Numerical and Author Indexes

Introduction

The New York State Museum Bulletins have been indexed only sporadically.

Mary Ellis published an index to all publications of the New York State Natural

History Survey and New York State Museum from 1837 to 1902 in Bulletin # 66. In

1940 a "List of the Official Publications of the New York State Museum" by Clinton

Kilfoyle was published in Bulletin # 322, pp. 97-129. In addition, special listings

of the Bulletins and other publications of the Museum and Science Service have been issued.

In December, 1973, we inquired about a complete index to the <u>New York State</u>

<u>Museum Bulletins</u>. Donald F. Roberts, Museum Librarian, replied that none was available, and the museum had no plans to index the Bulletins. Therefore we decided to meet the need by preparing these indexes.

At present we have completed the numerical and author indexes. Plans for a subject index are underway. We hope that the research presented in the New York State Museum Bulletins will now be more accessible.

We have included parts of Bulletins (articles) where they are specifically attributed to an author. Therefore, in the author index under each name there are listed alphabetically, first, those Bulletins by the author, and second, his articles in other Bulletins.
