabû would otherwise be wanting on this stone (V. A. 2663), while it occurs on nearly every other stone. (2) Nabû is frequently represented as holding the stylus, cf., e.g., *tâmekh qân tuppi âhizu šukâmi* (I R. 35, No. 2, 4) *šâbit qân tuppi elli nâši tupšimât ilâni* (K. B., IV, 102, 3). (3) On the stone of Sargon (fig. 15, p. 35) the stylus standing erect follows the spearhead of Marduk. It here takes the place of the wedge, the usual symbol of Nabû. On Assyrian monuments the symbol of Nabû is a single (rock relief of Bavian) or double (Esarhaddon stele of Sendschirli) column. On the boundary stone of Nabû-apal-iddina (fig. 9, p. 23) the two columns are joined so that they form an H-like figure.

It appears on a shrine, London, 90922;¹ on a dragon, London, 99.² Dragon, shrine and spear on top are found on London, 100, 105, 106, I R. 70³ and on most of the other stones. (2) The wedge appears standing alone on the new stone of Nebuchadrezzar I. (Neb. Nippur),⁴ on the dragon (London, 99),⁵ on the shrine without the dragon (V. A. 208),⁶ on the shrine with the dragon alongside (London, 100, 105, 106, I R. 70).⁷ (3) The ram's head is on a shrine (London, 90922),⁸ on a goatfish (London, 99).⁹ Ram's head, shrine and goatfish are seen together on London, 105, V. A. 2663, Susa I, etc.¹⁰ (4) The arrow, pointing downwards, occurs alone I R. 70.¹¹ It is held by a scorpion man with a bow (London, 100),¹² or by a centaur with a bow (London, 101).¹³ (5) The fork of Rammân occurs alone (London, 106, 101, I R. 70),¹⁴ or on the crouching ox (London, 99, 100, Susa II),¹⁵ or on a shrine (V. A. 208),¹⁶ or on a shrine with crouching ox alongside (Susa III).¹⁷ These variations might be multiplied, but enough have been given to show that a considerable number of symbols appear in three possible forms.

From the shrines we pass to a discussion of the weapons. A number of these weapons can readily be recognized on the boundary stones, others are more difficult to identify, because the Babylonians did not limit the term "weapons" to what we commonly include in that term. Of the more obvious weapons on the boundary stones may be mentioned the spearhead (fig. 24¹), the lightning

fork (fig. 28¹⁰), the mace with the double head (fig. 24¹¹), the mace with the square top (fig. 24¹⁰), the mace with the vulture head (fig. 24¹⁴), the mace with the lion head (fig. 24¹²), the lion standing erect, holding two daggers (fig. 21), the mace with the globular end (fig. 12¹³, fig. 14¹⁸) and the arrow (fig. 12¹⁰, fig. 14⁸, fig. 13¹¹). The three scepters or shafts with round balls on top, pictured on the new boundary stone from Nippur (fig. 47, Nos. 3, 6, 9), belong perhaps to the same category.

When we turn to the historical and religious texts¹ we find that the Babylonians included among the weapons of the gods a number of mythological forms and natural phenomena.

Anu has a weapon called *e-ri*, which was held by the sorcerer in incantations (*e-ri isukakku šîri ša A-num ina qâtâ-ia našâku*, C. T., XVI, pl. 3, 87; cf. also pl. 6, 211; pl. 21, 202). A bow of *Anu* is spoken of in the Creation Story (*imurâ-ma isugaštu kî nukkalat [epšetsa]*, K. 3449, a Rev. 2, cf. K. B., VI, 1, 32).

Anunît, as the goddess of battle, carries a bow and a quiver (*Anunîtum bêlît taḥâzi našâta isugašti u išpati*, V R. 64, III, 22, cf. K. B., III, 2, 104).

Ea has a net (*gišparru ša Ea*, C. T., XVII, 34, 26).

Ishtar is supplied with a "powerful bow, a mighty spear, which cuts down the disobedient" (*isugaštu dannatu isutartaḥu gišru mušamqit lâ mîgiri*, Esarhaddon stele of Sendschirli, Rev. 29, 30, see *Ausgrabungen in Sendschirli*, p. 38). Aššurbânâplu describes an appearance of *Ishtar* in a dream, "on the right and left she had quivers hanging, she held a bow in her hand and drew a sharp sword" (*imna u šumêla tullâta išpâti tamḥat isugaštu ina idiša šalpat namšaru zaqtu*, Cyl. B., Col. V, 53-55, cf. K. B., II, 250). The same king killed four lions with "the

terrible bow of Ishtar, the mistress of battle" (*tiłpānu izzitu ša ʿIštar bêlit taḥāzi*, I R. 7, No. 9, a, 2).

Lugal Maradda is mentioned by Nebuchadrezzar II., who refers to his "terrible weapons which spare not the foe, truly advance and are sharp" (*kakkêka ezzûtim ša lâ igammilû nakiri lû tibû lû zaqtû*, Langdon, *Building Inscriptions*, Nebuch. 2, Col. III, 42-43; cf. 3, Col. II, 27f.).

Marduk's weapons are described in the Creation Story. Before he went into the fight with *Tiāmat* "the gods gave him a weapon without equal, which overwhelms enemies" (*iddinûšu kaku lû maḥra dā'ipu zaiari*, IV, 30). To prepare himself for the conflict *Marduk* "formed a bow and appointed it for his weapon; he laid the arrow on it; he took up the *miṭtu*-weapon and caused his right hand to seize it, he hung a bow and a quiver at his side; he placed lightning before him and filled his body with burning fire; he prepared a net to enclose *Tiāmat*" (*ibšimma ʿisuqašta kakkašu uaddi mulmullum uštarkiba iššima ʿisuṣmiṭṭa imnašu ušāḥiz ʿisuqaštu u mashku ʿiṣpatum iduṣšu ilul iškun birqu ina pānišu nablu muštahmiṭu zumuršu umtallā ēpušma sapara šulmū kirbiš Tiāmat*, IV, 35-41). The same weapons of *Marduk* occur in several other passages (cf. Frank, *Bilder und Symbole*, p. 23).¹

Nabû has a weapon of which it is said: "Thy weapon is a dragon from whose mouth runs no poison," *kak-ka-ka ú-šum-gal-lu ša iš-tu pî-šu im-tu la i-na-at-tu-ku*, IV R.² 20, No. 3, 15,

Nanā had a bare sword and a pointed *ulmû* as the adornment of her divinity ([*na*]mšaru pîû [u]lmû zaqtu simat ilūtiša, Craig, *Rel. Texts*, I, 55, Col. I, 2).

Nergal is called "the lord of weapons and bows" (*bêl bêlê u qašāti*, III R. 43, IV, 21, cf. above, p. 55). *Tiglathpileser* declares

¹ See also Hehn, *Hymnen an Marduk*, B.A., V, 309, 19; 327, Obv. 16; 329, Obv. 10, 15; 330, 20; 339, Obv. 1; 349, 23.

that he received from Ninib and Nergal "their terrible weapons and their sublime bows" (*isukakkēšunu ezzūti ū isugašātsunu širtu*, I R. 14, 58, 59, cf. K. B., I, 38). Again he is represented as holding "the merciless *abūbu* weapon" (*tāmeḥ, abūbi lā pādē*, Böllenrücher, *Gebete an Nergal*, No. 8, 8, p. 50). Of Nudimmud (Ea) it is said, "he presented to thee a weapon without equal" (*isukakku lā māḥiru iqīšku* "Nudimmud, Böllenrücher, No. 8, 12. He is "the hero whose whip[cracks"] (?) and people cry out, "The noise of his weapon" (*qarradu ša qinazzu . . . iqabbū rigim kakkīšu*, Böllenrücher, No. 5, 46). He is the one "who lifts up the weapon, who urges on to battle" (*naš isukakki dikū anantum*, Böllenrücher, No. 4, 13, p. 21).

NIN.IB's weapons are the most numerous and best known at present.

Upon what is perhaps the third tablet of the *Ana-gim gim-ma* series (Hrozný, *Mythen von dem Gotte Ninrag*, p. 13f.) twenty-two weapons (perhaps originally twenty-four) are enumerated. Some are given in Assyrian, others only in Sumerian. Not all of the latter can be explained. The weapons given in Assyrian are: "The heavy weapon of Anu" (*isukakku kabtu ša dAnum*, Obv. 30); "the wide net of the hostile land" (*alluḥappu mātī nukurtim*, Obv. 34); "the sword, the dagger of my divinity" (*namṣaru paṭru anūṭā*, Rev. 1); "the net of the battle" (*šuškal taḥāzi*, Rev. 4); "the long bow" (*ariktu*, Rev. 6); "the girdle clasping men and the bow of the storm (battle)" (*šibba ša ana ameli iṭeḥḥu qaštu abūbi*, Rev. 8); "the bow and the shield" (*tilpānu u kakābu*, Rev. 10).¹ The weapons whose names are only

¹ These weapons have a series of ornamental names: "The destroyer of lords," *muabbīt šadī*, Obv. 30; "The overthrower of lords," *mušakniš šadī*, Obv. 32; "The victor in battle," *litti taḥāzi*, Obv. 34; "The one cutting off necks," *muṣṣir kišadāti*, Rev. 2; "The lord from whose power there is no escape," *ša šadū ina gātišu la ipparšiddu*, Rev. 4; "The helper of heroes," *rēṣat edli*, Rev. 6; "The overwheeler of the houses of the hostile land," *ḫatū bīt māt nukurtim*, Rev. 10.

given in Sumerian are: ^d*Šar-ur* in his right and ^d*Šar-gaz* in his left hand (Obv. 19-22); ^d*Ud-ka-ninnû*, "the storm with fifty edges" (Obv. 23); ^d*Ud-ba-nu-illa*, "the merciless storm" (Obv. 25, cf. also II R. 26, 38c-d, and II R. 57, 61a = *ûmu lâ pâdû*); *mir-silig-ga* (Obv. 27); the *nu-na* weapon (Obv. 31); *Ku-šag-ninnû*, "the weapon with fifty heads" (Rev. 11); *Giš-ga-šag-imin-na*, "the weapon with seven heads" (Rev. 13); *Ku-šag-ia*, "the weapon with five heads" (Rev. 16); ^d*Kur-ra-šu-ur-ur*, "which makes the lords tremble" (Rev. 19); ^d*Erim-a-bi-nu-tuk*, "whose enemy has no strength" (Rev. 21); *ŠI+UM-tila*, "support of life" (Rev. 28) and once more *Ku-šag-ninnû* (Rev. 29, cf. Rev. 12).

NIN.IB is also called "the spear, the great hero, the son of Ellil, with his arrow he cuts off life" (^d*NIN.IB tartabû qarradu rabû apil* ^d*En-lil ina uššišu zaqti uparri* *napištim*, V R. 9, 84-85). In Shurpu IV, 75, he has the title "the lord of the weapon" (*bêl isukakki*).

Nisaba, like *Ēa*, has a net (*saparu ša* ^d*Nisaba*, C. T., XVII, 34, 30).

Rammân's weapon is the lightning, hence one form of *Rammân* (^d*UMUN-IM*) is called ^d*Rammân ša birqi*, III R. 67, 47c-d, and the curse of *Rammân* is "that he may strike his (the evil-doer's) land with awful lightning" (^d*Rammân ina birqi limutti mâtsu libriq*, Tigl., VIII, 83, 84). *Rammân* is also pictorially represented with the lightning fork on the boundary stones (most clearly on Susa, No. 5, *b*, see fig. 18, p. 41). Another weapon of *Rammân*, as has been suggested by Zimmern (cf. K. A. T.³, 448^e), may be the axe, which is once referred to on a fragmentary boundary stone (O. B. I., No. 80, 1).

Shamash has a snare by which he overthrows all lands (*sâhip šušallaka puḫur mâtâti*, IV R. 17, Rev. 13). The net (*šêtu*) of *Shamash* occurs in the *Etana* myth (I, a, 11, cf. K. B., VI, 1,

104) and a synonym, *gišparru*, is also mentioned (*gišparru mamû* ^d*Šamaš*, *Etana* Myth, 1, a, 12).

Sibitti, they are described by Esarhaddon as holding bow and arrow (^d*Sibitti ilâni qardûti tâmeku tilpânu u ušši*, K. 2801, 12, Esarhaddon's *Bauinschriften*, cf. B. A., III, 228). Cf. also Hehn, *Siebenzahl und Sabbat bei den Babyloniern*, pp. 19ff.

Sin, his symbol is the crescent, *usqaru-asqaru*, also called the basket (*bugîna*) and the ship (*maqurru*, Susa 2, IV, 10, 11). Although it is probable that the crescent was regarded as Sin's weapon, it is not definitely called by that name in the inscriptions published thus far.

Ûr-ra, "the powerful weapon of the terrible Ûr-ra," is mentioned by Nabopolassar (^{iš}*u**kakku dannu ša* ^d*Ûr-ra rašubbu*, O. B. I., No. 84, Col. I, 24, 25).

A fragmentary list of divine weapons together with their names is given III R. 69, 3, 75-83. As it has not been used in this connection before, as far as I know, it is reproduced entire:

As to the names only a few suggestions can be ventured at the present time because none of them, with perhaps a single exception, appear elsewhere. It seems that several of the names indicate different species of thorns. *Iṭ-ṭi-it-ti* occurs in the Gilgamesh Epic (XI, 284) as the "bramble," by means of which Gilgamesh is

enabled to return home.¹ *Puquttu* is also a thorn, which occurs on the boundary stones in the curses of Rammân (cf. p. 64f.). With *hihinu* we may perhaps compare *ha-hi-in* which is mentioned as a synonym of *puquttu* (II R. 41, 58a, b). *Maššû* (if the restoration is correct) is perhaps the *maš-šû-u* mentioned II R. 47, 14, b, as a synonym of *kak-ku*. For *qa-qu-ul-tu*, the weapon of Marduk, we can offer no explanation, unless it has something to do with *qaq-qul-ti la pa-te-e*, "a closed vessel," mentioned in an incantation text, cf. C. T., XVII, 35, 79. It is tempting to restore the weapon of Nergal to *pal-s[u-u]*, because of the occurrence of this name in an omen text, to which we shall presently refer.

The Babylonians did not only picture the divine weapons on the boundary stones, but they fancied that they could also detect them in the markings found on sheep livers. Hence they appear frequently in omen texts. In one of these (C. T., XX, 42) which has recently been discussed by Prof. Jastrow (A. J. S. L., XXXIII, (January, 1907), pp. 111-115) we find a similar series of divine weapons. The destructive weapon (*isukakku išitu*) of Ellil is called *kak-su-û*, the weapon of Shamash *ud-di-su-û* and the weapon of Ea *gab-lah-hu*.² In the case of three other weapons, the names

¹ Cf. also the god *Id-di-tum* (or *Iṭ-ṭi-tum*) in the Cassite texts published by Prof. Clay, B. E., XV, p. 54. For the deification of the divine weapons see the weapons of NIN.IB, cf. p. 82.

² The view of Prof. Jastrow that the names of these weapons are written ideographically does not seem to me to be fully established. The other names found in Col. VI of the tablet under discussion (K 2235) are all written phonetically. Moreover the name of the weapon of Ea, written *gab-lah-hu*, is not necessarily connected with the ideogram *GAB.LAH*, for which the reading *saḫ-maš-tum* seems probable, or, if they are the same, it might be argued that *gablahhu* is only a synonym of *saḫmaštum*, but not identical with it. Finally the fact that four of the names end in *su-û* does not necessarily prove them to be ideograms, especially since the ideogram *SU-Û* is unknown and no possible meaning can be attached to it. For these reasons I prefer to regard the names as written phonetically.

of the respective deities to whom they belonged have been effaced. They are: *pal-su-ú*, *dí-dí-su-ú* and *isukakku* III-*tuš*, perhaps to be read with Prof. Jastrow *šalaltuš*.

Besides the weapons mentioned on this tablet there are numerous other references to divine weapons in omen texts. As Prof. Jastrow has shown, there is a weapon of Ishtar called *dí-e-pu*, "the overthrower" (V R. 63, II, 30), a weapon of Shamash called *ma-ak-ša-ru*, perhaps "the helper," from *kašáru* to support. A second weapon of Shamash is called *at-mu-u ki-e-nu*, "the faithful word" (Rm.² 106), and a double weapon is named *úmu šaqû*, "the mighty storm" (Stele of Nabonidus, XI, 11f.). As one of the weapons of NIN.IB is called *Ud-ba-nu-illa* = *úmu lâ pâdû* (cf. above p. 82), "the merciless storm," and as the double-headed club is the symbol of NIN.IB, it is probable that the *úmu šaqû* here mentioned is also a weapon of NIN.IB. We also find a "sevenfold *zibu*," the weapon of Shamash (C. T., XX, 48, 33-36), a "fifteen-fold *zibu*," the weapon of Ishtar (C. T., XX, 48, 39), a "threefold *zibu*," the weapon of Sin (C. T., XX, 48, 42). Three other names appear on the tablet referred to above (C. T., XX, 42, 33), namely, *šú-šú-ru*, *šul-mu* and *isukakku* KU.ŠI. To these may be added a name occurring in the omens of Sargon and Narâm-Sin, namely *su-ḫu-ru-ni* (IV R.² 34, Rev. 4). Altogether the omen texts have thus far furnished us with seventeen names of divine weapons.

Finally divine weapons appear also in the heavens. The Babylonians spoke of certain constellations as the weapons of the gods. Thus both the *mulmullu* star and the *gamlu* star were called "the weapon of the hand of Marduk" (*isukakku ša qât* ^d*Marduk*, V R. 46, Obv. 3, 26, a), and the star *GIŠ.GAN.URU* was called the weapon of the God A-e(mal), (V R. 46, 25, a). One of the weapons of NIN.IB was the *tartaḫu* (V R. 9, 84), but there was also a *tartaḫu* star, which was identified with Ninib (II R. 57, 52,

a, b).¹ Ishtar held a bow in her hand (see above, p. 79), but there was also a bow star (= Sirius), identified with Ishtar, cf. V R. 46, 23, a, b, and Jensen, *Kosmologie*, pp. 53, 149. Šar-ur and šar-gaz are two weapons of NIN.IB (see above, p. 82), but they are also two

stars, cf. V R. 46, 32,a, and Jensen, *Kosmologie*, p. 145f.

A review of these divine weapons has shown that the Babylonians did not only represent them pictorially upon their boundary stones, but they also believed that they could detect their

shape in the markings of sheep livers and in the forms of certain constellations.

There can no longer be any question that not only the weapons but all the varying figures on the stones are symbolic representations of certain gods. This is not only stated in the inscriptions, as quoted above, but one of the new stones from Susa (D. E. P., I, fig. 379) has actually the names of the gods written on the symbols. We now know that the spear represents Marduk, the mace with a vulture head *Za-mà-mà*, the mace with a lion head *Nergal*,¹ the mace with the square top *Shuqamuna*, the walking bird most likely *Bau*, the shrine with the goat-fish and ram's head *Ea*, the lamp *Nusku*, the seated goddess *Gula*, the crescent *Sin*, the sun disk *Shamash*, the eight-pointed star *Ishtar* and the serpent *Širu*. The inscriptions on the scorpion, on the mace with twin-headed dragons, on the crocodile-like monster with a shrine on its back and a vase on its head, have become illegible (cf. fig. 24).

There are other symbols which can be identified with certain gods. On the stone of Nebuchadnezzar I. (V R. 57)² we find three shrines with tiaras in the first row. These correspond to the two shrines followed by the symbol of *Ea* (a shrine and a goatfish), on Susa III, Susa XV, I R. 70, Susa XX.³ This makes it probable that the first two symbols stand for *Anu* and *Ellil*. The proof for

¹ The sign is , as determined by an examination of a photograph of the original, which I secured through the kind assistance of Dr. Heuzey, the Director of the Louvre. I submitted the photograph also to Prof. Hilprecht, who independently reached the same conclusion. The sign is a variant of *GIR* (cf. Br. 9190), as can be seen by a comparison with the older forms, cf. Amiaud et Méchineau, *Tableau comparé*, No. 203. This conclusion is important because it shows that the twin lion heads, as on the rock relief of Ravian, can only be *NIN.IB*. It also proves that the lion standing erect with daggers in his fore claws, as shown on Susa No. 9 (fig. 21, p. 73), is a symbol of *Nergal*.

on the stone. As the list is important for our later discussion we reproduce it:

¹ The god Sibitti is written in this as well as in other inscriptions dVII-Bi, which should not be read dSibi(-bi). The Semitic reading is determined by IV R.² 21 (B) Rev. 21-22 (= Zimmern, *Ritualtafeln*, No. 54, p. 168), where to dVII-Bi in the Sumerian line corresponds *ilâni Si-bit* in the Semitic line. Cf. also Winckler, *Altorientalische Forschungen*, II, 10, dSi-bit-ti; Zimmern, K. A. T.³, p. 620, and Hehn, *Siebenzahl*, p. 24, note. For the inscription on the Bavian relief see III R. 14.

In this inscription, as Hommel has already shown (*Aufsätze*, p. 442), Anu and Ellil are clearly represented by the shrines with tiaras. To the identifications made on Susa I are here added: Rammân with the lightning fork, Nabû with the square column,

Ishtar with the four-cornered star, which on Babylonian monuments appears usually as eight-cornered. The identification of NIN.IB with the twin lion heads has now become certain, because Susa I has shown that the single lion head stands for Nergal, hence there is no other god but NIN.IB left for the twin lion heads.

¹ The gods represented are as follows: (1) The seven stars, the Sibitti; (2) Aššur (Anu) standing on two animals; (3) Bêlit seated on a lion; (4) Ellil standing on a dragon, similar to that of Anu; (5) Rammân holding the lightning fork and standing on an ox; (6) The crescent of Sin; (7) The winged disk of Shamash; (8) The sixteen-pointed star of Ištar; (9) The spearhead of Marduk; (10) The double staff of Nabû; (11) The ram's head of Ea; (12) The twin-headed mace of NIN.IB.

FIG. 28.—Boundary stone of King Nazi-Maruttash found at Susa, No. 2, face D.

These are all the identifications that can be made with any degree of certainty. Recently, however, Prof. Zimmern has attempted to increase the number considerably by a study of the stone of Nazi-Maruttash. I should be glad to follow the ingenious explanation of this distinguished scholar, but it seems to me there are fatal objections to his identifications: (1) His whole theory is based on the supposition that the seventeen terrible figures (*šuripât*) of the gods are actually represented on the stone. But there is no justification for this supposition in the text. The strongest argument that can be found for the view of Prof. Zimmern is the fact that there are actually seventeen figures on the stone. But this is in itself not sufficient to warrant their identification, especially when we find that *on no other boundary stone do the figures and the gods quoted in the text agree*. This point is important enough to warrant the full presentation of the evidence on hand.

Susa XVI	" 18 " " 47 " " "

This list shows that the supposition that the gods and the symbols are identical is not favored by the other boundary stones. (2) But when we analyze Prof. Zimmern's identifications we meet still more objections. The first two symbols are two identical shrines with tiaras; hence we should expect, if symbols and text correspond, that the text should have the same or at least similar statements about these two symbols. But this is not the case. While the first is described as *šub-tum u šú-ku-zu šá Anum(-num) šarri šamê*, the second is said to be *gîr-gi-lu al-la-ku ša ^aEn-lîl bēl mâtâti*. Hence Prof. Zimmern is forced to the assumption that the second symbol "*in der bildlichen Darstellung nur implicite vorhanden ist.*" This is equivalent to a confession that his theory does not agree with the evidence. (3) It may well be doubted that the third symbol, which is entirely erased, consisted of the shrine and the goatfish. There is room for the shrine with the ram's head, but for the goatfish is hardly any room, as a glance at the upper row will show. (4) He identifies the two lion heads with Shuqamûna, while Susa I shows that the mace with the square end represents Shuqamuna. To call the latter simply "*eine weitere Zuthat*" seems again due to the exigencies of a theory. (5) Shar-ur and Shar-gaz represent the personified weapons of NIN.IB, of which Shar-ur is held in his right hand and Shar-gaz in his left (Frank, *Bilder und Symbole*, p. 28); but how can the vulture head alone be said to fit that description? It demands rather that the two lion heads represent the weapons of NIN.IB. (6) The *ma-sab ru-ba-ti*, or "censer of the princess," is also absent, and Prof. Zimmern must again have recourse to the supposition that it is implied. (7) The identification of the *mar-ka-su rabû(-û)ša bît si-kîl-*

la with the shrine carrying the horseshoe-like, or Ω -like, figure is also doubtful, and would hardly have been made if the theory had not demanded it. It will be observed that this last symbol occurs frequently in fourth place after the symbols of Anu, Ellil and Ea (e.g., V R. 57, Susa XX, Susa XV, Susa III, I R. 70,

FIG. 30.—Symbols on an uninscribed boundary stone found at Susa, No. 20.

III R. 41).¹ And as in several of these cases (I R. 70, III R. 41, Susa III) NIN.HAR.SAG or NIN.MAH follows Anu, Ellil and Ea, it is likely that this symbol is a representation of *Ninharsag*. Although the identifications of Prof. Zimmern as a whole can hardly

¹ See fig. 49⁹, p. 131; fig. 30⁴, p. 95; fig. 2⁷, p. 6; fig. 11⁷, p. 28; fig. 13⁷, p. 33; fig. 14¹³, p. 34.

be accepted, there are several which are correct. His identification of Išhara with the scorpion is very happy. Both have the same ideogram, GIR.TAB (Br. 315-316). The lion-headed dragon undoubtedly represents Nergal or Shit-lam-ta-ë (Frank, *Bilder und Symbole*, p. 30).

Recently Dr. Leon Heuzey has made it very probable (*Revue d'Assyriologie*, VI, 95-104) that the shrine with the brick and the wedge, which is frequently (Susa III, XX, V R. 57, IV R.¹ 43, III R. 41, I R. 70, etc.)¹ placed alongside of the lance of Marduk, is the symbol of Nabû, the god of writing and architecture.

To sum up, we have thus far been able to make twenty identifications of symbols with their respective deities;² that is, nearly half of the symbols have been identified. But these symbols are more than gods, for all the gods of Babylonia are astral. They represent certain stars with which the gods were identified. This should have been plain long ago, for sun, moon and the eight-pointed Venus star, which occur on all these monuments, clearly point to the heavens as the place where we should look for all the other symbols.

The most prominent of the symbols is the serpent, which is either coiled up on top of the monument or extends along the

¹ See fig. 11¹⁴, p. 28; fig. 30⁸, p. 95; fig. 49⁸, p. 131; fig. 6¹⁴, p. 17; fig. 14³, p. 34.

² These identifications are: (1) The spearhead stands for Marduk; (2) the mace with vulture head for Zamama; (3) the mace with lion head for Nergal; (4) the mace with the square top for Shuqamuna; (5) the lamp for Nusku; (6) the shrine with goatfish and ram's head for Ea; (7) the seated goddess with dog (or dog alone) for Gula; (8) the crescent for Sin; (9) the sundisk for Shamash; (10) the eight-pointed star (five-pointed on Neb. Nippur, No. 13, six-pointed on Susa, No. 4, seven-pointed on the stone of Nabû-shum-ishkun) for Ishtar; (11) the serpent for Šir; (12) the walking bird for Bau; (13-14) the two shrines with tiaras for Anu and Ellil; (15) the shrine with the wedge, brick(s) or stylus for Nabû; (16) the mace with the twin lion heads for NIN.IB; (17) the scorpion for Ishhara; (18) the forked lightning and the ox for Rammân; (19) the shrine with the yoke or horseshoelike figure for Ninḫarsag; (20) the seven stars for the Sibitti.

lower edge of the symbols or winds through the centre and hangs downwards with its tail. The meaning of this serpent has been determined by three separate facts: (1) In a list of rivers (II R. 51, 45-47) the river of the serpent (*nâr Šir*) is explained as "the river of the great band of heaven" (*nâr DUR.AN.GAL*) and as "the river of the great ocean" (*nâr ZU.AB.GAL*). (2) Another text (Rm. 282) represents Ellil as drawing the picture of the great serpent, called Labbu, upon the firmament (see Hrozný, *Mythen*

von dem Gotte Ninrag, p. 108, obv. 7-10). (3) Franz Delitzsch has added the observation that Jewish tradition identified the serpent defeated by God (Job 23:16) with the milky way (so Rabbi Levi Ben Gersom; see Delitzsch, "Commentary on Job," 2d ed., p. 339¹). Prof. Hommel was the first to infer from the first and the third of these facts that the serpent was identical with Tiāmat and her eleven helpers, and recognized them in the milky way and the signs of the zodiac (Hommel, *Aufsätze*, pp. 360, 370). On the basis of this identification Prof. Hommel has argued that all the other symbols are signs of the zodiac. This theory has recently

been subjected to an able criticism by Boll in his valuable work, *Sphaera*, Leipzig, 1903. He raises two strong objections to Hommel's theory:

(1) The symbols do not occur in a fixed order, such as we naturally expect to be followed if they represented the signs of the zodiac. In all other known zodiacs the order is fixed, while the arrangement of the symbols on the boundary stones varies constantly. (2) There are more symbols than twelve represented

on fifteen stones, while at least five have less than twelve symbols. In view of this evidence we must come to the conclusion that the zodiac as such is not represented on the boundary stones.

A different answer, however, must be given to the inquiry whether separate signs of the zodiac are to be found on the stones. This is certainly the case. The most striking symbol on the boundary stone of Nebuchadrezzar I. (V R. 57)¹ is the scorpion man or archer. It also occurs on the stone of Meli-Shipak (London, 103).² The human part ends with the belt, below which is the body

and the tail of a scorpion, with the feet of a lion. To this symbol corresponds a centaur drawing a bow on two other stones. In one case (London, 101)¹ he has a double head, one human, the other that of a dragon. He is also provided with wings and a double tail, the lower of a horse, the upper of a scorpion, and under his fore feet is a scorpion. In the second case (D. E. P., I, p. 175, fig. 381)² the wings are left off and there is but one tail. All these remark-

able features appear on Egyptian and the Greek zodiacs. On the square zodiac of Dendera, *e.g.*, which dates from the time of the Emperor Nero, we see the same double-headed centaur drawing a bow, winged and having two tails, the lower of a horse and the upper of a scorpion. Here, too, the scorpion follows as the next sign of the zodiac. Moreover, there is the same transition from a centaur to a human form. The *sagittarius*, which Boll gives from a Latin MS. (p. 131), is a two-legged satyr with a horse-tail. These

remarkable agreements cannot be accidental. They rather prove conclusively that the Egyptian zodiac was influenced by the Babylonian, and that by this symbol on the Babylonian boundary stones a sign of the zodiac, the *sagittarius* or archer, is meant. If one symbol of the zodiac is unquestionably represented on the

FIG. 35.—Round zodiac of Dendera from the time of Emperor Augustus.

boundary stones, it is reasonable to suppose that there are more.

In this connection the round zodiac of Dendera deserves special attention. Here we find along the inside circle, besides the planets, the thirty-six decani and some other stars, the signs of the zodiac in the usual order: *aries*, *taurus*, *gemini*, *cancer*, *leo*, *virgo*,

libra, scorpio, sagittarius, capricornus, aquarius and *pisces*. The planets are arranged as follows: Mercury between lion and virgin, Saturn between virgin and balance, Mars above the capricorn,

Venus between waterman and fishes, Jupiter between twins and cancer. Several of these signs are found in similar forms on the Babylonian monuments. The goatfish, combining the head and body

of a goat with the tail of a fish, is found repeatedly on the boundary stones as the symbol of Ea (I R. 70, London, 99, Susa I, Susa XV, Susa XX, etc.).¹ The close similarity in form absolutely demands a common origin. Another symbol which shows close similarity is the lion walking on a serpent. It may correspond to the winged lion walking on a serpent on I'r.M. 99.² Again, the waterman pouring water out of two vases reminds us very much

of the similar figure on Susa VI, most likely Ea, standing on a goat. In front of his breast he holds a vase, out of which two streams are running. A similar figure of Ea with vases, out of which water is bubbling in two streams, is published by Heuzey in *Revue d'Assyriologie*, Vol. VI, p. 95. This identification, however, can hardly be said to be certain, because we found that the

¹ See fig. 13⁶, p. 33; fig. 6¹⁷, p. 17; fig. 24⁶, p. 86; fig. 2⁶, p. 6; fig. 30³, p. 95.

goatfish, the symbol of Ea, corresponds to the Greek capricorn, while here we would have the God Ea identified with the waterman. It will be noticed, however, that the goatfish and waterman are two adjoining signs, and it might well be that the figure of Ea himself stood for the waterman, while his symbol, the goatfish, expressed the neighboring sign of the capricorn.¹

FIG. 39.—The symbol of the god Marduk. (Susa, No. 19.)

Other identifications that have been proposed are still less certain. Attention has been called to the fact that in a number of cases the spear of Marduk opens the series of symbols (V. A. 2663, Susa I¹, Susa 106¹), and that on the Sargon stone the inscription AM, the "ox," is placed alongside of it (Hommel, *Aufsätze*, p. 257). Now when we recall the fact that at 1100 B.C., when the boundary

¹ The symbol of Gula seems to be a parallel case which probably stands for the virgin, while her dog represents the next zodiacal sign, the lion. The same combination of two symbols into one group may be seen in the centaur holding the bow, which represents the sagittarius, under whose fore feet is the scorpion, the next sign in the zodiac (see fig. 32, p. 98).

stones were engraved, the vernal equinox fell into the sign of the bull (*taurus*), it may be argued with some degree of probability that the spear represents the first zodiacal sign or *taurus*. It is often preceded or followed by the shrine with the wedge, and, as a glance at the northern hemisphere of heaven shows, the triangle is a part of the sign of the *ram*. Therefore the wedge represents perhaps the *aries*. Again, the spear of Marduk is at least twice associated with the twin lion heads (London, 105, Susa II), but the twins (*gemini*) adjoin the *taurus*; hence the twin lions may stand for the *gemini*. All these identifications are rendered uncertain by the fact that the spearhead stands for Marduk, the wedge most

likely for Nabû and the twin lion heads for NIN.IB. These are the gods of the three planets Jupiter, Mercury and Mars. Hence it would be more natural to identify them with these planets.

To sum up, the only certain identifications of the boundary stone symbols with signs of the zodiac are, the archer with the *sagittarius*, the scorpion with the *scorpio* and the goatfish with the *capricorn*. The rest cannot be regarded as fully established—the god pouring out water with the waterman, the walking or sitting lion (dog) with *leo*, the spearhead with *taurus*, the wedge with the *aries*, the twin dragon heads with the *gemini*. The goddess Gula may stand for the virgin. But that the mace with

the globular end is a substitute for the *cancer*, the Ω like figure on the shrine for the *libra*, and the walking bird for the *fishes* does not appear to have been proved by the arguments of Hommel.¹

But even if all the twelve signs of the zodiac were fully established it would by no means exhaust the list of the symbols, as there are more than forty different symbols. What are the rest?

We naturally expect to find besides the signs of the zodiac the five planets that were known to the ancients. Now, it is highly probable that they are represented. We have seen that the spear-head is attributed to Marduk, who was in later times identified with Jupiter; the wedge is most likely the symbol of Nabû, identified with Mercury; the twin lion heads are the symbol of NIN.IB, identified with Mars; the lion-headed dragon is the symbol of Nergal, identified with Saturn, while the eight-pointed star is certainly the symbol of Ištar, identified with Venus, the morning and evening star.

As neither the signs of the zodiac nor the planets exhaust the list of symbols found on the boundary stones, we must look for other constellations which might possibly be represented. At this stage of our investigation an astrological text of a Greek writer named Teucros the Babylonian, which was published recently by Boll,² seems to show us the right way. In this text we find each sign of the zodiac associated with an animal name, which is called ἡ δωδεκάωρος. These animals, therefore, are symbols of a series of twelve hours. The hours must have been double hours, because it takes twenty-four hours for one revolution of all the twelve parts of the ecliptic, and each animal represents one-twelfth

¹ I do not mean to question the many and valuable contributions of Prof. Hommel on this subject. But in the points enumerated he does not seem to have established his contention. See also article of C. Bezold in *Archiv für Religionsgeschichte*, X (1907), p. 115f., and Frank, *Bilder und Symbole der Babylonisch-Assyrischen Götter*, p. 3.

part or thirty degrees. Moreover, these twelve double hours could not originally have referred to the ecliptic, because each twelfth part of the ecliptic rises in unequal intervals of 1 hour 20 minutes, to 2 hours 24 minutes in the latitude of Babylon. To secure equal

divisions the twelve parts must have been applied to the heavenly equator.¹

Now it is well known that the system of double hours called *kaš(s)-bu* (KAŠ.GID) was used in Babylonia, as the tablet III R.

¹ Ball, *l.c.*, p. 315.

51, Nos. 1 and 2, and other passages plainly show. The Babylonians must, therefore, first have measured the dodekatemoria of the equator, and from this division determined that of the ecliptic; so also in Egypt the division of the thirty-six decani referred originally to the equator.¹

This juxtaposition of the zodiacal circle with the *dodekaoros* circle has recently been found pictorially represented on a marble plate discovered in Egypt.² The centre is occupied by the two heads of Apollo and Phœbe, around which is a double circle. The outer circle represents the signs of the zodiac, the inner circle agrees completely with *dodekaoros* animals mentioned by Teucros. They are as follows:

It is strange to notice that while the idea of a twelve-hour circle goes back to Babylonia, several of these animals at least (cat, ibis, crocodile) are no doubt due to Egyptian influence. The best theory to account for this phenomenon is, as Boll has pointed out, to suppose that the *dodekaoros* was carried from Babylonia to Egypt, where several of the animals were renamed. That there

² Ball, *l.c.*, pl. VI; see fig. 41.

was such a renaming process seems to be supported by the East Asiatic cycle. This cycle of twelve animals represented: (1) A cycle of twelve successive years. (2) A cycle of twelve months. (3) The twelve hours of the calendar day. In all these relations the Chinese substituted the twelve *tschi* or characters in their places which (4) designated the twelve signs of the zodiac and

(5) twelve successive days.¹ The same uniform designation of hours, days, months and years, corresponding to the twelve parts of the zodiac, is not only a part of ancient astrology, but we know that the Babylonians divided the calendar day into twelve double hours, they had twelve months, over which presided the same gods

¹ Ball, *l.c.*, p. 333.

as those attributed to the signs of the zodiac (Diodor., II, 30),¹ while Censorinus testifies to the "Chaldaic" origin of a cycle of twelve years. From all this it is highly probable that the East Asiatic cycle, with all the ideas connected with it, goes back to Babylonia. A comparison of the two series of animals, those of the *dodekaoros* and of the East Asiatic cycle, will further corroborate this view. They are as follows:

<i>Dodekaoros.</i>	<i>East Asiatic Cycle.</i>
cat	dog.
dog	hen (bird).
serpent	ape (long-tailed monkey).
scarab (cancer)	sheep (goat).
ass	horse
lion	serpent.
he-goat	dragon (crocodile).
bull	hare (rabbit).
falcon	tiger (leopard, panther).
ape	ox (cow, heifer).
ibis	mouse (rat).
crocodile	pig (wild boar).

In both cases we have twelve animals, of which nine are the

¹ He says: τῶν θεῶν δὲ κυρίους εἶναι φασὶ δώδεκα τὸν ἀριθμὸν, ὃν ἐκάστω μῆνα καὶ τῶν δώδεκα λεγομένων ζῳδίων ἐν προσνέμονσι, i.e., "the chief of these gods (the thirty-six decani), they say, are twelve in number, to each of whom they attribute a month and one sign of the twelve in the zodiac." With this statement of Diodorus ought to be compared the list of months and their gods in IV R.², 33 (= K 2049 + K 129). It reads: (1) *Nisanu* ša *dA-num* u *dEn-lil* (2) *Airu* ša *dE-a* bēl *te-ni-še-e-ti* (3) *Šimānu* ša *dSin māru rēšti* ša *dEn-lil* (4) *Dūzu* ša *qu-ra-du* *dNIN.IB* (5) *Abu* ša *dNin-giš-zi-da* bēl . . . same or at least similar in both lists. Only three of the *dodekaoros* have no parallels, the cat, the scarab and the falcon, and three on the East India circle are unique, the hare, the mouse and the pig.

An intermediate link between these two circles, found on an Indian zodiac, is preserved on a wall in a pagoda at Trichinopoly,¹ India. It shows six circles, of which the fourth contains the signs of the zodiac and the third, corresponding to them, eleven animal figures called *Karana*. Here we find the following animals corresponding to the zodiacal signs:

<i>Zodiac.</i>	<i>Karana.</i>	
ram—bull	lion (<i>Bhava</i>) ²	D ³ (lion, cat).
bull—twins	tiger (<i>Bhalava</i>)	A
twins—crab	boar (<i>Côlava</i>)	A
crab—lion	ass (<i>Têttila</i>)	D (a horse).
lion—virgin	elephant (<i>Carasey</i>)	
virgin—balance	bull (<i>Baniĵ</i>)	DA
balance—scorpion	hen (<i>Bhadra</i>)	A
scorpion—bow	hawk (<i>Saccouni</i>)	D (ibis, falcon).
bow—sea monster	dog (<i>Tchatouchpad</i>)	DA
sea monster—urn	serpent (<i>Naga</i>)	DA
urn—fish	rat (<i>Kintoughna</i>)	A
fish—ram		

Of these animals the lion, ass, bull, hawk, dog, serpent are found on the *dodekaoros* in the same or similar forms, while the tiger, wild boar, horse, bull, hen, dog, serpent and rat occur on the East Asiatic circle. Only the elephant is represented on neither, while bull, dog and serpent occur on all three circles.

³ D stands for Dodekaoros, A for Asiatic circle.

When we now ask the question, What is the possible bearing of these figures upon those of the Babylonian monuments? we must remember that while the arrangement and also the names of these animals differ, they all agree in the fact that they represent constellations parallel to the signs of the zodiac. This parallel circle, which in its full form numbers twelve animals and represents a division of the heavenly equator, points unmistakably to Baby-

lonia as the place of its origin. If this is true, we are fully warranted in seeking a representation of this *dodekaoros* circle on Babylonian monuments.

It is evident that, as has already been pointed out, some of these animals are due to native influences—the cat, ibis and crocodile to Egypt, the tiger and elephant to India—but after making due

allowance for such native influences, there remain certain of these animals, common to the different circles, which must go back to a common origin. It is at least interesting to note that we find on the boundary stones a lion (the sitting lion on London 105, 106)¹ and an ox (the crouching ox of Rammân with lightning fork), also two birds, corresponding to the falcon and ibis of the *dodekaoros* and to the hen and hawk on the Indian circle (the walking bird of Bau and the bird perched on a pole). We find also a horse (V R. 57)² and a dragon with wings (IV R.¹ 43, Susa III).³ There is also a sheep with a shrine bearing a chisel (Susa III) and a crocodile-like creature (Susa I, XV).⁴ In view of these resemblances it is altogether probable that some of the symbols on the boundary stones represent constellations belonging to the *dodekaoros*.⁵

The attempt of Richard Redlich⁶ to explain all these symbols as constellations of the equator circle must be regarded as a failure, because the archer, the scorpion and the goatfish point decidedly to the ecliptic; nor is their position close enough to the equator circle that they could represent equatorial constellations. But he seems to be right in claiming that the equatorial circle was more original than the ecliptic, and that constellations of the equatorial circle are represented on the boundary stones, not, however, to the exclusion of the signs of the zodiac.

⁶ Redlich, *Der Drache zu Babel* in the *Globus*, Vol. 84 (1903), Nos. 23, 24. The identifications of Redlich are as follows: (1) Spearhead of Marduk—Pleiades, (2) Twin lion heads—Orion, (3) Sitting dog—Prokyon, (4) Serpent—Hydra, (5) Bird on perch—Raven, (6) Lightning fork—Spica of virgin, (7) Scorpion—Balance, (8) Tortoise—Ophiuchus, (9) Walking bird—Eagle, (10) Mace with round knob—Dolphin, (11) Lamp—Pegasus and Andromeda, (12) Horseshoelike form—Aries. Compare with these the remarks of Hommel, *Geographie*, p. 239.

We may summarize the results of our investigation as follows:

(1) The symbols on the Babylonian boundary stones represent

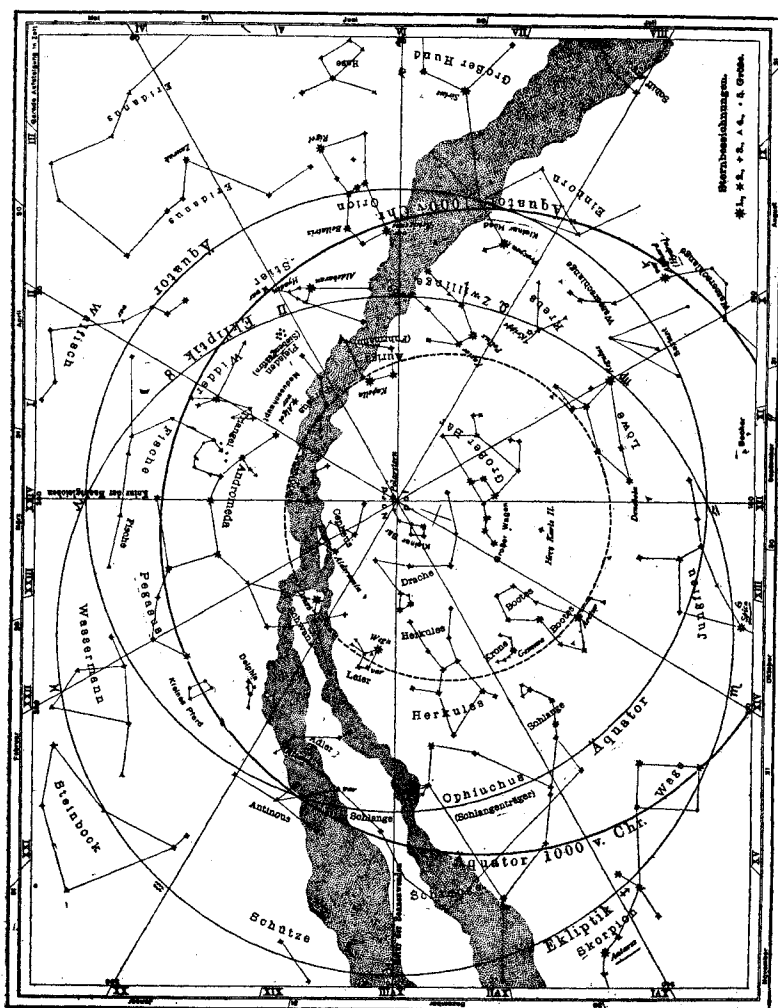

FIG. 45.—Northern hemisphere showing the ecliptic and the equatorial circles at 1000 B. C.

primarily certain deities, as is now definitely known from Susa I, XIV and XIX. The deities thus symbolically represented are

independent of the deities enumerated in the texts. The two series never agree. The symbols represent the deities either by their shrines, their weapons, their sacred animals or in human form.

(2) Babylonian deities being also stellar in their nature, the symbols represent by implication certain constellations. Some signs of the zodiac are represented, but not the zodiac itself, for there is no order such as we expect if the zodiac as such were represented.¹

(3) There being more than forty symbols, other constellations besides the zodiac are included. These are most likely the planets and the constellations of the *dodekaoros*. Here again there is no representation of the full series, but, as in the case of the zodiacal signs, only a selection is made.

The problems in connection with these symbols which still await future solution are: (1) The complete identification of all the symbols with the gods they represent. (2) The identification of the symbols with their respective constellations. (3) The determination of the principle which guided the Babylonian sculptors in their selection and arrangement of the symbols on the stones. When these problems are solved the mystery of the symbols shall have found its complete and satisfactory solution.

¹ According to Prof. Hilprecht, the rounded top of the boundary stones, as also frequently seen in Etruscan monuments (cf. Milani, *Studi e Materiali di archeologia e numismatica*), represents the firmament of heaven with various well-known stars and constellations.

II.

A NEW BOUNDARY STONE OF NEBUCHAD-
REZZAR I. FROM NIPPUR c. 1140 B.C.

1. INSCRIPTION AND SYMBOLS.

THIS magnificent boundary stone was found at Nippur, "on the northwest side of the Ziggurat, within the temple area,"¹ in February, 1896, at the close of the third Babylonian expedition of the University of Pennsylvania. It was presented by the Imperial Ottoman Government to Prof. Hilprecht for his services in organizing the Assyriological Section of the Sultan's Archeological Museum in Constantinople.²

It is a conical block of black limestone, being 49 cm. in height and 73.2 cm. in circumference around the center. It tapers towards the top, being 68.4 cm. along the upper edge of the inscription. The latter consists of a heading of two lines, placed among the symbols on top, and five columns, containing $32 + 32 + 33 + 30 + 26 = 155$ lines of text. The stone is slightly damaged, a piece having been broken off at the lower end, by which the latter part of six lines from column three and the beginning of four lines from column four have been lost. Fortunately their contents can be restored almost completely.³

This boundary stone has several peculiar features not found on

¹ According to a note entered by Dr. Haynes in his diary, to accompany the photographs taken of the stone at the time of its discovery. It was found on the last day while closing up one of the ditches.

² The text will be published in B. E., Series A, Vol. I, Part 3.

other monuments of this kind. In the first place, it contains a drawing of the field in question, together with an accompanying description, which precedes the inscription proper. Similar plots of fields and plans of buildings are, however, found on numerous clay tablets.¹ A second peculiarity is a beautiful hymn to Ellil, at the beginning of the inscription. It was no doubt taken from the liturgical collections of hymns in use at Nippur. It is the finest Ellil hymn which has been found thus far,² fitly celebrating the majesty and power of the god of Nippur. In some of its expressions it approaches the Psalms of the Old Testament.³ A similar hymn to Nanâ, opening a legal document, is found on a stone tablet, dated in the reign of Nabû-shum-ishkun, which records the investiture of a priest of Nebo at Borsippa with certain rights and privileges.⁴ The nearest approach to a hymn on other boundary stones is the glorification of Marduk on the stone of Merodach-baladan II., now at Berlin.⁵

The inscription is also remarkable for certain peculiar signs, as *e.g.* the sign to be read perhaps *sah* in *sah-pu-û*, (I, 13), the sign for *rabišu* (IV, 26), the sign for *išdu* (V, 7), and the sign *NISAG* in *nisakku* (V, 18). A large number of ideograms is used, and several new words occur. Of the latter the following may be mentioned: *alâku*, "to throw down" (IV, 4); *nelmenu*, "misfortune" (IV, 7); *lillu*, "laughter" or "smile" (IV, 14); *ušaku*, "calamity" (IV, 24). Other words are written in an unusual way—*baqânu* (because of following š) = *baqâmu* (III, 26); *nazuzzu* (under accent) = *nanzuzu* (I, 8); *šuzuzzu* (half accent) but *šuzu-*

zatma (II, 19 and II, 30); *maḥḥar* = *maḥar* (II, 18); *nanzaz* = *manzaz* (II, 18); *nugu kabitti* = *nug kabitti* (IV, 10); *bannûa* = *bânûa* (IV, 26); *ikîlu* (probably = *ekêlu*) = *akâlu* (III, 21) as *libênu* = *labânu* (II, 10).¹

The stonecutter has not always been accurate in engraving the inscription. There are several erasures, as *ina* written on an erasure of *ši* (III, 23); the sign preceding *i-tar-ra-šu* (III, 24); the second last sign following the *nu* in *i-din-nu-šu* (IV, 18); *šup-par* written on an erasure of *bît* (V, 9). Even some mistakes occur—*at-pi* instead of *ap-pi* (II, 10); *ta* instead of *ša* (II, 11); *ŠA.SAG* instead of *ŠA.DUG(KA)*, (II, 3); and probably also *me-su-šu* instead of *par-su-šu* (I, 18) and *A.ĤA.ME* instead of *ĤA.A.ME* (V, 7).

The inscription consists of the following divisions:

(1) The heading, containing the name of the stone, in two lines, written between the symbols.

(2) The plot of the field, accompanied by a description of eight lines.

(3) A hymn in honor of Ellil, the god of Nippur, Col. I, 1–22.

(4) The historical circumstances under which the land was given to Nusku-ibni, a high dignitary of Ekur, the temple of Ellil at Nippur, Col. I, 23–II, 16.

(5) The measuring of the land under the supervision of Baušum-iddina, the governor of Bît-Sin-sheme, in response to a royal command; a more detailed description of the field and its actual transfer to Nusku-ibni, Col. II, 17–III, 16.

(6) The curses: (a) Introduction to the curses, forbidding any official to appropriate the land or interfere with the privileges of the owner, Col. III, 17–IV, 2. (b) Invocation of the gods and the punishments they are asked to mete out to any offender, Col. IV,

(4) A shrine with a tiara on it, the symbol of Anu. (5) The neck and head of a lion above the shrine, the symbol of Nergal. (6) A scepter (like No. 3) standing erect, a knob on top and an animal head in the center. (7) A shrine with a tiara on it, the symbol of Ellil. (8) The head and neck of a vulture above the shrine, the symbol of Zamama. (9) A scepter, standing erect, with a knob and the head of an animal (partly defaced) in the center. (10) A shrine with a yoke-shaped figure, reversed (as on V R. 57, third symbol, second row, and Susa No. 20), most likely the symbol of Ninḫarsag.² (11) A scorpion, the symbol of Ishḫara. (12) The crescent, the symbol of Sin, partly surrounding (13) a five-pointed star, the symbol of Ishtar. (14) A sitting dog, the symbol of Gula.³ (15) The sundisk, the

¹ See Chap. I., p. 96; R. A., VI, 95-104.

² Dr. Hayes Ward, of New York, has called my attention to the fact that this symbol, which represents most likely the goddess Ninḫarsag (cf. p. 95), shows a remarkable resemblance to the plaits of hair adorning the Egyptian goddess Hathor. Compare, *e.g.*, the picture given by Prof. W. Max Müller in his *Egyptological Researches*, Washington, 1906, p. 14 (cf. fig. 48). The similarity is striking, to say the least. If the figure on the Babylonian boundary stones really represents plaits of hair, it would furnish an adequate reason why this peculiar symbol stands for the goddess Ninḫarsag. There is but one difficulty in the explanation—if it was intended for plaits of hair, why was it reversed and even flattened out, cf. fig. 11⁷; 30⁴; 47¹⁰; 49⁹?

³ The dog is not only associated with Gula on numerous boundary stones, but there is definite evidence in the inscriptions that the dog was sacred to her. Nebuchadrezzar II. set up two gold dogs, two silver dogs and two bronze dogs at the entrance of Gula's temple E-sa-bad in Babylon. Cf. *Neb. Wady Brissa*, B, VI, 20-24; and in the temple E-ul-la in Sippar he found her name written upon a terra cotta figure of a dog (*šū-um ša dNin-kar-ra-ag [a-ši-bat] E-UL.LU [ši-i-ri] kalbu ḫa-aš-ba ša-ti-ir-ma*); cf. (19) The serpent, winding over the top of the stone. (20) A bird, perched on a pole alongside of the serpent.

FIG. 48.—Symbol of Ninḥarsag and symbol of Hathor.

The three scepters which appear here for the first time may simply be marks of division, as Hommel thinks.² However, attention must be called to the fact that the animal heads, placed in the

found at Sippar (see *Fouilles à Sippar*, p. 90, fig. 13) a terra cotta dog with the inscription: *Ana dME.ME.* (= *dGula*, cf. V R. 44, c-d, 10) *bêlti kalbu ḥašbi épūšma aqīš.*

¹ It is remarkable that the symbol of Ea, the goatfish with the shrine carrying a ram's head, is wanting. Its place may be taken by this new symbol, which may be intended for a brazier or censer, called *kinûnu* in Babylonian. If this is true, the remarks of Hommel may be compared (*Aufsätze*, p. 241) who places the star called *Kinûnu* near the Capricorn, the symbol of Ea.

² *L.c.*, p. 436. The horned animal head in the first scepter is perhaps that of an antelope, the second can hardly be recognized, the third is perhaps a lion head. With these three scepters the three fans or fly flaps on the stone of Nabû-shum-ishkun may perhaps be compared. See p. 97.

center of the scepters, differ. It is therefore more probable that they may turn out to be separate symbols.

The finding of this boundary stone within the confines of the temple at Nippur raises the interesting question, How can we explain its presence there? An examination of the inscription shows that the priest to whom the land was granted was Nusku-ibni, the son of Upahhbir-Nusku, who was officially connected with the Nusku worship at Nippur,¹ being the *pašiš apsi* or *UH.ME.-ZU.AB* of Nusku. Hence the name of this boundary stone contains the name of the god Nusku, while at the same time Nusku is invoked in the curses. This is remarkable, as it is thus far the only instance of a separate curse being uttered in the name of Nusku. But the key to the whole situation lies in the title which is ascribed to Nusku. It is *bannûa*, "my creator." Now, as the name of the priest was Nusku-ibni, he is evidently playing on his own name. This conclusion leads us to the further inference that he himself wrote the inscription. This is at once the explanation of all the peculiarities. It explains the repeated use of the god Nusku in the title and in the curses. It also furnishes the reason for the plot of the field. It was a measure of precaution, adopted by the priest to locate and describe his land as exactly as possible. It also explains why this inscription begins with a hymn of Ellil. Nusku-ibni, the priest (*nisak*) of Ellil (Col. II, 13; III, 11), had access to the hymnological collections of the temple, and by its insertion wanted to glorify his god and place the land and stone under his special protection. Finally we can also infer from it why the stone was found in the temple precincts. It had evidently been deposited

¹ The earliest reference to Nusku that has come to my notice occurs on a seal cylinder, dedicated to Nusku by a patesi of Nippur, for the life of Dungi, king of Ur. Collection de Clercq, No. 86; cf. Thureau-Dangin, *Inscriptions de Sumer et d'Akkad*, p. 278, Sceau, B.

by Nusku-ibni in the temple.¹ The land itself was located between the royal canal and the Tigris, probably at some distance from Nippur.²

A comparison between this inscription, written under Nebuchadrezzar I., and the inscription of Nebuchadrezzar II. reveals the fact that there is a remarkable similarity between them, and makes it very probable that the scribes of Nebuchadrezzar II. intentionally imitated the style and phraseology of his great predecessor and namesake.

Some of these phrases are also found in other inscriptions, but it is impossible to duplicate any considerable number of them from the inscriptions of any other king. The scribes of Nebuchadrezzar II. adopted, therefore, not only the archaic script, but imitated also the style of older kings, notably that of Nebuchadrezzar I.

2. IDENTITY OF PA.SHE WITH ISIN.

This inscription of Nebuchadrezzar I. brings again the questions and problems still surrounding the fourth Babylonian dynasty to the front.

One of these problems refers to the proper pronunciation of the name of the dynasty written PA.SHE in the king's list.¹ It seems to be tacitly assumed by some scholars (Winckler, *Forschungen*, I, 130, 138)² that *Pa-še* is to be read phonetically and that it represents, therefore, the actual name of the dynasty. This, however, is far from certain. On the contrary, it is most probable that PA.SHE is an ideogram. Not only are most of the other dynastic names written ideographically in the king's list (*TIN.TIR*^{ki}; *URU.AZAG*, or *URU.ĤA* according to list A, and *E*), but other considerations point in the same direction.

As early as 1888 Sayce regarded PA.SHE identical with the cities of Isin and Patesi.³ The same view was maintained by Pinches.⁴ It was further developed by Jensen,⁵ who observed that (1) according to K. 4995, 20f.⁶ (*PA.ŠE GAL.LA.BA* = *ša i-ši-in-šu ib-šū-ú*) *PA* (= *aru*, the tassel) + *ŠE* (corn) is equivalent to *išinšu*. This seems to be confirmed by another passage⁷

¹ Winckler, *Untersuchungen*, p. 147; Rost, *Untersuchungen*, pl. III (who, however, writes by mistake PA.MU); Knudtzon, *Gebete an den Sonnengott*, p. 60, and Lehmann, *Zwei Hauptprobleme*, pls. 1, 2.

² Hommel formerly held this view, *Geschichte*, pp. 170, 488, but he has since expressed himself in favor of Isin being a synonym of Pashe; cf. *Geographie und Geschichte des alten Orients*, p. 297.

³ R.P.², Vol. I, 17³, quoting II R. 53, 13a. This passage, however, does not prove the identity of Isin and Patesi, just as Kutha and Nippur (I. 4) or Sippar and Dilbat (I. 8), though placed in the same juxtaposition, are not identical.

in which *PA + X* is followed by the gloss *i-ši-in*. (2) That in the charter of Nebuchadrezzar I. (V R. 56, 17-18), who was a member of the PA.SHE dynasty, the name of the governor of Ishin precedes that of the governor of Babylon, which argues for the great political importance of Ishin at that time. (3) That according to Reissner, V.A.TH. 408 + 2178, Obv. 5, *PA.ŠE* is = *i-ši-in*. From these facts Jensen concluded that the city of PA.SHE^{ki} was also to be pronounced Ishin. This conclusion, however, while very ingenious, was not absolutely necessary, for what was true of the word *iš(i)nu*, cstr. *išin*, meaning the blossom of the grain,¹ was not necessarily true of the city of Ishin. But as the Babylonians were very fond of playing with their ideograms, it is *à priori* probable that the sameness of sound in the two words caused a transferring of the ideogram, originally intended for *iš(i)nu*, blossom, to the name of the city of Ishin.

This probability can be increased by other evidence. In 1897 Craig published two tablets,² preserved in the British Museum, which shed more light on this question. From the first tablet (80-7-19, 126) we learn that the later pronunciation of *NI.SI.IN*.^{ki} is *I-si-in*³ (l. 9-10), that Gula was the "Lady of Isin" (l. 1), which is called "the city of her dominion" (*al bēlūtiša*, l. 9-10).

These statements are supplemented by another inscription, published by Craig (Sm. 289, Obv. 17), in which we read: *Bīt-dGu-la ša PA.ŠE*.^{ki} Combining these statements we are naturally brought to the conclusion that PA.SHE and Ishin are identical.

The name of this city is written either I-si-in (so in the tablet 80-7-19, 126, quoted above) or I-ši-in (V R. 56, 17; I R. 66, II, 7) or I-šin (*Babylonian Chronicle*, IV, 18; see Winckler, *Forschungen*, I, 303). In the Sumerian texts the same variation occurs between

NI.SI.IN (so usually) or *NI.ŠI.IN* (K. 3811 + 3833 and K. 10844, see Bezold, *Catalogue*, pp. 566, 1118). In this connection it is noteworthy that the word *išinu*, "the blossom of the grain," is also written *isinu* (Reissner *Hymnen*, 73, 5a, compared with *ibid.*, pp. 21, 27). Finally it may be mentioned that alongside of the personal name *PA.ŠE^{ki}-ai* also the form *I-sin-na-ai* is found.¹

On the basis of the above evidence Isin may well be adopted as the *probable* pronunciation of *PA.SHE*.²

The dynasty was called Pa-she, according to some scholars,³ from a certain quarter in the city of Babylon, which is inferred from Nebuchadrezzar I.'s statement that he was "the offspring of Babylon" (V R. 55, 2), and it is further assumed that the names of the other dynasties (*TIN.TIR.KI*, *URU.AZAG* and *E*) refer to Babylon. On the other hand, those scholars who identify *PA.SHE* and Isin naturally connect the origin of the fourth dynasty with that city as the ancestral home of its princes. They look for the city somewhere in Southern Babylonia.⁴

In favor of a city of *PA.SHE* or Isin as entirely different from Babylon the following considerations may be urged. The argument based upon the title of Nebuchadrezzar, "the offspring of Babylon," is not absolutely convincing, for this personal title may have nothing to do with the origin of his dynasty. Nebuchadrezzar may have been born in Babylon as the son of a younger royal prince, perhaps Ninib-nâdin-shum,⁵ who held a priestly office, for it is noteworthy that Nebuchadrezzar bears the titles *iššakku*

(*PA.TE.SI*) *qardu šakkanak Bâbili*¹ and also *nisakku* (Neb. Nippur, II, 12), the same title as borne by the priest Nusku-ibni. Moreover, the new stone of Nebuchadrezzar I. distinctly implies (Col. II, 1-4) that the causes which placed him on the throne were largely of a religious nature.

Nor is the argument drawn from the names of the other dynasties more conclusive, because several dynasties, the fifth, sixth and seventh, had nothing to do with Babylon. Why should the fourth? Besides, the name of the second dynasty is very uncertain (*URU.-AZAG* or *URU.HA*) and not well suited to draw far-reaching conclusions from it. Cf. King, "Chronicles," pp. 70f., 107ff.

On the other hand, it must be remembered that the city of Isin appears prominently during the fourth (*PA.SHE*) dynasty. On the charter of Nebuchadrezzar I. (V R. 56, 17) Shamash-nâdinshumu, the son of Atta-iluma, the governor of Ishin, is placed in a conspicuous position before the governor of Babylon. On the stone of Za'aleh (I R. 66, II, 6-7) E-karra-iqîsha, the then governor of Ishin, is the very first among the witnesses, and on the new stone of Nebuchadrezzar I. (Neb. Nippur, V, 21) we find among the witnesses a native of Ishin, named Amel-Ishin. To complete the references mentioning the city of Isin during this period, we may recall the fact that at the close of the Cassite period Ishin was entered by a victorious Elamite army under Kidin-hutrutash (*Babylonian Chronicle*, IV 18).

As to its location we know nothing definite, but the various lists of cities seem to locate it in Southern Babylonia. On K 3811 + 3833 (Bezold, *Catalogue*, p. 566) *NI.ŠI.IN* appears between Shirpurla and Girsu (= Telloh, cf. Hommel, *Geographie*, p. 189). On

¹ That *duHI*(*DUG*), "the good city," is a term applied to Babylon appears from the parallel expression *šakkanak Bâbili*, applied to Nebuchadrezzar I. on the new stone from Nippur (Col. II, 20). This corroborates the view of Winckler, K.B., III, pt. 1, p. 165, note 2 Cf. also IV R.² 21,* No. 1 (C), Col. III, 1.

K. 4541 (*Catalogue*, p. 640) it follows Shirpurla and Nippur. On K. 10844 (*Catalogue*, p. 1118) it precedes Larsa. In another text (Rass. 2, 417, see *Catalogue*, p. 1674) PA.ŠE is preceded by Eridu, Adab (*UD.NUN^{ki}*) and Ur, while in still another passage (80-7-19, 126) it is in close parallelism with Nippur.

3. THE SUCCESSION OF THE ISIN KINGS.

Another problem of the Isin (PA.SHE) dynasty is the succession of its kings.

Our knowledge of the dynasty is based on the kings' list, the synchronistic history and the inscriptions of the various rulers belonging to this dynasty.

The kings' list is unfortunately very incomplete at this point. We only know that there were in all eleven kings belonging to it, who reigned 132 years and six months.¹ The names of the last three kings are partially preserved, only one of which can be restored with certainty. This is the name of the last king, *Nabû-shum-[li-bur]*, the same king to whom the inscription upon a duck-weight found by Layard in the North-West palace at Nimrûd belongs. Cf. King in *P. S. B. A.*, Vol. XXIX (1907), p. 221, and "Chronicles," Vol. II, p. 159. Of the eight kings whose names are missing entirely six are known to us from their own inscriptions, *Nabû-kudurri-uşur I.*, *Ellil-nâdin-aplu*, *Marduk-nâdin-aḫê*, *Marduk-shâpik-zîrim*, *Rammân-apal-iddina* and *Marduk-aḫê-erba*.

Nebuchadrezzar I. is now represented by three boundary stones (V R. 55-57; C. T., IX, pls. 4, 5, and the new stone from Nippur). Two hymns glorify his military achievements (K. 3426, published

¹ The sum total was long in doubt. It was read 72 by Pinches, Winckler and Delitzsch. Peiser first proved (*Z.A.*, VI, 269) that the number 72 was impossible. Later Knudtzon and Lehmann read 132, while Rost still considers it as doubtful (*Untersuchungen*, p. 3). Taking, however, everything into consideration, the figure 132 (or perhaps 133) seems to be the most probable and has, therefore, been generally accepted.

last in *C.T.*, XIII, pl. 48, and III R. 38, 4; see Winckler, *Forschungen*, I, 534-538). Winckler also translates two other inscriptions (K.

FIG. 49.—Boundary stone of Nebuchadnezzar I. from Abu Habba, V R. 57.

3444 = IV R. 20 and D.T. 71), which seem to refer to Nebuchadrezzar's successes over Elam. Finally an inscription published by Strassmaier (Br. M., Sp. II, 407, in *Hebraica*, Vol. IX, p. 5) must be mentioned. It refers to a king, *Nabû-kudurri-uşur šar Bâbili mâr NIN.IB-nâdin-šumu*. This seems to refer to Nebuchadrezzar I., because it can neither apply to Nebuchadrezzar II., the son of Nabopolassar, nor to the usurper Nebuchadrezzar III.

From the reign of Ellil-nâdin-aplu we have one *kudurru* inscription (*O.B.I.*, Vol. I, 83). To the reign of these two kings belong also III R. 41 and I R. 70, as we shall show below in discussing the succession of the various kings.

The reign of Marduk-nâdin-aḥê is represented by two boundary stones, the stone of Za'aleh from his first year (I R. 66) and III R. 43-45, from the tenth year of his reign. An inscription, dated in the fifth year of this king has been discovered at Nippur, as announced by Prof. Hilprecht (see his *Excavations in Assyria and Babylonia*, p. 519).

The king Marduk-shâpik-zîrim (or Marduk-shâpik-zêr-mâti, of which the first is an abbreviation; see Rost, *Untersuchungen*, p. 26, note 1)¹ is represented by a fragmentary inscription (*O.B.I.*, Vol. I, No. 148).

Of Rammân-apal-iddina we have a short inscription, preserved in the Louvre (Place, *Ninive et Assyrie*, III, 78, note 4; cf. Winckler, *Untersuchungen*, p. 28, note 2). An inscription dated in the tenth year of this king has been found at Nippur (see Hilprecht, *Excavations in Assyria and Babylonia*, p. 519).

A boundary stone of Marduk-aḥê-erba was published by Prof. Hilprecht (*O.B.I.*, Vol. I, No. 149).

Four of these kings are also mentioned in the *Synchronistic History* (IIR. 65, 1 and IIIR. 4, 3; see also Winckler, *Untersuchungen*,

¹ For the use of "m" as a hypocoristical ending see note of Prof. Hilprecht in Ranke's *Early Babylonian Personal Names*, p. 186.

pp. 148-152), namely, Nebuchadrezzar, Marduk-nâdin-aḥê, Marduk-shâpik-zêr-mâti and Rammân-apal-iddina. Of the last two it is definitely stated that they followed each other immediately. That leaves us to determine the succession of the other four kings. From the inscription of Ellil-nâdin-aplu it is evident (Col. I, 7-15) that he was the immediate successor of Nebuchadrezzar, for the land in question had been for 696 years in peaceful possession of the temple of Ninâ up to the reign of Nebuchadrezzar, but in the fourth year of Ellil-nâdin-aplu its area was reduced by E-karra-iqîsha. It is also evident that the reign of Ellil-nâdin-aplu was of short duration and was followed immediately by that of Marduk-nâdin-aḥê, for Ardi-Nanâ, son of Mudammiq-Rammân, occurs both on the charter of Nebuchadrezzar (V R. 56, 13) and the stone of Za'aleh (I R. 66, II, 13) dated in the first year of Marduk-nâdin-aḥê. Tâb-ashâb-Marduk, son of Ina-Esagila-zêru, is mentioned on three stones, on V R. 56, 22, as governor of Halmân, but on I R. 70, I, 15 and I R. 66, II, 11 as *sukallu*. Moreover, E-karra-iqîsha, son of Ea-iddina, is found as governor of Bît-Sin-mâgir in the reign of Ellil-nâdin-aplu (*O.B.I.*, 83, I, 10), but as governor of Ishin (I R. 66, II, 6, 7) in the reign of Marduk-nâdin-aḥê. Perhaps Ellil-nâdin-aplu had transferred him to another province as the result of his high-handed actions in Bît-Sin-mâgir. Again, Šîr-ušur, brother of Ellil-nâdin-shumu, and son of Habbân, mentioned V R. 56, 23, is also found on the *Caillou de Michaux* (I R. 70, I, 13), while Nabû-zêr-lîshir, son of Itti-Marduk-balâtu and grandson of Ardi-Ea, who served as surveyor of the field, mentioned on the new stone of Nebuchadrezzar I. (Col. III, 13, 14), is no doubt a brother of Shâpiku, son of Itti-Marduk-balâtu and grandson of Ardi-Ea, the surveyor of the field mentioned in III R. 41, Col. I, 13. All these links would be impossible if Ellil-nâdin-aplu and Marduk-nâdin-aḥê had not succeeded Nebuchadrezzar immediately. They also prove that III R. 41 and I R. 70 were written either in the

reign of Nebuchadrezzar I. or his immediate successor, as Hommel had already concluded in his *Geschichte*, p. 459. The position of Marduk-aḫê-erba is less easy to determine. Rost (*Untersuchungen*, p. 65) places him with a question mark at the head of the Isin (PA.SHE) dynasty. Lehmann (*Zwei Hauptprobleme, Tabelle IV*) inserts him between Marduk-nâdin-aḫê and Marduk-shâpik-zêr-mâti. Assyrian synchronism does not favor the latter arrangement, because Tiglath-pileser, the contemporary of Marduk-nâdin-aḫê, is followed immediately by his son Ashur-bêl-kala, the contemporary of Marduk-shâpik-zêr-mâti. This would argue that, as in Assyria, so in Babylonia there was an immediate succession of the two kings in question. It is therefore more natural to place Marduk-aḫê-erba either at the beginning of the dynasty or after Rammân-apal-iddina. The latter seems to me preferable, because none of the persons named on the stone occur on any of the other boundary stones of this period.¹ It was, therefore, most likely separated from them by a considerable number of years.

4. PLACE OF NEBUCHADREZZAR I. IN THE DYNASTY OF ISIN.

The last question that needs discussion is the position of Nebuchadrezzar I. in the dynasty. It appeared in our discussion that he heads the six kings whose names are broken off from the kings' list; but where is he to be placed in the dynasty? It is now generally agreed that he did not occupy the first place. A renewed examination of this passage in the kings' list seems to have placed that beyond doubt.² On the other hand, there is strong and even irresistible evidence to show that he was actively engaged in freeing his country from the chaos and disorder such as we know prevailed

¹ This is also the judgment of Hommel, who identifies him with the ninth king of the PA.SHE dynasty, see his article, "Eine neuer Babylonischer König," in *Sitzungsberichte der Königl. böhm. Ges. d. Wissensch.*, 1901, pp. 18, 24.

² See Prof. Hilprecht's statement in B.E., Vol. XX, Pt. 1, p. 44, note 1.

at the close of the Cassite period. This appears first of all in the remarkable titles that are attributed to him. He is called "the sun of his land who makes prosperous his people" (*aŠamaš mâtīšu mušammīhu nišēšu*, V R. 55, 4)¹; "the protector of boundary stones, who fixes the boundaries" (*nāšir kudurrēti mukinnu ablê*,² V R. 55, 5); "the king of right who judges a righteous judgment" (*šar kināti ša dīn mēšari idinnu*, V R. 55, 6). The last two statements clearly imply previous lawlessness and disorder, which he brought to an end. The titles applied to him in the new inscription from Nippur point even more strongly to a change of dynasty. It is said that "Ellil broke the weapon of his (Ellil's) enemy and laid the scepter of his enemy into his (Nebuchadrezzar's) hand" (Col. II, 4, 5). These statements show that the Ellil cult at Nippur had been neglected by the previous rulers, that this neglect had roused the anger of Ellil, and that the downfall of the Cassite dynasty was attributed to it. In perfect agreement with this is the fact that after Bitiliāshu no monuments of Cassite kings have been found at Nippur. But the new inscription from Nippur is even more explicit in its statements as to the causes which led to the elevation of Nebuchadrezzar to the throne of Babylonia. We are told that it was done for a threefold purpose: "that he might shepherd Shumer and Akkad, renew the sanctuaries of the city of dwellings and regulate the tithes of Ekur and Nippur" (Col. II, 1-3). Here the religious character of the movement is plainly indicated. Another significant title applied to Nebuchadrezzar is "the one who lays the foundation of the land," *mukīn išdi māti* (Col. II, 24). As Nebuchadrezzar was not the first of the dynasty, it can hardly mean "the founder of the dynasty," as Winckler interpreted it,³ but perhaps

¹ Hammurabi uses a similar title, *aŠamaš Bābili mušēzi nārīm ana mātuŠu-mērīm u Akkadim*, Code V, 4-9.

² For the meaning of *ablê*, see Glossary and Lau, J.A.O.S., Vol. 27, pp. 301f.

"the one who established the autonomy of the land," for we find the title used by Agukakrime (K.B., III, 136; Winckler, *Forschungen*, I, 517f.), the seventh Cassite king. It is also used by

FIG. 50.—Figure of a king, probably Nebuchadnezzar I., on the Stone of 'Amrân, now at Berlin.

Nebuchadnezzar II. (Langdon, *Building Inscriptions*, 16, I, 4), neither of whom were founders of dynasties. Nor could this title, in the sense of founder of a dynasty, be properly applied to Sargon,

as we find it done by Shamash-shum-ukin (C.T., X, pl. IV, 7), nor to Merodach-baladan II. (B.A., II, 261, Col. II, 44). Nabopolassar is the only one using this title (Sippar inscription, A.H., 82, 7-14, Col. I, 5) who can properly be called the founder of a dynasty. In view of these facts the translation, "the one who establishes the autonomy of the land," seems to be more appropriate, because it fits every case. Of great importance for the relation of Nebuchadrezzar I. to his contemporaries is the interesting inscription K. 2660 (III R. 38, 2), translated and discussed by Winckler (*Forschungen*, I, 534-38). Here we find that Zamama-shum-iddina, the next to the last Cassite king, was driven away by an Elamite king, whose name we now know from the inscriptions found at Susa¹ to have been Sutruk-naḥunte, who, it seems, had entrusted his son Kudur-naḥunte with the conquest of Babylonia. In the course of the following lines, which are badly broken, Ellil-nâdin-aḥu, the last Cassite king, is twice referred to, and it is stated that he (most likely the Elamite conqueror) swept away all the people of Akkad like a storm flood and devastated all their large cities (*nišê mátu Akkadi kul-lat-si-na a-bu-biš is-pu-nu* [ma-ḥa]-zi ši-ru-ti na-gab-šu-nu u-še-me [kar-miš], Obv. 7-8). By this same Elamite invasion another king suffered, who called Ellil-nâdin-aḥu "the king my predecessor" (*šarru pa-na mah-ri-ia*, Obv. 5). His name is broken off, but his title, "the offspring of Babylon" (*nabntt Bâbili*), still remains. Winckler is undoubtedly correct in restoring the missing name to Nebuchadrezzar, whose wars against Elam form the theme of several other hymns. This inscription, by connecting Ellil-nâdin-aḥu and Nebuchadrezzar so closely, implies clearly that they are contemporaneous. It constitutes, therefore, a valuable corroboration of the view recently advanced by Prof. Hilprecht that the first kings of the Isin (PA.-

¹ Cf. Scheil, D. E. P., V, pp. XV-XVI.

SHE) dynasty were contemporaneous with the last Cassite kings.¹ This view reconciles also the otherwise contradictory statements of the kings' list and Nebuchadrezzar's own inscriptions. From the evidence now at hand we can conclude that Nebuchadrezzar was a usurper, for his father is not given any royal titles; that at first he battled in vain against the Elamite and Assyrian supremacy, but after repeated reverses and late in his reign he was able to throw off the foreign yoke, ascend the throne of Babylonia and even extend his conquests to the Lulubeans in the east and the land *Amurru* in the west. This enabled him to assume the proud title, "king of the world" (*šar kiššati*). The case of Nebuchadrezzar I., fighting against the Elamites and only succeeding in the latter part of his reign in defeating them, has a close parallel in the history of Hammurabi, who only in the thirtieth year of his reign defeated the Elamites and in the following year Rim-Sin, king of Larsa, by which he was able to unite all of Babylonia under his rule.

If it is true that Nebuchadrezzar followed the last Cassite king immediately, it should be possible to remove the chronological objections which have been raised against this view by Winckler and others. These chronological difficulties are caused almost exclusively by assigning to the Assyrian kings more years than the inscriptions demand. Thus, *e.g.*, Winckler assigned at first² approximately twenty years to Ninib-apal-Ekur and about thirty-five years to Ashur-dân. Recent discoveries, however, have compelled him³ to lower the reign of the first king to twelve years, and that of the latter to not more than twenty. The probabilities are that at least the reign of Ninib-apal-Ekur must be reduced still more. The following table offers the probable synchronisms of this period:

COMMENTARY.

THE heading of the inscription written among the symbols is a nominal sentence, whose predicate, for emphasis sake, has been placed at the head of the sentence. Cf. the other nominal sentences in this inscription, Col. IV, 15-17, 26, and Delitzsch, Gr., § 140. For similar constructions in Hebrew see Gesenius-Kautzsch, *Hebr. Gram.*,²⁶ p. 446d.

The gods NIN.IB and Nusku are combined in this heading as guardians of the boundary, because they were, alongside of Ellil, the chief gods worshipped at Nippur. The earliest references to both of them are found in the reign of Dungi, the first king of the second dynasty of Ur (cf. Thureau-Dangin, *Inscriptions de Sumer et d'Akkad*, pp. 278, B; 330, 1). Their worship became prominent at Nippur during the Cassite dynasty. Not only do we find numerous votive objects, dedicated to Nusku (O. B. I., Vol. I, Nos. 51, 54, 58, 59, 64, 71, 75, 138) and NIN.IB (O. B. I., Vol. I, Nos. 31, 32, 61, 62, 76), but they also occur together in the oath formula of contract tablets dated in the Cassite period. For example, Clay (B. E., XIV, 40, 22-24) reads: *niš(MU) ^dEn-lil ^dNIN.IB ^dNusku ù Ku-ri-gal-zu šarru (LUGAL.E) mithâriš (UR.BI) itmâ (IN.PAD.DE.EŠ)*, i.e., "by the name of Ellil, NIN.IB, Nusku and King Kurigalzu together they swore" (cf. also B. E., XIV, 1, 18-20; 7, 28-30).

As to the pronunciation of NIN.IB see the Aramaic transliteration אַנְיִשָּׁת (Clay, B. E., X, pp. XVIII, 8), for which Prof. Clay offers the ingenious explanation: *ên-waštu = ên-maštu = ên-martu*, i.e., "Lord of the West Land" (cf. J. A. O. S., July, 1907).

MU.NE = MU.NI = šûm-šu, see Br. 4,600, 5,330.

The drawing of the field is not a correct geometrical figure, corresponding to the measurements as given in the text, but the stonecutter adapted it to the space at his disposal. The correct drawing would have been as follows:

This would give a square area of $60 \times 120 = 7,200 \text{ GAR}^2 + 235 \times 65 = 15,275 \text{ GAR}^2$, in all $22,475 \text{ GAR}^2$.

Now assuming the correctness of the usual statements (Reissner, in *S. B. B. A.*, 1896, p. 477f., and *Z. A.*, XI, p. 422; Thureau-Dangin, *R. A.*, IV, pp. 18ff.; IV, p. 80, and *Z. A.*, XI, p. 428; Johns, *A. D. D.*, II, p. 231) that $1 \text{ gur} = 300 \text{ QA}$, $1 \text{ QA} = 3 \text{ GAR}$, $1 \text{ gur} = 900 \text{ GAR}^2$, $1 \text{ GAN} = 1,800 \text{ GAR}^2$, we obtain the following result:

$$900 : 22475 \text{ GAR}^2 = 24 \text{ GUR}$$

$$\begin{array}{r} 1800 \\ \hline 4475 \\ \hline 3600 \\ \hline \end{array}$$

$$3 : 875 = 291\frac{2}{3} \text{ QA}$$

This sum, 24 GUR, $291\frac{2}{3} \text{ QA}$, shows that a mistake has been made, either by the scribe or possibly by the surveyor, in giving the length of one or several of the sides. If it were possible to take

1 GUR at 1,000 GAR² we would come much nearer to the 22 (gur) 168 $\frac{2}{3}$ (qa) 5 (gin), the result of the measurement of the surveyors (Col. III, 7), for we would obtain on that basis 22 (gur) 158 $\frac{1}{3}$ (qa), which differs only by 10 $\frac{1}{3}$ qa, 5 gin from the sum given by the surveyors. For a similar error see the *Caillou de Michaux* (I R. 70); cf. Johns, A. D. D., Vol. II, p. 232.

From the fact that the ancient formula *DIL.GAN.AŠ* is used, it may be concluded that the old system of measurement, making 1 gur = 300 QA, is employed. The phrase *DIL.GAN.AŠ* has caused considerable discussion. Delitzsch (B. A., II, 273) and others read: *ina KAR.AŠ I ammatu rabîtu*, and explain the whole phrase as meaning "according to the square yard." But the investigations of Thureau-Dangin have shown that the first two signs are used in the GAN.SAR scale to denote $\frac{1}{18}$ GAN (according to Oppert, 1 GAN), while AŠ denotes 30 qa of seed, used to seed $\frac{1}{18}$ GAN. Hence Thureau-Dangin explains the whole expression as meaning " $\frac{1}{18}$ GAN is reckoned at 30 qa of seed and equal to one *ammatu rabîtu*." The latter is $32,400 \text{ Ū}^2 = 100 \text{ GAR (DU)}^2 = \frac{1}{18} \text{ GAN}$ (cf. R. A., IV, 19). According to this interpretation two systems of measurements have been combined in this expression—one which determined the size of the field by the amount of seed it took to sow it, the other by the number of yards it contained.

The reading of *Ū-GAL(-tum)* is now certain from the stone of Agabtaḥa (D. E. P., II, 95, ll. 4, 5), which reads: 10 *zêrê i-na am-ma-ti ra-bi-i-ti*.

The field, presented by Nebuchadrezzar to Nusku-ibni, was not situated in the neighborhood of Nippur, as might be expected, but it lay most likely in Northern Babylonia. This seems to follow from the fact that the field was bounded on its northwestern side (*illânu*) by the royal canal and on the southwest (*šûtu*) by the Tigris. All the references to the "Royal Canal" point to Northern Babylonia. The Semitic name *nâr šarri* appears first in the

Cassite period. The boundary stone of Nazi-Maruttash informs us that the city of Pilarî, in the government of Hudâdi (Col. II, 2-4), and the city of Kari in the government of Upî (Col. II, 17-19), were located at the royal canal. The latter is the classical Opis at the mouth of the Adhem river (cf. Winckler, *Altor. Forsch.*, II, 509ff., and Hommel, *Geographie und Geschichte*, 346ff.). According to the new boundary stone of Meli-Shipak from Susa (Susa, No. 3) the city Tamakku, belonging to the environs of Akkad in the government of Bit-Pir'-^dAmurru (Col. I, 3-6) and the town Shalhi, belonging to the land of the goddess Ishtar of Akkad (Col. II, 47-54), bordered on the royal canal. The same inscription records the immunity of the people of Akkad from conscription to repair the sluices of the royal canal (Col. II, 25-29). It also refers to a connecting canal (*mê ša mušêbiri*), which joined the canal Râti-Anzan with the canal of the royal province (*nâr pihâti ša šarri*, Col. III, 1-3). Another inscription of Meli-Shipak (London, 101) locates the town Shaluluni, in the government of Bit-Pir'-^dAmurru, at the royal canal (Col. I, 5, 6). The royal canal is also most likely meant by the *kišâd na-ga-ar šarri*, referred to on a fragmentary boundary stone, D. E. P., II, 112, 5. On the charter of Nebuchadrezzar I., granted to the priests Shamûa and Shamai (C. T., IX, pls. 4, 5), the district *Bit-mMa-zi* (or perhaps better *Bit-mBa-zi*), "of the royal canal," is mentioned (pl. IV, 24).

The new boundary stone of Nebuchadrezzar I. from Nippur locates the town of Mâr-Aḥ-attûa, in the government of Bit-Sin-scheme, at the royal canal, and places Bit-Šir-appili and Bit-Suḥur-Gal-du in its immediate vicinity. It also shows that the land was bordered on its southeastern side (*šûtu*) by the Tigris, and on its northwestern side by Bit-Ushbula, which was temple property. The land of Nusku-ibni adjoined this temple land, while, according to the plot of the field, the royal canal passed through its northwestern end. On the boundary stone of Marduk-aḥê-erba (O. B. I., 149,

Col. I, 6, 11) the canal *nâr* ^(*alu*)*Ša-šar-ri^{ki}* is mentioned, which Streck (*Deutsche Lit. Zeit.*, 1905, p. 618) includes among the references to the royal canal. But it is safer to take *Šašarri* as one word which does not refer to the royal canal (cf. p. 196). Under Merodach-baladan II. (668-648 B.C.) we find the field (*ugâru*) of Dun-ni-edinni and Nurzu (perhaps also a city) situated on the royal canal.

Unfortunately the references to the royal canal in the contract tablets do not help us materially to fix its location. Strassmaier, Nbn., 483, refers to tithe (*ešrû*), the property of Shamash, of the tenth year of King Nabû-na'id. In the text occurs this passage: *a-di^{alu}Za-za-an-nu 50 gur ultu muḫ-ḫi nâr šarri a-di muḫ-ḫi nâru* *Idiqlat* (Nbn., 483, 6, 7). This statement, which does not go beyond the new boundary stone from Nippur, except that it seems to locate the town Zazannu in the neighborhood of the royal canal, is the most definite that occurs; all the others are indefinite. Cyrus 26 : 17, a text dated at Sippar, refers to the *nâr šarri* in a broken passage. Cyrus 181 : 11, *suluppu GIŠ.BAR ša muḫ-ḫi nâr šarri*. Camb. 44 : 5 locates a field at royal canal, but the boundaries of the other three sides are unfortunately broken off. Cf. also Darius 198 : 4 and Dar. 411 : 7-9. The latter refers to a royal canal in Elam. It reads: *a-di-i u-il-tim mahṛîtim(-tim) ša 1½ ma-na kaspi ša a-na dul-lu ša nâr šarri ša^{mātu}Élamti nadna(SE-na)*. Finally one of the Murashû texts refers to the royal canal, but again in such general terms that no definite inference is possible. B.E., IX, 73, 1-3, reads: *II gur 24 qa^{she'u}šamaššammu zitti šarri ša ina uz-ba-ri ša šarri ša ina muḫ-ḫi nâr šarri ša ina pâni^mRimut-^dNIN.IB aplu ša Mu-ra-šû-û*. The same is true of a passage in the Harper Letters, No. 275, Rev. 4. For a recent discussion of the "royal canal" see Hommel, *Geographie*, pp. 284-6.

UŠ.SA.DU. The pronunciation of this word is still unknown. Oppert (*Doc. jur.*, p. 99) proposed *emêdu*; Belser (B. A., II, p. 135)

tih. The former, however, is a verb, while *UŠ.SA.DU* is here used as a preposition. The latter is admittedly only a hypothetical reading. The form *UŠ.SA* is used in the date list of the first dynasty, published by King (*Letters of Hammurabi*, Vol. III, pp. 212-253), in the sense of "after" or "next" (King, p. 310), *DU* = *nazâzu* (Br. 4,893), hence the ideogram means literally "standing after" or "standing next." See Daiches, *Altbabylonische Rechtsurkunden*, p. 21, and the discussion of Arno Poebel as to the use of *MU.US.SA* in the contract tablets of the first dynasty (Z. A., XX, pp. 234-238).

Col. I, 1. The recent investigations of Prof. Clay ("Ellil, the God of Nippur," in A. J. S. L., XXIII (July, 1907), pp. 269-279) have shown that in the Aramaic endorsements of the Murashû tablets the name, which was formerly read *Bêl-nâdin-shumu*, is transliterated אֵלִל שׁו אֲדִין, i.e., *Ellil-šum(w)-iddin* (cf. B. E., IX, 66a), which proves that the god ^dEn-lil is not to be pronounced Bêl, but Ellil. This is corroborated by the equation, *Il-lil* = ^d*En-lil* in V R. 37 : 21 and the transliteration Ἰλλίλος of Damascius.

Many of the titles applied in this hymn to Ellil are in other hymns transferred to other gods. *Etil šamê u iršiti* is applied to Shamash by Agu-kakrime, Col. VIII, 7-9.

I, 2. The title *bêl gimri* is also applied to Ea. Cf. IV R.² 56, II, 9, *bân kullati bêl gimri*, "creator of everything, lord of all."

I, 3. With the title *šar ilâni rabûti* may be compared the titles of Marduk, *šar ilâni* (B. A., V, 381, No. 2, Col. II, 1), *bêl ilâni rabûti* (B. A., V, 375, No. 24, 10), *etil ilâni* (B. A., V, 325, No. 3, 1), *qarrad ilâni* (B. A., V, 330, No. 5, 18).

I, 4. To *lâ ibaššu ilu šâninšu* corresponds Marduk's title *ša šânina la išû* (B. A., V, 334, No. 7, 18) and *ša šin-na-as-su la ibaššû* (B. A., V, 329, No. 5, 12).

I, 6. *appa ilabbinû*. The same phrase is applied to the Igigi before Nabû, Rm. III, 15 ([*ina ilu*]-*ti-šu ka-bit-ti Igigi ap-pi i-lab-bi*-

na-šu, cf. Winckler, *Altorientalische Forschungen*, I, 254, l. 12). Of Nergal it is said, ^d*A-nun-na-ki ap-pa i-lab-bi-nu-ka*, Böllenrücher, *Gebete an Nergal*, No. 7, II, 36, p. 44. Similarly of Sin, cf. IV R.² 9, 59, 60a. Cf. also Schrank, *Priester und Büsser in Babylonischen Sühnriten*, pp. 58f.

The verb *ú-taq-qu-ú* stands here in parallelism with *appa ilabbinû*, from which it may be argued that it has the same or a similar meaning. This raises at once the question, whether the usual derivation from אָקָה or וָקָה (see Delitzsch, H. W., 123a) is correct. In favor of Delitzsch's rendering it may be urged that the syllabaries connect it with *še-mu-ú*, "obedient" (in S^d 24 *ú-te-ku-ú* follows *še-mu-ú*), and with *pu-ug-qu* (פּוּק) and *nu-up-pu-qu*, "to pay attention, to await" (the ideograms [HAR].DA and [HAR.DA].AG.A are shared in common by them, see K. 4,188, III, 55-59). But the historical inscriptions clearly connect it with "bowing," e.g., Nebuch. E. H., II, 61, reads: *ilâni šu-ut šamê u iršiti pa-al-ḫi-iš ú-tak-ku-šu ka-am-šu iz-za-zu maḫ-ru-uš-šu*. Here it stands in parallelism to the phrase, "bowed they stood before him." To do justice to all the passages I propose to connect *utaqqû* with a verb *taqû*, which corresponds to the Arabic تَقَى, "to fear god," which in turn is the eighth form of وَقَى, "to fear or reverence God." Accordingly *utaqqû* is the Piel (II, 1) of תָּקָה, and means "to show reverence or obedience." If this explanation is correct, the phrase *utaqqû palḫiṣ* is not absolutely synonymous with *appa ilabbinû*, but rather gives the reason for the prostration; it was to show their reverence.

I, 7. The form *A-nun-na-ku* is exceptional. It is not singular but plural, hence *Anunnakû* (cf. IV R. 45, 30f., *ilâni rabûti ilâni I-gi-gu ša ša-me-e ilâni A-nun-na-ku ša iršiti*). The meaning of the Sumerian *A.NUN.NA* is given (K. 4,829, Rev. 5f. = Hrozný, *Mythen*, pp. 18, 19) as *riḫût rubê*, i.e., "offspring of the great," namely "abyss." Compare with this *DAM.GAL.NUN.NA*, "the

great mistress of the abyss." For recent discussions of the Igigi and Annunaki see Hrozný, *Mythen*, pp. 84-89; Zimmern, K. A. T.³, 451-56; Morgenstern, *The Doctrine of Sin in the Babylonian Religion*, M. V. A. G., X (1905), pp. 161-167.

I, 8. *šuharrurû* and *nazuzzû* are both permansives, 3d pl., *nazúzzû* = *nazuzû* = *nazzuzû* = *nanzuzû*, IV, 1 of 𐎶𐎵. The metrical accent has caused the form *nazúzzû* instead of *nánzuzû*. The parallelism and metrical form of ll. 6 and 8 are evident. They are as follows:

appa ilábbinû, utáqqû pálhiš
ášriš šuharrurû, nazúzzû šáhtiš.

I, 9. *be-el bêlû(m)*, the singular *bêlu(m)* agreeing with the plural *bêlû(m)* in form, is used as a substitute for it. The same expression is applied to Marduk, IV R. 20, No. 1, 25, *be-el be-lum* (cf. Hehn, *Hymnen*, B. A., V, 340, 25). This title is also applied to Aššur, see Craig, *Religious Texts*, pl. 34, 15.

As to the meaning of *ušamsaku*, I would like to propose starting with the meaning of the corresponding Arabic word *مَسَكَ* "to lay hands on," "to seize." From this can easily be derived the meanings to remove, to set aside and to keep back.

These meanings suit all the known instances of its occurrence. It is applied: (1) To the removal of the statues and memorial tablets. Cf. Adad-nirari, I, Rev. 16, 17, *lu na-ri-ia ú-šam-sa-ku a-na ša-aḥ-lu-uq-ti i-ma-nu-ú*, i.e., "who will remove my inscribed stone and give it over to destruction." Cf. also Aššur-našir-apal, *Monolith*, Col. V, 57, 58; Sargon, Cylinder, 76, and Sargon, Bull Inscription, 104. (2) It is applied to the removal of sin, *šu-ši-i mur-ši šum-si-ki ḥi-te-ti*, Br. M., 81, 2-4, 188, Rev. 21 (Z. A., V, 68), i.e., "let my sickness come forth, remove my sin." (3) It is applied to shouting, Br. M., 81, 2-4, 188, Rev. 11, *rig-ma šum-sa-ku si-mat u ḥa-da-a ša balâti zu-um-ma-ku*, "I am removed (i.e., kept) from

shouting, from the beauties and pleasures of life I am debarred."

(4) It is applied to the contents of the inscriptions. K. 2,727, Rev. 35 (B. A., II, 366f.), *rubû arku(-û) ša pi-i dan-ni-te šu-a-tu la ú-šam-sak*, "a later prince who will not remove (*i.e.*, set aside) the contents of this document." Cf. K. 382, 13, 14 (Str., A. V., 5,065).

(5) It is applied to the commands of the gods, Neb. Nippur, I, 9f., *i-pis pî-šû la ú-šam-sa-ku ilu aiumma*, "his command no god can set aside." V R. 66b, 11, *ina qibûti-ka kit-ti ša la uš-tam-sa-ku*, "by thy righteous command, which cannot be set aside." Cf. also K. 2,852 + 9,662, Col. I, 25, *la uš-tam-sa-ku a-mat ru-bu-ti-ša*. A substitute for this phrase is *ši-it pi-i-šu la uš-te-pi-il ilu ai-um-ma*, Creation Epos, VII, 132, and Susa, 3, VI, 29-32, *ša ši-it pi-šu ilu ma-am-ma la uš-pi-el-lum*, "what issues from his mouth (*i.e.*, his command) no god can annul." (6) It is applied to the removal, *i.e.*, the keeping back of tribute, Tigl. II, 92, *Šu-ba-ri-i šap-šu-te . . . ša bilat-su-nu ù ma-da-at-ta-šu-nu u-šam-si-ku-ni*, "the powerful Shubarites, who had kept back their taxes and their tribute." (7) It is applied to the thoughts in one's heart, IV R.², 60, III, Obv. 15, *ša ina lib-bi-šu mu-us-su-kat*, "what is kept back in one's heart."

I, 11. *rašubbi* ^d*Anunnakû*, literally "one who fills the Anunnakû with terror," from which develops the more general meaning, the powerful one, the potentate. In this line beings, including gods and men, in the next line lands and kingdoms indicate the extent of the god's rule. *ka-bit* is the construct of *kabtu*, "powerful," not yet registered in the dictionaries.

I, 13. The value of the sign  is unknown. It is the simple form of which Br. 2,706 is the double. As the noun *melammu* is frequently joined with the verb *sahâpu*, *e.g.*, *a-na ša-a-ri ir-bit-ti me-lam-me sah-pu*, "to all four directions they spread terror" (for other passages see Muss-Arnolt, *Dict.*, p. 550), it is probable that the verb used here was *sahâpu*, or at least a synonym.

I, 14. *ka-la si-ḫi-ip ša-ma-me*. The rendering of the word *si-ḫi-ip* has caused translators considerable difficulty. It occurs: Aššurb. (Smith) 285, 7; 274, 28, *si-ḫi-ip mâtî ka-la-mu a-na si-ḫir-ti-šu um-da-al-lu ana pâṭ gim-ri-ša*. To this passage corresponds V R. 9, 44, 45, *nap-ḫar mâtî-ia um-dal-lu-û ana pâṭ gim-ri-ša*. In the first passage Delitzsch (H. W., p. 494a) is inclined to see in *si-ḫi-ip* a scribal error of George Smith. But the word occurs again in a Shamash hymn (A. J. S. L., XVII, 134), Col. I, 20, *nam-ri-ru-ka im-lu-û si-ḫi-ip mâtâtî*, and again Col. III, 41, *kal si-ḫi-ip da-ad-me*. The former passage is translated by Gray: "Thy brilliancy fills and overwhelms countries," taking *si-ḫi-ip* evidently as equivalent to *sâḫip* (cf. I, 40). But there can be little question that *siḫip* in these passages is the construct of *siḫpu* and means "extent." The fundamental meaning of *sahâpu* would, therefore, be to stretch out; applied to an area it is that which is stretched out, the extent; in a hostile sense it becomes "to overthrow." This is corroborated by our passage, where *kala siḫip šamâme* is in parallelism to *napḫar qinnê u kal dadmê*. The phrase must therefore be translated literally: "the totality of the extent of heaven." In agreement with this we find the expressions *kiššat da-ad-me* (K. 8,235 + 8,234, Col. I, 6; cf. Z. A., IV, 22, 8) and *gi-mir da-ad-me* (K. 8,717 + D. T. 363, Col. I, 8; cf. Z. A., IV, 230) substituted in similar passages. The accuracy of G. Smith is once more vindicated, and his passage becomes particularly valuable because it shows that *siḫip* actually exchanges with *napḫar*.

Namrirri ša'nu is the governing sentence, whose thought is further elaborated by the two lines that follow (cf. Hilprecht, *Assyriaca*, pp. 14, 16).

I, 15. *qinnê* is here used with reference to human habitations, a usage which is also found in the O. T. (cf. Jer. 46 : 16; Hab. 2 : 9; Ob. 4; Job 29 : 18).

The etymology of *dadmê* is not given by lexicographers, as far as

I know.¹ I would suggest that it belongs to the same root as *admānu*, dwelling (cf. Tigl., VII, 74, 90; VIII, 17, etc.), namely *adāmu*, to build. It is, therefore, a *t* formation, whose *t* under the influence of the following *d* has been softened to *d*. The same formation is probably to be found in *da(d)daru*, "the stench," whose root, according to Jaeger (B. A., II, 299), is *adāru*.

Parallel passages, comparing the glory of a god to a garment, are [*ša puluḥ*]-*tu lit-bu-šu ma-lu-ú ḥar-ba-šu*, King, *Magic*, No. III, 11; cf. II, 13, and *ḥa-lip ša-qum-ma-ti ša lit-bu-šu nam-ri-ri*, King, *Magic*, No. 46 : 15, pl. 61. There are also Hebrew parallels to this thought, compare especially Hab. 3 : 3, כֶּסֶם שָׁמַיִם הוֹרוֹ וְתִהְיֶה מְלֵאָה הָאָרֶץ; also Ps. 104 : 1-2, "With honor and glory thou art clothed, using light as a garment," and Ps. 93 : 1; 148 : 13.

I, 16. As Prof. Hilprecht was the first to recognize (*Assyriaca*, p. 57), the word *šalummatu* does not exist in Assyrian. The reasons for this are as follows: (1) If we read *šalummatu* it is impossible to connect the word with the verb *šalāmu*, "to be whole." Nor can any other satisfactory etymology be suggested. (2) We never find the word written *ša-lu-um-ma-tu*, but there are frequent cases in which we find the writing *ša-qu-um-ma-tu*. (3) The sign *lum* has also the value *gum*, *qum*, cf. Strassm., Neb., 135 : 24, *a-pi-il ru-qum-ma-a*, and Oppert, Z. K., I, 61; Tallquist, *Contracte Nabû-na'id*s, p. 127, *sub rugummû*; Hilprecht, *Assyriaca*, p. 57, note.² (4) The meaning of *šaqummatu* appears from the explanation of its ideogram *SU.ZI* as *puluḥtu*, "terror." From this develops the secondary meaning, "that which inspires terror," hence "majesty, glory." We must, therefore, translate the passage of Aššur-bân-apal (V R. III, 3) *ša-qu-um-ma-tu at-bu-uk*, "terror I poured cut."

¹ This was written before the appearance of Prof. Hilprecht's latest book, which offers the same etymology, cf. B. E., Vol. XX, Pt. 1, p. 44, note 1.

² Cf. also *sin-niš-tum šag-gum(LUM)-ma*, Reisner, *Hymnen*, 115 : 24; *be-el-šu iš-gum(LUM)-ma*, Reisner, *Hymnen*, 62, 17.

For the discussion of Jensen, who makes the original meaning of שָׁקֵט, "to be quiet," see K. B., VI, 1, 354f. Compare also Macmillan, B. A., V, 564, who arrives at the meaning, "to be in distress."

katmâ, permans. 3 pl. fem., agreeing with *mâtâti*. A thought parallel is: *puluḫti melammeka bît* ^a*Enlil kîma ṣubâti iktum*, which is said of NIN.IB, cf. Hrozný, *Mythen*, p. 10, Obv. 30.

um-daš-ša-lu, II, 2 pres. of *mašâlu*. For other examples of this form see King, *Seven Tablets of Creation*, III, 86; II, 24, and Muss-Arnolt, *Dict.*, 605a. This same idea is also found in the O. T., e.g., Ex. 15 : 11, "Who is like thee of Yahweh among the gods?" Cf. further Ps. 71 : 19; 89 : 6; 113 : 5; II Chron. 6 : 14. *ilu-su* = *ilu-us-su* = *ilûti-šu*, cf. Delitzsch, *Gr.*, § 51.

I, 18. *me-su-šu*. There are three possibilities as to the reading of this word. (1) The signs may be read syllabically *me-su-šu* or *šip-su-šu*, for which, however, no satisfactory explanation can be offered. (2) *ME.SU* may be an ideogram. *ME* is *paršu* (Br. 10,374) and *ME.ZU* is *mûdê têrti* (Br. 10,385), "expert in omira," a title applied to the *bârû*. In the same way *ME.SU* might be an ideogram for *paršu* or one of its synonyms, possibly *purussû*. If the latter word was intended *su* might also be regarded as a phonetical complement (cf. *KUD-su* = *ipparasu(-su)*). (3) The text contains a scribal error, *me-su-šu* for *par-su-šu*. The word *par-si-e* occurs on the boundary stone of Ellil-nâdin-aplu, II, 9 (*Assyriaca*, p. 5). In that case the ideogram *ME* for *paršu* probably contributed to the confusion, as well as the similar form of the signs  and . The last alternative seems to me to be the most probable, especially as the most common word for law *paršu* (of which *parsu* is a synonym) would otherwise be wanting. Moreover, the inscription contains other inaccuracies (cf. Col. II, 3, 11; V, 10).

šit-ru-ḫu. For other passages in which this word occurs see Zimmern, G. G. A., 1898, 826; B. A., V, 311, l. 20; Muss-Arnolt, *Dict.*, p. 1137a.

billudûšu (GARZA.MEŠ). The plural sign is only attached to the singular in this case because plural happens to agree in form with the singular. For this playful use of the plural sign see Hilprecht, *Assyriaca*, p. 55¹.

I, 19. For similar glorifications of the "word" of the gods see a hymn to Sin, IV R. 9, Col. I, 48-62; a hymn to Nergal, K. 69 (cf. Böllenrueher, *Gebete und Hymnen*, pp. 30-42), and the "word" of Ellil and Marduk in the Reissner collection, see Macmillan, B. A., V, 539f. A similar description of the law of Yahweh is found Ps. 19 : 7-9.

naklâ is perm., 3. pl. fem., agreeing with *alkakâtu*.

I, 20. With *muma'ir šamê u iršiti*, cf. Gen. 14 : 24, אל עליון קנה שמים וארץ, and Ezra 5 : 11.

mukûl mâtâtî. The verb *kâlu* is here used in the sense of uphold, sustain, as, e.g., in IV R. 5, 37-39c, *na-piš-ti mâtî ú-kal-lu*, "he (Sin) sustains the life of the land." Of Ishtar it is said: *mukillat napîšti*, K. 3,477, Obv. 19, cf. B. A., V, 592; cf. also the statement of Hammurabi, Code XL, 49, 50, *ina utlia nišê mâtû Šumêrim u Akkadim ukûl*. The various meanings of כול are discussed by Meissner, A. P., p. 138.

I, 23. With *ana šatti* the various appositions to Ellil, extending I, 1-23, come to an end. With the next words the apodasis begins, whose first predicate is *ippalisma*.

ina BIR.ŠI.MEŠ. In view of the parallelism which characterizes this hymn, we should expect, corresponding to *bânisu namrûti*, a noun followed by an adjective, so that *BIR.ŠI* would be the ideogram of a word synonymous with *bânu*. This synonym might be *zîmu*, for it occurs in parallelism with *bânu* in V R. 61, Col. IV, 43-46, *ina bu-ni-šu nam-ru-ti zi-me-šu ru-uš-šu-ti damqâti inâ(ŠI + II)-šu ha-diš ip-pa-lis-su-ma*. In accordance with the analogy of this sentence we should read: *ina zîmêšu damqâti ina bânišû namrûti*. Over against these considerations we have the

expression in the O. T., Prov. 16 : 15, באור פני מלך חיים; cf. also Ps. 4 : 7; 44 : 4; 89 : 15; 90 : 8. Now *BIR* (as *LAH*) is an ideogram of *nûru*, "the light." Hence it is equally possible to read: *Ina nûr panûšû damqûti*. This reading I regard as preferable in view of the Hebrew expression quoted above, and the absence of any evidence that *BIR.ŠI* is an ideogram for *zîmu*.

II, 2. *eš-rit* is pl. cstr. = *ešrêti*. The phrase *ana udduš ešrêti* is common in the inscription of Nebuchadrezzar II. (cf. p. 124).

II, 3. *ŠA.SAG* is certainly a scribal error for *ŠĀ.DUG* (cf. II, 8). It is a new form of the usual ideogram for *satukku* *SA.DUG*, cf. Delitzsch, H. W., 513. The ideogram is artificial, having the appearance of a Sumerian word, but *satukku* is no doubt Semitic, corresponding to Arabic مَدَقَّة, "poor tax," Talmudical צדקת and South Arabic *šadaqat*. See Hommel, *Aufsätze*, p. 274, and Leander, *Ueber die Sumerischen Lehnwörter im Assyrischen*, p. 31. A synonymous expression: *su-ud-du-ru gug-ga-ni-e qut-ri-ni nîknakkê* occurs in Craig, *Religious Texts*, I, pl. 30, 6.

II, 5. *qātuššu itmuḫ* = *ina qâti-šu itmuḫ*, cf. Delitzsch, Gr., § 80e.

II, 7. *û-ša-tir šum-šu*. This phrase ends the first long sentence, containing the hymn to Ellil and the appointment of Nebuchadrezzar as king.

II, 9. *ina igisê*, the singular, is here again used as a substitute for the plural, cf. I, 9.

The adjective *habšûti* is in parallelism with *šum-du-li*. The exact meaning of *habâšu* has been in dispute. Jensen (K. B., VI, 1, 20, 323) translates "to swell," Zimmern "to strengthen," Delitzsch "to fill, burst." Nebuchadrezzar II. connects *igisê* with the adjective *rabûti* (*Délégation en Perse*, II, 123), *ba-bi-il i-gi-si-e ra-be-ù-tim*, Col. I, 10, or with *summuḫu*, cf. E. H., II, 37, *i-gi-sa-a šu-um-mu-ḫu*, while in this inscription *habâšu* stands in parallelism with *naḫâšu*, "to be abundant." This establishes also for *habâšu*

the meaning "to fill to overflowing," a meaning which fits very well the context of the Creation Epos, III, 136, *ši-ik-ru ina ša-te-e ha-ba-šu šu-um-[ru]*.

The word *na-kin-ti* appears now in four different forms: *bīt na-kam-te* (Layard, 34, 21), *na-kan-ti* (Aššurb., Sm., 132, 22), *kīma na-kim-tum* (V R. 47, 21b), and *na-kin-ti* in our passage.

II, 10. The inf. *libēnu* instead of *labānu* occurs also in the new Ishtar hymn, Rev. 91, *mug-ri li-bi-en ap-pi-ia*, i.e., "received favorably my prostration," cf. King, *Seven Tablets of Creation*, I, 234.

The expression *bēl u mār bēli* is also applied to Marduk and Nebo in an inscription of Sargon, *a-na^{ilu} Bēl^{ilu} mārī* (it ought to be *mārī^{ilu}*) *Bēl ū-ki-in* (cf. Winckler, *Inscripfen Sargons*, pl. X, No. 20, l. 7).

II, 12. The verb *zarābu* means to be pressed or oppressed, hence it shares with *šaharratu*, "anguish," the same ideogram (*SIG*), while *zurub ša libbi* has the same ideogram as *marāru*, "to be sad." In the stem II, 1, it means "to press out," so in Sennach. VI, 20, not "to keep back," or it may be applied to the expression of sounds. Regarding *zurub* as the cstr. of *zurbu*, "anguish," we should translate: "In the anguish of fervent prayer." But it is perhaps better to explain it as the inf. cstr. II, 1 = *zur(r)ub*, and translate "in the utterance of prayer." For the omission of the doubling see *li-gi-sa-šu*, IV, 8.

For *ZI.ŠAG.GAL-li* compare O. B. I., 83, I, 17, and Hilprecht, *Assyriaca*, p. 13^a. This Sumerian word (also written *ZI.ŠAG.GAL-LA*, cf. Gudea, B, III, 1) is no doubt correctly explained by Jensen (K. B., III, 1, 29††, 208) as *ZI* = *napištu*, *ŠAG* = *libbu*, *GAL* = *bašû*, hence "breath being in the heart." It is a synonym of *ikribu*, see Jensen, Z. A., VIII, 221, and also Leander, *Sumerische Lehnwörter*, p. 18, No. 135.

II, 14. *UH.ME.ZU.AB* is rendered by Jensen as *pašiš apsi*, *Weltmeer-Gesalbter*, while Meissner (A. P., 154) and Haupt (in

Cheyne, Isaiah, S. B. O. T., p. 82) transcribe *pāšišu*, "the anointer." But in view of K. 4,328 (= C. T., XIX, 41) and K. 10,194 (= C. T., XVIII, 47), happily joined by Meissner (M. V. A. G., Vol. X (1905), p. 254), it is perhaps better to regard *UH.ME.ZU.AB* as the pronunciation which was actually used in Assyrian, for the word which is in the left-hand column is there accompanied (l. 6) in the right-hand (or Semitic) column by the remark *šú-u*, i.e., "the same."¹ For this use of *šú* see, e.g., Hommel, *Geographie*, p. 281. Or we should at least expect, following the analogy of *UH.ME.ŠIK.BAR.RA* = *šú'-ú-ru* and *UH.ME.-TUR.RA* = *lu-ma-ak-ku* (i.e., ll. 7, 8), that there is one Semitic word to correspond to the Sumerian *UH.ME.ZU.AB*; but as none has as yet appeared the first alternative seems to me preferable, hence I retain *UH.ME.ZU.AB*. For a recent discussion of the meaning of this title as "one who anoints himself with the water of the *apsû*, perhaps a large basin standing in the temple," see Morgenstern, M. V. A. G., Vol. X (1905), p. 117⁷.

NU.TUR. This shorter ideogram occurs on a number of stones—London, 101, II, 14; D. E. P., II, 97, 11; IV R.² 38, III, 1; O. B. I., 83, II, 12, and Code of Hamm., XI, 49, 52, 63. The longer form *NU.-TUR.DA* is found III R. 41, I, 32; I R. 70, II, 5. The phonetic spelling *lu-b(p)u-ut-tu* occurs III R. 43, III, 13. For the explanation of Jensen as "deputy governor," see K. B., III, 1, 31*¹⁰, and *Kosmologie*, 78¹. But why should we not rather follow the Assyrian lexicographers, who translate *TUR.DA* (read *ba-an-da*, V R. 38, 19, a, b) by *ek-du*, cf. IV R. 27, 19, 20a: *AMAR.BAN.DA* = *ri-mi ek-du*, hence *NU.BAN.DA* = *zikaru ekdu*, *Machthaber*, here the "chief" of the temple. See also Leander, *Lehnwörter*, p. 26.

II, 14. *DUR.AN.KI*, "the link of heaven and earth," was one

¹ This "ditto" note can hardly refer to the preceding word in the Semitic column, for that is *zer-ma-ši-tum* = *NU.BAR*, which in turn is preceded by *NU.GIG* = *ga-diš-tum*.

of the names of the stage tower of the temple *E.KUR* at Nippur. See Hilprecht, *Explorations in Assyria and Babylonia*, p. 462. The same name also occurs in K. 3,454, Col. II, 8, 10, 50, 73; III, 73 (cf. B. A., II, 409); Br. M. 80, 7-19, 126, ll. 11, 12 (cf. B. A. V., 586); IV R. 24, No. 1, 50, 51; King, *Babylonian Magic and Sorcery*, No. 6, 18; Craig, *Religious Texts*, I, pl. 19, 9, *ES.EN.LIL^{ki} DUR.AN.KI*; *Laws of Hammurabi*, I, 59, where we should not translate "*Dûrilu*," as Nippur precedes immediately. For other passages see Hommel, *Geographie*, 351².

II, 15. To *ana šarri rê'i kîni* the verb *ippalissuma* belongs. The whole section wants to say that, because the king was so pious (as shown by his restoration of all the gifts and tithes to the temple), Nusku-ibni, the high priest of Ellil, gathered courage and addressed his petition to the king through the governor, Bau-shum-iddina.

II, 16. *ut-ni-ni-šu* is inf. II, 2 of 𒌦; it ought to be written *utninnu*, cf. Delitzsch, H. W., 101b.

II, 17. Bau-šum-iddina, son of Hunna, the governor (*šaknu*) of *Bît-Sin-šeme*, was no doubt identical with Bau-šum-iddina, son of Hunna, the governor (*šaknu*) of Babylon, mentioned on the first boundary stone of Nebuchadrezzar, V R. 56, 18.

II, 18. In *na-an-za-az* we have an assimilation of *m* to *n*.¹ The same forms occur R. M. III, 105, *na-an-za-az mah-ri-šu*; see Winckler, *Forschungen*, I, 256, 11; also Nabû-shum-ishkun, Edge 7, *ilâni mala ina eli narî annî šuršudû na-an-za-zu*, i.e., "the gods as many as on this stone have been caused to take a place." The usual form of this title occurs on a boundary stone of Rammân-shum-ušur, *lu man-za-az pân šarri*, D. E. P., II, 97, 13. *mah-ḥar* is an unusual writing for *ma-ḥar*, perhaps due to the accent.

¹ Prof. Hilprecht, however, informs me that he prefers to explain *nanzaz* as a *fa*"*al* form *nazzaz*, dissolved into *nanzaz*, i.e., "a man whose business it is to stand before one."

II, 19. *at-mu-šu na-as-qu-ma*, with which compare *a-wa-tu-ú-a na-aš-ga*, *Code of Hammurabi* (Harper), 40 : 81; 41 : 99.

II, 20. *šakkanak Bâbili*, "the viceroy of Ellil over Babylon," cf. *Annals of Aššur-nâšir-apal*, who calls Adad-nirari *šakkanak ilâni rabûti*, Col. I, 29, and Winckler, *Keilschrifttexte Sargons*, Vol. I, p. XXXVI⁶.

šakkanakku, literally *ša kanakku*, "the man of the door," like *šangû* = *šá naqû*, "the man of sacrifice," and *šabrû* = *ša barû*, "the man of sight," so Jensen, *Z. A.*, VII, 174¹. In V R. 55, 3, this title is placed alongside of *iššakku* (*PA.TE.SI*) *qardu*, while in our inscription the king is distinctly called *nisakku* (II, 12), which is the same title as that of the priest Nusku-ibni (II, 13). With this compare the priestly titles of the Assyrian kings, see M. D. O. G., No. 22, p. 74.

II, 23. For a discussion of *šar kišati* see Hilprecht, *O. B. I.*, Vol. I, Pt. 1, pp. 23ff., and Winckler, *Forschungen*, I, 90-97, 140-158, 222-232. See also Chapter II, p. 137.

II, 25. With *qirubû* compare the Aramaic כְּרוּבָא, "an area that can be plowed in a day," from כָּרַב, "to plow." In view of *qir-bi-tum*, pl. *qir-ba-a-ti* and *ga-ar-ba-a-tim*, the root must be קָרַב in Assyrian.¹ For a discussion of the word see Streck, *Z. A.*, XVIII, 174².

II, 26. With *bu-tuq-ti* compare Talmudical בִּרְקָא, "flooding."

II, 27. *Ugâr âli* means here as in Old Babylonian law (Meissner, *A. P.*, 123) "the land belonging to a city." It is therefore usually followed by the name of the city, I R. 70, I, 2; III R. 43, I, 2; Susa 2, I, 23, 30, 33; II, 2, 7, 12, etc.

II, 29. *iku* and *palgu* are the little ditches of irrigation drawn through a field, so in *Shurpu*, V/VI, 63, which treats of an onion, "around which a furrow and ditch is not drawn" (*ina iki u palgi*

¹ Compare also the Arabic كَرِيبٌ and حَرْبٌ

lâ innimmedu). For the earliest occurrence of *šapâku* compare the stele of Narâm-Sin from Diarbekr, O. B. I., 120, III, 3-4, *KI.GAL iš-pu-uk*.

II, 30. *mêrištu* from *erêšu*, "to plant," cf. Arabic غرس , "to plant." The fundamental meaning of this verb, as proposed by Jensen (*Theol. Lit. Zeitung*, 1895, Sp. 250), is "to irrigate," but this is not accepted by Zimmern (*Beiträge*, p. 58). The Arabic does not support the meaning "to irrigate," nor the Assyrian lexicographical lists, which give *na-du-û* as a synonym of *e-re-šu* (cf. V R. 24, 12, c, d). Its connection with *a-ga-di-ib-bi* (Haupt, A. S. K. T., p. 73: 8, 9), whose exact meaning is still uncertain, can hardly be used to reach a definite conclusion.

III, 1. *Šîr-ap-pi-li*, perhaps "O Šîru, answer," Imp. II, 1 of אנפל , cf. *a-pal-an-ni*, "answer me," Knudtzon, *Gebete an den Sonnengott*, 286.

III, 3. The last part of the name *Su-ḫur-Gal-du* is most probably a Cassite god. The same name occurs in the Cassite tablets from Nippur, e.g., *Ḫa-aš-mar-Gal-du* (Clay, B. E., XV, 154 : 30); cf. also Clay, B. E., XIV, Introduction, p. 4⁵.

III, 5. *bêl mâtâti*, i.e., Ellil of Nippur, to whose temple the land in question belonged; see also plan of field, l. 7. Even this peculiar title of Ellil was transferred to Marduk by the priests at Babylon (K. 3,505, 8, see B. A., V, 325; K. 2,962, 14, see B. A., V, 334; IV R. 57, 1, see B. A., V, 349, etc.).

III, 12. A *ḫazannu* was originally the chief of a village or township, cf. Winckler, *Forschungen*, I, 246.

III, 14. A comparison of this line with III R. 41, I, 14-15, shows that *ŠĀ.BAL.BAL* has here the force of "grandson," for in III R. 41, we find *Shâpiku*, son of *Itti-Marduk-balâtu*, son (*mâru*) of *Ardi-Ea*, *Shâpiku* and the *Nabû-zêr-lîshir* of our stone were no doubt brothers. This places III R. 41 either in the reign

of Nebuchadrezzar I. or of his immediate successor. Other names point to the same conclusion, see p. 133.

A discussion of the different meanings of *ŠĀ.BAL.BAL* is given by Weissbach, *Babylonische Miscellen*, p. 3; cf. also Winckler, *Forschungen*, I, 518¹; II, 20. The Semitic pronunciation is perhaps *liplîpu*, which like *ŠĀ.BAL.BAL* may be used of grandson (*Agum-kakrime*, I, 14), great-grandson (Adad-nirari, Obv. 27), or descendant in general; so hesitatingly Delitzsch, *Lesestücke*⁴, 27, No. 224, and Winckler, *Forschungen*, II, 20, 23.

III, 15. *^hša-kin ṭe-me*. The name of this official is not *ša ṭe-me*, so Belser (B. A., II, 118, Col. II, 3; p. 120, Col. III, 11), and still retained by Scheil (D. E. P., II, 108, Susa 3, VI, 9), but as O. B. I., 149, I, 18; II, 3, and Susa 16, III, 30, has shown, it is *^hŠĀ-in = šakin(-in) ṭe-me*. Inasmuch as *šakânu ṭêmu* means always "to have, to hold a command" (Delitzsch, H. W., 297b), I prefer to translate *^hšakin ṭême* "commander" instead of "councillor."

III, 17. Most of the boundary stones begin the section of the curses with *mâtima*. In two cases (III R. 43, III, 1; I R. 70, II, 1) *im-ma-ti-ma* is used. Two other stones introduce this section with *man-nu ar-ku-u*, V. A. 2663, V, 18; also the stone of Nabû-shum-ishkun, II, 16; IV, 3. One has *ma-na-ma arkû(-û)*, C. T., X, pl. VII, 32. A stone of Marduk-apal-iddina I. (IV R.², 38) leaves out the line with *mâtima* altogether and starts at once with the enumeration of the officials (*lu aklu lu laputtu*, etc., IV R.², 38, III, 1). Finally the smaller charter of Nebuchadrezzar (C. T., IX, pl. 5, 31) opens this section with *ša*.

The phrase *ana ûmê* is most frequently used, but *ina arkât ûmê* occurs six times (D. E. P., II, 112, 10; I R. 70, Col. II, 1; London, 102, I, 29; V. A. 202, I, 31). On III R. 43, III¹, we find *ina ar-ka-ti ûmi(-mi)* and on V. A. 208, Rev. 43, *ina (ar)-kat ûmâ(-ma)*.

III, 18. To *ana aḥrât nišî apâti* corresponds *a-na ni-ši aḥ-ra-a-ti* on London 101, II, 13. *Nišê apâti* is peculiar to the new boundary

stone from Nippur, but the same phrase is found, in a different connection, in the new hymn to Ishtar (King, *Seven Tablets of Creation*, Vol. I, 226, Obv. 27), where Ishtar is called *ri-e-a-at nišê a-pa-a-ti*. An etymology for *apâti* is offered by Zimmern, Z. A., VIII, 84, from the root *ופה*, "to unite," to which also *šutapû*, "the companion," belongs.

III, 19. It is to be noted that *rê'û* occurs here for the first time among the officials enumerated in the passage introduced by *lu* (cf. pp. 42, 43). Its absence on other boundary stones was commented on by Prof. Hilprecht, *Assyriaca*, p. 19¹. A similar phrase occurs in the new stone of Meli-Shipak (Susa 3), Col. III, 59f., *ša ilâni rabûti inambûšuma ana rê'ût mâti inaššûšu*, "whom the great gods will call and to the rule (shepherding) of the land will raise."

lu aklu lu šâpiru lu ridû. The same succession of officers is found on K. 7599, Obv. 3 (cf. Winckler, *Forschungen*, I, 530). With *aklu* we can compare the Arabic *وكيل*, "Agent, Verwalter" (Wahrmund, H. W., 1217b); for *šâpiru* (= Hebrew *ספר*), see Johns, *Deeds and Documents*, II, 160f.; with *ridû*, cf. the Hebr. *רדה בעם*, I K. 5 : 30; 9 : 23, literally "one who drives the people, the levy-master," see Hastings, *Bible Dict.*, Vol. V, 590b; B. A., IV, 85, and Daiches, in Z. A., XVIII, pp. 202-222.

III, 20. *ša-ar-qi eqlu šû-a-tu i-nam-du-ma*. As there is a noun *šurqu*, "the gift," used in the phrase *šarâqu šurqu* (*Shurpu*, II, 86), so this passage establishes the word *šarqu*, "the gift, grant."

The context demands for *inamdûma* the meaning "to overthrow, to set aside"; cf. the use of *inamdû* in the curses, p. 48.

a-na i-ki-li ri'-ti. Thus I would read the somewhat broken signs of this line. The *ki* might possibly be *di* and the *'i* perhaps *hi* or *ih*, but after studying the signs carefully I have come to the conclusion that the proposed reading is the most probable. I regard *ikîlu* (*ekêlu*) as equivalent to *akâlu*, as *libênu* (II, 10) = *labânu*, *hi-ri-e* (III, 25) = *harû*, "to dig," and *limênu* (from which

the noun *ni-el-me-na*, IV, 7) = *lamânu*; ã and ā become ě and ē when standing in proximity of *l*, (*m*), *n* and *r*, cf. *ramênu*, *nadênu*, *našêru*, etc. (Prof. Hilprecht's lectures). *akâlu* is used in the Code of *Hammurabi* (XIII, 1; XV, 57; cf. also XV, 48, 59) and in contract tablets of the first dynasty in the sense of "*Nutzniessung nehmen*," "to obtain the usufruct of something." Cf. C. T., VIII, 6b, *iš-ri-ku-ma i-ku-lu*, l. 6; C. T., VIII, 49b, *a-di ba-al-ṭi-at i-ka-al*, l. 14; cf. Meissner, *Assyriologische Studien*, in M. V. A. G., Vol. X (1905), pp. 260, 291.

III, 24. After the word *limutti(-ti)* appears the trace of a little wedge, but it is no doubt an erasure, due to a small hole which the scribe wished to avoid.

III, 25. *ina ilki dikâti* is synonymous with *ina ilki tupšiki* used on the second charter of Nebuchadrezzar I. (C. T., IX, 4, 38). *ilku* means here "obligation service," see Streck, Z. A., XVIII, 198³, Daiches, Z. A., XVIII, 212-217. It is the Biblical הלך, tax, Ezra 4 : 14 (cf. Zimmern, K. A. T.³, 651). Prof. Clay discovered הלכא in the Aramaic endorsements of the Murashû tablets, corresponding to *ilki gamrutu*, see B. E., X, 78, where ה in the first line of the Aramaic endorsement is written on an erasure of ש.

As to the liabilities incumbent upon land in Babylonia see Chapter I, pp. 27-31, and Johns, *Assyrian Deeds and Documents*, II, 174-178.

III, 26. The verb *baqânu* occurs also on Susa 3, III, 13, 14, *šammê eqlišu la ba-qa-ni*. It is a variant of *baqâmu*, a synonym of *qašâšu*, "to cut off"; cf. Delitzsch, H. W., 181b. The imper. occurs B. A., II, 393-4, Obv. 28, *bu-qu-un-šu-ma*. The change of *m* to *n* is caused by the following š, see Delitzsch, Gr. § 49, p. 114.

kal-li-e nâri u ta-ba-li. The same phrase is found on several other boundary stones. I R. 66, I, 6, 7, *kal-li-e nâri kal-li-e ta-ba-li*; III R. 45, No. 2, *ka-al-li-e nâri ka-al-li-e ta-ba-li*. On the second charter of Nebuchadrezzar I. (C. T., IX, pl. 5, 32f.) the

expression is followed by officials: *kal-li nâri kal-li ta-ba-li^h pa-nu-û^h šanû(?)^h šu-hi-li*, while V R. 55, 51, 52, shows plainly that *kallû* is also an official, *kal-li-e šarri u ša-kin^{mātu} Na-mar^h nâgîru*. The juxtaposition of *šakin^{mātu} Namar* with *kallê šarri* leaves no doubt that both are officials. On the new stone from Nippur "the seizing of a canal digger" goes evidently with the canal officers (*kallê nâri*); hence the cutting of plants must refer to the other group of officials. This leads to the natural conclusion that the noun *tabâlu* means land, and is in that case related to the Hebrew רֶבֶל, "the world." In this sense *tabâlu* is evidently a synonym of *nabâlu*, "the dry land."¹

III, 27. The verb following *uš-aš-šu-û* and introducing *ik-ki-mu* of the next line is probably *û-šad-ba-bu*, for (1) this verb occurs usually on the boundary stones in this connection (Susa 2, III, 13; London 103, V, 36; London 101, II, 17; IV R.² 38, III, 5; III R. 43, III, 6; O. B. I., 149, II, 7; V. A. 209, II, 1). (2) It would be natural to have the taking away (*ekêmu*) preceded by a legal action.

III, 28. The phrase [*a-na*] *pihâti i-t[u-ur-ru]* is probably preceded by *ušašraqû*, which is found in the parallel passages, III R. 41, II, 2, *a-na pihâti-ši-na ú-tar-ru lu-û ana ili . . . i-šar-ra-qu*. C. T., X, pl. 7, 34, *a-na a-ḫa-[n]u i-šar-ra-[qu] lu-û ana pi-ḫat i-man-nu-u*, cf. also V R. 61, VI, 40; I R. 70, II, 10.

III, 32. As Bau-shum-iddina is the subject of the dependent clause, and is followed by *a-na^{md} [Nusku-ibni mâr Upahḫîr-Nusku]* it is necessary that the predicate be active, and as the main act of Bau-shum-iddina (Col. III, 13) is not mentioned in the other lines, it is probable that it stood here, hence we read: [*ul i-ri-im-šu i-qab-bu-û*]. For the repetition of *iqabbû* see III R. 43, III, 6, 7, and V. A. 208, 45, 47.

IV, 2. *ma-ḫi-ir-mi*. The enclitic *ma* has here become *mi* under the influence of the preceding syllable. For other examples of

¹ Cf. Meissner in Z. A., Vol. IV, p. 266.

this change see O. B. I., 149, II, 7, *šarri-mi*; London, 103, V, 38, *na-din-mi*, and London, 101, III, 1. We ought to read *i-qab-bu-ú* not *i-gab-bu-ú*, and *i-qal-lu-ú* (V, 1) not *i-gal-lu-ú*, because the *q* is not softened to *g* in this inscription, see *na-as-qu-ma*, II, 19; *qa-tu-uš-šu*, II, 5; *qa-bi-e*, II, 22; *ba-qa-an*, III, 26; *li-qa-am-ma*, IV, 27.

IV, 3. *li-tal-lik-šu-ma*, II, 2, pret. of *alâku*. The sign *tal* is Br. 7. For its syllabic use (*dal*) *tal* see Jensen, *Kosmologie*, 468⁴. The meaning of the verb cannot be "to go," for the following reasons: (1) The context demands a stronger verb than *alâku*, "to go." (2) *alâku*, "to go," is intransitive, hence always constructed with the preposition *ana*, but not with the direct accusative, such as we find here. (3) There is another verb *alâku*, whose meaning appears from V R. 24, 11-13, c-d: *a-la-ku* = *e-re-šu*; *e-re-šu* = *na-du-ú*; *na-du-ú* = *ma-qa-tu(m)*. This passage shows that this verb *alâku* has the meaning "to throw down." The prt. I, 1, of this verb seems to occur in a text published by Craig, *Religious Texts*, I, 23, 31, *šamnu tâbu i-za-ar-ri-qu immerî niqê ip-pu-šu rikkê il-lu-ku*, i.e., "good oil they shall sprinkle, sheep as sacrifices they shall offer, herbs they shall lay down." Martin compares the vulgar Arabic *علق*, "to throw into the fire" (cf. Martin, *Textes religieux Assyriens et Babyloniens*, p. 97).

Like this curse was perhaps London, 101, III, 9, ^a*A-nu-um a-bi ilâni [ag-giš li-tal(?)]-lik-šu* or [*li-ḫal*]-*lik-šu*.

Against the suspicion that the text contains an error, *li-ḫal-lik-šu-ma* instead of *li-tal-lik-šu-ma* (the *tal* sign is quite plain), it may be urged that if *li-ḫal-lik-šu-ma* were intended there would be a tautology, for it is followed by *nap-ša-tuš li-bal-li*.

The phrase *nap-ša-tuš li-bal-li* occurs also in the *Creation Epos*, IV, 103: *nap-ša-taš* (var. *tuš*) *ú-bal-li*.

IV, 5. The title *mušîm šîmâti* is also applied to other gods, e.g., to Anu, Monolith of Aššur-nâšîr-apal, I, 2; to Aššur, Craig,

Religious Texts, I, 32, 2; to Marduk, D. T., 109, 5 (cf. B. A., V, 375); to NIN.IB, Hrozný, *Mythen*, p. 28, Obv. 4.

IV, 7. *ni-el-me-na*, an *m* formation from the root למן. The *m* has become *n* under the influence of the labial (Barth's law, see Delitzsch, Gr. 174).

Both *lubnâ* and *nelmenâ* are fem. pl.

IV, 8. *li-gi-sa-šu*, prt. I, 1, third pl. fem. of *nagâšu*, "to throw down." The pret. of this verb is *ig(g)iš*, like *ik(k)is* of *nakâsu*. The *s* before *š* is due to dissimulation. For other examples see Nabopol. (Hilprecht), Col. III, 32, *ri-e-si-šu*; cf. I, 36, *ri-e-si-ša*; *ú-ša-ar-sa-an-ni*, II, 19. The meaning of *nagâšu* in this passage is, like the Hebrew שׁוּן, "to oppress," so in Isa. 14 : 2; I Sam. 13 : 6. With this curse compare Susa 3, VII, 44-51; London, 101, Col. III, 10.

IV, 10. *nu-gu* is inf. II, 1, of נגן. It is treated as a noun, cf. Delitzsch, Gr., p. 339. To avoid the coming together of two "k" sounds (*nug kabitti*) we have here *nugu kabitti*. *Naḥâša ḥabâša* are also two inf., which, like *maḥâru*, govern a double accusative, cf. Delitzsch, Gr., p. 347f. The parallelism with *naḥâša* establishes for *ḥabâša* the meaning "to fill to overflowing," see Commentary on II, 9. Usually the curses of Anu, Ellil and Ea are combined, cf. Chapter I, p. 66f.

IV, 14. *lit-te-šu-ma*, II, 1, pret. of לטן, "to darken," thus far not found in this stem. The result of the face being darkened is naturally that he does not smile, hence the meaning of "smile, laughter," suggests itself for *lil-lu*. The passages quoted for *lil-lu* by Muss-Arnolt, *Dictionary*, 481a, hardly belong to this word, cf. Martin, *Textes religieux*, pp. 172, 76; 184, 218.

IV, 15. Shamash and Rammân are combined only on the Nippur stone and on London, 103, VI, 9, 10. For the other parallel passages see Chapter I, p. 65.

I retain the reading Rammân for Babylonia, because there is no proof thus far that it was pronounced Adad, as in Assyria. Com-

pare on this question Zimmern, K. A. T.³, 444; Hommel, *Aufsätze*, 270; Ranke, *Personal Names*, 206¹.

IV, 16. With the nominal sentence *lu mulammenû igirrê-šu šunuma* compare the heading of this inscription, IV, 26; B. E., X, 94: 14, 15; 119 : 10, 11; and Amos 7 : 13, **כִּי מִקְדָּשׁ מֶלֶךְ הוּא**.

IV, 17. *kitti u mēšari*, also personified as the companions of Shamash, standing before him, cf. V R. 65, Col. II, 29; with which compare the Old Testament expressions: "Righteousness (**צֶדֶק**) and judgment (**מִשְׁפָּט**) are the foundation of thy throne, mercy (**חֶסֶד**) and truth (**אֱמֶת**) go before thee," Ps. 89 : 15; Ps. 97 : 2.

IV, 20. *simma* can hardly be connected with the Aramaic **סַמָּא** and the Arabic **سُمُّ**, "the poison," as Belser suggested (B. A., II, 146-7), because (1) If poison is injected into the body it does not have the results mentioned in IV, 21. (2) The curses uttered in the name of several other gods refer to sickness. Marduk is called upon to send dropsy (III R. 43, III, 31; III R. 41, II, 25; I R. 70, III, 13; London, 102, I, 40f.; V. A. 2663, V, 43; cf. Chapter I, pp. 61, 62). Anu, Ellil and Ea shall send blindness, deafness and lameness (V. A. 2663, V, 36-40). *simma* does not mean "blindness," but it is a synonym of *maṣṣu*, Br. 9235, 9238; cf. also Jäger in B. A., IV, 287, and Jensen in K. B., VI, 1, 413f. Scholars have differed about the derivation and meaning of *la-az-za*. Jäger derives it from *lâ âs (sa)*, *asa* = *assa* = *asia*, "healing," from *ašû*, "to heal," cf. B. A., II, 288. It is also derived from *ašû*, cf. Muss-Arnolt, *Dict.*, while Belser (B. A., II, 146-7) and Delitzsch (H. W., 357a) prefer to read *la-az-za*, from the root **לִז**.

The word is written *la-zu* (Winckler, *Forschungen*, II, 10), or *la-az* (Susa 3, VII, 19; III R. 43, IV, 16), or *la-az-za* (III R. 41, II, 30; I R. 70, IV, 6; London 102, II, 20), and *lu-az-zu* (Labartu, III, a, 54). On the boundary stones it is applied to sickness, but in the Labartu series to a plan, *a-nam-di šipta a-na la-az-za me-lik-ki* (Labartu, III, a, 54; b, 4, 14), and to heat, *umma(NE) la-az-za*

(Labartu, I, a, 21; cf. Z. A., XVI, 156). As to the meaning the Arabic لَفَّ , "evil," and the verb لَفَّ , "to follow one persistently, to press upon," supply a satisfactory etymology. As لَفَّ has similar meanings, it is impossible to decide the nature of the sibilant. I retain therefore the spelling preferred by Delitzsch. Judging from the symptoms of the disease, it may be consumption accompanied by hemorrhages.

IV, 22. As *šarqu* means "bright red blood," cf. the Sumerian *BE.UD* and the Arabic شَفَرَةٌ , "bright red, fox color," it refers perhaps to the blood of the arteries, in which case *dāmu* would mean the darker blood of the veins.

As to the derivation of *rûb* in *ša ru-ub-ša a-bu-bu*, there are two possibilities. It may be derived from رَاب or رُوب. The former would lead to the translation: "Whose rage is (like) a stormflood," and the latter "whose destruction is (like) a stormflood." In favor of the first rendering the following may be urged: (1) The anger of the gods is often compared to a stormflood. Cf. e.g., King, *Babylonian Magic*, No. 11, pl. 23, 1, *ḫMarduk ša e-zis-su a-bu-bu*. (2) The verb *ra'ābu*, "to rage," is applied to Ishtar, e.g., in the new hymn to Ishtar, Rev. 94 (King, *Seven Tablets of Creation*), *a-di mātī ḫBēlti-ia ra'-ba-ti-ma uz-za-za-at kab-ta-at-ki*. (3) The writing of the **𐎶** is frequently omitted, cf. e.g., *ū-za-in* and *ū-za'-in* (Del., H. W., 249a), *bi-i-ši* and *bi-'i-šu* (Del., H. W., 165a), *ta-a-ū* and *ta-'a-ū* (Del., H. W., 697a), *da-a-tim* and *da-'a-ti* (Del., H. W., 208a). (4) We must take into consideration the possibility that, as in Hebrew, ע guttural verbs, and ע"ו, verbs having the same meaning, may have existed side by side. Cf. Hebrew רָאב and רֹוּב, כָּאֵר and כּוֹר, רָאָם and רוֹם, תּוֹר and תָּאֵר and the nouns רָאֵשׁ and רוֹשׁ, "poison," כָּאֵר and כּוֹר, "the pit."

In favor of a derivation from רֹוּב may be urged that this verb is also applied to Ishtar. *mu-rib-bat šamê mu-nar-ri-ṭa-at*

iršitim, Sm. 954, Obv. 45, 46 (Del., H. W., 615a), and M. I. Hussey, *Some Sumerian-Babylonian Hymns of the Berlin Collections*, A. J. S. L., XXIII (1907), p. 170.

On the whole the first alternative appears to me to be preferable, especially as the anger of the gods is dwelt upon in these curses (cf. IV, 3). Moreover Ishtar's anger would be the natural cause of what is stated in the next line.

IV, 24. The word *ušaku* is evidently used here as a synonym of *namrašu*. It is no doubt to be connected with the Hebrew חִשָּׁה, as Prof. Hilprecht suggested to me. It is here used, like the Hebrew word in some cases, in a figurative sense, "trouble, misfortune," cf. Isa. 9 : 1; Job 15 : 22. To the same root belongs *ašakku*, "a demon of sickness and misfortune," cf. the Ašakku series of incantation texts in C. T., XVII, pls. 1-11, and their discussion by Prof. Jastrow, *Religion Babyloniens*, I, 348-351.

IV, 25. On the other boundary stones no curse is uttered in the name of Nusku; he is only referred to in Susa 2, IV, 19. As to the reason for the insertion of Nusku here, cf. Chapter II, p. 123, Com., p. 156. For Nusku hymns see IV R.² 26, No. 3; Craig, *Religious Texts*, I, pls. 35, 36. For translations and discussion see Jastrow, *l.c.*, I, 485-88.

The title *a-ri-ru* is also applied to the fire god *GIŠ.BAR*; cf. Craig, *Religious Texts*, I, 40, 13, ^d*GIŠ.BAR a-ri-ru bu-kur* ^d*A-num*; cf. also 41, 40. A similar title of Nusku is *ilu qar-du qa-mu-ú limnâti*, Craig, *Religious Texts*, I, 35, 4.

IV, 26. The sign *ban* in *ban-nu-ú-a* is No. 145 in Amiaud and Méchinau, *Tableau comparé*; *bannua* = *bânua*. The phrase *ilu bânua* or *abu bânua* is of frequent occurrence, especially in the inscriptions of Nebuchadrezzar II. (see Chapter II, p. 125).

IV, 27. In this line I assume that nothing is wanting, although the break has carried away a small part of this line.

IV, 28. The section which begins here is usually opened by

man-nu (see Nabû-shum-ishkun, Col. IV, 13; V. A. 2663, V, 18), or *man-na-ma* (C. T., X, pl. VII, 32), but as *man-nu* is always followed by *ša*, *man-nu* cannot have stood here. The section opened therefore with a simple *ša*, such as we find O. B. I., No. 1, 12; 2, 12; C. T., IX, 5, Rev. 31; V. A. 208, Rev. 45. It occurs also in contract tablets Nbk. 198 : 9; 283 : 19; 368 : 8, and on Assyrian inscriptions, Pudi-ilu, ll. 5, 6; Adad-nirari, Rev. 14; Tiglathpil., VIII, 63.

IV, 29. *ŠIM.MEŠ* stands probably for a verb. The parallel passages suggest *nakâru*, *abâtu* or *našû*, V. A. 2663, V, 28, *û-na-ka-ru ina sub-ti-šu*; Nabû-shum-ishkun, IV, 18, *ina abni ubbatu*; I R. 70, II, 24, *abnu narâ annâ û-ša-aš-ša-ma*; so also III R. 41, II, 10; III R. 43, I, 32; *ina abni i-naq-qa-ru*, V. R. 56, 35.

V, 2. With *ina* ^{isul}*lipitti* (*LIBIT*) *i-pi-hu-û* should be compared Susa 3, V, 52-54: *i-na qaq-qa-ri it-te-mi-ir*, *i-na lipitti* (*LIBIT*) *it-te-'i* (𐎶𐎵, I, 2) *i-na i-ga-ri ip-te-ḫi*, i.e., "who hides it in the dust, surrounds it by an enclosure or shuts it up in a wall." *Ina LIBIT* cannot be read, as is done by Scheil, *ina libnâti*, as there is no plural sign. Our passage shows that it is something made of wood and no bricks. We must therefore take *lipittu* (Br. 11, 193), which forms with *agurru*, "the enclosure," and *amâru*, "to enclose," a group, cf. II R. 36, 23-25, *h*. A similar expression is found D. E. P., II, 114, 16, 17, *lu a-na išâti i-na-du-[û] lu i-na i-ga-ri i-p[hi]-hu-û*.

V, 3. For the persons here mentioned see Chap. I, p. 50.

V, 7. The text reads *u zêri-šu a-ḫa-me*. In view of the fact that *aḫameš*, a synonym of *aḫame*, is always used of two persons, but never of things, while here "the foundation" and "the seed" would be joined by *aḫame*, I am inclined to see in the last three signs a scribal error. To this must be added the fact that most of the other inscriptions close with *ḫalâqu*; see V R. 56, 60, *zêra-šu li-ih-liq*; O. B. I., 149, II, 20, *zêra-šu li-[ḫal]-li-[qu]*; cf. also Susa 2, III, 25; London, 103, VI, 23; London, 101, III, 9, 12; but especially

V. A. 2663, V, 47, *zêri-šu piri-’šu ina pî nišê lihalliqû* (*H.A.A.ME*). The phrase occurs also on Assyrian monuments: Tukulti-Ninib, Rev. 29, 30; Adad-nirari, Rev. 55. All these passages make it probable that the scribe intended to write *H.A.A.ME* = *lihalliqû*.

With these curses compare the interesting passage in the history of the Arabic historian Maşûdî, *Kitâb Marûj el Dhahabi*, Paris, 1861, p. 22f.: “He who dares to change the sense of this book, to remove one of the foundations upon which it rests, to obscure the clearness of the text or to cast doubt upon a passage by alteration or removal, by extract or résumé, and finally who shall allow it to be attributed to another author, may he be the object of divine wrath and of swift punishment,” etc.

V, 8. For the reading of 𐎶 𐎶 as *li-û*, see Chap. I, p. 10.

V, 9. The title *šaq-šup-par* occurs on I R. 66, No. 2, Col. II, 10; III R. 43, I, 30; II, 30; Edge IV, 4; London, 102, IV, 48; VI, 17. By transposing the elements of the name we get *ḥšu-par-šaq*, “the commander.” This reading has long been maintained by Guyard, *Notes de lexicographie Assyrienne*, Paris, 1883, § 33, and Winckler, *Forschungen*, I, 476². It has become more probable by the observation of the possible connection between these two titles (*šaq-šup-par* and *šup-par-šaq*) and the plausible emendation of Ezra 4 : 9 and 5 : 6, reading *ספרסכניא* instead of the unintelligible *אפרסכניא*, see Hoffmann, Z. A., II, 54f., and Marti, *Gram. des Bibl. Aram.*, p. 53. This makes it probable that the usual reading of the word as *šud-šaqû* (see Delitzsch, H. W., 685a) has to be given up. For a full discussion of the word see Muss-Arnolt in A. J. S. L., 1904, p. 192; and Johns, A. D. D., II, 163.

V, 10. With the name *Ku-bu-bu* we may compare *Ku-ub-bu-bu*, on the Cassite tablets from Nippur, Clay, B. E., XV, 44 : 8; 157, 3, and the *fu*“*ulu* formations on p. 29³ of the same work; cf. also Ranke, *Personal Names*, p. 21^{6,1}.

¹ See also Tallquist, in O. L. Z., Vol. IX (1906), p. 467.

The interchange of the title *amel bâb êkalli* with *amêlu ša bâb êkalli* (V R. 56, 16) shows that *amelu* should not be taken as a determinative, but as a part of the title.

V, 11. *Ši-ta-ri-ba*, "She has increased." Compare with this name *Ši-la-ma-zi* and *Ši-lu-da-ri*, Ranke, *Personal Names*, 194; also *Ši-lu-da-ra-at* (Tallquist, N. B.), and for *ta-ri-bi* see *Ištar-ta-ri-bi*, Johns, A. D. D., No. 89; cf. III, 149. A different form is in *Mil-ḫi-ta-ri-bi* (B. E., IX), *Nabû-taribi(-SU)-uṣur*; in both cases it must be second person singular pret.; cf. Tallquist, *Namenbuch*, pp. 264, 317.

V, 12. *Taqîšu*, an abbreviated name, cf. *Ta-qîš-^dGu-la*, Clay, B. E., X, 65. For such hypocoristica see Tallquist, *Namenbuch*, p. xxx.

V, 15. *Ri-mut-^dGu-la*, usually regarded as an abbreviated name, but in view of the fact that *irîm* (pret. I of *râmu*) is always used on the boundary stones of the "granting" of land, and also the noun *ri-mut* occurs (O. B. I., 149, I, 2; V. A. 2663, V, 33; also V. A. 66, 25 = Peiser, *Acten-Stücke*, p. 20) in the sense of "grant, gift," I would suggest that *Ri-mut-Gula* means "the gift of Gula."

V, 16. *A-ḫi*, abbreviated perhaps from *A-ḫi-ba-ni* (Clay, B. E., XV, 26a), *Aḫu-iddina* (Clay, B. E., X) or a similar name.

V, 18. With *^mKaššû* the name *^mKaš-ša-a* (O. B. I., 149, I, 18) should be compared. There are but few names on the boundary stones of the second Isin (*PA.SHE*) dynasty which can clearly be recognized as Cassite, e.g., *Na-zi-^dMarduk mâr Shad-dak-me*, V R. 56, 12; *Ka-šak-ti-ia-an-zi*, III R. 43, II, 10; *Mi-li-Ḫar-be*, III R. 43, II, 14, 18; *Šar-bi-^dEnlil*, O. B. I., 149, I, 19. *NISAG.GA* is here used instead of the usual *NISAG*, cf. Br. 6710.

V, 20. If the reading *Pir-šá* is correct we may compare *Pir(-ir)-^dŠamaš*, D. E. P., II, 93, of which it is perhaps an abbreviation; cf. the remarks of Prof. Hilprecht in Ranke's *Personal Names*,

p. 19³, calling attention to the Palmyrene name אַמְרֶשֶׁא, transcribed in Greek ἀμαρὶ σαμσου; see Lidzbarski, *Handbuch.*, p. 223.

⁴*Nâgîru*, for the ideogram see Amiaud, *Tableau*, No. 127, and remarks under No. 126; also Thureau-Dangin, *Écriture*, No. 91. For a discussion of this official see Johns, A. D. D., II, 70.

V, 24. The earlier passages (III, 14) in which the name *Ardi-Ea* occurred showed that he was the grandfather of *Nabû-zêr-lîšîr*, son of *Itti-Marduk-balâtu*. Whether this *Ardi-Ea* is identical with persons of the same name mentioned on other stones (V R. 56, 19; III R. 43, II, 4; I R. 66, II, 15; O. B. I., 149, I, 15) cannot be determined.

BOUNDARY STONE OF MARDUK-AHÊ-ERBA.

O. B. I., VOL. I, PT. 2, NO. 149.

The discovery of this boundary stone was announced in the year 1894 by Prof. V. Scheil. It was then for sale in one of the bazaars of Constantinople. Scheil published a transliteration of the first column of the inscription in the *Recueil de Travaux*, Vol. XVI (1894), p. 32f. In 1896 the text itself was published by Prof. Hilprecht in his *Old Babylonian Inscriptions*, Vol. I, Part 2, No. 149. As a full transliteration and translation has not yet appeared, as far as I know, it will be appropriate to present one in this volume, as an appendix.

This boundary stone of Marduk-ahê-erba belongs evidently to the second Isin (PA.SHE) dynasty. This appears not only from the fact that there is no room for Marduk-ahê-erba at the end of the Cassite dynasty, to which its paleography might possibly permit us to place him, but on closer examination we find that the paleographical evidence points distinctly to the second Isin (PA.SHE) dynasty. Many of the signs, like *kat* (II, 1), *bi* (I, 18, 19; III, 18), *bir* (I, 22), *gu* (III, 1), *sa*, (I, 6), *šar* (I, 16), *zu* (III, 3), *ha* (I, 19), *SIS* (I, 14), *tuk* (II, 9), *šal* (I, 16), and others, occur in the same form on the boundary stones of Nebuchadrezzar I., while other signs, like *gir* (II, 23), *har* (I, 11), *tim* (III, 6), etc., appear also on III R. 41 and III R. 43. An exhaustive comparison of all the signs of this inscription with those of the other *Kudurru* inscriptions of the fourth dynasty shows that, with but few exceptions, they

can all be found in them. As to the exceptions, it is difficult to say whether they are due to the idiosyncrasy of the scribe or to his inexperience in engraving inscriptions. The signs for *il* (II, 5), *iš* (I, 15, 20; II, 19), *šar* are not found in exactly the same form in Amiaud, *Tableau comparé*. Two other signs are remarkable. One of them, *liq* (III, 11), looks much like *ba* (II, 7), but that it is meant for *liq* appears clearly from the context (see p. 199). The strangest sign is *zi* (II, 19), which has exactly the same form as *gab* (Neb. Nippur, IV, 2). It is either due to an error, or, what is more likely, the scribe represents by his upper horizontal wedge two perpendicular wedges, as in the case of *liq*, where the uppermost horizontal wedge takes the place of the two usual perpendicular wedges, forming the first part of the sign (cf. Amiaud, *l.c.*, No. 276).

The scribe shows also a peculiar tendency to make two similar signs so much alike that there is practically no difference between them. Thus *di* (I, 2, 4, 7; II, 7) is made like *ki* (I, 5, 6, 9, 10, 12, etc.); *ri* (I, 2, 10, 11, 21; II, 13, 16, etc.) like *uš* (I, 7, 8, 9); *ni* (II, 15, 22; III, 2) like *kak* (II, 8, 14) and also like *ir* (III, 5); *ib* (I, 12) like *lu* (II, 3, 4). Again, the same signs vary constantly in form; compare, *e.g.*, *bi* (I, 18, 19 and III, 8), *ri* (I, 5 and I, 6 and I, 10), *ki* (I, 5, 8 and III, 6), *du* (I, 7 and II, 11), *tu* (I, 1 and II, 6, 14), *i* (II, 14 and III, 2) and *ir* (III, 5 and III, 8).

For a general statement of the contents of this inscription see Chap. I, p. 20. For the position of Marduk-aḥê-erba in the dynasty see Chap. II, p. 133f., and for the symbols see p. 238.

In the transliteration the most common ideograms are not indicated in the notes.

COMMENTARY.

I, 2. For the noun *ri-mut*, "the grant, gift," compare also V. A. 2663, V, 33, *ri-mut* . . . *i-ri-mu*; V. A. 66, 25 (see Peiser, *Acten-Stücke*, p. 20), and Muss-Arnolt, *Dictionary*, 969a.

I, 4. The name *Kandi* may perhaps be compared with *Gan-daš(diš)*, the first king of the Cassite dynasty.

For the deity ^aKUR.GAL, equivalent to ^aAmurru, see Clay, B. E., X, p. 7f.

I, 5. The word *harri*, "canal," should also be recognized in the proper names, *Har-ri-Pi-qu-du* (B. E., IX, p. 76), *Ha-ar-ri-Ba-ši*, "the canal of the city Baš" (Susa 3, I, 24), and ^{alu}*Har-ri-Ka-ri-e* (D. E. P., VI, 42, I, 3).

I, 6. The fact that after *šarri* in every case (ll. 5, 6, 11) the determinative *ki* is written decides in favor of the reading *nāru* ^{alu}*Šá-šar-ri^{ki}*.

I, 12. I prefer to read *ti-ib*, cstr. of *tēbu*, "approach," rather than *ti-lu*, as read by Scheil, which might be connected with *tīl(l)u*, "mound of ruins."

I, 15. The sentence beginning with Nabû-ērish I take to be a relative sentence with the *ša* understood, hence the overhanging *u* vowel in the verbs *iš-pu-ru-ma* (I, 20) and *i-ri-mu* (I, 22). Another possibility would be to take Nabû-ērish and Bêl-mushallin as the subject and the other two persons as the object. Against this, however, militates the fact that the grant is distinctly said to be "a gift of the king" (*ni-di-it-ti šarri-mi*, II, 7), and then there is no apparent reason why the two scribes should have sent two men, who, to judge by their titles, held a superior office. Moreover,

scribes are repeatedly referred to as engaged in measuring fields (cf. p. 44).

I, 19. I see no reason for the reading *Har-bi-Ellil* as given by Scheil. The sign *šar* has the value *hir* (Br. 4287), but there is as yet no proof for the value *har*.

I, 20. The reading *rêš eqli* for *SAG eqli* is determined by the new stone of Marduk-apal-iddina I. (Susa 16), Col. III, 6, 7, *iš-pur-ma ri-eš eqli šú-a-tum iš-šú-ma*. This has been rendered by Scheil, "the area of that field they took," but the meaning "area" for *rêš* can hardly be established. The verb *našû* means "to take up, to lift up," and refers evidently to a portable object. Moreover, the phrase *ri-iš eqli-šu i-ka-aš-ša-ad* occurs repeatedly in Hunger's texts of *Becherwahrungen*, and as Prof. Jastrow has shown (A. J. S. L., XXIII (1907), p. 100), is there used as a synonym of *zittam akâlu*, "to acquire possession"; but the taking of the area of a field could hardly be equivalent to gaining possession. It was rather the acquisition of the "boundary stone" which gave a man the title to a property. The term *rêš*, literally "the head-(piece)," was certainly appropriate for the boundary stone.

I, 21. The name of Kudurra's father might also be read *Tu(?)-uš-šu-ru*. The scribe made no distinction between *uš* (I, 6, 7, 8, 9) and *ri* (I, 2, 6, 10, 11, 22, etc.). The first character, however, looks more like a *hi* (I, 2; II, 5, 16) than an *ud, tu* (II, 1; III, 4, 10), whose final wedges are more perpendicular.

I, 22. *Ha-bir-ai* is literally "a man of (the country) *Ha-bir*," probably Elam, for IV R.² 34, No. 2, 5, mentions a *Ha-bir-ai*, called *Har-bi-Shi-pak*, cf. Jensen, Z. D. M. G., Vol. 50 (1896), p. 246f.

II, 3. Finding a hole at the end of l. 3 the scribe wrote *te-mi* at the end of l. 2.

II, 7. For *šarri-mi* see p. 178f.

II, 12. In view of *i-qa-bu-û* (II, 8) I prefer the reading *i-gal-lu-û* to *i-gal-lu-û*. Cf. p. 179.

II, 19. The form of *zi* in *iz-zi-iš* (on which see above p. 189) may throw some light on London, 103, VI, 3, 4, ^d*Sin* ^d*Šamaš* ^d*Rammân* ^d*Marduk išid-su GAB-ḫu*. Peiser (K. B., III, 1, 162) takes *GAB* here as the ideogram of *pahû* (Br. 4486) and renders *lipḫu(-ḫu)* "may they loosen(?) his foundation," but as *GAB* has the same form as *zi* in *iz-zi-iš* (which is undoubtedly *zi*), and as *ZI-ḫu* is the ideogram of *nasâḫu*, used in connection with *išid-su* (cf. Neb. Nippur, V, 7; IV, 19 and I R. 70, III, 12; III R. 43, III, 27) I propose reading *išid-su lissuhû* in London, 103, VI, 4.

II, 20. For the restoration of *zêri-šu li-[ḫal]-li-[qu]* cf. *zêri-šu li-iḫ-liq*, V R. 56, 60; *li-ḫal-li-qu zêri-šu*, V R. 56, 40; cf. also Neb. Nippur, V, 7; I R. 70, III, 12; III R. 43, III, 28.

II, 21. *Marduk bēl lip-te-ti*. This title does not appear elsewhere. But the phrase *li-bit ga-ti-ia* occurs repeatedly in the inscriptions of Nebuchadrezzar II. (cf. Langdon, *Building Inscriptions*, Nebuch., 2, III, 31; 3, II, 18; 5, II, 17; 7, II, 24; 10, I, 16, etc.) and *lip-ta-at qâtâ-ia* (Sargon, *Bullinscr.*, 101), cf. especially *li-pi-it ga-tim* ^d*Marduk*, "the work of the hand of Marduk," in an omen text published by Prof. Clay, B. E., XIV, 4. 1. The dams and dykes, guarding fields and preserving cultivation, are therefore placed under the protection of Marduk, as is implied in this title. For this side of Marduk's character compare his titles *šâriq mērišti mukîn isrâti* (from *esêru*, to enclose), *bânû šeam u qê mušêši urqûti*, "giver of vegetation, establisher of enclosures, creator of grain and herbs, producer of (green) grass" (King, *Seven Tablets of Creation*, Vol. I, pp. 92, 93), and Hehn, *Hymnen und Gebete an Marduk* (B. A., V, pp. 282, 319), *muš-te-šir nârâte ina ki-rib ša-di-i mu-pat-tu-û bu-ur kup-pi ina ki-rib ḫur-sa-ni*, "the director of rivers in the mountains, the opener of the depth of the spring(s) in the hills."

With the restoration *[na-ra-a-t]e-šû lis-kir-ma* compare the following passages from other boundary stones: III R. 45, No. 2, 8, *nâri-šu a-na la sa-ka-ri*, "not to close his canal"; Susa 16, V, 5-8,

lu-ú ša-ki-i-ik-ki dal[-ti] u a-šar mi-il-ti nâri-šu i-si-ik-ki-ru-ma šî-ki-iz-zu ub-ba-lu, "whoever closes up with mud the sluice, the place by which his canal is filled, and diverts its irrigation"; Susa 3, II, 28-33, *la e-pi-ši du-ul-li bâb nâr šarri lu-ú ša si-ki-e-ri lu-ú ša pi-te(!)-e ħi-ru-tu nâr šarri la ħi-ri-e*, "they are not to do the work at the sluice of the royal canal, neither that of closing, nor that of opening it, nor to dig the bed of the royal canal." Cf. also *Code of Ham.* (Harper), XLIII : 7-9, *nârâte-šu i-na na-ak-bi-im li-is-ki-ir*, "May he (Ea) dam up his rivers at the sources."

II, 23. With *i-gir-ra-šu [(i-la)m-man* compare the curse of Ea, *šîmti-šu li-lam-man*, London, 101, III, 11; and of Shamash and Rammân, *mu-lam-me-nu i-gir-ri-šu šû-nu-ma*, Neb. Nippur, IV, 16, 17.

III, 4. *ûm [ba]l-tu*. The last part of *bal* is clearly visible. The form of *tu*, not given by Amiaud et Méchainau, *Tableau comparé*, No. 275, is found Susa 3, VI, 52; VII, 23-25, in the identical phrase, *a-di ûm(-um) bal-tu šar-ka u da-ma ki-ma me-e li-ir-mu-uk*.

III, 6. With the title of Sin *în(-in) šamê(-e) u iršitim(-tim)* compare the personal name *^dSin-i-na-ma-tim*, Tallquist *Namenbuch*, p. 274; and *^dŠamaš-în(ŠI)-âli-šu*, l.c., p. 281.

III, 8. In view of the fact that the other parallel passages (cf. p. 64f.) and Susa 16, VI, 17, *i-na ka-mat âli-šu li-šar-bi-šu-šû-ma*, contain the positive statement that the criminal shall lie outside of the wall of his city, *i-na ka-mat âli-šû ai ir-bi-is* must mean "in the enclosure of," i. e., "within his city may he not lie."

III, 10. Compare with the phrase *ki-i ištên ûmi(-mi) la balât (TI)-su liq-bu-ú*, London, 101, IV, 7, *ûma(-ma) iš-tin la balât (TI)-su liq-bu-ú*; London 102, V, 7, *ûmê-šu la ba-laṭ-su iq-[bu-ú]*, and Susa 16, VI, 23, 24, *[mu]-šim balâti la ba-la-az-zu [liq-b]u-ú*.

III, 11. That the first sign of *liq-bu-ú* is really *liq* cannot be doubtful from the parallel passages quoted above and the context.

* Compare with this name the opening stanza of a hymn addressed to Marduk (Craig, *Religious Texts*, pl. 29): *a-dal-lal zi-kir-ka dMarduk*.

† Not *Nusku-na'id* as Scheil translates, because *ŠEŠ.KAK* is not preceded by the determinative *ilu*. For the correct reading see Tallquist, N. B., p. 4.

† Formerly read *Kur-kà-me*, but the second sign is not *KĀ*, from which it differs by the last two wedges. In the Cassite texts the name *Šad(Kur)-dak-me* occurs; see B. E., Vol. XV, 37, 8; 85 : 3; 90 : 20. That makes it probable that the doubtful sign is an older form of *dak*.

* To this translation Prof. Hilprecht remarks: "It is doubtful to me whether the use of the ideogram in the passage quoted from B. E., XV, is sufficient to prove the writing with 'b,' *ašābu*, 'to dwell.' In view of *Šum-ili-a-šip-ū-uš* it is not impossible that the scribe mixed the ideograms for *ašābu* and *ašāpu* (the latter also pronounced *ašābu* in Babylonian), so that the old translation, 'Good is the exorcism (*ašābu*=*ašāpu*) of Marduk,' would stand after all."

* This identification is established by a comparison of Susa No. 3 (fig. 11) with Susa No. 20 (fig. 30). The arrangement of the symbols on these two stones is almost identical. The first four symbols of fig. 30 (Anu, Ellil, Ea and Nin-harsag) correspond to the first section of fig. 11, the next three symbols of fig. 30 (Marduk, Nabû, Gula) correspond to the third section of fig. 11, repeating even the curious bust of Gula on a shrine (fig. 11¹⁵ and 30⁷) which is found only here. The next six symbols of fig. 30 (winged dragon, Nergal, bird looking backwards, Zamama, winged lion, followed by the mace with the lion head) correspond exactly to section 2 of fig. 11, where we find instead of the last two symbols the winged lion with the twin-headed mace standing on its back. This shows that the winged lion, followed by the lion-headed mace, exchanges with the winged lion having the twin lion heads on its back. The last three symbols of Susa No. 20 are separated from the rest and are found on fig. 16, first view. They are the lamp, the scorpion and the walking bird, which correspond to Nos. 18, 20, 24 on Susa No. 3 (fig. 11). This remarkable similarity of Susa No. 3 (a stone of Meli-Shipak) and Susa No. 20 (an uninscribed boundary stone) cannot be accidental. The latter (Susa No. 20) belongs undoubtedly to the reign of the same king and was made perhaps by the same sculptor. It may also explain why this stone (Susa No. 20) is not inscribed. Perhaps before the inscription could be engraved the invasion of Sutrak-naḫunte took place, by which most likely all the boundary stones found by the French at Susa were carried away, for it should be noted that the inscription which this Elamite king put on another monument (see fig. No. 5) states distinctly: "the land of Qarin. . . . I took and the stele of Me-li-[Shi-pak] I found," see Scheil, D. E. P., IV, p. 146, B. 6, 7.

* Prof. W. Max Müller kindly informs me that the part of the Egyptian picture which corresponds to the Babylonian really represents the plaits of hair (*hnskt*) of the goddess *Hat-hor*, which, according to him, play an important part in Egyptian mythology.

ADDITIONS AND CORRECTIONS.

- p. xxii, No. XXIX. "Perhaps Nippur."—There seems to be some difference of opinion as to the place where this stone was discovered. While the author of the official catalogue of the Royal Museums (*Verzeichnis der Vorderasiatischen Altertümer und Gipsabgüsse*, Berlin, 1889, p. 66, No. 213) assigns this boundary stone thus: "*Aus Nippur (heute Niffer) in Südbabylonien*," and while nothing is known of any authorized change in this designation, yet according to information received from one of the officials of the Museums more recently (June, 1905), the statement in the Catalogue rests solely upon what the dealer, who sold the stone to the Berlin authorities in 1885, said. Moreover, according to the records of the Museums, the stone was not excavated by the dealer, but purchased by him. In view of this, and in the absence of any internal evidence, it seems that an attitude of reserve is advisable.
- p. 5, l. 2, and p. 10, ll. 15f. For *duppu* read *tuppu*; see Glossary, s. v.
- p. 11, l. 2. The "sealing" of the boundary stones is evidently a stereotyped phrase, derived from the period when clay tablets were still in use. Only in one case we may possibly have an instance of an autograph signature. The name of King Meli-Shipak is scratched under the inscription on Susa, No. 2.
- p. 27, l. 2 from below. Instead of "sojourners," see Glossary under *qattinu*.
- p. 58, l. 2 from below. For *lilamman* read *lilammin*. "Br. 9946, MIN has the same phonetic value also in Assyrian, which is required grammatically in the above passage. Cf. also Delitzsch, A. G.², p. 40" (Prof. Hilprecht). The same correction also on p. 66, l. 16; p. 192, II, 23; p. 199, ll. 10, 11.
- p. 69, ll. 3, 4. Instead of *ekimmu* read *eṭemmu*. For *e-di-im-mi*, *e-te-im-mi-im* and *e-GIM-mu* = *eṭemmu*, see Ungnad, V. S., Vol. I, p. VIIIb, and Zimmern in Pinckert, *Hymnen und Gebete an Nebo*, p. 14. The writing of *du-up-pu* and *tu-up-pu* (Muss-Arnolt, Dict., p. 263a) = *tuppu* is a perfect parallel.
- p. 78, note 10. For "fig. 12¹⁴, p. 29," read "fig. 12¹⁴, p. 30."
- p. 92, l. 20. For "London 106" read "London 105," also p. 137, last line.
- p. 92, l. 22. For "London 105" read "London 106."
- p. 97, fig. 31. Alongside of the figures found on the Babylonian boundary stones may be placed the figures on an unbaked cylinder which was recently found by Mr. MacAlister at Gezer, in debris belonging to the El Amarna period, and published by him in the October number of the "Quarterly Statement of the Palestine Exploration Fund," p. 262. It shows two bands of figures in relief, made by the rolling of a seal cylinder over the clay. The complete design appears twice in each band. It represents certain constellations, some of which certainly belong to the zodiac, but (as on the Babylonian boundary stones) they are not arranged in regular order. Beginning at the left hand corner of the lower band we find, after a partial picture of the sun, what

looks like a tree, but is probably intended for an ear of grain and thus represents *spica*, the most prominent star in the *virgo*. Below it is the *scorpion*; alongside of it an upturned vessel, most likely the *amphora*, a name for the *aquarius*. Then follows a ladder with an upturned vase on top. The next figure is a horned animal, perhaps the *aries*. Immediately above it is a small animal which cannot be identified. Alongside is a bird with a little triangle. It reminds us of the walking bird on the Babylonian boundary stones. Over the three last figures is a curiously ribbed animal, perhaps intended for *leo* or *taurus*. This is followed by an animal which looks like an antelope. It is perhaps meant for the *capricorn*. Beneath it is a figure, resembling an inverted T, which may stand for the *libra*. Above the antelope is an indistinct, clumsy figure, which the artist intended perhaps for the *cancer*. Between antelope and lion is another T-shaped figure. Next comes a serpent, perhaps the *hydra*. Near its tail is a star, most likely *Venus*. Alongside of it is the crescent and the sun, beneath which are

FIG. 52.—The zodiac tablet from Gezer.

the clear figures of a fish and a scorpion. In all there are eighteen figures, of which the little triangle under the bird and the upper T-shaped figure are perhaps only inserted to fill out space. Of the remaining figures we can clearly recognize the sun, moon, Venus star, fish, scorpion, amphora and ear of grain, while the ram, capricorn, lion, balance and cancer are less clearly represented. Finally the ladder with inverted vase, the small animal between ram and lion and the bird with the triangle under it are still unclear. But they may stand in some relation to the *sagittarius*, *taurus* and *gemini*, which are not otherwise represented.

- p. 105, last line. Franz X. Kugler in his excellent work, *Sternkunde und Sternendienst in Babel*, I. Buch, Münster, 1907, shows, pp. 261–263, that in the late (Arsacide) period the star of Gula corresponded to our waterman. This can hardly be applied to the picture of the goddess Gula on the boundary

- stones, which is always associated with the dog. Now the "great dog," called *UR.GU.LA* (evidently also a play on the name of the goddess), is identical with *leo*, the zodiacal sign of the month *Abu*; hence the goddess Gula on the boundary stones is either an explanatory addition to the symbol of the "lion" or stands for the next zodiacal sign, the "virgin." In the lists given by Kugler on p. 229 the zodiacal sign for the month *Ulûlu* is either called *AB.SIM*(*šer'u*) or *ŠU.PA*(*namru*), which is identical with *spica* or a *virginis* (Kugler, p. 251). Thus far, however, the picture of an ear of grain has not appeared on the boundary stones. It is, therefore, possible that the picture of Gula represents the "virgin." That the Babylonians associated a goddess with the month *Ulûlu* is evident from the list of months with their patron deities, where we read: *arḫuUlûlu Iš-tar be-lit*. . .
- p. 106, l. 13. For NIN.IB read Nergal.
- p. 106, l. 14. For Nergal read NIN.IB. The investigations of Kugler (*Sternkunde und Sterndienst in Babel*, pp. 215–225) have shown that the names of the Babylonian planets and the gods associated with them were *not* exchanged, as has been argued by Hommel and Winckler.
- p. 202, Col. II, 1. Instead of *A-šab-šu*, Prof. Hilprecht prefers the reading *A-šap-šu* in view of *Bit-Sum-ili-a-šip-ù-uš*.
- p. 209, Col. II, 17. Instead of *Nabû-[-ēriš](-iš)*, Prof. Hilprecht suggests *Nabû-[ga]-mil* as the preceding name. The form *Nabû-[-ēriš](-iš)* had been chosen in view of *Ilu-ēriš*(*PIN-iš*), *Rammân-ēriš*(*PIN-iš*), *Sin-ēriš*(*PIN-iš*), *Šamaš-ēriš*(*PIN-iš*), etc., found in Clay, B. E., Vols. XIV, XV.
- p. 213, Col. II. Instead of *Šir-ap-pi-li*, Prof. Hilprecht suggests the reading *Šir-ap-pi-LI*(*SUB*) as a possibility. *LI* is ideogram for *ellu*, therefore probably also for *alātu*, "to be shining"; hence "O Šir, make my face shining," i.e., "joyful."
- p. 217, Col. I, 1. For *āluDi-in-du-bitu* = *āluDintu-bitu* = *āluDimtu-bitu* Prof. Hilprecht remarks: "For *dintu* = *dimtu* cf. (1) *āluDi-in-tu ša mSu-la-at*, Sennach., IV, 56; (2) Hommel, *Geographie*, p. 350⁵; (3) *nakamtu*, *nakantu*, *nakandu*, cf. the list on p. 215: *Bit-a-qar-nak-kan-di*."
- p. 248, l. 6 from below. For *drānu* read *idranu*.
- p. 264, Col. II, 19. For *GÚ.EN.NA* see also Clay, B. E., XIV, 39 : 1; 136 : 1.

- p. 295, Col. II, l. 22. For *māshku**pa-gu-mu* read *mashku**pa-gu-mu*.
- p. 299, Col. II, after *pašāru* insert:
pitû(*bitu* ?), in the phrase *p(b)ūt i-mit-ti šarri*, V R. 55, 26, 36, perhaps with Muss-Arnolt, Dict., p. 853a, to be rendered: "In front of the right hand of the king."
- p. 309, Col. I, l. 13. In support of the identity of *šadû*, mountain, and *šadû*, east, which I owe to Prof. Hilprecht, he remarks: "(1) Cf. Hebr. שָׂדֵה, (a) sea, (b) west. (2) In 1900, while at Nippur, I convinced myself by repeated observation that on clear days the eastern mountains beyond the Tigris are easily visible in Babylonia at the latitude and longitude of Nippur."

- p. 312, Col. 1, l. 3 from below. Prof. Hilprecht explains *a-na šú-li-i* differently. "In view of the fact that *elû* in the contract literature is also used of the 'emporschiessen, aufgehen, wachsen,' of plants (*ina qaqqari*) and of fruit on trees (*ina gišimmarê*), I propose to translate *šûlû*, standing here in connection with *zêru*, as Inf. III, 1 of *elû*: "May they destroy his name and may (= so that) his seed not have (find) a resting place where one lets it grow up."
