## INTRODUCTION

This bibliography consists of documents issued by Nassau and Suffolk Counties and the towns and villages within them. Also included are the publications of the Long Island Regional Planning Board (formerly the Nassau-Suffolk Regional Planning Board), as well as selected publications written by individuals and corporations for the use of Long Island governments.

This bibliography is not comprehensive. It consists primarily of publications held by the SUNY Stony Brook libraries. Also included are selected holdings of the Long Island Regional Planning Board and the Suffolk Cooperative Library System (Bellport). Materials from the other libraries are included only if they are not held by SUNY Stony Brook and if they are considered potentially useful to the users of the Stony Brook libraries. Holdings symbols are as follows:

LIRPB Long Island Regional Planning Board  
 NBels Suffolk Cooperative Library System (Bellport)  
 NSbSU State University of New York at Stony Brook

This work lists serials and monographs separately. Holdings are indicated for serials. No holdings symbols are given for monographs held by SUNY Stony Brook. Arrangement within these two categories is alphabetical by main entry as it appears in the SUNY Stony Brook card catalogs. Following the list of documents there are the following indexes: an index by first lines of titles, a corporate name index (which excludes references to corporate names when used as main entries), and a key word index.

Users should note that this bibliography excludes approximately two hundred titles (not all of of recent date) not yet cataloged by Stony Brook. Inquiries about these titles should be directed to the Documents Section of the Main Library at SUNY Stony Brook. The editors hope that these titles, together with additional materials held by other libraries, will be included in a future edition of this bibliography

The editors wish to thank Mary McCallum and Carolyn Woods, formerly members of the Reference Department at SUNY Stony Brook, for their participation in the earliest phase of this project. We would also like to give our special thanks to William Hollander, Programmer-Analyst in the Administrative Systems Office at Stony Brook, whose programming assistance and patient advice greatly facilitated the completion of this bibliography.
